Congressional Record

PROCEEDINGS AND DEBATES OF THE 98th CONGRESS, SECOND SESSION

SENATE—*Wednesday, February 23, 1983*

The Senate met at 11 a.m. and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Almighty God, Lord of truth and righteousness and justice, as bills are drafted and committees respond, grant grace and wisdom to Thy servants in the Senate. May the unity of the Nation dominate their thinking. Deliver from parochialism and partisanship which is divisive. May we take seriously the warning in George Washington's Farewell Address, "against the baneful effects of the spirit of party * * * the common and continual mischiefs of the spirit of the party * * *" its tendency to "distract public councils, enfeeble the public administration, agitate the community with ill found jealousies and false alarms, which kindle the animosity of one party toward another * * *."

Grant, O God, that present crises will not suffer neglect because of preoccupation with the future election. Free the Senators from every spirit that would divide and demean and destroy. May this body lead the Nation in a demonstration of unity, national purpose, justice, and love. We pray this in the name of the One who loved unconditionally, inclusively and sacrificially. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

ELLIS "BUD" MEREDITH HONORED BY APPAREL INDUSTRY

Mr. BAKER. Mr. President, recently, a good friend of mine and I am certain a good friend of many in this Chamber, was honored by his chosen profession, and I would like to take just a moment this morning to congratulate him.

For more than 20 years, Ellis "Bud" Meredith has represented the apparel industry in Washington. Those of us who are fortunate to have garment manufacturers in our States and to have worked with Bud Meredith can attest to how well he represents his industry.

So it came as no surprise to us to learn that the publication "Association Trends," which serves not only the apparel industry but a wide variety of industries and interests, named Bud Meredith its "1982 Association Executive of the Year."

Mr. President, this is a well deserved recognition. In 1961, Bud came to Washington to represent the relatively small Southern Garment Manufacturers Association, but has since been instrumental in expanding that organization into the American Apparel Manufacturers Association. Bud is now president of the association which represents the manufacturers of more than 70 percent of all garments made in this country.

I am most pleased for Bud and his family, and send to them my best wishes and congratulations for such a distinguished recognition.

THE PATUXENT WILDLIFE RESEARCH CENTER

Mr. BAKER. Mr. President, imagine this: Thousands and thousands of undomesticated and protected wilderness embraced by trails and trees and ponds and lakes, dedicated to understanding, researching and saving some of our country's most important species.

One might guess that such a place was a land of the past, or merely a dream for the future. Or one might think that such a place could only exist in the Western part of these United States. One would probably be shocked to learn that not only does such a place exist, but that it lies nearby, outside of Laurel, Md.

I am speaking of course about the Patuxent Wildlife Research Center, and I was most fortunate to have visited there this past Monday. One of the benefits to having a reputation as an avid photographer is that from time to time you are the recipient of gracious invitations to unusual and spectacular places. Such was my invitation to visit Patuxent, because, Patuxent is spectacular.

I had originally thought that I would travel to the center, take my pictures of some eagles and whatever, and then go home. But as I learned more about the center from my hosts, Dr. Russell Hall, the acting director of the center, Dr. James Clayton, a lab investigator, and Dr. James Fleming, a wildlife biologist at the center, I realized that I was in a truly unique environment, and that I would go home with more than pictures.

As I learned about the efforts of the center, I began to realize the importance that such a program can have. The whopping cranes that reside there are being protected to the point where the research program is now having a substantial impact on that crane population in the United States. The Andean condors, are being studied with the hopes that they will be instrumental in saving this country's largest bird in danger of extinction, the California condor. And the eagles. Our national symbol. They were in life, a hundred times more breathtaking than on television or in a book, and despite that fact that they did not always cooperate with my picture taking, I was able to witness a program which is providing States who no longer have eagles, with eagles of their own. This program is most successful, and there is an increasing demand from States all across the country for the eagles.

Mr. President, I believe it is not an exaggeration to state that the future of our wildlife programs in this country, depend, to a large degree, on programs like the Patuxent Research Center, I am sure that Secretary of the Interior Watt is most proud of this facility, and despite the fact that funds for such programs are in high demand, I cannot picture a better use for them.

I wish to commend and thank once again, Drs. Hall, Carpenter, and Flem-

ing for their time, guidance and hospitality. We are indeed fortunate to have their knowledge being put to work, and they are indeed fortunate to be able to work at such an important center.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that I may be recognized for the purpose of making a statement, and, perhaps, propounding a unanimous-consent request without prejudice to the rights of any Senator under the rules of the Senate.

The PRESIDING OFFICER (Mr. PRESSLER). Is there objection to the request of the Senator from Tennessee?

Mr. BYRD. Mr. President, reserving the right to object, and I shall not object, I think this is a good suggestion.

The majority leader, when he uses the words "without prejudice," means without prejudice to the right of any Senator to object to the dispensing with the reading of the Journal, and so forth?

Mr. BAKER. Yes, I do.

Mr. BYRD. I do not object.

Mr. BAKER. I thank the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS CONSENT REQUEST—SHIPPING ACT OF 1983

Mr. BAKER. Mr. President, having adjourned on last evening, under the rules and precedents of the Senate after the prayer the Journal would be read.

The proceedings of the Senate then are prescribed in rather exact detail to follow on for a period of time for 2 hours of business of the Senate and perhaps longer in the ordinary course of affairs.

In a moment, I intend to propound a unanimous-consent request that I believe may be agreeable to all parties. I hope so. In the event that unanimous-consent agreement is entered into, it would be my intention to ask unanimous consent that the Journal of proceedings of the Senate be approved to date and ask then that there be a period for the transaction of routine morning business.

After that, it will be my intention to ask the Senate to turn to the consideration of the shipping bill once again if the unanimous-consent agreement is entered into.

If that agreement is entered into, I anticipate that the shipping bill then would be laid before the Senate as the pending business and the regular proceedings of the Senate prescribed by the rules following on after an adjournment of the Senate would be dispensed with, having agreed to the presentation of the bill for debate and consideration.

Mr. President, as we all know, there has been a considerable controversy about the shipping bill, and I suppose there will continue to be. Indeed, I have had extended conversations with the distinguished Senator from Ohio, with the distinguished Senator from Alaska, with the distinguished President pro tempore, and with others on this subject, and I wish I could report that all the problems have been worked out, but they have not. But I think we may have worked out a procedure that will accomplish the purposes of the Senate, whatever they may be.

So let me put this request, Mr. President:

I ask unanimous consent that after the approval of the Journal and the recognition of the two leaders under the standing order there be a period for the transaction of routine morning business of not to exceed 30 minutes in length in which Senators may speak for not more than 3 minutes each.

I ask unanimous consent that at the end of that period the Senate proceed to the consideration of S. 47, the Shipping Act, which is Calendar Order No. 13.

I further ask unanimous consent that no motion or cloture on that measure will be in order before 4 p.m. on Thursday, tomorrow.

I say parenthetically if this is agreed to it would be my intention to file a motion at that time.

Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 12 noon tomorrow.

I further ask unanimous consent that when the Senate completes its business on Thursday it stand in recess until the hour of 12 noon on Monday next.

Mr. President, I ask unanimous consent that at the conclusion of the business of the Senate on Monday the Senate stand in recess until 11:30 a.m. on Tuesday next.

Mr. President, I ask unanimous consent that at 4 p.m. on Tuesday, waiving the mandatory quorum provisions of rule XXII, a vote occur pursuant to the cloture motion previously filed on the bill. That is the end of my request.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. METZENBAUM. Mr. President, reserving the right to object, and I shall not object, I wish to address myself for a moment as to the parliamentary posture at the present point.

There is no secret about the fact that on a motion to proceed I or any other Senator would be in a position to debate the issue or to insist upon the Journal being read after a quorum of the Senate has been assembled and determined and that other procedures of a parliamentary nature would be available to me or to any other Member of the Senate for the purpose of dragging out the debate and at one point I had given serious thought to following that procedure.

But I have concluded that we should get into the merits of this measure at an early point, that there are Members on both sides of the aisle who have serious concerns about the matter, and that those serious concerns can actually only be addressed when we are on the bill itself and not on the motion to proceed.

I know Senator STROM THURMOND, the distinguished chairman of the Judiciary Committee, and the Judiciary Committee have a large number of amendments, something like 19 or 20 amendments, that can only be addressed when the issue is before the Senate.

I am aware of the fact that the distinguished Senator from Utah (Mr. HATCH) has some very major concerns about the legislation in its entirety, and is prepared to debate the issue on its merits. I know there are other Senators who have indicated their reservations and concerns.

It is this Senator's view that merely seeking to drag out the time and to keep the Senate from getting to the measure itself would not serve a useful purpose. Therefore, I have indicated to the majority leader that the procedure he has outlined under a unanimous-consent agreement, with a cloture motion to be filed on tomorrow and a vote in connection with that cloture motion to be on Tuesday, is probably satisfactory to this Senator and, therefore, I do not intend to object.

But lest there be any misunderstanding of my position, my opposition to this measure is no less strong nor do I intend to by this action in any way indicate any less opposition to the measure itself.

Mr. BYRD. Mr. President, reserving the right to object——

Mr. BAKER. Mr. President, reserving the right to object to my own request, I am advised on this side that there are one or two other bases for me to touch on timing and, perhaps, on a matter of substance, so on behalf of another Senator, I am going to postpone consideration of this request and will suggest the absence of a quorum.

Mr. BYRD. Will the Senator withhold?

Mr. BAKER. I withhold the request.

Mr. BYRD. In postponing the action on the request, the Senator is also protecting the rights of all individuals under the rules.

Mr. BAKER. Yes, Mr. President. I believe that was included in the previous request, and I reiterate that as my intention.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that I may proceed briefly at this point.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, in a moment, I am going to withdraw my unanimous-consent request which is pending and put another one which will provide for the termination of the morning hour, and I will renew my motion to proceed to the consideration of S. 47, which will be debatable in the formulation that I put.

Mr. President, first I withdraw my request now pending.

The PRESIDING OFFICER. The Senator has that right.

JOURNAL—LEADERSHIP TIME—ROUTINE MORNING BUSINESS

Mr. BAKER. Now, Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

I further ask unanimous consent that the morning hour now be considered as having expired.

I ask unanimous consent that the time allocated to the two leaders under the standing order be inserted at this point.

I further ask unanimous consent, Mr. President, that there be a brief period for the transaction of routine morning business of not greater than 10 minutes in length in which Senators may speak for not more than 3 minutes each.

The PRESIDING OFFICER. Without objection——

Mr. BYRD. Will the Chair not be too hasty?

Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I see the distinguished Senator from Wisconsin in the Chamber, and I believe he has business to transact this morning.

Other Senators may wish to speak. I hope that the period for the transaction of routine morning business will be very brief, so that we can get on with a motion to proceed to the consideration of S. 47, which I intend to make as soon as that time has expired.

Mr. President, I have no further need for my time under the standing order, and I am prepared to yield it back or yield it to the minority leader.

Mr. BYRD. I thank the majority leader.

Mr. President, I yield back my time.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, for reasons that have been brought to my attention and involve a number of Senators in a commitment off the floor of the Senate, it is my intention, after the expiration of the time for the transaction of morning business, to ask the Senate to recess until 1:15 p.m. today.

ROUTINE MORNING BUSINESS

Mr. PROXMIRE. Mr. President, are we in morning business?

The PRESIDING OFFICER. The Senator is correct.

GENOCIDE CONVENTION: THE WEST WAS UNPREPARED FOR HITLER'S RISE TO POWER

Mr. PROXMIRE. Mr. President, 50 years ago this month, Adolf Hitler became Chancellor of the Third Reich, ushering in a violent reign of totalitarian terror.

Photographs of open graves stuffed with emaciated corpses and haunting tales of brutal torture remind the world of Hitler's grim legacy. Yet, we tend to overlook the fact that, in 1933, few in the Western world realized the significance of Hitler's accession to power. Thousands of Germans marched down the Wilhelmstrasse to greet Hitler, the man who would transform Germany into a savage dictatorship and home of mass extermination, while people in the Western democracies were tending to their own domestic problems, too busy to take notice of the events in Germany.

In a recent New York Times article, Gordon A. Craig points out that, while not excusable, this lack of attention to events in Germany was somewhat understandable. The Western democracies were in the midst of one of the worst depressions in modern history, and the urgency of their domestic economic problems left little time or energy for interest in foreign affairs. Great Britain had 3 million workers unemployed in 1933, and the Government was being criticized for its inability to formulate an economic recovery plan. In France, Leon Blum's Socialists, and the Radicals led by Eduoard Herriot, were at odds about how to deal with the Depression, and national attention in the United States was focused upon what the newly elected President might do to relieve the economic malaise.

Although there were some perceptive observers, the popular view in the British and French press in 1933 was that Hitler and his party should not be taken seriously.

The U.S. Embassy in Berlin had little understanding of the ideology and objectives of the Nazi Party, and the U.S. Government was no better prepared than the British and French to appreciate the maning of Hitler's ascension to power. One cannot help but wonder if the ensuing tragedies could have been prevented if the Western democracies had understood the significance of the events in 1933, or if they had been prepared with a mechanism for punishment of perpetrators of genocide, like Hitler.

My purpose today is not to point an accusing finger at any country for their lack of preparedness in 1933, nor is it my intention to tell tales of past atrocities, for this has already been done by others at great length. I would, however, like to ask the following question: Is the United States any more prepared in 1983 than we were in 1933 to react to the threat of genocide? I am afraid that the answer is no, because the United States still has no effective and legitimate means to punish genocide offenders. The Genocide Convention, a treaty which outlaws the extermination or intent to exterminate any racial, ethnic, national, or religious group, has still not been ratified by the Senate.

Given our abhorrence at the events in Nazi Germany, it seems inconceivable that this country would fail to ratify a treaty making genocide a crime under international law. Yet, we stand alone among the developed nations in our refusal to become a party to this treaty.

I urge my colleagues to ratify the Genocide Convention immediately and participate in the international effort to condemn and punish those who commit the heinous crime of genocide.

WHY NOT STOP NEW RUSSIAN ICBM BY AGREEING NOT TO BUILD MX IF THEY DO NOT BUILD THEIR NEW ICBM?

Mr. PROXMIRE. Mr. President, Jeremy Stone, executive director of the Federation of American Scientists, has made a very timely proposal to begin a dramatic halt to the nuclear arms race. Stone proposes that we call on the Soviet Union to stop flight testing and end their plans to produce their new intercontinental ballistic missile. In return, we would agree not to proceed with our MX—or any other new intercontinental missile—pending negotiations on reductions.

Stone points out that the SALT II treaty, which both Russia and the United States have agreed to observe as long as the other side does not violate it, permits both sides to build one new light ICBM. Both the new Soviet ICBM and our MX fit within this SALT II definition. By agreeing not to go ahead with the MX if the U.S.S.R. does not proceed with its new ICBM, we save the immense cost of the MX and lose nothing in our nuclear competitive position with the U.S.S.R.

Mr. President, I ask unanimous consent that the Stone proposal as carried in the New York Times on February 14 be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BARTER THE MX

(By Jeremy J. Stone)

WASHINGTON.—The future of arms control for strategic weapons in this decade may be decided in the next few weeks. The Commission on Strategic Forces, under the chairmanship of Gen. Brent Scowcroft, is now due to report to President Reagan in mid-March with recommendations for basing the new MX missile—or some alternative plan for dealing with the perennial issue of the vulnerability of land-based missiles.

Most commission members probably assume that their only possible choice is to devise a variation on the 33 previous plans for basing the MX. But there is another possibility: It involves arms control.

The commission could recommend that production of the MX—or any other new intercontinental ballistic missile—be deferred pending negotiations on reductions. Thus, America could hold back the MX punch and use the threat of deployment of the MX to persuade the Soviet Union to join with us in agreeing to substantial reductions in strategic weapons. Similarly, the Soviet Union could suspend flight-testing of its own new ICBM as an expression of good faith and as an incentive to serious talks.

If, thus encouraged, both sides agreed on reductions of strategic arms—which each has already proposed—it would be less likely that either side would fund new ICBM's. America, as part of the reduction agreement, would have obtained sizeable cutbacks in Soviet ICBM's. Thus, the MX would have been traded off as part of a package not only for the new Soviet ICBM but also for the reductions in SS-18's, SS-19's, and SS-17's that the Administration craves. If, on the other hand, agreement could not be reached, the two sides would have suffered only a delay in deployment of a single new type of ICBM—a delay that would have no significant security implications for either side.

Most important of all, if the two ICBM punches are not held back, deployment of both missiles will enormously complicate subsequent efforts to establish limits on strategic weapons. This is particularly true if the new Soviet ICBM turns out to be mobile or if our basing method does not fit within the SALT II limits that we are currently observing.

Herein lies an arms control option that the commission could put before the President. Why not ask the Russians if they would observe a bilateral (and easily verifiable) pause in the flight-testing of the one new ICBM that the SALT II treaty permits each side? This pause would give each side time to negotiate seriously on a far-reaching reduction plan. If the flight tests are not halted, it will soon be much more difficult to verify any halt in the production of these missiles.

Indeed, during the SALT negotiations, both sides proposed that there be no new ICBM's under SALT II; unfortunately, they advanced their proposals at different times and so failed to reach agreement. Now, more than ever, they should go back to proposing no new ICBM's since they are both currently proposing reductions in ICBM's, which make new ICBM's pointless. (For that matter, both sides should be banning new types of sea-based missiles.)

As things stand, unless the commission intervenes, America is about to repeat its mistake of the late 1960's when, intent on keeping negotiating pressure on the Soviet Union, it pushed forward so vigorously with a program to place multiple warheads on individual missiles as to make the whole subject of multiple warheads unnegotiable. The Soviet multiple-warhead program followed and made our ICBM's vulnerable. We are now suffering, predictably, from that error.

America does not, in fact, really need any new ICBM at all. In a rational world, we would finesse the Soviet ICBM buildup by unilaterally reducing our emphasis, within our overall strategic forces, on vulnerable land-based missiles. We would simply leave the Russians with ever more vulnerable ICBM's and shift our emphasis to air and sea—as, indeed, we already have. Nothing more is needed.

Unfortunately, the American defense community has begun to put great emphasis on appearances. It seems more concerned with an absurdity—who has missiles with larger diameter—than with real military effectiveness. Accordingly, bilateral disarmament would permit our military leadership to accept less emphasis on ICBM's without loss of face.

Those opposing new ICBM's also need a bilateral solution. We may be able to kill the MX outright—as it deserves to be killed—but, assuming a continuation of the Soviet ICBM buildup, Congress will eventually fund a new ICBM—if not the MX, then an ICBM with a single warhead, which is already under consideration.

These are the reasons political as much as military, why all sides of this debate need arms control. The place to start is by plugging the loophole in SALT II that permits each side to build one new ICBM.

DISAPPROVING DEFERRAL OF ECONOMIC DEVELOPMENT ADMINISTRATION FUNDS

Mr. HOLLINGS. Mr. President, there have been some developments with regard to Senate Resolution 49. This resolution, when approved, will disapprove the deferral of $181,900,000 in funds available to the Economic Development Administration. The administration proposed the deferral of these funds in order to make them available for transfer to the Small Business Administration to pay off the extraordinary amount of defaults on SABA's guaranteed loans.

A total of 28 of my colleagues joined me when I introduced Senate Resolution 49 on February 2. Last week, nine additional cosponsors were added. I ask that seven more of my colleagues now be added as cosponsors, as follows: Mr. PELL, Mr. BENTSEN, Mr. LONG, Mr. GLENN, Mr. JACKSON, Mr. ANDREWS, and Mr. BIDEN.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. Mr. President, all told, we have 45 Senators now on Senate Resolution 49 of which 10 are Republicans, so this is a bipartisan response to a misguided move by the administration. I am grateful for those who have joined me on Senate Resolution 49, and their leadership in this endeavor is most appreciated by those struggling to maintain the economies of areas devastated by the national economic situation.

Last week the Subcommittee on Commerce, Justice, State, the Judiciary and Related Agencies appropriations, on which I serve as ranking minority member, almost unanimously endorsed Senate Resolution 49 to the full Committee on Appropriations. Our distinguished chairman, the senior Senator from Nevada (Mr. LAXALT) opposes Senate Resolution 49, but my good friend is a fair man and expeditiously moved the resolution along. We appreciate his cooperaton and will be working to persuade him of the value of this proven program.

Mr. President, I ask that our chairman's letter polling the subcommittee on Senate Resolution 49 as well as his letter to Chairman HATFIELD be printed in the RECORD at the completion of my remarks.

This has been good progress and I urge the distinguished chairman of the Committee on Appropriations to schedule a meeting of the committee to report out Senate Resolution 49. The overwhelming approval of the subcommittee, plus the fact that 20 of the 29 members of the committee are now sponsoring the resolution makes me confident of the committee's approval. We need to get it reported out so the full Senate can address this issue. I am also confident that the Senate will agree that this is no time to scuttle a proven economic development program, and will want to overturn the deferral and get this modest amount moving into the economic development of our Nation.

Mr. President, the Reagan administration is wrong in its efforts to terminate the EDA. Certainly the program could be improved, and it is unfortunate that the administration is not building on the nearly 20 years of EDA to strengthen the program.

The Secretary of Commerce complains that virtually the entire country is eligible for EDA assistance. That is true, but he can establish priorities. In its early days, the EDA operated on a "worst first" strategy whereby the funds went to the areas with the highest unemployment on lowest income levels. That was followed by an emphasis on growth centers. The Secretary of Commerce has the power to be a virtual czar over economic development. It is beyond me why he is reluctant to use it, particularly as we view the present effort to formulate a jobs bill. There are projects ready for financing. The Assistant Secretary of Commerce for Economic Development authorized the processing of $31,483,041 in projects on December 17, 1982. Only a small amount of those

projects have been approved. Given the administration's opposition to the program, the authorized projects have to be good ones. We need to get Senate Resolution 49 up before the committee, and then the Senate, and get EDA back to work getting the country back to work.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON APPROPRIATIONS,
Washington, D.C., February 14, 1983.

DEAR COLLEAGUE: The Subcommittee on Commerce, Justice, State, the Judiciary, and Related Agencies has received Senate Resolution 49, disapproving deferral D83-43, relating to Economic Development Assistance Programs. The deferral involves $181.9 million of the $198.5 million in grants approved in the continuing resolution for fiscal year 1983.

While I am inclined to support the deferral, and will oppose the resolution, I am aware that a majority of the Subcommittee are co-sponsors of S. Res. 49. Therefore, I am circulating this letter to secure your approval of reporting the resolution favorably to the full Appropriations Committee. Your signature will be taken as an affirmative vote for this action.

Best regards,
Sincerely,
Paul Laxalt, Chairman, Commerce, Justice, State, and the Judiciary Subcommittee; Ted Stevens; Lowell P. Weicker, Jr.; Warren Rudman; Mark O. Hatfield; Arlen Specter; Ernest F. Hollings; Daniel K. Inouye; Dennis DeConcini; Dale Bumpers; Thomas F. Eagleton.

U.S. SENATE,
COMMITTEE ON APPROPRIATIONS,
Washington, D.C., February 14, 1983.

Hon. MARK O. HATFIELD,
Chairman, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR MARK, I am writing to inform you that the Subcommittee on Commerce, Justice, State, the Judiciary, and Related Agencies, having considered S. Res. 49, disapproving deferral D83-43, does favorably report this resolution to the full Appropriations Committee.

With best regards,
Sincerely,
PAUL LAXALT,
Chairman, Commerce, Justice, State, and the Judiciary Subcommittee.

100TH ANNIVERSARY OF THE ALABAMA AGRICULTURAL EXPERIMENT STATION

Mr. HEFLIN. Mr. President, as the senior Senator from Alabama, it is a great pleasure for me to rise today in recognition of a very significant milestone being observed today by one of the fine universities in my State, Auburn University. Today, February 23, is the 100th anniversary of the establishment of the Alabama Agricultural Experiment Station, the agency charged by law with providing the scientific research support for Alabama's agricultural and forestry industries.

It is entirely appropriate that Auburn faculty and friends pause to observe this occasion, and to reflect on the contributions made during the experiment station's 100-year history. Although agriculture has been the direct beneficiary of most of this research, all citizens of Alabama have benefited.

This centennial celebration at Auburn University also calls attention to the importance of the Nation's land-grant college system, particularly the agricultural research arm. This nationwide agricultural research system represents one of the greatest strengths of this Nation, making possible our unparalleled farm productivity that is certainly the envy of the world.

Members of the Alabama Legislature who passed the February 23, 1883, act creating the Alabama Experiment Station were concerned about the well-being of their people, and saw the need for improving the State's major industry, agriculture. Their decision to establish a research station at the State's land-grant college at Auburn put into motion a movement that has served the people well for 100 years and promises even greater service in the future.

From that beginning in 1883 when the professional staff included the director and one other scientist, the experiment station has grown to a major research facility. Today there are some 200 scientists and 500 support workers conducting hundreds of research projects dealing with all aspects of agriculture and forestry on 21,000 acres of land at 23 Alabama locations.

Although financial support was extremely modest in those early years, researchers found ways to attack and solve important problems of the day. Today's inflated costs of research are limiting factors, but available funds are being used to attack most serious problems facing farmers under the current cost-price squeeze situation. Such research holds out the major hope for overcoming today's depressed farming situation that is threatening the very existence of the Nation's agricultural industry.

Work of the Alabama Experiment Station has contributed greatly to the quality and enjoyment of life in both rural and urban settings in Alabama. Water quality, fishing and hunting resources, recreational opportunities, and resource conservation are all areas in which experiment station research plays a vital role.

In today's technological age, the survival of civilization as we know it is dependent on our accumulated knowledge base. Much of the research being done at agricultural experiment stations around the Nation, like the one at Auburn, is helping to maintain an up-to-date knowledge base that will assure the Nation a bright future.

The men and women who have served the Alabama Agricultural Experiment Station have met the challenge for 100 years. Present researchers and those who will follow can be counted on to meet the new challenges that will come in the future.

Mr. President, it is with great pride in their work that I commend the workers, past, present, and future, who have made the contributions for which the Agricultural Experiment Station is known, and I know that all of you join me in wishing them a very happy 100th anniversary.

I ask unanimous consent that an article from the February 1983 issue of the publication Highlights of Agricultural Research be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

REFLECTIONS OF A CENTURY OF SERVICE

On February 23, 1983 the Alabama Agricultural Experiment Station completes 100 years of service to the people of Alabama. This is an appropriate time to review our accomplishments, take stock of our current status, and consider the direction for the future.

From exceedingly humble beginnings that included only a couple of staff members and a few acres of land designated for research, the Alabama Agricultural Experiment Station has grown into a major center of research. It reaches into all parts of the State and touches the lives of all its citizens. Today, we celebrate our 100th birthday, the Alabama Agricultural Experiment Station employs over 200 agricultural scientists and almost 500 support personnel. They work on more than 300 research projects. Literally thousands of individual experiments are conducted annually in the search for answers to an assortment of problems that affect the farmers and citizens of this State. Experiments are conducted at the main research stations at Auburn and Shorter and at 21 other sites around the State on 21,000 acres.

The Alabama Agricultural Experiment Station was created by a state legislature that was concerned about the well-being of its people and the success of the State's primary industry, agriculture. The legislators, in their honest quest to provide a better life for the people of Alabama, exhibited great wisdom and far-reaching vision. During the intervening years, every legislator has had an opportunity to reaffirm that first commitment to the State's agricultural and forest industries by supporting the Alabama Agricultural Experiment Station.

From the beginning, the mission of the Alabama Agricultural Experiment Station has been clear: to conduct scientific research that will enhance the establishment and maintenance of a permanent and effective agricultural industry in the State. Over the years, we have refined, added to, and expanded our mission to include basic research, which affects all of agriculture and forestry. In more recent years, we have placed greater emphasis on protecting our soil and water resources and on improving the quality of our environment.

Because of the breadth of our research programs, no attempt will be made here to define the total impact of the Alabama Ag-

ricultural Experiment Station on the people of this State. Instead, this centennial issue of Highlights of Agricultural Research will document only a few of its accomplishments during the past 100 years.

Success of our research programs can be effectively measured by the knowledge that is generated. We live in a technological age where the quality of life, and even the survival of civilization as we know it, is dependent upon our accumulated knowledge. Although much of the research done by experiment station scientists finds immediate use in agricultural programs, there is a significant amount of research that contributes only to our pool of scientific knowledge. This knowledge pool provides the future basis for more efficient and more productive agricultural and forestry industries.

It is important that we maintain a healthy and well-supported research program for the well-being of the present generation and for generations yet to come. Our future accomplishments should match or exceed our past accomplishments, which have provided for a more successful agriculture and for a better life for all of us.

We are constantly reviewing our research program. This often results in a redirection of resources into new research priorities. From the very beginning of the Experiment Station, we have utilized the collective wisdom of our scientists and administrators, along with input from the agricultural, forestry, and business communities, to chart the course of our research efforts.

The financial base of the Alabama Agricultural Experiment Station has always been somewhat tenuous. The fertilizer tax, which provided for the establishment of the Experiment Station, was never sufficient to fully support the desired research programs. The Federal Hatch Act of 1887 and direct State appropriations, beginning in 1907, provided the first relatively sound and continuous financial support for the Experiment Station.

The State appropriation was $152,168 in 1936 and had reached one million dollars by 1958. For the past 5 years, the State appropriation has been between 7 and 8 million dollars per annum out of a 20-million-dollar annual budget.

Throughout the history of the Alabama Agricultural Experiment Station, there has not been sufficient funds to address all of the recognized research problems. With the increasing complexity of researchable problems and the high cost of conducting research, there is an even greater challenge to our scientists and support personnel.

The single greatest asset of the Alabama Agricultural Experiment Station is the scientists and support personnel who conduct the research that provides answers to problems affecting our agricultural and forestry industries. The record of accomplishments is, indeed, a tribute to the dedication and perseverance of these individuals to their research programs.

The challenge for the future is quite simple: provide the knowledge that will make possible a better life for the citizens of this State and Nation. This requires the dedication and intellect of the imaginative and hard-working men and women who make up the Alabama Agricultural Experiment Station. We have effectively met the challenges of the past 100 years, and I am convinced that we will be equally successful in the years ahead.

INTERNATIONAL TRADE

Mr. HOLLINGS. Mr. President, he who has the gifts of wit and humor can often do more to advance a serious cause than 20 people producing an encyclopedia on a subject. When, on particularly happy occasions, two gifted people combine their wit and humor to puncture some especially stubborn myth and thereby cast fresh light on the world in which we live, we have reason to rejoice. And rejoice I did when I read of AFL-CIO president Lane Kirkland's proposal for "The Free Trade, Anti-Protection and Anti-Hypocrisy Act" in George Will's February 13 column in the Washington Post.

What Kirkland presents so vividly, and what Will condenses so brilliantly, I would not dream of synopsizing. The column is brief and speaks to the issue of trade with a cogency and feel that other commentators on the subject have seldom if ever been able to match.

Let me just note, Mr. President, that the subject being treated is deadly serious. For the better part of a generation, successive administrations have closed their eyes to what has been happening in international trade. Meanwhile, other countries have come with strategies and tea work and built for themselves tremendous competitive advantage, picking off vital American industries in the process. The damage has been so far reaching that now the very economic survival of our country is in question.

We must understand how the field of play has changed, and we must disabuse ourselves of outdated notions which blind us to the world in which we live. The reason the world has moved farther away from the ideal of free trade is that other nations have made a mockery of it, and we have refused to call them on their abuses.

But I do not want to be heavy where Lane Kirkland and George Will are light. My purpose in rising, Mr. President, is to ask that this clearheaded column be included in today's edition of the RECORD. I commend it to my colleagues with enthusiasm, and I congratulate both my friends who made the piece possible. I ask unanimous consent to have this column printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE FREEST TRADE IS IN HYPOCRISY

(By George F. Will)

Irena Kirkland's husband (we who know them both think of Lane that way) is head of the AFL-CIO, but someone has to be. He also is author of an instructively amusing legislative proposal. It deserves to become law, but will not because it violates Washington's law of gravity, which is that only heavy things rise.

Kirkland proposes "The Free Trade, Anti-Protection and Anti-Hypocrisy Act." Weary of pious praise of free trade from people who know that free trade is increasingly a fiction, Kirkland says: free trade is wonderful and it would be nice if we had some. So his bill begins: Whereas certain practices distort the free flow of commerce and diminish the wealth of nations, deprive customers of the benefits of comparative advantage, and are contrary to national policy, therefore:

It shall be illegal for any American to engage in a transaction involving a product of which any portion is required to be manufactured abroad because of the existence in another country of a domestic-content statute.

(That would pertain to products from 30 or so countries.)

It shall be illegal to engage in a barter transaction with a state trading monopoly.

(Kirkland calls this "the Donald Kendall and Armand Hammer clause" because of Pepsico's and Occidental's deals with the Kremlin.)

It shall be illegal to engage in a transaction involving any product for which any part of the price or terms is subsidized by the state.

(This would concern countless products, including farm and certain other products from this country.)

It shall be illegal to engage in any transaction involving a commodity the price or supply of which is controlled by an international cartel.

(That is, OPEC since 1973. Before 1973, OPEC's role was played by the Texas Railroad Commission.)

It shall be illegal to engage in any transaction involving the use of a currency of which the exchange rate is manipulated by the state.

(The yen, for one.)

No U.S. revenues shall be paid to any international organization which, as a condition of giving aid to any country, requires the country to engage in protectionist policies.

(The International Monetary Fund frequently requires recipient nations to promote exports and impede imports.)

To combat word pollution, Kirkland's bill would set terminological standards. For example, "free-trade zones" (locations where goods are produced under a restriction that none can be sold in the country where the "free-trade zone" is located) shall be known as "protectionist zones."

The bill's enforcement provisions, Kirkland says, incorporate the assumption of many free traders that human values and rights ought not to be treated as relevant in determining the flow of commerce—"that all values are fungible." Therefore: any punishment practiced by any trading nation shall be available for the enforcement of the Kirkland statute.

So, a first offender's right hand shall be severed at the wrist. For the second offense, he shall receive five years at hard labor at the prevailing wage in a Mexican asbestos plant. For a third offense, he shall be sent—after a treaty arranges this with Kendall's and Hammer's trading partners in Moscow—for 10 years in the Gulag.

Finally: any person who advocates or engages in the violation of any provision of this statute, and who is thereafter apprehended in the act of making a free-trade speech to the Council on Foreign Relations, to the Aspen Institute, to Bilderberg, to Ditchley, or to any other such forum, shall have his tongue extracted by heated tongs.

The bill is Kirkland's way of underscoring this truth: mercantilism, not free trade, is increasingly the prevailing practice in the world. Kirkland favors national self-assertion in self-defense. Recently the Japanese ambassador asked Kirkland if he objected to any of Japan's commercial practices. Kirkland answered: no, I object to my government's not fighting back by doing likewise.

Robust nationalism is a Kirkland family tradition. Which brings me to Irena.

At a dinner party at the time of the debate about the Panama Canal treaties, Lane, who was for them, got into an amiable but vigorous argument with Irena, who opposed them. Irena, who is from Czechoslovakia and a survivor of Auschwiz, had received American citizenship just a few years earlier. She exclaimed to Lane: "You've had the canal all your life. I've only had it for a few years."

Sound folks, these Kirklands—the one from Prague and her consort from Camden, S.C. Nationalism is another supposed anachronism whose time has come 'round again.

S. 530—EDUCATION FOR ECONOMIC SECURITY ACT

Mr. BRADLEY. Mr. President, we recently introduced the Education for Economic Security Act, which provides up to $400 million annually to education institutions to upgrade education in mathematics, science, computer instruction, foreign languages and vocational education.

Funding would be provided to elementary and secondary schools, vocational and technical centers and colleges and universities based upon a formula tied to each State's school age population. Recipients of the grant would be given broad discretion on how the funds would be spent. Leaving administrative authority with the States, the schools and the colleges preserve the tradition of local flexibility to tailor programs to local needs.

The legislation requires that over 40 percent of the funds must go to elementary and secondary schools, with funding specifically earmarked for development of instructional programs, model programs, foreign language teaching and the acquisition of equipment. Over 20 percent of the funds must go for the development of vocational education programs in new and emerging technologies, with the remaining funds for institutions of higher education, primarily for teacher training and retraining.

Mr. President, I know some people doubt that we can afford a new multimillion dollar education program in these times of fiscal austerity. In my opinion, however, the real question is whether we can afford to forgo this kind of legislation and still address the challenges confronting us. And I believe the answer to this question is clear.

Mr. President, the facts speak for themselves:

Mathematics SAT scores have fallen from an average of 502 in 1963 to 466 in 1980. That is hardly surprising when you consider that only one-third of our high schools offer more than 1 year of math or science, and at least one-half of all our high school students now take no math beyond algebra and no more than 1 year of science. In addition, our foreign language proficiency has dramatically declined; there has occurred over the past 15 years a 40-percent decline in high school credits awarded for foreign language study.

Nationwide, 22 percent of the high school mathematics teaching posts are vacant, and 26 percent of the occupied posts are filled by uncertified or temporarily certified people. A study by the National Science Teachers Association reveals a 77-percent drop in the number of secondary school math teachers being trained and a 65-percent decline in science teachers.

Less than one-third of all freshmen entering college in New Jersey are fully proficient in basic verbal and arithmetic skills, and only about 10 percent are fully proficient in elementary algebra.

And the problems are not only at the elementary and secondary level; recent studies show that only one-sixth of our college graduates majored in math, sciences, and engineering. In Japan, more than a quarter do so; in West Germany, more than a third; and in the Soviet Union, over a half.

Mr. President, our economy is changing rapidly. Increasingly our economy is fueled by information processing, high technology, and international trade. The Bureau of Labor Statistics projects by 1990 a 40-percent rise in demand for scientists and engineers and a 50-percent increase in the computer field. Our country needs a highly skilled labor force capable of filling these jobs, and the best way for us to meet this need is through a major increase in our investment in educating our citizens.

Mr. President, a major component of this legislation is aimed at correcting these deficiencies by upgrading the Nation's teacher stock. The legislation will help us in three key areas: First, training more new teachers in math, science, computer learning and foreign languages. Second, retraining teachers from other disciplines to help fill the gap. And third, retaining the current supply of teachers through inservice training and the development of new instructional techniques.

Mr. President, our economic security depends upon the education of our people. In order to effectively compete internationally, the American work force must be second to none. Presently, in many fields, our edge is slipping, and our educational institutions simply cannot keep pace with the rapid pace of technological change. We need to help our educational institutions adapt to these changes if we are to continue to grow as a nation.

In summary, Mr. President, our schools and colleges must more effectively train students for the new job demands of the 1980's. We need to strengthen our present instructional programs and improve teacher training and retraining programs to help fill the gaps. This legislation is a step in the right direction, and I urge my colleagues for their support.

Mr. President, I ask unanimous consent that the full text of S. 530, the Education for Economic Security Act, be printed in the RECORD at this point.

There being no objection the bill was ordered to be printed in the RECORD, as follows:

S. 530

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assemble, That this Act may be cited as the "Education for Economic Security Act".

STATEMENT OF PURPOSE

SEC. 2. It is the purpose of this Act to make financial assistance available to States to improve instruction and learning in mathematics, science, computer technology, foreign languages, and vocational education and thereby contribute to strengthening the economic security of the United States.

DEFINITIONS

SEC. 3. As used in this Act—

(1) The term "Governor" means the chief executive of any State.

(2) The term "institution of higher education" means an educational institution in any State which (A) admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate, (B) is legally authorized within such State to provide a program of education beyond secondary education, (C) provides an educational program for which it awards a bachelor's degree or provides not less than a two-year program which is acceptable for full credit toward such a degree, (D) is a public or other nonprofit institution, and (E) is accredited by a nationally recognized accrediting agency or association, or if not so accredited, (i) is an institution with respect to which the Secretary has determined that there is satisfactory assurance, considering the resources available to the institution, the period of time, if any, during which it has operated, the effort it is making to meet accreditation standards, and the purpose for which this determination is being made, that the institution will meet the accreditation standards of such an agency or association within a reasonable time, or (ii) is an institution whose credits are accepted, or transfer, by not less than three institutions which are so accredited, for credit on the same basis as if transferred from an institution so accredited. Such term also includes any school which provides not less than a one-year program of training to prepare students for gainful employment in a recognized occupation and which meets the provision of clauses (A), (B), (D), and (E). Such term also includes a public or nonprofit private educational institution in any State which, in lieu or the requirement in clause (A), admits as regular students persons who are beyond the age of compulsory school attendance in

the State in which the institution is located and who have the ability to benefit from the training offered by the institution. For purposes of this subsection, the Secretary shall publish a list of nationally recognized accrediting agencies or associations which he determines to be reliable authority as to the quality of training offered.

(3) The term "junior or community college" means an institution of higher education—

(A) that admits as regular students persons who are beyond the age of compulsory school attendance in the State in which the institution is located and who have the ability to benefit from the training offered by the institution;

(F) that does not provide an educational program for which it awards a bachelor's degree (or an equivalent degree); and

(C) that—

(i) provides an educational program of not less than two years that is acceptable for full credit toward such a degree, or

(ii) offers a two-year program designed to prepare a student to work as a technician or at the semiprofessional level in engineering, scientific, or other technological fields requiring the understanding and application of basic engineering, scientific, or mathematical principles of knowledge.

(4) The term "local educational agency" means a public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a service function for, public elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State, or such combination of school districts or counties as are recognized in a State as an administrative agency for the public elementary or secondary schools. Such term includes any other public institution or agency having administrative control and direction of a public elementary or secondary school.

(5) The term "Secretary" means the Secretary of Education.

(6) The term "State" means a State, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands.

(7) The term "State educational agency" means the officer or agency primarily responsible for the State supervision of public elementary and secondary schools.

(8) The term "State agency for higher education" means the State board of higher education or other agency or officer primarily responsible for the State supervision of public higher education, or, if there is no such officer or agency, an officer or agency designated by the Governor or by State law.

PROGRAM AUTHORIZED

SEC. 4. (a) The Secretary is authorized to make grants to States, in accordance with the provisions of this Act, to pay the Federal share of the costs of strengthening instruction in mathematics, science, computer education, foreign languages, and vocational education.

(b) There are authorized to be appropriated $400,000,000 for each of the fiscal years 1984, 1985, and 1986 to carry out the provisions of this Act.

ALLOTMENT TO STATES

SEC. 5. (a)(1) From the amount appropriated to carry out this Act for each fiscal year, the Secretary shall allot to each State an amount which bears the same ratio to the amount so appropriated as the number of children aged 5 to 17, inclusive, in the State bears to the number of such children in all States, except that no State shall receive less than one-half of 1 percent of the amount appropriated under section 4(b) in any fiscal year.

(2) For the purpose of this subsection, the term "State" does not include Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, or the Trust Territory of the Pacific Islands.

(3) The number of children aged 5 to 17, inclusive, in the State and in all States shall be determined by the Secretary on the basis of the most recent satisfactory data available to him.

(b) The amount of any State's allotment under subsection (a) for any fiscal year to carry out this Act which the Secretary determines will not be required for that fiscal year to carry out this Act shall be available for reallotment from time to time, on such dates during that year as the Secretary may fix, to other States in proportion to the original allotments to those States under subsection (a) for that year but with such proportionate amount for any of those other States being reduced to the extent it exceeds the sum the Secretary estimates that State needs and will be able to use for that year; and the total of those reductions shall be similarly reallotted among the States whose proportionate amounts were not so reduced. Any amounts reallotted to a State under this subsection during a year shall be deemed a part of its allotment under subsection (a) for that year.

(c) There are authorized to be appropriated for each fiscal year for the purpose of this subsection amounts equal to not more than 1 per centum of the amount appropriated for such year under this Act. The Secretary shall allot the amount appropriated pursuant to this subsection among Guam, American Samoa, the Virgin Islands the Northern Mariana Islands, or the Trust Territory of the Pacific Islands according to their respective needs for assistance under this Act. In addition for each fiscal year the Secretary shall allot from such amount to—

(1) the Secretary of the Interior the amounts necessary for programs authorized by this Act for children in elementary and secondary schools operated for Indian children by the Department of the Interior, and

(2) the Secretary of Defense the amounts necessary for programs authorized by this Act for children in overseas dependent schools of the Department of Defense.

The terms upon which payments for such purposes shall be made to the Secretary of the Interior and the Secretary of Defense shall be determined by such criteria as the Secretary determines will best carry out the purpose of this Act.

IN-STATE APPORTIONMENT

SEC. 6. (a) Sixty-five per centum of each State's allotment under section 5 of this Act shall be used for elementary and secondary and vocational education programs in accordance with section 7.

(b) Thirty-five per centum of each State's allotment under section 5 of this Act shall be used for higher education programs in accordance with section 8.

ELEMENTARY, SECONDARY, AND VOCATIONAL EDUCATION PROGRAMS

SEC. 7. (a) The amount apportioned under section 6(a) from each State's allotment, shall be used by the State educational agency to strengthen elementary, secondary, and vocational education programs in accordance with the provisions of this section.

(b)(1) Forty per centum of the amount apportioned under this section shall be distributed to local educational agencies within the State to be used for mathematics and science instruction, and computer education programs, together with instructional materials related to such instruction and programs. Such instruction and programs may be carried out through agreements with public agencies, business concerns, and nonprofit private organizations, including museums, libraries, and other appropriate institutions.

(2) The State educational agency shall distribute funds under this subsection to local educational agencies in the State based upon—

(A) the size of each local educational agency as determined by the number of children aged 5 to 17, inclusive, in the schools of such agency; and

(B) the size of the proposed program in terms of the number of students to be served and the number of grade levels involved in the program.

(3) The State educational agency shall renew payments to local educational agencies under this subsection based upon the criteria set forth in paragraph (2) of this subsection and a determination by the State educational agency that the local educational agency is implementing the program assisted under this Act so that a substantial number of students in the schools of such agency are served and several grade levels of instruction in such schools are involved in the program.

(c)(1) Fifteen percent of the amount apportioned under this section shall be used for foreign language instruction in the schools of local educational agencies in the State.

(2) The State educational agency shall distribute funds under this subsection in accordance with criteria described in paragraph (2) of subsection (b) of this section.

(d) Ten percent of the amount apportioned under this section shall be used by the State educational agency to assist exemplary programs in mathematics instruction, science instruction, foreign language instruction, and computer learning and instruction, together with instructional materials and necessary technical assistance, and the dissemination of information to all local educational agencies within the State relating to the exemplary programs assisted under this subsection.

(e) Thirty-five percent of the amount apportioned under this section shall be used, by the State agency responsible for vocational education, for employment based programs, together with instructional materials and equipment, in new and emerging technologies, including computer learning and instruction. Ten per centum of the 35 per centum available under this subsection shall be used for programs described in the preceding sentence conducted in correctional institutions.

(f) To the extent consistent with the number of children in the school district of each local educational agency who are enrolled in private elementary and secondary schools, each local educational agency shall make provision for including special educational services and arrangements (such as dual enrollment, educational radio and television, and mobile educational services and equipment) in which such children can participate in meeting the requirements of this section. Expenditures for educational serv-

ices and arrangements pursuant to this subsection for children in private schools shall be equal (taking into account the number of children to be served and the needs of such children) to expenditures for children enrolled in the public schools of the local educational agency.

(g) The amount available under this section shall be distributed among vocational education schools and area vocational schools in accordance with criteria established by the state agency responsible for vocational education.

HIGHER EDUCATION PROGRAMS

SEC. 8. (a) The amount apportioned under section (6)(b) from each State's allotment under this Act shall be used for higher education programs in accordance with this section.

(b) Fifty per centum of the amount available under this section shall be used for—

(1) elementary and secondary school teacher training programs for teachers who will specialize in teaching mathematics, science, and computer learning and instruction;

(2) retraining of elementary and secondary school teachers who specialize in disciplines other than the teaching of mathematics, science, or computer education to specialize in the teaching of mathematics, science, or computer education;

(3) in-service training for elementary and secondary school teachers of mathematics, science, and computer technology designed to improve their skills; and

(4) cooperative programs between institutions of higher education and other organizations and agencies, such as museums and libraries.

(c)(1) Thirty-five per centum of the amount available under this section shall be used for employment-based programs, together with instructional materials and equipment, in new and emerging technologies, including computer learning and instruction and basic engineering instruction.

(2) The amount available under this subsection shall be distributed among institutions of higher education, including community and junior colleges, in accordance with criteria established by the State agency for higher education.

(d) Fifteen per centum of the amount available under this section shall be used for foreign language instruction in institutions of higher education within the State.

(e) The State agency for higher education shall distribute funds available under this section among institutions of higher education in the State who apply for payments under this section.

STATE APPLICATION

SEC. 9. (a) Each State which desires to receive grants under this Act shall file an application with the Secretary at such time, in such manner, and containing or accompanied by such information as the Secretary reasonably requires. Each such application shall—

(1) designate the State educational agency for the purpose of programs described in sections 7 (b), (c), and (d), the State agency for vocational education described in section 7 (e), and the State agency for higher education for programs described in section 8, as the agency or agencies responsible for the administration and supervision of the programs described in sections 7 and 8, as the case may be;

(2) describe the programs for which assistance is sought under the application;

(3) provide assurances that payments will be distributed by the State in accordance with the provisions of sections 7 and 8, as the case may be;

(4) provide procedures for submitting applications—

(A) by local educational agencies, area vocational schools, and correctional institutions, for programs described in section 7; and

(B) by institutions of higher education for programs described in section 6,

within the State for distributions of payments under this Act, and for approval by the appropriate State agency, including appropriate procedures to assure that the appropriate State agency will not disapprove an application without notice and opportunity for a hearing;

(5) provide assurances that Federal funds made available under this Act for any fiscal year will be so used as to supplement, and to the extent practicable, to increase the level of funds that would, in the absence of such funds, be available for the purposes described in sections 7 and 8, and in no case supplant such funds; and

(6) provide such fiscal control and accounting procedures as may be necessary (A) to ensure proper accounting of Federal funds paid to the applicant under this Act, and (B) to ensure the verification of the programs assisted under the application.

(b) The Secretary shall expeditiously approve any application that meets the requirements of this section.

PAYMENTS

SEC. 10. (a) From the amounts appropriated under section 4(b), the Secretary shall pay, in accordance with the provisions of this Act, the Federal share of the costs of the programs described in the application approved under section 9.

(b)(1) The Federal share for each fiscal year shall be 50 per centum.

(2) Payments under this Act shall be made as soon after approval of the application as practicable.

POSTAL SERVICE RECEIVES VON WEIGAND AWARD

Mr. STEVENS. Mr. President, in its annual meeting in Philadelphia in November of last year, the Association of Labor Management Administrators and Consultants on Alcoholism presented to the U.S. Postal Service its prestigious Ross Von Wiegand Memorial Award. This award recognizes the U.S. Postal Service program for alcoholic recovery (PAR) as the outstanding labor-management alcoholism program of 1982. This program has conserved the lives of thousands of postal employees since its inception in 1968.

The award's namesake, Von Wiegand, was a member of the National Council on Alcoholism from 1964-79; he is credited with initiating the major portion of alcoholism recovery programs within American industry. Postmaster General William Bolger and Alfred Harrington, eastern region policy and steering committee member of the National Post Office Mailhandlers, Watchmen, Messengers, and Group Leaders, AFL-CIO, represented management and labor, respectively, at the award ceremony.

The PAR program is the largest civilian occupational alcoholism program in the country, available to most of the Postal Service's 670,000 employees. PAR is part of the national agreement between the Postal Service and its labor unions. It is an example of labor-management cooperation in providing assistance to employees with alcoholism.

PAR was established as a pilot program in the San Francisco Post Office in 1968. During the last 14 years, more than 33,000 employees have been interviewed by PAR counselors. Of these, about 24,000 have participated in the program, 12,000 are now active, and 7,000 have successfully completed the program.

In accepting the Von Wiegand award, Postmaster General William Bolger stated,

> PAR's philosophy is that an employee suffering from alcoholism is first of all a person * * *. Like victims of other diseases, with proper treatment, the person stricken by alcoholism can be rehabilitated and can continue to function as a normal and productive member of society.

Programs such as PAR make good business sense because an employee who recovers from alcoholism returns as a productive member of the organization. The Postal Service has saved millions of dollars in reduced absenteeism and accidents, improved morale, and retention of valuable employees.

The U.S. Postal Service has 260 PAR counselors nationwide. These people are responsible for the success of the program and I want to take this opportunity to commend them all. As further recognition of the program and the fine work accomplished by those involved, the national program manager, John McPhee, was presented with the 1981 Excalibur Award for his achievements with the PAR program.

Mr. President, during the rush of business in the waning days of the last Congress, this prestigious award was unfortunately overlooked by many. I wish this solid accomplishment could have made headlines. The Postal Service, its management, labor union officials, and all connected with the PAR program are certainly to be commended.

PRINTING OF THE RULES OF THE COMMITTEE ON THE JUDICIARY

Mr. THURMOND. Mr. President, in accordance with rule XXVI of the Standing Rules of the Senate, requiring the publication of the rules of each Senate committee in the CONGRESSIONAL RECORD not later than March 1 of each year, I submit the procedural rules of the Committee on the Judiciary and ask unanimous consent that they be printed in the RECORD.

There being no objection, the rules were ordered to be printed in the RECORD, as follows:

RULES OF THE COMMITTEE ON THE JUDICIARY

1. MEETINGS OF THE COMMITTEE

1. Meetings may be called by the Chairman as he may deem necessary on three days notice or in the alternative with the consent of the Ranking Minority Member or pursuant to the provision of the Standing Rules of the Senate, as amended.

2. Each witness who is to appear before the Committee or any Subcommittee shall file with the Committee, at least 48 hours in advance of the hearing, a written statement of his testimony in as many copies as the Chairman of the Committee or Subcommittee prescribes.

3. On the request of any member, a nomination or bill on the agenda of the Committee will be held over until the next meeting of the Committee or for one week, whichever occurs later.

II. QUORUMS

1. Ten members shall constitute a quorum of the Committee when reporting a bill or nomination; provided that proxies shall not be counted in making a quorum.

2. For the purpose of taking sworn testimony, a quorum of the Committee and each Subcommittee thereof, now or hereafter appointed, shall consist of one Senator.

III. PROXIES

When a record vote is taken in the Committee on any bill, resolution, amendment, or any other question, a quorum being present, a member who is unable to attend the meeting may submit his vote by proxy, in writing or by telephone, or through personal instructions. A proxy must be specific with respect to the matters it addresses.

IV. BRINGING A MATTER TO A VOTE

The Chairman shall entertain a non-debatable motion to bring a matter before the Committee to a vote. If there is objection to bring the matter to a vote without further debate, a rollcall of the Committee shall be taken, and debate shall be terminated if the motion to bring the matter to a vote without further debate passes with ten votes in the affirmative, one of which must be cast by the Minority.

V. SUBCOMMITTEES

1. Any member of the Committee may sit with any Subcommittee during its hearings or any other meeting, but shall not have the authority to vote on any matter before the Subcommittee unless he is a member of such Subcommittee.

2. Subcommittees shall be considered de novo whenever there is a change in the Subcommittee chairmanship, and seniority on the particular Subcommittee shall not necessarily apply.

Except for matters retained at the full Committee, matters shall be referred to the appropriate Subcommittee or Subcommittees by the Chairman, except as agreed by a majority vote of the Committee or by the agreement of the Chairman and the Ranking Minority Member.

UNITED STATES-JAPAN RELATIONSHIP

Mr. STEVENS. Mr. President, I wish to point out to my colleagues a speech made recently by Ambassador to Japan Mike Mansfield in Tokyo regarding the importance of the United States-Japan relationship. As all of my colleagues are aware, Mike Mansfield is one of the most distinguished Members the Senate has had the fortune to have served.

His viewpoints concerning our country's dependence upon political and economic cooperation with Japan are particularly pertinent in these days of heightened tension between the United States and other post-war trading partners. As Ambassador Mansfield points out, the pressure to reduce imports and impose protectionist measures is the greatest since the Great Depression. It is my hope that through adherence to the tenets proposed by a man such as this renowned for his insight in international relations, we can work together in Congress to see our way through this deeply disturbing period. I would like to particularly draw attention to the remarks made by the Ambassador regarding the possibility of Alaskan oil exports. He concludes: "* * * this possibility would benefit all concerned and injure no one." I could not agree more.

I urge the Senators to keep an open mind on this issue. There is no secret that export benefits the State of Alaska. What is overlooked is that it also greatly benefits the Nation through enhanced Federal revenues, increased production, and a downward pressure on oil prices. I ask unanimous consent that the remarks of the Ambassador be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

THE IMPORTANCE OF THE UNITED STATES-JAPAN RELATIONSHIP

President Kobayashi, Chairman Mutai, Secretary-General Sato, distinguished members of the Yomiuri International Economic Society, I am both honored and pleased to have the opportunity to address this special luncheon meeting today. Your invitation could not have come at a more appropriate time, for both our countries—and the Free World as a whole—stand at a critical crossroads. It is increasingly evident that the new Japanese government of Prime Minister Nakasone and the newly elected U.S. Congress, along with the governments of all the Western democracies, presently confront a challenge to the entire post-war structure of international economic and political cooperation unprecedented since the days of the Great Depression. In consequence of the most severe world recession since the thirties and of rising protectionist pressures, the U.S. is under heavy pressure in Congress to restrict imports, especially against countries which restrict our exports. Our ability to manage the crisis of worldwide recession and unemployment in a manner consistent with the principles of free trade and mutual ccoperation upon which our prosperity has depended for the past 35 years is at stake.

I know that my good friend President Kobayashi shares my firm conviction that the most important bilateral relationship in the world today is that between the U.S. and Japan, both in terms of the future of our two countries and the international community. The U.S. relationship with Japan provides the foundation for protecting our mutual economic, political and security interests in east Asia, the Pacific and around the world. But at present in spite of the basic soundness of our relationship, there are serious problems between us requiring urgent attention. Our ability to resolve these problems through increased understanding and mutual commitment can help insure the continuation of a fair and stable international economic and political order beneficial to all the nations of the world.

The overall U.S.-Japan relationship is a highly cooperative one. We have stood together in protest against Soviet aggression in Afghanistan and interference in Poland, a stand for which Japan—and the U.S.—paid a significant econoimic price in terms of lost contracts and sales. Moreover we both have been in the forefront, together with the ASEAN states, in calling for the withdrawal of Vietnam from Kampuchea. In additon, Japan is playing an increasingly significant role in providing economic assistance to developing nations and has increased its aid to refugees from Southeast Asia. At the recent GATT meeting in Geneva, Japan was one of a very few countries which joined the United States in arguing forcefully and effectively for a conference declaration in support of free trade principles as an essential first step toward coping with current international economic problems. Unfortunately, the Geneva Ministerial meeting achieved only a limited success in preserving the system of free trade which is so important to both Japan and the U.S.

Yet, on the other hand, there remain in Japan a variety of obstacles to more liberal international trading practices which seem to be at variance with the very principles of free trade which we and Japan espouse and which do not in the eyes of other countries jibe with the economic pre-eminence which Japan has now attained. As perhaps the world's chief beneficiary of the free trade system—and the nation most dependent on access to the markets of the world for continued economic prosperity—we ask that Japan, in its own interest, translate its expressions of principle and its market liberalization plans into concrete actions to open new markets in keeping with its position as the second largest economy in the Free World.

Despite efforts in both our countries to understand each other better, not enough attention is being given in Japan to danger signals going up across the Pacific with respect to our trade relations. Given the fact that the 1981 U.S. merchandise trade deficit of $15.8 billion with Japan is expected in 1982 to increase even more, the most immediate and politically sensitive issue in U.S.-Japanese relations is unquestionably trade. A situation now exists which, in many different fields—manufactured goods, services, standards codes, investments—Japan enjoys easier access to the American market than America has to the Japanese market. In order to counter rising protectionist sentiment in the U.S. and among Japan's other major trading partners, Japan should, in its own interest, further open up her markets. For it is the widely shared perception that the Japanese market is not as open as it should be that is causing United States politicians—including previous champions of free trade—to call for new restrictions on imports from Japan. It is this perception which has resulted in a majority of the House of Representatives and a smaller

group in the Senate to go on record as favoring some form of so-called "local content legislation" which would require that a high percentage of certain foreign products sold in the American market—such as autos—be manufactured in the U.S.

I firmly believe that a protectionist approach to dealing with our current trade problems would be wrong. The American answer to Japanese competition in our marketplace should not be sought through new trade barriers which will invite retaliation, reduce trade and hurt American producers, consumers and workers. A large part of the answer is rather to apply our famous Yankee ingenuity to increase productivity, and to develop a more cooperative relationship between labor and industry and industry and government. Nevertheless, we will not be able to resist successfully protectionist pressure if the perception persists that our major trading partners—particularly Japan—are protecting their markets while competing freely in the U.S. market.

Japan and the U.S. are the world's greatest overseas trading partners, with two-way trade amounting this year to more than $60 billion. Japan is a vital market for U.S. products, taking more of our goods each year than any other country except Canada. This unprecedented bilateral trading relationship signifies an economic interdependency of enormous benefit to both countries, one that should be protected at all costs. While Japan depends on the U.S. to buy Japanese goods and services more than on any other market, the United States also finds that the Japanese economy has a broader effect on U.S. economic interests than any other overseas country. Two-way investment now exceeds $13 billion. Japan purchased $22 billion of U.S. exports in 1981 while the U.S. purchased $37 billion of Japan's exports. Japan buys over 15 percent of all American agricultural exports (almost twice as much as any other country), while 20 to 25 percent of all automobiles sold in the U.S. are of Japanese manufacture.

However, in spite of the growth in our two-way trading relationship, it is clear that Japanese exports to the U.S. have achieved significant penetration of the U.S. market in many areas while the U.S. share of the Japanese market in areas where we should be most competitive is strikingly low. In addition to Japan's nearly one-quarter share of the U.S. auto market, many other Japanese products now hold major shares of the U.S. market. To illustrate my point, last year's figures indicate that in steel Japan held a 10 to 15 percent share of the U.S. market; in TVs 20 to 30 percent; in motorcycles, 90 percent; in radios, 50 to 60 percent; in cameras, over 30 percent; in recording equipment, over 50 percent; in watches, over 50 percent; and in machine tools, over 20 percent. By contrast, representative competitive U.S. products hold only the following limited share of the market in Japan—cigarettes, 1.3 percent in comparison to more than a 50 percent share of cigarette sales in Hong Kong, a market very similar to Japan's; communications equipment, 1.3 percent; fresh oranges, 3 percent; medical equipment, 6.3 percent; office automation equipment, 11.2 percent; beef, 7 percent; as well as unreasonably low market shares for such competitive products as analytical instruments, wood products, industrial chemicals and pharmaceuticals.

Japan's success in exporting to the U.S. has occasioned considerable concern in the U.S. even though the global U.S current account (including invisibles) is in surplus. Because demand in the U.S. for many products is down, Japanese products are often seen as displacing U.S. products and employment.

It is true, as many Japanese have observed, that the Japanese market is now more open than it has been in the past. Tariff barriers, for example, have been substantially reduced. Nonetheless, there remain in Japan a number of barriers to U.S. imports which are neither necessary or defensible. Prime examples are the 35 percent tariff on imports of manufactured tobacco and the restrictions on distribution of U.S. tobacco products, and discriminatory quotas on some agricultural imports such as beef and citrus. Reduction or removal of these barriers by Japan would do much to improve the trade climate between the two countries and strengthen the bilateral economic relationship.

Achieving a more open Japanese market has been a major U.S. government objective for many years, with increased emphasis over the past year and one-half. Ambassador William Brock, the U.S. Trade Representative, Secretary of State George Shultz and Secretary of Commerce Malcolm Baldridge have made this point repeatedly. Teams of U.S. officials have engaged in an almost continuous dialogue with Japanese officials to detail U.S. concern, to urge prompt Japanese action and to suggest possible solutions. There has been some reason for hope: the Japanese Government announced trade liberalization packages in January and again in May of this year. The packages included acceleration of tariff reductions agreed to in the Tokyo Round, establishment of the Office of the Trade Ombudsman (OTO) to receive trade complaints, reform of customs procedures, steps to remove or simplify some standards requirements and a pledge by the Prime Minister to continue efforts to open further the Japanese market. These steps are welcome and helpful, but they do not go as far as Japan can and should go. It is important that Japan fully *flesh out* and implement these commitments, while at the same time taking further steps to open up its market. This should include a significant reduction in and eventual elimination of the tariff on manufactured tobacco, liberalization of the quotas on agricultural products such as beef and citrus, and additional flexibility in the application of its product health and safety standards.

It is vital that the Japanese government and people understand the urgency and importance of our requests. I recognize that sustained and energetic efforts are needed to overcome Japanese administrative resistance to easing technical standards and simplifying procedures. I welcome the urgings from Japanese leaders for greater flexibility and receptivity to foreign imports. I am happy to note that Prime Minister Nakasone has emphasized the importance of further liberalization of the Japanese market in his public statements since his election.

Despite the strain current U.S. economic difficulties place on U.S. trade policy, the U.S. is not, as yet, turning to protectionism. The economic policies of President Reagan aim at the recovery of the U.S. economy and not at its insulation from global competition. But our trading partners have their responsibilities as well. Japan in particular needs to take additional steps to demonstrate its willingness to do its fair share to maintain the world trading system from which it so clearly benefits and to discourage protectionism.

For some years now, the United States has had an unfavorable balance of trade with Japan. Until recently, the U.S. has tended to accept its trade gap with Japan quite philosophically. We Americans understood that Japan had to export to survive and to recover after the war. And in any case, our trade balance elsewhere in the world has often been favorable and our global balance of trade has been good in most years.

Now the situation is different. Today, more than ever before, the United States depends on its ability to sell goods and services abroad. United States total world exports now amount to eight percent of our GNP (as compared to 13 percent in the case of Japan). Four out of five American jobs created in the last five years are in our export industries.

As you know, the United States is in a recession, along with much of the world. Ten point eight percent of our work force is unemployed, many from industries where Japanese imports have made dramatic inroads in recent years. I wish to emphasize those unemployment figures: the number of unemployed in America today just about equals the population of Tokyo! There is much that the United States can—and is—doing to rectify this situation, to put its own economic house in order. Under the Reagan Administration, inflation has been reduced to five percent, interest rates have come down from over 20 percent to less than twelve percent. But still the American economy is hardly growing, while our trade gap with Japan increases.

At the same time, the American people are being asked to support through taxes a much larger defense budget to meet increased Soviet military power; to continue economic assistance to the developing countries; to accept more refugees (we have taken in 600,000 refugees in the last few years already!). America's defense budget alone accounts for over six percent of our gross national product. Japan's military budget is just under one percent of GNP, although if it included pensions and survivors benefits, as do the defense budgets of the U.S. and the NATO countries, it would be somewhat above one percent.

Americans realize that they are not the only country with economic problems or heavy tax burdens to pay for defense. But they feel, understandably I think, that it is high time other advanced countries contributed more actively to the overall stability of the world in economic and defense terms.

For years, Japan could say with reason that its industries needed various kinds of protection if its economy was to get on its feet, that it could not do anything on the military side because of lack of funds and constitutional restraints. For years, Japanese have felt a deep sense of vulnerability. For years, the world—especially the United States, which was seen by many Japanese as overwhelmingly powerful and successful—accepted these reasons and respected them.

America today is still basically strong; it will eventually recover from its present economic difficulties. But Japan, too, is strong—much stronger, more successful, and more influential than many Japanese realize. Japan has now arrived at an historical watershed. It is the second largest economy in the Free World; its per capita income, while still less than the U.S., is among the world's highest. Japan accounts for ten percent of the world's economic output. Japanese products are sold widely all over the world; and Japanese technological innovations contribute to the world's prosperity and better health in hundreds of ways.

What has made this dramatic change in Japan's world position possible? First and foremost, the hard work and ability of the Japanese people; secondly, the excellence of Japan's primary and secondary public education. But there is another major factor also contributing to Japan's success story: the willingness of much of the world, and especially of the United States, to freely admit Japanese goods at competitive prices enabling Japan to buy the resources it had to have for its economy to grow. And the growth in Japanese sales of consumer goods has indeed been phenomenal. Let me emphasize that for the American consumer, this is fine! We do not want a situation to develop where Americans would not be able to buy such products so cheaply or easily. We want our consumers to be able to choose from among the best, least expensive products from all over the world.

However, and here is the nub of the problem: we should be able to penetrate your markets as freely and as efficiently as you are now able to penetrate ours.

Before continuing, I would like to suggest that one way we might dramatically reduce our bilateral trade deficit and increase the value of U.S. exports to Japan by three to four billion dollars per year would be to lift the present congressional ban on export of surplus Alaskan oil and natural gas.

At present, each day 600,000 barrels of surplus oil leave the port of Valdez, Alaska, in super tankers. Then the oil is transshipped through the Panama Canal in smaller boats, and finally transferred back into super tankers for transport to U.S. Gulf Coast refineries. The whole journey is in U.S. flag ships with transport costs amounting to $5.50 to $5.60 a barrel. If current restrictions—strongly supported by U.S. shipowners and maritime unions—were removed, this surplus Alaskan oil could be shipped to Japan. Gulf Coast refineries could make up the difference by stepping up imports from Mexico at fifty cents a barrel or from the Middle East at from $2.00 to $3.00 a barrel.

In discussions with interested representatives of the private sector in Japan, I have received the impression that if Alaskan oil were to be exported to Japan, there would be serious consideration given to utilizing—at least in part—American bottoms for such shipments at a probable cost of $2.50 to $3.00 a barrel. I hope that both U.S. and Japanese governments and political leaders will carefully study such a possibility, which would at one stroke greatly increase U.S. exports to Japan, somewhat lower U.S. oil prices due to more efficient transportation, decrease Japan's current dependence on the Mideast for 70 percent of its oil imports, benefit U.S. maritime unions and the maritime industry and further increase the economic ties binding our two countries, thereby strengthening our overall relationship. As I see it, this possibility would benefit all concerned and injure no one.

The second major issue in U.S.-Japanese relations which demands attention at the political level is defense. Despite the severe economic situation in the United States, Americans are generally agreed that Soviet military advances and aggressive behavior of the last few years must be met with a firm stand by the Western nations. As a consequence the United States is currently engaged in an extraordinary effort to strengthen its own forces in response to the Soviet buildup. This is essential not only to U.S. security, but also to the security of its allies, including Japan.

Recently, there has been some concern expressed by several Asian leaders with respect to U.S. support for a somewhat larger Japanese defense effort. As we have made clear several times, the U.S. intends to maintain its defensive role in the Pacific and in East Asia. But we can do so more effectively, and contribute to Free World security including the security of the oil states of the Middle East, if Japan increases its own ability to defend itself and, with our cooperation, its surrounding waters and sea lanes. I believe that such a posture on the part of both our countries will be quite acceptable—even welcomed—by our mutual friends in Asia.

In asking Japan to do more in its own self-defense, the United States is mindful of the constitutional and political constraints with respect to Japan's defense role. We are not suggesting that Japan take on any missions that would violate these constraints, and we do not expect Japan to play a regional military role in East Asia.

Those differences we have with Japan on defense issues are not over goals but rather over the pace at which we should proceed. We welcome Japan's decision to increase its defense expenditures and are encouraged by Prime Minister Nakasone's statements indicating that the new Japanese government is committed to increasing Japan's self defense capability. Those who would like to see Japan more sharply increase its share of the Free World's defense burden should not lose sight of the fact that while Japan, from an admittedly much smaller base, was increasing its defense budget in the 1970s at an annual real growth rate of about eight percent, the NATO yearly increase was about 2.5 percent, and the United States was actually decreasing its budget by about two percent a year. Now, all of us should do more, even when we are trying hard to reduce our national budget deficits.

In discussing U.S.-Japan relations, it is not sufficient to focus only on handling the immediate bilateral issues we face. We must not neglect the longer term challenge of expanding the web of ties between our two societies. It is essential that we develop a greater breadth and depth of understanding of each other's society and culture to ensure that inevitable bilateral probelms do not threaten the basic relationship.

Our overall relations remain strong. But we must not ignore signals of distress, and such signals are now flashing mightly in the U.S. Now is the time for more rapid action—for both our futures.

In conclusion I would like to suggest that the history of the twentieth century has taught us that the preservation of international peace and security depends on equitable international economic relations and a sharing of the burdens of defending the democratic way of life. Japan and the United States have the opportunity today to demonstrate that despite different historical and cultural antecedents, two peoples firmly committed to the ideals of democracy and prosperity and determined to resolve the inevitable differences that arise between great nations can serve as a model for progressive international relations. If we succeed in meeting today's difficult and complex challenges, future generations will look back on the decade of the 1980s as a time when the world community took a giant step forward in promoting and preserving a stable and beneficial world order over the demands of short-sighted nationalism. If we fail, the future for all of us may be very bleak indeed.

MESSAGE FROM THE HOUSE

At 1:42 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that pursuant to the provisions of section 2(a) of Public Law 85-874, as amended, the Speaker appoints as members of the Board of Trustees of the John F. Kennedy Center for the Performing Arts the following Members on the part of the House: Mr. YATES, Mr. WILSON, and Mr. MCDADE.

The message also announced that pursuant to the provisions of section 5(b) of Public Law 93-642, the Speaker appoints as members of the Board of Trustees of the Harry S. Truman Scholarship Foundation the following Members on the part of the House: Mr. SKELTON and Mr. TAYLOR.

The message further announced that pursuant to the provisions of section 1(b)(2) of Public Law 94-399, the Speaker appoints as members of the Temporary Commission on Financial Oversight to the District of Columbia the following Members on the part of the House: Mr. DELLUMS, Mr. DIXON, and Mr. MCKINNEY.

The message also announced that pursuant to the provisions of section 1, Public Law 372, 84th Congress, as amended, the Speaker appoints as members of the Franklin Delano Roosevelt Memorial Commission the following Members on the part of the House: Mr. HOWARD, Ms. FERRARO, Mr. FISH, and Mr. GREEN.

The message further announced that pursuant to the provisions of section 14(b) of Public Law 96-296, the Speaker appoints as members of the Motor Carrier Ratemaking Study Commission the following Members on the part of the House: Mr. ROE, Mr. SEIBERLING, and Mr. SHUSTER.

The message also announced that pursuant to the provisions of 16 United States Code 715a, as amended, the Speaker appoints as members of the Migratory Bird Conservation Commission the following Members on the part of the House: Mr. DINGELL and Mr. CONTE.

The message further announced that pursuant to the provisions of 44 United States Code 2501, as amended, the Speaker appoints Mr. BATES as a member of the National Historical Publications and Records Commission.

The message also announced that pursuant to the provisions of section 4(a), Public Law 94-118, the Speaker appoints as members of the Japan-United States Friendship Commission the following Members on the part of the House: Mr. ZABLOCKI and Mr. CONTE.

The message further announced that pursuant to the provisions of section 2 of Public Law 96-388, as amended, the Speaker appoints as members of the U.S. Holocaust Memorial Coun-

cil the following Members on the part of the House: Mr. YATES, Mr. LEHMAN of Florida, Mr. SOLARZ, Mr. GARCIA, and Mr. GREEN.

MEASURE ORDERED HELD AT DESK

The Committee on Small Business was discharged from the further consideration of the bill (H.R. 1043) to amend section 8(e) of the Small Business Act, and the bill was ordered held at the desk by unanimous consent.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-258. A communication from the Administrator of the National Aeronautics and Space Administration, transmitting, pursuant to law, a report that there were no scientific and professional positions established in NASA during calendar year 1982; to the Committee on Governmental Affairs.

EC-259. A communication from the Vice President of the Mortgage Corporation (Human Resources), transmitting, pursuant to law, the annual report of the Federal Home Loan Mortgage Corporation Employees' Pension Trust for the plan year ending December 31, 1981; to the Committee on Governmental Affairs.

EC-260. A communication from the Comptroller of the Washington Gas Light Company, transmitting, pursuant to law, a certified copy of the balance sheet of the Company as of December 31, 1982; to the Committee on Governmental Affairs.

EC-261. A communication from the Executive Vice President of the Potomac Electric Power Company, transmitting, pursuant to law, a copy of the balance sheet of the Company as of December 31, 1982; to the Committee on Governmental Affairs.

EC-262. A communication from the Secretary to the Council of the District of Columbia, transmitting, pursuant to law, a copy of Council Resolution 4-498; to the Committee on Governmental Affairs.

EC-263. A communication from the Assistant Attorney General (Office of Legislative Affairs), transmitting, pursuant to law, a report regarding activities initiated pursuant to the Civil Rights of Institutionalized Persons Act during fiscal year 1982; to the Committee on the Judiciary.

EC-264. A communication from the Executive Secretary of the National Music Council, transmitting, pursuant to law, the audit report of the Council for the fiscal period ending April 30, 1982; to the Committee on the Judiciary.

EC-265. A communication from the Secretary of Labor, transmitting, pursuant to law, the annual report of the Department on the administration of the Black Lung Benefits Act during 1981; to the Committee on Labor and Human Resources.

EC-266. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Need For Greater Efforts To Recover Costs Of Food Stamps Obtained Through Errors Or Fraud"; to the Committee on Agriculture, Nutrition, and Forestry.

EC-267. A communication from the Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a cumulative report on budget rescissions and deferrals for February 1983; pursuant to the order of January 30, 1975, referred jointly to the Committee on the Budget and the Committee on Appropriations.

EC-268. A communication from the Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics), transmitting, pursuant to law, a report on the performance of Department of Defense Commercial and Industrial-Type functions; to the Committee on Armed Services.

EC-269. A communication from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, a report on the conversion of the inactive ship maintenance function at the Inactive Ship Maintenance Facility, Bremerton, Washington, to performance by contract; to the Committee on Armed Services.

EC-270. A communication from the General Counsel of the Federal Emergency Management Agency, transmitting a draft of proposed legislation to authorize appropriations for civil defense programs for fiscal years 1984 and 1985, and for other purposes; to the Committee on Armed Services.

EC-271. A communication from the Secretary of Defense, transmitting, pursuant to law, a report on the standardization of equipment within NATO, dated January 1983; to the Committee on Armed Services.

EC-272. A communication from the Deputy Assistant Secretary of Defense (Installations), transmitting, pursuant to law, a copy of the Base Structure Annex to the Defense Manpower Requirements Report for fiscal year 1984; to the Committee on Armed Services.

EC-273. A communication from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to authorize certain construction at military installations for fiscal year 1984, and for other purposes; to the Committee on Armed Services.

EC-274. A communication from the Secretary of the Treasury, transmitting, pursuant to law, a report on activities under the Olympic Commemorative Coin Act for the period October 1 through December 31, 1982; to the Committee on Banking, Housing, and Urban Affairs.

EC-275. A communication from the President and Chairman of the Export-Import Bank of the United States, transmitting, pursuant to law, a report on loan, guarantee, and insurance transactions supported by Eximbank during December 1982 to communist countries; to the Committee on Banking, Housing, and Urban Affairs.

EC-276. A communication from the Chairman of the Securities and Exchange Commission, transmitting, pursuant to law, the appropriations request of the Commission for fiscal years 1984 through 1986; to the Committee on Banking, Housing, and Urban Affairs.

EC-277. A communication from the Chairman of the Marine Mammal Commission, transmitting, pursuant to law, the tenth annual report of the Commission covering calendar year 1982; to the Committee on Commerce, Science, and Transportation.

REPORTS OF COMMITTEES

The followng reports of committees were submitted:

By Mr. McCLURE, from the Committee on Energy and Natural Resources, without amendment:

S. 420: A bill to quiet title and possession with respect to a certain private land claim in Livingston Parish, Louisiana (Rept. No. 98-4).

S. 459: A bill to authorize and direct the Secretary of the Interior to convey, by quitclaim deed, all right, title, and interest of the United States in and to certain lands that were withdrawn or acquired for the purpose of relocating a portion of the City of American Falls out of the area flooded by the American Falls Reservoir (Rept. No. 98-5).

S. 473: A bill to authorize the Secretary of the Interior to acqure certain lands by exchange for addition to Effigy Mounds National Monument in the State of Iowa, and for other purposes (Rept. No. 98-6).

By Mr. McCLURE, from the Committee on Energy and Natural Resources, without amendment:

S. 577: An original bill to provide for the conveyance of certain Federal lands adjacent to Orchard and Lake Shore Drives, Lake Lowell, Boise project, Idaho (Rept. No. 98-7).

By Mr. McCLURE, from the Committee on Energy and Natural Resources, without amendment and with a preamble:

S.J. Res. 25: Joint resolution redesignating the Saint Croix Island National Monument in the State of Maine as the "Saint Croix Island International Historic Site" (Rept. No. 98-8).

By Mr. ANDREWS, from the Select Committee on Indian Affairs, without amendment:

S. 143: A bill to authorize the Twenty-nine Palms Band of Luiseno Mission Indians to lease for ninety-nine years certain lands held in trust for such band.

S. 304: A bill to hold a parcel of land in trust for the Burns Paiute Tribe.

S. 366: A bill to settle certain claims of the Mashantucket Pequot Indians.

S. 419: A bill to provide that per capita payments to Indians may be made by tribal governments, and for other purposes.

By Mr. WEICKER, from the Committee on Small Business:

Special Report entitled "Legislative and Oversight Activities During the 97th Congress By The Committee on Small Business (Rept. No. 98-9)

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. McCLURE, from the Committee on Energy and Natural Resources:

J. J. Simmons, III, of Oklahoma, to be Under Secretary of the Interior.

(The above nomination was reported from the Committee on Energy and Natural Resources with the recommendation that it be approved, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. PERCY from the Committee on Foreign Relations, without amendment:

Treaty Doc. 98-1. An Amendment to the protocol of November 30, 1972 (TIAS 9948) to the Convention of November 22, 1928,

concerning International Expositions (TIAS 6548, 6549) (Exec. Rept. No. 98-3).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. GARN:

S. 556. A bill to provide for the reinstatement of U.S. oil and gas lease applications numbered U-26845, U-26504, and U-26505; to the Committee on Energy and Natural Resources.

By Mr. DECONCINI:

S. 557. A bill to amend the Internal Revenue Code of 1954 to implement a flat-rate tax system; to the Committee on Finance.

By Mr. JACKSON:

S. 558. A bill to amend the Geothermal Steam Act of 1970—30 U.S.C. 1001 et seq.—to expedite exploration and development of geothermal resources; to the Committee on Energy and Natural Resources.

By Mr. PROXMIRE:

S. 559. A bill to establish a Federal Bank Commission to administer all Federal laws relating to the examination, supervision, and regulation of the banking business both foreign and domestic, including such laws relating to the chartering of banking institutions and their branching activities, bank holding companies and their activities, Edge Act Corporations and their activities, and the examination, supervision, and regulation of banking institutions under Federal law; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. HOLLINGS (for himself, Mr. BENTSEN, Mr. GOLDWATER, and Mr. HEFLIN):

S. 560. A bill to authorize and regulate the launch of space objects by nongovernmental entities, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. PERCY (for himself, Mr. ABDNOR, and Mr. THURMOND):

S. 561. A bill to authorize a youth minimum wage differential under the Fair Labor Standards Act of 1938, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. PERCY (for himself and Mr. DIXON):

S. 562. A bill to authorize the Secretary of the Treasury to grant extensions of the 5-year period within which private foundations must dispose of excess business holdings; to the Committee on Finance.

By Mr. MATHIAS:

S. 569. A bill to preserve, protect, and maintain the original boundary stones of the Nation's Capital; to the Committee on Energy and Natural Resources.

S. 570. A bill for the relief of Chang Ai Bae; to the Committee on the Judiciary.

By Mr. ROTH.

S. 571. A bill to amend the Federal Property and Administrative Services Act of 1949 to make Federal surplus property more accessible to local emergency preparedness and volunteer firefighting organizations and to authorize and direct the Federal Emergency Management Agency to recommend available Federal surplus to the Administrator of the General Services Administration, and for other purposes; to the Committee on Governmental Affairs.

By Mr. DODD (for himself, Mr. CRANSTON, Mr. KENNEDY, Mr. RIEGLE, and Mr. TSONGAS):

S. 572. A bill to provide emergency assistance for children; to the Committee on Finance.

By Mr. DODD (for himself and Mr. PROXMIRE):

S. 573. A bill to require depository institutions to disclose to their customers their practices relating to the availability of funds in connection with check deposits, to require the timely payment of interest on deposits to interest bearing accounts, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. PRYOR (for himself and Mr. BUMPERS):

S. 574. A bill for the relief of Kurt Perwolf, his wife Hilda Perwolf, and his son Christian Perwolf; to the Committee on the Judiciary.

By Mr. BOREN:

S. 575. A bill to provide emergency price and income assistance to U.S. farmers so as to assure consumers an adequate supply of food and fiber reasonable prices, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. DOLE (by request):

S. 576. A bill to provide for prospective payment rates under medicare for inpatient hospital services, and for other purposes; to the Committee on Finance.

By Mr. McCLURE, from the Committee on Energy and Natural Resources:

S. 577. An original bill to provide for the conveyance of certain Federal lands adjacent to Orchard and Lake Shore Drives, Lake Lowell, Boise project, Idaho; from the Committee on Energy and Natural Resources; placed on the calendar.

By Mr. SIMPSON:

S. 578. A bill to amend title 38, United States Code, to provide for adult day health care services for veterans, to authorize the Veterans' Administration to administer a community residential care program, to establish a presumption of service connection for former prisoners of war suffering from dysthymic disorder and to revise and clarify eligibility for reimbursement of expenses of travel for Veterans' Administration health care; to the Committee on Veterans' Affairs.

By Mr. METZENBAUM (for himself, Mr. RIEGLE, Mr. BAUCUS, Mr. LEVIN, Mr. RANDOLPH, Mr. BURDICK, Mr. PELL, and Mr. SARBANES):

S. 579. A bill to provide that the amount of unnegotiated social security checks shall be returned to the social security trust funds; to the Committee on Finance.

By Mr. SIMPSON:

S. 580. A bill to amend title 10, United States Code, to establish the Prisoner of War Recognition Medal; to the Committee on Armed Services.

By Mr. HOLLINGS:

S.J. Res. 40. Joint resolution to designate the week of April 17, 1983, through April 23, 1983, as "National Architecture Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MELCHER:

S. Res. 70. Resolution to encourage the delay of the implementation of withholding of interest; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DECONCINI:

S. 557. A bill to amend the Internal Revenue Code of 1954 to implement a flat rate tax system; to the Committee on Finance.

FLAT RATE TAX SYSTEM

Mr. DECONCINI. Mr. President, I am today introducing a bill that will have the effect of restructuring our entire method of Federal income taxation, both personal and corporate. Last year, no less than five bills were introduced in the Senate that provided for reform along the lines of a flat

rate tax. This level of legislative initiative, so close on the heels of ERTA and TEFRA manifest the profound dissatisfaction of many with our current tax system.

A complete overhaul of our tax system is long overdue. The majority of American people view the Tax Code as too complex and uncertain and riddled with loopholes benefitting the wealthy. It is seen as promoting economic inefficiencies at a time of more than 10-percent unemployment and decreasing productivity.

As is so clearly pointed out by the final report of Citizen's Choice National Commission on Taxes and the IRS, fear and distrust are the responses the tax code creates in our populace. The perception of the tax laws as unjust threatens the self-assessment core of our current tax system. One need only look at the untaxed and burgeoning underground economy or the widespread advertising for tax shelters and tax avoidance schemes to see that we are becoming a nation of tax evaders.

We must return to the basic principles upon which a sound tax system must stand: Equity, efficiency, and simplicity. We must get rid of all the personal tax preferences, special deductions and credits, exclusions from income and such. These only lead to contempt for our tax system, endless pressures to create loopholes for some privileged group, and use of the tax code to indirectly further some purpose that could not be achieved through normal expenditures. Constituents in my State are fed up with our present system. I have repeatedly been urged to do something, anything, to restore sanity to the way we obtain our Federal revenues. Simplification and lower rates are what the people are demanding. The solution is a modified flat rate tax structure.

I am proposing that in the taxable year commencing January 1, 1985, and thereafter, that a flat percentage rate of tax be applied to all forms of personal and corporate income.

The flat rate income tax, while not a new idea, is an idea whose time has come. Favorable comment by scholars and public figures alike are becoming increasingly frequent. The administration recently expressed interest and the Treasury Department is conducting feasibility studies of various related proposals.

Serious work on the subject has been done in the recent past by an assortment of economists and political writers ranging from William F. Buckley's book, "Four Reforms," published a decade ago, to very recent studies completed by Dr. Robert Hall and Dr. Alvin Rabushka of the Hoover Institute.

During the midseventies under the direction of then Secretary of Treasury William Simon, the Treasury Department did ground breaking work on tax reforms that can be found in the publication "Blueprints for Basic Tax Reform." Simon followed this effort by chairing an American Enterprise Institute advisory council on tax policy. This led to publication of "Reforming the Income Tax System" authored by Simon and the AEI staff which makes a compelling case for the need to restructure the tax system.

I became intrigued with the possibilities of a flat rate income tax after having seen a movie produced by Dr. Rabushka, a fellow at the Hoover Institute, on the economy and tax structure of Hong Kong. It presented a clear picture of the benefits of relatively low rate of taxation applied roughly equally on all sources of income. The experience of Hong Kong was that, because of their low flat rate structure, the incentive to produce was not reduced as the taxpayer reached increasingly higher marginal rates as is the result in this country. Indeed, the city experienced tax surpluses. I have since discussed the theories of a flat rate tax with Dr. Rabushka and others and have concluded that this reform can restore the incentives to save, invest and produce, which are essential to the revitalization of our economy.

Last year I introduced the first flat rate tax bill in the Senate. My bill directed the Secretary of the Treasury to draft a flat rate tax system implementing the guidelines and policies set out in the bill. In the past year, considerable progress has been made in ironing out difficulties in the flat rate tax, and in defining and refining the issues. A series of conferences sponsored by Citizen's Choice has greatly aided development of tax reform issues. I commend these efforts coordinated by Tom Donahue and John Lynch of the Chamber of Commerce and Citizen's Choice. Other groups such as the National Taxpayer's Union, led by Jim Davidson and David Keating, have made enormous progress in educating the public on tax matters and bringing the views of the public before Congress. It is their work and the continued efforts of individuals such as Jim Jones of Blanco, Tex., who have brought the good news of simple, fair taxation to the American public.

Dr. Hall and Dr. Rabushka have recently published their book, "Low Tax, Simple Tax, Flat Tax," reflecting an outstanding scholarly effort directed at forging a workable flat rate income tax system. They detail the problems of the present system and provide an exemplary discussion of how the flat rate tax will work.

As a result of this recent activity and enthusiasm, I now feel it is helpful to attempt to legislate actual tax law rather than mere guidelines as my previous bill did.

My bill replaces subtitle A of the Internal Revenue Code of 1954 with the bare essentials of a flat-rate tax code, trusting the implementation and regulation to the Treasury Department. This tax law applies the principles that I set out in my previous guidelines bill. These are:

First, all income should be taxed only once and as close as possible to the source.

Second, all income should be taxed at the same low marginal rate. I have set this rate at 19 percent in order to equal current revenues.

Third, the poorest households should pay no tax.

Fourth, all tax returns should be simple enough to fit on a single page.

This bill is not offered as the sole embodiment of the tax reform cry of the American taxpayer. Instead, I offer this legislation as a jumping off point for further development of this issue. I hope that discussion and hearings like those of the Senate Finance Committee chaired by Senator DOLE in September 1982, can result in a viable tax reform by bringing together the principles of my tax bill and those of my distinguished colleagues, Senator QUAYLE, Senator HELMS, Senator BRADLEY, and Senator GRASSLEY, all responsible legislators responding to the groans of the taxpayer who bears the weight of our monstrous system. Their initiative and innovation is to be applauded and I hope from this we may devise a plan to remove the tax shackles on our economy and our taxpayers.

I recognize that any fundamental change in our tax law will involve serious transitional problems, but short-term difficulties should not prevent us from adopting a tax structure that will serve us well for years to come.

The essence of what a good tax system must contain was outlined by former Secretary of the Treasury Mellon in his book "Taxation: The People's Business":

The problem of the Government is to fix rates which will bring in a maximum amount of revenue to the Treasury and at the same time bear not too heavily on the taxpayer or on business enterprises. A sound tax policy must take into consideration three factors. It must produce sufficient revenue for the Government; it must lessen, so far as possible, the burden of taxation on those least able to bear it; and it must also remove those influences which might retard the continued, steady development of business and industry on which, in the last analysis, so much of our prosperity depends.

Furthermore, a permanent tax system should be designed not merely for one or two years nor for the effect it may have on any given class of taxpayers, but should be worked out with regard to conditions over a long period and with a view to its ultimate

effect on the prosperity of the country as a whole * * *

I have never viewed taxation as a means of rewarding one class of taxpayers or punishing another. If such a point of view ever controls our public policy, the traditions of freedom, justice and equality of opportunity, which are the distinguishing characteristics of our American civilization, will have disappeared and in their place we shall have class legislation with all its attendant evils. The man who seeks to perpetuate prejudice and class hatred is doing America an ill service. In attempting to promote or defeat legislation by arraying one class of taxpayers against another, he shows a complete misconception of those principles of equality on which the country was founded.

Any man of energy and initiative in this country can get what he wants out of life. But when that initiative is crippled by legislation or by a tax system which denies him the right to receive a reasonable share of his earnings, then he will no longer exert himself and the country will be deprived of the energy on which its continued greatness depends.

I believe that a flat rate income tax, by restoring incentives and closing present inequalities in the tax law, is the key to economic recovery and long term prosperity.

I ask unanimous consent that a copy of the bill be printed in the RECORD and that several recent articles on related issues also be reproduced in the RECORD.

There being no objection, the bill and articles were ordered to be printed in the RECORD, as follows:

S. 557

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That (a) subtitle A of the Internal Revenue Code of 1954 is amended to read as follows:

"Subtitle A—Income Taxes

"Chapter 1. Computation of taxable income.
"Chapter 2. Determination of tax liability.
"Chapter 3. Exempt organizations.
"Chapter 4. Withholding.

"Chapter 1—COMPUTATION OF TAXABLE INCOME

"Sec. 101. Compensation defined.
"Sec. 102. Business receipts defined.
"Sec. 103. Cost of business inputs defined.
"Sec. 104. Cost of capital equipment, structures, and land defined.
"Sec. 105. Business taxable income defined.

"SEC. 101. COMPENSATION DEFINED.

"(a) IN GENERAL.—Compensation means all cash amounts paid by an employer or received by an employee, including wages, salaries, pensions, bonuses, prizes, and awards.

"(b) CERTAIN ITEMS INCLUDED.—Compensation includes—

"(1) the cash equivalent of any financial instrument conveyed to an employee, measured as market value at the time of conveyance; and

"(2) workman's compensation and other payments for injuries or other compensation for damages.

"(c) CERTAIN ITEMS EXCLUDED.—Compensation excludes—

"(1) reimbursements to employees by employers for business expenses paid by the taxpayer in connection with performance by him or her of services as an employee;

"(2) goods and services provided to employees by employers, including but not limited to medical benefits, insurance, meals, housing, recreational facilities, and other fringe benefits; and

"(3) wages, salaries, and other payments for services performed outside the United States.

"SEC. 102. BUSINESS RECEIPTS DEFINED.

"Business receipts are the receipts of a business from the sale or exchange of products or services produced in or passing through the United States. Business receipts include—

"(1) gross revenue, including sales and excise taxes, from the sale or exchange of goods and services;

"(2) fees, commissions, and similar receipts, if not reported as compensation;

"(3) gross rents;

"(4) royalties;

"(5) gross receipts from the sale of plant, equipment, and land;

"(6) the market value of goods, services, plant, equipment, or land provided to its owners or employees;

"(7) the market value of goods, services, and equipment delivered from the United States to points outside the United States, if not included in sales; and

"(8) the market value of goods and services provided to depositors, insurance policyholders, and others with a financial claim upon the business, if not included in sales.

"SEC. 103. COST OF BUSINESS INPUTS DEFINED.

"(a) IN GENERAL.—The cost of business inputs is the cost of purchases of goods, services, and materials required for business purposes.

"(b) CERTAIN ITEMS INCLUDED.—The cost of business inputs includes—

"(1) the actual amount paid for goods, services, and materials, whether or not resold during the year;

"(2) the market value of business inputs brought into the United States; and

"(3) the actual cost, if reasonable, of travel and entertainment expenses for business purposes.

"(c) CERTAIN ITEMS EXCLUDED.—The cost of business inputs excludes purchases of goods and services provided to employees or owners, unless these are included in business receipts.

"SEC. 104. COST OF CAPITAL EQUIPMENT, STRUCTURES, AND LAND DEFINED.

"The cost of capital equipment, structures, and land includes any purchases of these items for business purposes. In the case of equipment brought into the United States, the cost is the market value at time of entry into the United States.

"SEC. 105. BUSINESS TAXABLE INCOME DEFINED.

"Business taxable income is business receipts less the cost of business inputs, less compensation paid to employees, and less the cost of capital equipment, structures, and land.

"Chapter 2—DETERMINATION OF TAX LIABILITY

"Sec. 201. Personal allowances.
"Sec. 202. Compensation tax.
"Sec. 203. Business tax.

"SEC. 201. PERSONAL ALLOWANCES.

"(a) IN GENERAL.—For the year 1983, personal allowances are—

"(1) For married taxpayers filing jointly, $6,700. A taxpayer is considered married if he was married at the end of the year or his spouse died during the year.

"(2) For heads of households, $6,000. A taxpayer is a head of a household if he is not married, and maintains as his home a household which is the principal home of a dependent son, stepson, daughter, stepdaughter, mother, or father of the taxpayer, and the taxpayer provides more than half the support for the dependent.

"(3) For single taxpayers, $4,100.

"(4) For each dependent, $810. A dependent is a son, stepson, daughter, stepdaughter, mother, or father of the taxpayer, for who the taxpayer provides more than half support.

"(b) ADJUSTMENTS.—Each year, personal allowances rise by the proportional increase from the beginning to the end of the immediately preceding year in the Consumer Price Index of the Department of Commerce.

"SEC. 202. COMPENSATION TAX.

"Each individual employed at any time during the year will pay a tax of 19 percent of his compensation less his personal allowance, or no tax if his compensation is less than his personal allowance.

"SEC. 203. BUSINESS TAX.

"(a) BUSINESS DEFINED.—Each sole proprietorship, partnership, and corporation constitutes a business. Any organization or individual not specifically exempt under chapter 3, with business receipts, is a business.

"(b) COMPUTATION OF TAX.—Each business will pay a tax of 19 percent of its business taxable income, or zero if business taxable income is negative.

"(c) FILING UNITS.—A business may file any number of business tax returns for its various subsidiaries or other units, provided that all business receipts are reported in the aggregate, and provided that each expenditure for business inputs is reported on no more than one return.

"(d) CARRY-FORWARD OF LOSSES.—When business taxable income is negative, the negative amount may be used to offset positive taxes in future years. The amount carried foward from one year to the next is augmented according to an interest rate equal to the average daily yield on three-month Treasury Bills during the first year. There is no limit to the amount or the duration of the carry-forward.

"Chapter 3—EXEMPT ORGANIZATIONS

"Sec. 301. Exempt organizations.

"SEC. 301. EXEMPT ORGANIZATIONS.

"Organizations exempt from the business tax are—

"(1) State and local governments, and their subsidiary units; and

"(2) educational, religious, charitable, philanthropic, cultural, and community service organizations that do not return income to individual or corporate owners.

"Chapter 4—WITHHOLDING

"Sec. 401. Withholding.

"SEC. 401. WITHHOLDING.

"Each employer, including exempt organizations, will withhold from the wages, salaries, and pensions of its employees, and remit to the Internal Revenue Service, an amount computed as follows: 19 percent of the excess of compensation in each pay period over the employee's annual personal allowance, prorated for the length of the pay period. Every employee will receive a credit against tax for the amount withheld.".

(b) The amendment made by this section shall apply to taxable years beginning after December 31, 1984.

A FLAT-RATE TAX

(By Dennis DeConcini)

One legislative function to which members of Congress enjoy applying themselves is framing resolutions that cite and com-

memorate days, weeks, months and years for reason of one distinction or another. That this service is, however, rendered without any special prescience is proved by Congress' failure to anticipate and to take advance action in denoting that 1982 has become, de facto, the Year of the Flat-Rate Tax. Nine bills, six in the House and three in the Senate, have been introduced during the 97th Congress, with seven of the bills appearing during the second session, 1982. Such a profusion of legislative creativity, especially coming on the heels of the Economic Recovery Tax Act of 1981, is clear evidence of the national dissatisfaction with the existing Internal Revenue Code.

The Federal tax system consists chiefly of the personal income tax, the corporate income tax, and the payroll tax for Social Security. The personal income tax has steeply progressive rates rising to a maximum marginal rate of 50 percent. A wide and growing variety of exclusions, deductions, and exemptions now reduces by half the total national income subject to the income tax.

INHIBIT SAVINGS

One important consequence of Federal taxes' impact upon personal income is in the way they discourage savings and investment. Our country's rate of savings and investment has steadily declined and many vehemently argue that this is closely linked with the parallel decline of our national economy. Income is first taxed when earned and again when savings earn interest. If returns on savings are put into the corporate sector, they are taxed twice, once as corporate profits, and again at the household level when dividends are paid. Such a system must attenuate individual incentives to work, save and invest. For many taxpayers, protecting a dollar from tax incidence is worth twice as much as earning another dollar in income.

Prior to the 20th century, Federal revenues, comprising about 3 percent of GNP, were largely collected as customs duties. With the adoption of the 16th Amendment in 1913 establishing the Federal income tax, followed by the Social Security payroll tax in the 1930s, Federal revenues have grown to consume 22 percent of GNP.

Problems caused the economy by taxation have been greatly exacerbated by the inflation of recent years. Escalating inflation in the 1970s pushed growing numbers of taxpayers into high tax brackets originally only meant for the wealthy. "Bracket creep" is now recognized as a major and deleterious fact of economic life. In 1920, 15,742 returns were filed with adjusted gross income over $50,000. By 1979, there were over 2 million and the marginal tax rate at this level had soared from 32 to 59 percent. The income tax reductions instituted in 1981 respond to the problem, but really have had little but a stabilizing effect.

THE PROGRESSIVE INCOME TAX: UP & DOWNS

	Number of returns with adjusted gross income above $50,000	Marginal tax rate at $50,000 (percent)	Value of 50,000 1920 dollars
1920	15,742	32	$50,000
1928	43,184	18	58,479
1939	12,193	34	72,115
1948	69,005	75	41,609
1958	183,399	75	34,642
1968	384,017	62	28,790
1979	2,341,481	59	13,800

WIDESPREAD DELINQUENCY AND CHEATING

Tax avoidance and delinquency have become increasingly prevalent as Americans find their incomes undercut by bracket creep. Recent research and Internal Revenue Service reports indicate widespread tax abuses of deductions and evasion on interest, dividend, and other income. Today's marginal tax rates of 50 percent from the personal tax, 46 percent from the corporate tax, and 14 percent from the payroll tax are converting many Americans into tax evaders, or at the least tax avoiders, through channeling of their investments into often unproductive tax shelters. Estimates of the untaxed underground economy range up to $400 billion.

As the recession of 1980 became that of 1981 and, now, of 1982, many economists, tax experts and policymakers believe the current income tax system is significantly culpable. The income tax is an intolerable burden on the economy and must be replaced. The mass of the people view the tax code as too complex and uncertain. They believe it is riddled with loopholes benefiting the wealthy and corporations at the expense of the middle class. It is seen as promoting economic inefficiencies in a time of nearly 10 percent unemployment and decreasing productivity.

FLAT-RATE ALTERNATIVE

The flat-rate tax, on the other hand, is the antithesis of the current system. It is based upon the principles of sound taxation: equity, efficiency and simplicity. These were what guided Treasury Secretary William Simon during the department's development of "Blueprints for Basic Tax Reform" in the mid 1970s. Most recently, Dr. Alvin Rabushka and Dr. Robert Hall of the Hoover Institution set themselves by these principles as they undertook the ambitious research undergirding their developmental work aimed at creating a new tax structure based on a flat rate. They, like so many others, conclude that it is no longer feasible to tinker with the existing tax code; we must begin afresh.

The flat-rate concept has traditionally been associated with conservative analysts such as Milton Friedman and William F. Buckley, Jr. Nevertheless, as the evidence of the harmful effects of the current income tax system has mounted, more of my moderate and liberal colleagues have begun to give serious consideration to the idea. The exact form that an eventual flat-rate structure would assume varies in a wide range of proposals. These include:

1. a tax on gross income;

2. a flat rate imposed against individual income, but leaving the present corporate tax structure in place (the bills retain deductions and exemptions in varying degrees);

3. a so-called flat rate with two tiers;

4. tiered with additional surtaxes for each tier; and

5. my proposal, which would tax both individual and business income at the same rate, while eliminating most tax preferences.

The rates of tax within each of these proposals vary, as do the amounts and types of deductions, exemptions, and exclusions that would be retained. While there is little agreement on the specifics, it is evident that the many proponents of flate-rate taxes have all seen something in the characteristics of a flat-rate system that suggest it is sound enough to serve as the centerpiece around which a cogent Federal fiscal and social policy can be administered. Perceived benefits of a flat rate include:

Honesty. Billions of dolars of taxes will be paid that are now lost because of (a) claims for exemptions, (b) deductions, and (c) income that goes unreported. It would be as easy for the IRS to administer the flat-rate tax as for the taxpayer to understand it.

Savings on time and compliance costs. It is estimated that $60 billion was spent on tax compliance last year and an inestimable amount of hand wringing and headaches must have accompanied that monetary expense. These huge varied costs would be essentially saved.

FLAT-RATE TAX BILLS IN CONGRESS

Bill number	Date	Sponsor(s)	Title	Tax rate(s)	Exemptions and deductions	Business tax provisions
H.R. 4821	October 22, 1981	Representative George Hansen (R. Idaho).	Tax Simplification Act	14 percent flat rate	$1,000 per person deductions for religious contributions and catastrophic medical expenses.	None.
H.R. 5513	February 10, 1982	Representative Philip Crane (R. Ill).	Flat Rate Tax Act of 1982	10 percent flat rate	$2,000 per person	None.
S. 2200	March 15, 1982	Senator Jesse Helms (R. N.C.)	do	do	do	Do.
H.R. 6070	April 5, 1982	Representative Leon Panetta (D. Calif.).	Income Tax Simplification Act of 1982.	19 percent flat rate	Personal tax credit: $1,000 taxpayer, $1,000 spouse, $200 each dependent. Business expenses and losses.	Graduated tax of 3 to 15 percent.
H.R. 6352	May 11, 1982	Representative Ron Paul (R. Tex.).	Flat Rate Tax Act of 1982	10 percent flat rate above $10,000.	None	None.
S. 2147	March 1, 1982	Senator Dennis DeConcini (D. Ariz.).	Flat-rate income tax	Maximum 20 percent flat rate	Estimated [2] $4,040 (single), $6,735 (joint), $810 each dependent.	Flat-rate on gross revenues. Deductions for capital expenses and for goods and services.
S. 2557	May 20, 1982	Senator Dan Quayle (R. Ind.)	Self [1] Tax plan of 1982	18 percent flat rate above $17,500. 25 percent flat rate above $50,000.	$600 each dependent	20 percent flat rate. No multiple taxation. Deductions for ordinary and necessary expenses.

FLAT-RATE TAX BILLS IN CONGRESS—Continued

Bill number	Date	Sponsor(s)	Title	Tax rate(s)	Exemptions and deductions	Business tax provisions
H.R. 6944	August 5, 1982	Representative Richard Gephardt (D. Mo.).	Fair Tax Act of 1982	14 percent flat rate above $2,300 (single), $4,600 (joint).	$1,500 personal exemption. Retains selected deductions.	None.
S. 2817		Senator Bill Bradley (D. N.J.)	do	6 percent to 14 percent above $25,000 (single), $40,000 (joint).	do	Do.

[1] Simplicity. Efficiency. Low tax rates, and Fairness.
[2] Bill does not specify. Amounts indicated are in accompanying legislative material.

Accountability of government. The primary purpose of the income tax is to raise revenue. We cannot ignore the fact, however, that today's law has a major effect upon the nation's social policy. Many of the policies involved are worthy of support. We would be far more honest with the taxpayer, however, if we eliminated the "tax expenditures" [1] and openly made direct subsidy payments. The public would certainly become more aware of what their tax dollars were doing.

End bracket creep. Inflation has carried many taxpayers into marginal brackets meant only for the wealthy. No longer would the government be able to try to make up for its deficit financing by allowing ever greater amounts of real income to flow into its coffers despite the fact that no tax increase had been enacted.

Added productivity. By reducing the distortion built into the system by the varied impact of present tax laws, business decisions could be made in an environment that would reward efficiency and profitability.

Loopholes disappear. Any attempt to eliminate "loopholes" is generally met with such fierce opposition by the affected beneficiaries that attempts are rarely successful. However, as Peter Brimelow [2] has pointed out, under a flat-rate structure this problem largely solves itself. A tax shelter would not be nearly as attractive if only 15-20 cents of a taxpayer's dollar were exposed to the personal income tax.

Incentives increase. If you can keep 80 cents of the last dollar you earn, rather than 50 cents, you are certainly likely to make the effort to earn more and more dollars. For most taxpayers, the price of leisure will rise relative to the price of income.

More equitable tax treatment. Because the definition of income would be broadened significantly under most flat-rate proposals, it is much more likely that individuals in similar income categories would also be taxed equally. The flat-rate tax would largely end grumbling to the effect that the other guy isn't paying his fair share. Moreover, almost all flat-rate proposals have the effect of substantially eliminating the Federal tax burden for those below the poverty level by increasing the amount of income in the zero tax bracket.

Marriage penalty eliminated. Under the current tax system, two married income-earners who file a joint return in all probability pay more in income taxes than they would if they filed separate returns as singles. By applying the same flat rate to both joint and single returns, the source of the penalty—marginal tax rate schedules based on filing status—would be eliminated.

[1] Forgiving of taxes in order to encourage or support some activity deemed to have social or economic value.

[2] Washington columnist of *Barron's National Business & Financial Weekly* and former economic counsel to Senator Orrin Hatch (R. Utah), chairman of the Senate Labor and Human Resources Committee.

Losers?

No matter what theoretical arguments can be marshalled for a flat-rate tax, the key political question to be faced is who will be adversely affected? There is general agreement—although a wide disparity in projections as to the degree—that the middle-income earner would find his or her taxes slightly increased, although I believe that within a relatively few years of implementation their rate will also decrease as the tax base broadens due to expected economic growth and surfacing of the underground economy which will have lost its "tax evasion" purpose for existing. The true cost or benefit is difficult to determine even when comparing individuals with similar incomes. For example, a typical $30,000-a-year salary-earner who rents an apartment now pays an average tax rate of 19 percent. If the flat-rate tax were set at 7 percent, the renter would be a winner, the homeowner a loser.

Advantages for Middle-Income Earners

Even if a taxpayer were faced with a slightly higher tax rate, a strong argument can be made that he or she would be better off in net terms within a flat-rate system. For instance, while the tax rate might go up 3 percent, the middle-income taxpayer might very well find substantial benefit in the system because it:

spares him the need of keeping the detailed tax records that are required for justifying today's tax exemptions;

ends the need for professional tax preparation assistance with its attendant costs;

saves substantial amounts of time that otherwise would have been devoted to tax preparation;

lifts the danger of being called in for harrowing audits of tax returns;

makes clear that other taxpayers are now also paying their fair share and that opportunities for cheating have cut back dramatically; and

likely generates a higher income upon which the tax rate is applied, as nonproductive tax sheltering is replaced by an environment conducive to aggressive economic activity that rewards efficiency and production.

The significance of each of these flat-rate tax implications upon the individual will vary. But, on the whole, I do not believe that any income class will ultimately suffer from the imposition of a flat rate. Lower-income-bracket earners will benefit from reduced tax burdens and middle-income earners will have at worst only mildly increased tax burdens that will be offset by factors listed above.

Inequities

In the case of higher-income-bracket taxpayers, winners and losers will be decided on the basis of the amount of income they are successfully sheltering today. In 1979, for example, about 20,000 taxpayers with adjusted gross incomes of more than $100,000 paid income taxes of more than 40 percent on that income. Another 20,000 families in the same income bracket paid income taxes of less than 15 percent.

Another cost of the present system that a flat rate would eliminate is the massive disrespect for government caused by the system's perceived loopholes. Everybody thinks the other guy is cheating. As Aaron Wildavsky [3] has noted, there is a pervasive sense that moral values are being subordinated to strategies for minimizing taxes. Consequently, the legitimacy afforded to government by the people, the respect that supports the authority to govern is being undermined.

Fetish of Progressivity

One major hurdle that must be met when proffering a flat-rate approach to taxation is the notion that a tax system must have progressivity to be fair. "One should pay according to ability," it is held. Nominally, our income tax rates are steeply progressive. But this widely-held credo is undermined by practical fact. Our effective tax rates are much less sharply inclined in practice than in theory. And the people know it! We are all aware of high-income individuals or corporations that manage to pay very little Federal income taxes.

Most flat-rate systems, to be sure, have a built-in element of progressivity. This is the consequence of the typically generous income-exclusion provision. For example, assuming that no taxes are levied upon the $0-$10,000 bracket, the individual earning $12,000 pays taxes on only 16.6 percent of his or her income. Someone with a $100,000 income, on the other hand, would pay taxes on 90 percent of his or her income.

The DeConcini Bill

On March 1, 1982, I introduced the first flat-rate proposal of the 97th Congress in the Senate. Senate bill 2147 was based entirely on the work of Drs. Robert Hall and Alvin Rabushka of the Hoover Institution. I gratefully acknowledge their assistance in developing economic models and the computations that form the foundation of my bill and the remainder of this article.

The bill rests on four principles:

1. All income should be taxed only once, as close to the source as possible.

2. All types of income should be taxed at the same rate.

3. The poorest households should pay no income tax.

4. Tax returns should be simple enough to fit on a single page.

The simple income tax imposes a low tax rate on a broad concept of total income. It replaces the personal income tax with an individual compensation tax. The corporate income tax would be supplanted by a business tax. The two together would provide increased incentives for saving and investment, a low marginal tax rate, and reasonable progressivity.

Consequences

If Federal spending can be held to the level proposed by the President in his budget for fiscal year 1983, or if any increases can be financed by user fees or earmarked taxes, then a 19 percent income tax rate would balance the budget by 1985. Even if spending is at the high level projected in the Congressional Budget Office's baseline budget, a tax rate of 19 percent would bring the Federal deficit down to $75 billion by 1987.

Under the President's spending proposals, the tax rates necessary to balance the budget starting in fiscal year 1983 would be 21 percent in that year, 20 percent in 1984, and 19 percent in 1985. Under the CBO projections, the tax rates necessary to balance the budget would be 23 percent in 1983 and 1984, 22 percent in 1985, 21 percent in 1986, and 20 percent in 1987.

I would recommend the adoption of a flat-rate tax at 19 percent starting in fiscal year 1983. This tax would bring moderate deficits during the current recession, but would commit the nation to a balanced budget within three years, if spending is kept at reasonable levels. Additionally, it would be my hope that through increased productivity and additional revenues to be expected from the taxation of economic activities now a part of the underground economy that the rates could be driven down to 16 percent by 1990.

The essence of what a good tax system must contain was outlined by former Secretary of the Treasury Andrew Mellon with these words:

"The problem of government is to fix rates which will bring in a maximum amount of revenue to the Treasury and at the same time bear not too heavily on the taxpayer or on business enterprises. A sound tax policy must take into consideration three factors. It must produce sufficient revenue for the Government; it must lessen, so far as possible, the burden of taxation on those least able to bear it; and it must also remove those influences which might retard the continued steady development of business and industry on which, in the last analysis, so much of our prosperity depends."

I feel a flat-rate tax structure can accomplish these purposes. Serious study and reflection on this theory is now underway with hearings having begun before various congressional committees. I do not predict early adoption of a new tax structure. If contemporary public support is a good indicator, however, the subject of a flat-rate tax will receive serious consideration and may well become a central issue in the political campaigns of 1984.

REACHING THE BOTTOMLINE

Beleaguered taxpayers must wonder how it is possible for Senator DeConcini's 19 percent flat-rate tax to produce the same revenue as the current Internal Revenue Code with its marginal tax rates of 14 to 50 percent. The Arizona Democrat's figures are based on the work of Professors Alvin Rabushka and Robert Hall of the Hoover Institution. Using President Reagan's February 1982 budget message and its estimates of Gross National Product and tax revenues, the economists reworked the figures to show how a flat-rate tax would work.

[Dollars in billions]

	1981	1982	1983	1984	1985
Gross national product [1]	$2,922	$3,159	$3,522	$3,881	$4,257
Tax base	$3,314	$2,502	$2,789	$3,074	$3,372
Allowances	$481	$535	$580	$620	$655
Taxable income	$1,833	$1,967	$2,210	$2,454	$2,717
Taxable income, fiscal year	$1,790	$1,933	$2,149	$2,393	$2,651
Revenue, personal and corporate income tax [1]	$347	$345	$370	$407	$450
Rate, same revenue (in percent)	19.4	17.8	17.2	17.0	17.0
Rate, zero deficit (in percent)			21.2	20.0	19.0
Revenue at 19 percent			$408	$455	$504
Budget deficit at 19 percent	$58	$99	$51	$29	$8

[1] Budget of the United States Government, Fiscal Year 1983.

Source: Alvin Rabushka and Robert Hall.

The first line of the table is the President's estimate of Gross National Product for calendar years 1981 to 1985. The next line is the Rabushka-Hall estimate for the tax base assuming the 1980 experience of 79 percent of GNP. The third line deducts aggregate personal allowances using estimates in the following amounts: married couple—$6,735, single person-$4,040; single head of household—$6,060; each dependent—$810. (These figures are for 1983 and are to be adjusted for projected inflation.)

The balance shown on the fourth line is the Rabushka-Hall estimate of taxable income. The next line shows taxable income for the fiscal year which is slightly smaller because the fiscal year occurs earlier in calendar time. The sixth line is the revenue the Reagan administration expects from personal and corporate income taxes. The next line is the DeConcini flat rate required to produce the same revenue that the President expects. The next line shows that the flat rate needed to balance the Reagan budget. The ninth line shows the amount of revenue produced with a flat rate of 19 percent, while the last line calculates the deficit a 19 percent rate would incur.

Drs. Rabushka and Hall have also calculated the impact of the flat-rate tax under the more pessimistic projections made by the Congressional Budget Office. Under that set of figures, the flat tax rate required to balance the budget would range from 23.4 percent in 1983 to 20 percent in 1987. Based on the CBO predictions, a 19 percent flat rate would cause a $101 billion deficit in 1983, declining to $75 billion by 1987.—THE EDITORS.

FLAT-TAX LAB: THE ISLE OF MAN

(By Roy W. Jastram)

Tax reform, which has bedeviled many presidents and Congresses is again in ferment.

We are agreed that our present system of trying to extract from the citizenry enough dollars to pay the government's bills is too complex, costly and full of inequities. But as usual, few agree on how to make it simpler, cheaper to operate and fairer.

One prominent contender for achieving these desirable ends is the flat-rate tax on incomes. It must always be remembered that a flat-rate income tax has two distinct parts: 1) the percentage of tax to be applied; and 2) the numbers and kinds of deductions to be allowed. Much needless confusion arises over this subject because of a misapprehension that a flat-rate income tax necessarily precludes certain kinds of deductions.

The best way to get some idea of how a flat tax would work is to take a look at one in operation. And, as luck would have it, we've got one: It's on the Isle of Man in the Irish Sea.

For the past 20 years, the Isle of Man has operated with a flat-rate income tax of about 20% on individuals and corporations alike. And in the last 10 years its national income has risen nearly 500%.

Yes, the Isle of Man is small. But so is an experimental culture in a biologist's laboratory from which important principles have been drawn and hypotheses confirmed. The island has a population of 66,000 operating a modern economy with a mixture of manufacturing, finance, agriculture, construction and a wide range of services.

MAINTAINS PUBLIC SERVICES

The government of the island funds and maintains its own education, health, national insurance, social security, pensions, police, postal and other public services. The level of social benefits is comparable to that in the United Kingdom.

It should be emphasized that the island is totally independent from the U.K. except for defense, foreign affairs and diplomatic representation, for which it pays to Britain 2.5% of its customs and excise receipts. It has its own parliament, the Tynwald, which dates back 1,000 years. It is not represented in the British Parliament.

When we look at the Manx flat-rate income tax we are not looking at an anachronism ("Manx" is the adjectival form of Isle of Man). We are examining the results of a sophisticated overhaul of the island's entire tax system spanning the 1970s and culminating in the "Income Tax (Amendment) Act of 1979." This modern system emerges as an innovative attempt to remedy the confusing patchwork muddle to which most national tax systems are prone. Written on a clear slate, it is the most concise and original example of a working flat-rate income tax that can be observed. (In fact the entire Manx tax code deserves study.)

The tax rate in 1982 was 20%. Each year the Tynwald sets the rate for the forthcoming tax year. Since 1962, the flat rate has varied between 21.25% and the current 20%.

What about exemptions? The simplest way to examine how exemptions are applied is by presenting a prototype of a single family and a corporation.

The income tax return of a married couple with one child receiving a single income represented by the earnings of the husband would be worked out like this:

You begin with the individual's total earned income figure. From that subtract personal allowances (which for a married man there are 2,315 British pounds, and for each child, depending on age, from 250 to 350 pounds). Then subtract expense deductions (which include: expenses incurred in earning income; mortgage and loan interest—for any purpose—paid to a Manx recipient; and retirement annuity payments made). Those subtractions leave one's taxable income. And 20% of that is the personal income tax on the Isle of Man.

This information could be fitted onto the proverbial postcard, but the Manx Taxing Authority uses a sheet of paper so the taxpayer need not suffer the discomfort of cramped handwriting.

The principles of company (or corporate) taxation are closely consonant with the individual tax and form an integrated system. This can be accomplished in a straightforward manner when a flat rate income tax of equal percentage is applied to both.

A company's taxable income is computed according to the usual rules:

Starting with gross income, one subtracts: a) direct expenses to acquire income, including reasonable entertainment; and b) capital allowances. That leaves taxable income. And 20% of that is the company's income tax.

It is especially noteworthy that in addition to these customary deductions a company can subtract that part of its income as shall be distributed among its shareholders or members by way of dividends, bonus, interest or share of profit. As these amounts are passed on to the recipients designated, they become subject to the personal income tax of the same 20%. In this manner the Manx system avoids the double taxation of corporate income so controversial in our own code.

COMPASSIONATE TREATMENT

There is a distinction between earned and unearned income. Earned income is reduced by one-fourth of the first 6,200 pounds, with the standard 20% then applied.

Lest anyone think that the successful operation of a flat-rate income tax forecloses compassionate treatment of the individual, it should be pointed out there is provision in the Isle of Man's system for age relief, small income relief, dependent relative relief and tax relief when age or infirmity of the taxpayer causes a son or daughter to reside with the taxpayer. Particularly contemporary is a "housekeeper allowance" whereby a deduction is given to a widow who employs some other person to have care and charge of her child in the home. On grounds of equality, the "housekeeper allowance" is extended also to a widower similarly situated.

In the Manx system the income tax described is the main form of direct taxation.

There are no death or estate duties; no capital transfer or gift taxes; no wealth tax nor any other capital levies; no capital gains taxes, with the exception of a narrowly proscribed land speculation tax.

In international financial circles the Isle of Man may be viewed as a "tax haven." The inhabitants consider their tax code as a sensible solution to meeting their needs. It may be a tax haven for some but this need not be a pejorative term. It would be a credit to the strongest economy in the world if it were also known as a haven from unjust, confused and often contradictory taxation.

UNDERGROUND ECONOMY GROWS DURING TOUGH ECONOMIC TIMES

LOS ANGELES.—Colette, a Redondo Beach hair stylist, gets $25 a cut in the salon where she works. But she'll do your hair at home for $15—cash only, please.

Steve, a Topanga construction worker, makes a little extra by growing plants—some legal, some not.

O.J., A Venice laborer, says he's never filed a tax return and doesn't plan to start.

They are part of the underground economy—a thriving sector where billions of dollars change hands annually without formality and without tax forms.

Along with the housewife who peddles her handsewn quilts at swap meets, the sidewalk drug dealer and the businessman who pays his workers "under the table," they are coconspirators in a growing movement. And they are breaking the law by evading taxes.

No one knows just how much money California's underground entrepreneurs are generating, and federal officials make no attempt to rank the state with respect to their underground economies. But most observers agree that while the legitimate economy may be ailing, the subterranean sector is doing just fine.

"We know it's happening, but it's almost impossible to get a handle on it because of the legal aspect," said Dr. Ed Crosby, an economist with First Interstate Bank. "I've heard figures that it might be as high as 10 percent (of the reported economy)."

If the 10 percent figure is correct, California's undergound economy amounts to more than $30 billion annually.

Officials at the state's Franchise Tax Board say they are being short-changed to the tune of $1.5 billion to $2 billion a year because of the underground economy. This "tax gap," they say, would eliminate California's budget deficit if it could be collected.

The federal "tax gap" was more than $87 billion last year, Internal Revenue Service Commissioner Roscoe J. Egger told a congressional panel in March, with at least another $8 billion lost on untaxed illegal income.

"The tax gap has been a problem for years, but recently the dollars involved have reached alarming levels," Egger said, noting many small companies pay employees in cash, meaning there is no "paper trail" to follow to detect tax evaders.

Tax officials, while noting that most people pay what they owe, acknowledge that the number of cheaters is growing. A major reason, they say, is a widespread perception that the tax laws aren't fair.

"People feel the rich are getting away with murder, so they develop their own little form of tax shelter which is, 'You don't report your tip income, you don't report your interest income or you don't report your second job,'" said Robert Giannangeli, an IRS spokesman. "What I've heard is that people are tired of the level of taxation, that they feel the tax laws are inequitable."

Many people participate in both the surface and underground economies.

Vicki, 31, works in a Los Angeles health food store that withholds taxes from her salary. She also designs and makes clothes.

"Usually I get paid in cash, some checks. I never report any of it. It's not a real conscious thing, like I'm going to get back at them. I just don't see it as money I have to pay taxes on," she said.

"My girlfriend makes teapots. She's like me, it never enters her mind to pay taxes. A lot of people do this. To me, it's a side thing to make ends meet.

David, a 24-year-old El Segundo man, has been unemployed for about eight months but often helps a friend deliver magazines.

"He pays me in cash or he'll take and give me an ounce of pot. That's about $100 and I'll work two days for him and that will cover it," he said.

Like the others who evade taxes, David knows he's breaking the law. And like the others, he did not want to be identified by his full name.

"I don't know how I'm supposed to feel about it," he said. "When I was working, I brought home a fairly decent salary. But the government took so much. . . . Now, if I can get away without declaring it, I'm going to. I feel the government takes enough."

The underground economy includes illegal activities such as loan sharking, gambling, prostitution and narcotics. And state tax officers say they could increase government revenues substantially if they could collect from the marijuana farmers in California.

"Marijuana is one of the largest cash crops in California and it remains essentially untaxed," said Mark Thorseno of the state's tax board. "But we can't send our auditors out into the national forests with guns looking for marijuana growers."

In California, officials have instituted "Operation Fair Share" to try to detect some of the people who should have filed reported income and paid state taxes. Under the program, state officials are using dividend and interest information as well as other kinds of data, said tax board spokesman Al Hunter.

"Operation Fair Share is the Franchise Tax Board's response to the increasing tax gap," said the board's executive officer, Gerald Goldberg. "The tax evader, big or small, makes a mockery out of our sense of fair play and justice and erodes our confidence in government and we've got to do something about that."

[From Newsweek, Feb. 28, 1983]

BALANCING THE BUDGET

(By Milton Friedman)

The real problem is not how to balance the budget. It is how to generate the political will to do what needs to be done.

For example, the following three-part program would produce a balanced budget in a few years.

TAX REFORM

The cost to taxpayers of personal and corporate income taxes is far larger than the amount they pay to the government—in time spent on complying, money spent on tax shelters and tax-induced distortions in the use of labor and capital.

Substituting a flat-rate tax for present income taxes would drastically reduce this wedge between cost and revenue. In addition, it would be both more equitable and more favorable to economic growth.

In an important new book, Robert E. Hall and Alvin Rabushka ("Low Tax, Simple Tax, Flat Tax." *McGraw-Hill. 1983*) present a detailed proposal for a flat-rate tax on all income above a personal exemption. The only deductions would be for strictly defined business and occupational expenses. Their sample tax form fits on a postcard. They estimate that a tax rate of 19 percent would yield so much more revenue than present income taxes that it would balance the budget by 1985 even with no reduction in prospective government spending. This estimate may be too optimistic—but it does indicate the potential of this approach.

END SUBSIDIES

Many subsidies could be eliminated, with large budgetary savings and great benefit to the strength of the economy—while retaining in full the programs that aid the poor. A few examples: (1) The Export-Import Bank. This harmful form of "protection" cost $800 million in direct outlays in fiscal year 1982, not counting possible losses on the $6 billion of loans it guaranteed that year. (2) Farm-support programs. They cost the taxpayers $12 billion in extra government spending and perhaps more than that again in higher prices for food. (3) Merchant-marine subsidies. These cost the taxpayers $600 million in extra government spending and very likely a much larger sum in higher freight charges. (4) Subsidies to higher education, which go almost entirely to persons in middle- and upper-income groups, and cost $7 billion. This is far from an exhaustive list.

Each subsidy program costs the public—directly and indirectly—far more than it yields to its intended beneficiaries. For example, much of the $12 billion cost of farm subsidies was eaten up by storage costs and

extra costs of production, let alone the cost of maintaining the bureaucrats administering the programs in the style to which we have unwisely accustomed them.

REFORM SOCIAL SECURITY [1]

Instead of the Band-Aids proposed by the National Commission of Social Security Reform, attack the basic problems that have converted social security into a basket case: (1) More than 20 years ago, Congress introduced a strong incentive to retire early by providing that a person who retires at age 62 receive 80 percent of the full stipend available at age 65. Reducing this percentage would by itself go a long way to resolve the long-run financial problem. (2) The average remaining life span of persons aged 65 has risen from 12.9 years in 1940 to 16.8 years currently. Yet the retirement age has remained unchanged. It should be increased gradually beginning now, not, as considered by the commission, only after the year 2000. (3) Modify the adjustment for inflation to equal the excess over, say, 2 percentage points of either the change in the average wage or in consumer prices, whichever is lower.

Enacted as a whole, these measures would transform the future financial condition of the U.S. government and benefit the overwhelming majority of the public.

Yet all are outside the realm of the politically possible.

Each measure would benefit all of us in our capacity as taxpayers and consumers—but the benefit to each of us would be small. Each would impose costs on relatively few—but the costs to each of them would be large. The sum of the diffused benefits would more than offset the concentrated costs for almost everyone—including those who receive the subsidies. However, the sum of the benefits will never be weighed on the political scale. Each measure would be considered separately. And, considered separately, pressure-group politics would assure its defeat. The loud voices of the few who would lose would drown out the low voices of the many who would gain.

That is the real measure of our problem.

By Mr. JACKSON:

S. 558. A bill to amend the Geothermal Steam Act of 1970 (30 U.S.C. 1001 et seq.) to expedite exploration and development of geothermal resources; to the Committee on Energy and Natural Resources.

STEAM ACT AMENDMENTS OF 1983

● Mr. JACKSON. Mr. President, today I am introducing a bill to amend the Geothermal Steam Act of 1970. That act established a system of leasing geothermal resources on Federal lands, where an estimated 60 percent of the U.S. geothermal potential is located. The intent of the act was to encourage commercial development. However, for a variety of reasons, including some of the limitations included in the act, very little commercial development has thus far occurred.

Today's bill is very similar to the bill I introduced last Congress, S. 669. It makes a number of changes in existing law, three of which I would like to mention at this time. First, it increases the lease acreage limitation from 20,480 acres in any one State to 51,200 acres in any one State. This change in existing law should help achieve significant commercial development. Second, it attempts to assist local governmental entities in meeting their pressing energy needs by providing a set-aside of up to 10 percent of the acreage leased each year, and by allowing the Secretary of the Interior to defer royalty payments under appropriate circumstances. Third, it requires the Secretary to take steps that would adequately protect geothermal features of national significance located within our national parks and monuments. Development of our geothermal resources should not, and need not, harm the important geothermal features that enhance our national parks and monuments.

I look forward to hearings on this bill.●

By Mr. PROXMIRE:

S. 559. A bill to establish a Federal Bank Commission to administer all Federal laws relating to the examination, supervision, and regulation of the banking business both foreign and domestic, including such laws relating to the chartering of banking institutions and the branching activities, Edge Act Corporations and their activities, and the examination, supervision, and regulation of banking institutions under Federal law; to the Committee on Banking, Housing, and Urban Affairs.

FEDERAL BANK COMMISSION ACT OF 1983

Mr. PROXMIRE. Mr. President, I am today introducing legislation to establish a Federal Bank Commission to administer all laws relating to the examination, supervision, and regulation of the banking business, both foreign and domestic, for reference to the Banking Committee.

Currently we have three agencies regulating commercial banks. The Federal Reserve regulates State-chartered member banks, the Comptroller of the Currency regulates national banks, and the Federal Deposit Insurance Corporation regulates State-chartered nonmember insured banks. But all national banks are required to be members of the Federal Reserve. National banks and State-member banks are insured by the FDIC. The Federal Reserve regulates bank holding companies whose subsidiaries may include national banks and insured State nonmember banks.

Arthur Burns, the former distinguished Chairman of the Federal Reserve and now our Ambassador to West Germany had some harsh things to say about this structure. He said, "our system of parallel and sometimes overlapping regulatory powers is indeed a jurisdictional tangle that boggles the mind." He also, said,

> The present system is conducive to subtle competition among regulatory authorities, sometimes to relax constraints, sometimes to delay corrective measures. Practically speaking, this sort of competition may have served a useful purpose for a time in loosening overly cautious banking restrictions imposed in the wake of the Great Depression. But at this point, the danger of continuing as we have in the past should be apparent to all objective observers.

I agree with Chairman Burns' statements. They ring so true today. Every few years, the banking industry goes through a period when unsafe and unsound conditions send tremors through our financial system. Recall the large bank failures and the real estate investment trust scandals of the mid-1970's. Currently weak foreign lending portfolios are causing justified consternation over the safety and soundness of our financial system. While specific banking reforms are necessary to cure current problems, even more basic is the need to consolidate our regulatory authorities to remove the disincentives our wasteful system has to forego the tough regulatory decisions that need to be taken to maintain a healthy banking system.

Mr. President, the establishment of a Federal Banking Commission has had bipartisan support. The legislation I am introducing today was previously introduced with the sponsorship of Senator Ribicoff and Senator Javits. Those Senators joined me in proposing this legislation after the Committee on Governmental Affairs in December 1977 in its "Study on Federal Regulation" recommended reorganizing the three banking agencies into a single consolidated Federal Bank Commission.

It is noteworthy that the House Republican Research Committee in the report of its Task Force on Congressional and Regulatory Reform, January 18, 1983, recommends consolidation of the three bank regulatory agencies. The Republican committee stated under "recommendations for legislative consideration" that Congress should:

> Consider combining regulatory functions of different financial agencies instead of regulating according to outmoded industry classifications. New financial products and services and major merges and acquisitions have bridged the traditional gaps between the securities, banking, S&L, and insurance company industries. This change would include consolidating related regulatory bodies and simplifying regulation between agencies. For example, the three separate agencies that regulate and audit commercial banks could be consolidated.

Significantly, Vice President BUSH has formed a Task Group on the Regulation of Financial Services and has charged it with the responsibility to formulate a legislative program to revise the Federal Government's regulatory structure for financial institutions. This is a clear recognition that

---

[1] I may note that I have elsewhere presented a proposal for a more comprehensive and radical reform of social security. See Milton and Rose Friedman's "Free to Choose," chapter four.

our system of overlapping regulation applicable to financial institutions is outmoded.

Mr. President, developments in the marketplace have outpaced the creaky regulatory structure that was established for financial institutions during the Civil War, the money panics of the turn of the century and the Great Depression. We need a regulatory structure capable of dealing with today's marketplace realities.

The proposal I initiate today to establish a Federal Bank Commission would streamline the Federal Government's role in regulating financial institutions, making it more effective and cheaper.

Mr. President, I ask unanimous consent that two previous statements on this subject which I have made be printed in full in the RECORD following my remarks along with a letter on the subject which was sent to me by Vice President BUSH.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FEDERAL BANK COMMISSION ACT OF 1977

Mr. PROXMIRE. Mr. President, I am today introducing for reference to the Committee on Banking, Housing and Urban Affairs, a bill to establish a Federal Bank Commission. This bill is substantially identical to S. 2298 which I introduced in the 94th Congress but to which I have added significant new provisions designed to strengthen the role of the States in bank regulation and thereby the dual banking system; and to strengthen the role of the Federal Reserve in obtaining bank supervisory information which it may need to conduct the monetary policy of the Nation. The statements I made on the floor of the Senate in introducing that bill on September 5, 1975, are fully applicable to this legislation. Under the bill, the Federal Bank Commission would administer all Federal laws relating to the conduct of the banking business both foreign and domestic, including such laws relating to the chartering of banking institutions and their branching activities, bank holding companies and their activities, Edge Act corporations and their activities, and the examination, supervision, and regulation of banking institutions under Federal law.

The Office of the Comptroller of the Currency would be abolished and all of its functions and personnel transferred to the Federal Bank Commission. Similarly, all of the functions and personnel of the Federal Deposit Insurance Corporation would be transferred to the Commission and its Board of Directors abolished. However, the FDIC would be retained as a corporate entity within the Commission and under the sole control of the Commission for the accounting purpose of holding the insurance fund established to protect commercial bank depositors and which now total in excess of $6 billion. In this regard the relationship between the Commission and the FDIC would be similar to the relationship between the Federal Home Loan Bank Board which supervises and regulates federally insured savings and loan associations and the Federal Savings and Loan Insurance Corporation which insures the deposits in such institutions. Finally, all of the supervisory and regulatory authority of the Federal Reserve Board would be transferred to the Commission. The Federal Reserve would retain supervisory and regulatory authority over interest rate ceilings, and margin requirements and retain the authority to make loans to banks through the "discount window." Relieving the Federal Reserve Board of bank and bank holding company supervisory responsibility will enhance its ability to concentrate on conducting the monetary policy of the Nation which is its primary responsibility.

Unsafe or unsound conditions in our banking system have proliferated in the past 15 years as banks have changed their orientation toward go-go banking a high profile syndrome and high profits. In the process the capitalization of our Nation's banks has declined precipitously since 1960, particularly among the largest banks. The numbers of problem banks—banks which are categorized by regulatory authorities as possibly requiring aid from their shareholders because of their condition or banks which are in danger of failing—have increased in size and in numbers. Massive credits are extended by banking institutions to persons having insider relationships with banks: officers, directors, or stockholders and the companies they control.

Last year, after public disclosure that there existed large numbers of problem banks in the banking system, the Congress requested the General Accounting Office to audit the three bank regulatory agencies to find out how well they were exercising their bank supervisory and regulatory responsibilities. GAO filed its report with the Senate Banking Committee on January 31, 1977. In my view, the GAO report reveals that regulatory permissiveness, fostered by the split in Federal bank regulatory authority, has been the principal reason why a substantial number of the Nation's banks in the banking system have deteriorated.

In its report, the GAO found that during the period 1971-75, the number of problem banks increased from at least 352 to 607 with the number of problem banks whose deposits exceeded $100 million increasing from 13 to 83. GAO data shows that the numbers and size of bank failures have also increased recently. For example, during the past 4 years bank failures have averaged $937 million in deposits each year, an increase of 21 times over the average of $45 million in deposits at failed banks during the previous 13 years. Moreover, the recent failures were the largest in the history of the Nation. I refer, of course, to the failures of the Franklin National Bank, the U.S. National Bank, the Security National Bank and Hamilton Bankshares, Inc. The assets of each one of these banking organizations exceeded a billion dollars.

Why, Mr. President, are the numbers of problem banks and bank failures increasing? The answer I believe is poor Government regulation. GAO found that bank examiners in most cases identify bank problems 2 years before banks fail; and the primary cause of the bank failures were bad management practices—not economic conditions. But the bank regulatory agencies, GAO found, delayed requiring banks to correct their problems until it was too late, even though problem banks exhibit many of the types of problems which can be cured by tough enforcement action. But the banking agencies failed even to communicate clearly to bank managements the needed corrective measures.

Mr. President, the principal problem with bank regulation is the hydra-headed bank regulatory structure at the Federal level which moves in three separate directions. GAO hit home when it said in its report that no mechanism exists to insure that the agencies act in concert to operate effectively and efficiently. For example the GAO notes that:

First. The three agencies do not have common criteria for determining which banks should be treated as problem banks or for taking enforcement action against problems which are discovered by examiners.

Second. Each of the agencies is developing its own separate monitoring and early warning system to improve bank examinations.

Third. Loans to corporations in which banks regulated by each of the three agencies participate are reviewed and treated differently by each of the three agencies even though essentially only one extension of credit is involved.

Fourth. The agencies operate separate and to a large extent duplicate computer systems.

Fifth. There is no procedure for coordinated examinations of holding companies and their subsidiary banks regulated by three different agencies.

Sixth. Separate systems for enforcing the consumer protection laws are in effect at the agencies.

Seventh. Loans to the same foreign borrowers are treated differently by the agencies. Time and money are wasted by the agencies in separate examinations of foreign branches and subsidiaries.

Eighth. The agencies maintain three separate examiners training centers. As a result three separate governmental disciplines are brought to bear on common bank problems.

The Comptroller charters and supervises national banks. But deposits in those banks are insured by the FDIC and all national banks are required to be members of the Federal Reserve. The Federal Reserve regulates State-chartered banks which choose to become members of the Federal Reserve. But deposits in such banks are insured by the FDIC. The FDIC insures all federally insured banks but supervises only those State-chartered banks which are not members of the Federal Reserve. The Federal Reserve regulates all bank holding companies regardless of which of the three agencies regulates the principal banking subsidiaries of the bank holding company. None of these agencies will invade the bureaucratic turf of the other agencies even though the consequences of poor regulation by one agency will be felt by the other agency. For example, the Federal Reserve has loaned billions of dollars to national banks in distress which are supervised by the Comptroller. This has complicated monetary policy and misallocated bank reserves to speculative uses. The FDIC has had to underwrite the losses of banks which are regulated by the other agencies in the amount of hundreds of millions. The FDIC and the Comptroller have had banks which they supervise deteriorate to the point of distress because of poor regulation of their holding companies by the Federal Reserve.

Former Vice-Chairman of the Federal Reserve, J. L. Robertson testified before the Senate Banking Committee that there is an "institutional reluctance among the regulators to pull the rug out from under their own banks." This institutional reluctance arises in part from the ability of banks to switch regulators. It also arises from the fact that the greater the number of banks regulated the greater the justification for a

bigger bureaucracy. When this is combined with the fact that the Federal banking agencies derive their funds not from Government appropriations but from private assessments on the banks they regulate with no congressional oversight the results are pernicious. Even without actual charter switching former Governor Bucher testified that the subtleties of divided authority are always with the agencies whenever they made a decision. Thus, in my view, instead of tough regulation we get Government bureaucrats living high off the hog in plush offices and traveling first-class with their wives around the country to attend bankers association meetings. Only by eliminating this institutional reluctance to take action will we ever have any hope of bringing decent government to the banking field.

In a speech to the American Bankers Association, the distinguished Chairman of the Federal Reserve Board stated with respect to the structure of bank regulation at the Federal level that:

"I am inclined to think that the most serious obstacle to improving the regulation and supervision of banking is the structure of the regulatory apparatus. That structure is exceedingly complex. * * * At the Federal level, every bank whose deposits are insured is subject to supervision and regulation, but authority is fragmented. The Comptroller of the Currency charters and supervises national banks. The Federal Reserve System supervises State chartered member banks, regulates activities of Edge Act corporations, regulates all bank holding companies, and controls the reserves and other operating features of all member banks. The Federal Deposit Insurance Corporation insures nearly all banks, but supervises only State-chartered banks that are non-members of the Federal Reserve. The FDIC also has certain regulatory powers that apply to insured nonmember banks.

"Those of you who have been intimately concerned with regulatory matters will realize that I have oversimplified, that our system of parallel and sometimes overlapping regulatory powers is indeed a jurisdictional tangle that boggles the mind.

"There is, however, a still more serious problem. The present regulatory system fosters what has sometimes been called "competition in laxity." Even viewed in the most favorable light, the present system is conducive to subtle competition among regulatory authorities, sometimes to relax constraints, sometimes to delay corrective measures. I need not explain to bankers the well-understood fact that regulatory agencies are sometimes played off against one another. Practically speaking, this sort of competition may have served a useful purpose for a time in loosening overly cautious banking restrictions imposed in the wake of the Great Depression. But at this point, the danger of continuing as we have in the past should be apparent to all objective observers.

"I recognize that there is apprehension among bankers and students of regulation concerning over-centralized authority. Providing for some system of checks and balances is the traditional way of guarding against arbitrary or capricious exercise of authority. But this principle need not mean that banks should continue to be free to choose their regulators. And it certainly does not mean that we should fail to face up to the difficulties created by the diffusion of authority and accountability that characterizes the present regulatory system. * * * Some will doubtless conclude that the proper approach lies in improved coordination among the multiple bank regulatory agencies, together with harmonization of divergent banking laws. My own present thinking, however, is that building upon the existing machinery may not be sufficient, and that substantial reorganization will be required to overcome the problems inherent in the existing structural arrangement."

I am in agreement with this statement of Chairman Burns. The ability of banks to pick and choose their regulators as Chairman Burns says means that they have the ability to play off one Federal agency against the other. This results in poor and ineffective regulation and an inability of the Federal Government to deal with the tough issues because the bank agencies compete with one another to see which can regulate the least. Such competition in laxity has resulted in low public confidence in the bank regulatory agencies. The public is no longer willing to continue to be served by regulation at the lowest common denominator level among Federal agencies. Competition in laxity can only be eliminated by eliminating its base of operations: The threefold fragmented division of regulatory authority, into a single agency.

The benefits of a single bank regulatory agency, such as the Federal Bank Commission, which eliminates the competition in laxity among the three bank regulatory agencies would be enormous. Former Governor Holland of the Federal Reserve listed four such benefits as follows:

"(a) Such an agency would bring about uniformity in Federal regulation, supervision and examination of banks. In addition it would result in uniformity on decisions concerning merger and branching applications.

"(b) * * * such a consolidation would eliminate some duplication of efforts and lead to a more efficient use of supervisory and examination personnel. It would also remove any problems arising out of consultations between the agencies and resulting delays in decision-making.

"(c) We also believe there could be advantages from the development of consistent data which would permit fuller analysis of the banking industry as a whole and permit more prompt identification of developments which might affect the stability of the banking system.

(d) Finally, the consolidation of three Federal agencies into one would preclude the possibility of banks changing their organizational status in order to obtain more favorable treatment from a different Federal supervisor.[1]

Former Chairman Wille of the Federal Deposit Insurance Corporation listed eight as follows:

First. Simplification of administration; improved internal and external communication.

Second. Elimination of conflicting goals.

Third. Economy and efficiency of operation.

Fourth. Elimination of actual or potential policy conflicts.

Fifth. Facilitating the handling of failing banks.

Sixth. Improved regulation of bank holding companies, their affiliates, and certain other bank relationships.

Seventh. Gains to banks and bank customers from a single Federal agency.

Eighth. Adjusting to a rapidly changing environment.

This bill will also strengthen the hand of the Federal Reserve in conducting monetary policy. The Federal Reserve Board's testimony before the Senate Banking Committee was that the Board needs the bank supervisory responsibility discipline in order to be able to conduct monetary policy. Serious disagreement with this view was taken before the committee by former Vice Chairman of the Federal Reserve Robertson who served at the Board for 20 years and by former Governor Bucher.

This legislation places a member of the Federal Reserve directly on the five-man Federal Bank Commission. Thus under this bill the Federal Reserve will have more direct input into bank supervision and regulation than it now has; and, under the bill, the Board will have more direct and immediate access to such information than it now has. Thus, under the theory of the Federal Reserve, this bill should enhance the Board's ability to conduct monetary policy.

One of the most important features of this bill are the provisions designed to strengthen the dual banking system of the Nation under which we have federally chartered and regulated banks which compete side by side with State chartered and regulated banks. Two essential features of this system must be strengthened if we are to retain a viable dual banking system. First, Federal insurance should not be used as a veto to the chartering of State banks. Second, State supervisory functions should not be co-opted by the Federal Government either by design or by default as it is in too many cases.

Section 312(d)(2) requires the Federal Bank Commission to grant insurance to institutions chartered by a State whose operations are adequate to assure a safe and sound banking system. This provision is designed to eliminate the veto power now enjoyed by the FDIC over State chartered banks and to assure that the Federal Bank Commission which will also charter national banks will not favor the chartering of national banks in any State over the State banking system. Under the current fragmented regulatory authority there is no doubt that the Comptroller of the Currency has historically sought to induce State chartered banks to switch to national charters, particularly among the larger banks. This bill will put an end to this practice.

Section 312(d)(2) also provides that where State examiners make adequate examinations of State chartered banks the Federal Bank Commission may suspend Federal examinations and reimburse the State supervisory authority for the cost of examination. This provision will give the State's supervisory authorities the economic means to upgrade their supervisory positions.

Finally, section 4(a) of the bill provides that at all times, one member of the Federal Bank Commission shall be an individual who has had direct State bank regulatory experience. There is no counterpart to this provision in the present law and as a practical matter direct State supervisory experience is not a quality which is sought by the bank regulating agencies. This provision will insure that State experience will have a direct representation in all bank supervision in the Nation thereby strengthening the dual banking system.

This bill will also subject the Federal Bank Commission to periodic performance audits by the General Accounting Office and require the Commission's yearly expenditures to be with limitations set by an appropriations act of the Congress.

CONSOLIDATION OF BANK REGULATORY AGENCIES

Mr. PROXMIRE. Mr. President, I am today introducing for reference to the Committee on Banking, Housing and Urban Affairs a bill to establish a Federal Bank Commission to administer all Federal laws relating to the conduct of banking business, both foreign and domestic, including all such laws relating to the chartering and insuring and merging of banks, their branching activities, bank holding companies and their activities. Edge Act corporations and their activities, and the examination, supervision, and regulation of all banking institutions under Federal law.

It has become necessary to restructure the Federal bank regulatory apparatus because the existing structure consisting of the Federal Reserve System having jurisdiction primarily over State banks which are members of the Federal Reserve System, the Comptroller of the Currency having jurisdiction over all national banks, and the Federal Deposit Insurance Corporation having primary jurisdiction over nonmember State insured banks has proven incapable of dealing with banking practices which have arisen in the past 30 years in a manner which will insure a safe and sound banking system.

A safe and soundly maintained and operated banking system is basic to the economic well being of the Nation. Banking institutions occupy a unique and vital place in the economy. They are the principal suppliers and allocators of credit to the various sectors of commerce and industry. They are the principal institutions in our society by which decisions at the governmental level to increase or decrease the money supply are effectuated and translated into reality in the marketplace. They are the principal institutions in which the deposits and savings of individuals, partnerships, and corporations are held. They are, therefore, institutions which are imbued with an exceptionally high degree of public interest and must be subject to a high degree of effective public scrutiny.

Every banking institution must so conduct its affairs that it retains the ability to function without special Government subsidy in times of monetary restraint as well as in times of monetary growth. The structure of bank supervision should be such that banks are given no encouragement to conduct their affairs in a speculative manner in times of economic growth. Governor Robertson, the former distinguished Vice Chairman of the Federal Reserve Board has stated:

There should never be a possibility of utilizing the supervisory function to enforce a given monetary policy today and an opposite one tomorrow, to look at bank loan portfolios through rose-colored glasses today and black ones tomorrow."

It is undeniable that particular banking institutions have engaged in speculative finance in many areas of the economy. These speculations have served to misallocate credit resources to earn high rates of return. The existing structure of bank regulation consisting of three Federal regulators, often at odds with one another over whether particular banking practices should be permitted has prevented them from requiring the cessation of unsafe or unsound banking practices which would have prevented the speculations from taking place. Institutions which are engaged in speculative finance often suffer dire consequences themselves and have been responsible for a loss of confidence in the banking system itself. The Government regulators have lacked the will to utilize their supervisory authority to abate these practices and to keep banks operating in a safe and sound manner requiring them to fulfill their public purposes.

The structure of supervision and regulation at the Federal level has been the major reason why unsafe or unsound conditions in our banking system have been allowed to proliferate. To some extent, of course, each of the three Federal bank regulatory agencies bear individual responsibility for the state of affairs.

In the wake of the largest bank failures in this Nation's history last October Chairman Burns of the Federal Reserve said to the American Bankers Association:

"I must say to you, however, that I am inclined to think that the most serious obstacle to improving the regulation and supervision of banking is the structure of the regulatory apparatus. That structure is exceedingly complex. * * * At the Federal level, every bank whose deposits are insured is subject to supervision and regulation, but authority is fragmented. The Comptroller of the Currency charters and supervises national banks. The Federal Reserve System supervises State chartered member banks, regulates activities of Edge Act corporations, regulates all bank holding companies and controls the reserves and other operating features of all member banks. The Federal Deposit Insurance Corporation insures nearly all banks, but supervises only State-chartered banks that are non members of the Federal Reserve. The FDIC also has certain regulatory powers that apply to insured non-member banks.

"Those of you who have been intimately concerned with regulatory matters will realize that I have oversimplified, that our system of parallel and sometimes overlapping regulatory powers is indeed a jurisdictional tangle that boggles the mind.

"There is, however, a still more serious problem. The present regulatory system fosters what has sometimes been called "competition in laxity." Even viewed in the most favorable light, the present system is conducive to subtle competition among regulatory authorities, sometimes to relax constraints, sometimes to delay corrective measures. I need not explain to bankers the well-understood fact that regulatory agencies are sometimes played off against one another. Practically speaking, this sort of competition may have served a useful purpose for a time in loosening overly cautious banking restrictions imposed in the wake of the Great Depression. But at this point, the danger of continuing as we have in the past should be apparent to all objective observers.

"I recognize that there is apprehension among bankers and students of regulation concerning over-centralized authority. Providing for some system of checks and balances is the traditional way of guarding against arbitrary or capricious exercise of authority. But this principle need not mean that banks should continue to be free to choose their regulators. And it certainly does not mean that we should fail to face up to the difficulties created by the diffusion of authority and accountability that characterizes the present regulatory system. * * * Some will doubtless conclude that the proper approach lies in improved coordination among the multiple bank regulatory agencies, together with harmonization of divergent banking laws. My own present thinking, however, is that building upon the existing machinery may not be sufficient, and that substantial reorganization will be required to overcome the problems inherent in the existing structural arrangement."

I am in agreement with these statements of Chairman Burns. My own study of this problem has led me to conclude that the best restructuring at this time would be the unification of the three existing bank regulatory agencies into a single agency without a substantial change in the Federal law governing the business of banking. Before adopting more stringent regulatory laws to cure unsound practices which have arisen in banking in recent years, I believe we should give effective regulation under existing law the opportunity to work. With the removal of incentives to regulate all institutions at the lowest common denominator level, the Federal Bank Commission will be in a position to abate unsafe or unsound practices at particular institutions while maintaining a posture of encouragement of innovation in the public interest at other institutions possessing requisite management and operational capability. The existing structure does not allow for this degree of sophistication over the supervision and regulation of the business of banking.

There has been an expansion in the size of banks and bank holding companies in recent years that has outpaced the capability of supervisory authorities. Governor Robertson has stated that:

"Banks have grown so large that it is no longer feasible for examiners to analyze adequately bank management, assets and liabilities, and their trust and foreign exchange activities within the limitations of available man hours. It would not be feasible if the supervisory forces were quadrupled."

A portion of this expansion has been based upon management focus on profits which have encouraged speculations, and to which the regulatory authorities have aided by their "competition in laxity." Numerous examples are available of this unhealthy competition between regulators. I need cite only one example.

For years the regulatory authorities deemed the acquisition of excess reserves by banks from other institutions borrowings which were subjected to limitations under Federal law as to amount. In the mid-1960's one bank regulatory agency ruled that such transactions were purchases and sales and not borrowings and therefore not subject to the statutory limitation as to amount. This gave the banks that regulator supervised a sizable competitive advantage over other banks by broadening their ability to expand their loan portfolio.

To eliminate this competitive advantage, another regulatory agency, which had objected to the change in ruling, felt itself obliged to adopt the same position for the banks it supervises. The result has been a tremendous increase in Federal funds transactions. Institutions have relied on these overnight borrowings to an inordinate and in particular instances to an unsafe degree in funding forward loan commitments and to expand long-term loans on this basis of short-term borrowings. Liability management has added a new dimension of risk to the banking system.

The past several years have seen the largest bank failures in the history of our Nation. Liability management practiced by the use of volatile sources of funds to support illiquid and high-risk asset portfolios as I have described have been a major causative factor. In addition, insider self-dealing loan to bank directors and bank manage-

ment have been significant causative factors in other situations.

Still other disturbing trends in banking institutions have been the use of brokered deposits, the increased use of banks of loan commitments, bullet loans, and standby letters of credit as a source of earnings for banking institutions. The latter forms of banking, together with the practice of liability management serve to excerbate severely the tendency of banking institutions to increase the size of their asset portfolios at the expense of any significant regard for the stability of the sources of funds upon which these loans must be based. Supervision of these activities by bank regulators has been inadequate.

One of the reforms in bank supervision urgently needed is a drastic change in bank examinations procedures in order that the regulatory authorities may comprehend and respond to the material changes which are occurring with rapidity in banking institutions. The time frame within which bank supervisors have to require corrections of practices which have a potential to develop into unsafe or unsound conditions and crisis situations has been greatly shortened by the pace of change in the banking system. Only a restructuring of the bank supervisory agencies into a single bank regulatory agency gives any hope of being to cope with the problem.

There must be established an ongoing supervisory computerized network capable of obtaining information on the composition of bank assets and liabilities on a frequent basis. Such a system would enable a supervisor to determine at a glance the status of a bank—its capital, liquidity, asset, and liability position—and compare that present status with the standards of the regulatory agency. If a bank fails to meet those standards, examiners can be dispatched immediately to ascertain the causes and institute necessary changes long before a crisis occurs. Wherever potential unsafe or unsound conditions surface prompt and effective injunctive action by the supervisory authority must be undertaken under the Financial Institutions Supervisory Act of 1966.

Expert opinion shows that this kind of updated supervision cannot be achieved as soon as required—if it ever can be achieved in present circumstances—so long as Federal bank supervision remains fragmented among several agencies, each jealous of its prerogatives, each determined to maintain its own carefully constructed empire. Expert opinion reveals that it would take years—literally years—of negotiation before an agreement could be reached within the existing regulatory framework concerning the kind of information needed to provide an accurate picture of each bank, let alone devise appropriate standards by which banks should be judged, and without which it would be impossible to achieve anything like conformity of supervision and competitive equality.

This kind of an examination and supervisory capability, possible only within a single regulatory agency, will insure the swift abatement of unsound practices while allowing maximum flexibility to managements in the operation of their institutions. Bank examinations under the single regulatory agency concept can provide banking institutions with a significant management tool in the form of a sophisticated outside overview of their operations—particularly respecting unsafe practices or unsoundness in operation.

Unsafe and unsound conditions have proliferated in our banking system because bankers have been able to play the fragmented structure, shifting back and forth among supervisory authorities whom they have thought would best accommodate their views. We have the example of one banking institution in a State switching to the jurisdiction of a particular supervisor for the purpose of having a particular merger transaction approved. After the merger was approved and consummated, the banking institution switched back again to its original supervisor where it believed the merged operation could be conducted on a more economical basis for the bank.

In another instance a bank holding company was denied permission by one regulatory agency to acquire a particular bank on competitive grounds. Another regulatory agency shortly thereafter approved the acquisition of the bank by the holding company by allowing the merger of that bank into another banking subsidiary of the holding company. We have still another instance of a bank holding company being denied to engage in a certain activity by one agency and a different regulatory agency allowing a banking subsidiary of the holding company to undertake the same activity. These lax regulatory practices have led to a number of banking institutions leaving the regulatory jurisdiction of one agency and switching to the jurisdiction of another agency. This has been responsible for regulation at the level of the lowest common denominator.

The fragmented process is exemplified by cases such as those I have recited and by the differing standards applied by the banking regulatory agencies respecting merger applications filed under the Bank Merger Act. One regulatory agency has been more permissive in approving applications for mergers of banks than have the other regulatory agencies. The provisions in the Bank Merger Act for the filing of competitive factors reports by the bank regulatory agencies not having approval authority over a particular merger with the jurisdictional bank regulatory agency were designed to assure uniformity of treatment among the banking agencies respecting bank merger matters. These provisions of law have not achieved their intended purpose. Differing standards have been applied by the regulatory agencies while at the same time a large amount of time has been dissipated by the regulatory agencies in compiling competitive factors reports which have been largely ignored as evidenced by the continued application of differing standards by the regulatory agencies. There is, in short, no coherent policy at the Federal level among the bank regulatory agencies to control the concentration of banking resources in the Nation.

In May of this year the Committee on Banking, Housing, and Urban Affairs published a committee print titled "Compendium of Major Issues in Bank Regulation." At that time I stated my intention to introduce legislation unifying the bank regulatory agencies. Since that time there has been considerable testimony relating to a single regulatory agency and the advantages and disadvantages of establishing a single agency. In my view the concrete adyantages are overwhelming and compelling. The most perceptive fear is that a single agency would be all-powerful. But it is this very consolidation of authority which is necessary to cure the ills to which I have referred and which necessitates a single bank regulatory agency.

Furthermore, the single agency would not have the incentive to relax its rules so that its power base could be expanded by banking institutions switching their regulatory jurisdictions. The incentives, if any, would rather be on the side of looking to State regulatory authorities to accept increasing responsibility to insure the safe and sound operation of State institutions and to thereby strengthen this Nation's dual banking system

The benefits of a single regulatory agency are enormous. Chairman Wille of the Federal Deposit Insurance Corporation recently listed eight as follows:

"1. *Simplification of Administration; Improved Internal and External Communication.*—A single agency would provide a single focal point for Congressional and Administration contact on matters of bank regulation and supervision. Additionally, all public inquiries on matters of banking and bank regulation could be addressed to the single agency. All agency actions and decisions would originate * * * from a * * * single * * * (Commission). Instead of 14 FDIC regions, 14 National bank regions and 12 Federal Reserve Districts (few of which are today identical) a much simpler regional setup could be achieved.

"2. *Elimination of Conflicting Goals.*—The fact that the scope of responsibilities differs among the three Federal banking agencies results in a number of internal conflicts with respect to the handling of supervisory problems. This is thought by many to be a particular problem for the Federal Reserve System whose principal function is the formulation and implementation of monetary policy. These observers believe that where the implementation of monetary policy goals is combined with regular bank examination and supervision, the former will always be viewed as more important than the latter and will prevent a consistent, evenhanded approach to matters of bank supervision. This potential problem would be reduced by setting up a single bank regulatory agency divorced from monetary policy responsibilities.

"3. *Economy and Efficiency of Operation.*—Considerable economy could be achieved by combining the legal, research, training and other Washington Office functions of the three existing bank regulatory agencies. There would be a reduction in senior agency staff time spent communicating with and keeping current with the activities of other agencies.

"More efficient use could be made of examiner time, training and specialized capabilities. A single agency would eliminate differences in the form and substance of reports of examination and would be able to issue uniform instructions to all examiners. Travel time of examiners could be reduced, and in many instances where it has not heretofore been feasible, all banks within a particular community could be examined simultaneously. A single agency could make more efficient use of specialized expertise to handle complicated credits and to concentrate on such areas as trust activities, international departments and foreign offices of insured banks, certain data processing and other areas of automated activity, and compliance with Federal and State statutes in the consumer protection area. Economy could be achieved through a single training program which would not only reduce existing duplication, but facilitate the development of more advanced and specialized training.

"A single agency would eliminate differences in reports filed by insured banks, thereby eliminating some duplication or re-

dundant effort in administering and processing such reports, in computer costs and in publication costs.

"4. *Elimination of Actual or Potential Policy Conflicts.*—A single agency would bring uniform treatment to all insured banks in such matters as rules, regulations, standards and procedures. For example, a single, rather than three separate guidelines on a subject, such as insider transactions, could be effected. Also, uniform application of statutory powers, such as cease and desist powers, would result. Banks would also be subject to greater uniformity with respect to loan classifications, policies on capital adequacy and other areas related to bank examinations.

"Consolidation would result in a single policy on chartering, branching and mergers.

"5. *Facilitating the Handling of Failing Banks.* * * * The involvement of three Federal banking agencies in the handling of failing banks prolongs and overly complicates an appropriate resolution of the problem. A single agency probably could reduce the time involved. Under present arrangements, it is difficult to consider all alternatives more or less simultaneously, because the three agencies have somewhat different powers related to solving these problems (e.g., the Comptroller has somewhat more flexibility in arranging a National bank merger which does not require special Government financial assistance or guaranties, while the Federal Reserve can provide liquidity assistance and the FDIC can provide other types of financial assistance to insured banks regardless of charter).

"6. *Improved Regulation of Bank Holding Companies, Their Affiliates, and Certain Other Bank Relationships.*—A single Federal bank agency would have responsibility for examining banks and their holding company affiliates, thereby facilitating a more complete picture of the entire operation and the assessment of the overall risk exposure of the bank(s) and the holding company. Under present arrangements the Federal Reserve has certain regulatory authority over the activities of holding companies whose principal assets may be banks subject to the regulation of the other two Federal banking agencies.

"When Congress addressed the bank holding company issue in 1970 and concentrated regulatory authority within the Federal Reserve, Congress was primarily concerned with the range of permissible nonbank but bankrelated activities to be made available to such holding companies. In more recent years issues related to financial arrangements of holding companies and their impact on bank risk have become more important than permissible activities, and the present regulatory arrangement does not seem to be well suited to deal with these issues. Even apart from the holding company framework, there exist in today's banking system many complicated financial arrangements associated with joint ventures and shared credits where the present Federal regulatory structure makes it difficult to get a complete picture of a bank's risk exposure in a particular transaction. A single agency could ameliorate this situation.

"7. *Gains to Banks and Bank Customers from a Single Federal Agency.*—Differences in regulations, in examination standards and reporting requirements among the Federal banking agencies may result in different treatment of similar situations and, as a result, in some inequities. In addition, there are costs imposed on the banks and the public in having to work with and understand these differences.

"8. *Adjusting to a Rapidly Changing Environment.*—Rapid changes have been occurring in banking in recent years—for example, in such developments as the growth of bank-related activities across State lines through holding companies, innovations in the payment system and the growing importance of international operations in the activities of large banks—and there is no reason to assume that this process will decelerate. A single Federal banking agency may be in better position to command the technical and specialized resources and to exercise the administrative flexibility necessary to cope with this changing environment."

Governor Holland of the Federal Reserve Board similarly listed four as follows:

"(a) Such an agency would bring about uniformity in Federal regulation, supervision and examination of banks. In addition it would result in uniformity on decisions concerning merger and branching applications.

"(b) * * * such a consolidation would eliminate some duplication of efforts and lead to a more efficient use of supervisory and examination personnel. It would also remove any problems arising out of consultations between the agencies and resulting delays in decision-making.

"(c) We also believe there could be advantages from the development of consistent data which would permit fuller analysis of the banking industry as a whole and permit more prompt identification of developments which might affect the stability of the banking system.

"(d) Finally, the consolidation of three Federal agencies into one would preclude the possibility of banks changing their organizational status in order to obtain more favorable treatment from a different Federal supervisor."

This bill will serve to bring bank supervision and regulation into the last quarter of the 20th century and prepare us for tomorrow by recasting a Federal structure which has grown up in helter-skelter fashion over the last 100 years and whose operation has often visited upon the public unfortunate effects.

The bill would transfer all of the supervisory and regulatory powers of the Federal Reserve System to the Federal Bank Commission, enabling the Federal Reserve to concentrate its efforts upon the conduct of the monetary policy of the Nation. The conduct of monetary policy is an extremely important task because of its effect upon the life of our economy. The complexity is of the magnitude that the agency having that responsibility should not at the same time be burdened with the task of bank supervisory and regulatory functions.

Yet, bank supervision and regulation which should be so conducted as to insure a safe and soundly operated banking system is in many respects a task of equal importance to the conduct of monetary policy. The functions of monetary policy and effective supervision and regulation cannot be performed by one agency without seriously compromising the effectiveness of each function.

Governor Robertson stated on December 23, 1974, in recommending the unification of the three bank regulatory agencies into a single agency that:

"Finally, and in light of recent suggestions by others. I should make clear that in my opinion, based on forty years experience in the field of federal bank supervision, including twenty-one years as a Governor and seven years as Vice Chairman of the Federal Reserve Board, the merged supervisory function should not be vested in the Federal Reserve System. The function of formulating and implementing monetary policy and the equally important and coordinate function of supervising banks and bank holding companies cannot be performed by one agency without seriously compromising the effectiveness of each function."

Governor Bucher of the Federal Reserve said on March 11, 1975:

"Developing and implementing appropriate monetary policy at a given time require considerations and evaluation of the significance of an enormous volume of available data and their inter-relationships. The responsibilities are of such magnitude that the Board should not also be burdened with the performance of bank supervisory functions. Supervision is too important a function in itself to be the Federal Reserve's part time job."

The bill would abolish the Office of the Comptroller of the Currency and transfer all of its functions to the Commission. The Federal Deposit Insurance Corporation would continue as an insurance and financial entity under the control of the Commission and its functions would be transferrred to the Commission.

Thus, the primary thrust of this legislation is to recast the Federal regulatory structure over bank supervision and is not intended to change the substantive laws governing bank regulation at the Federal level. There are three exceptions to the primary thrust of the bill. The three exceptions are as follows:

First. Federal Reserve System advances to distress banks to ameliorate unsafe or unsound conditions could not be made under the provisions of the bill unless the Commission first certifies that such advance is in the public interest. In any case where such a certification is made the Federal Reserve is further required to find affirmatively that the advance may alleviate a significantly adverse effect upon the economy of the Nation or any section of the country.

This provision is necessary if we are to bring a minimum amount of accountability to the Federal Reserve System in making advances to banks in distress. Federal Reserve advances in the recent past in the case of the Franklin National Bank amounted to more than $1½ billion and tens of millions of dollars in other distress situations. The record of recent bank failures and near failures reveal that the Federal Reserve System acting in the capacity of a lender of last resort is often put under great pressure to rescue a bank from the consequences of its own mismanagement. The public interest is not served by a continuation of the practice of the Federal Reserve to underwrite the liquidity and solvency of banks in the circumstances characterized by recent large bank failures.

This provision will serve to insure that the Commission will use its authority to effectively regulate and to abate potential or actual unsafe or unsound practices before these attain crisis proportions. This provision will serve to alleviate the present situation where the Federal Reserve has made bail-out type loans to insolvent banks, complicating monetary policy, misallocating the distribution of bank reserves, and jeopardizing taxpayers' funds.

Second. The Commission will be required to make expenditures for office space, em-

ployees' salaries and expenses, and travel and other administrative expenses within yearly appropriations ceilings set by Congress. This provision of the bill is intended to bring the Commission within the Congressional appropriations review process. The Federal Reserve System, the Comptroller of the Currency, and the Federal Deposit Insurance Corporation are now exempt from the congressional review process over expenditures for their purposes. The exemption is retained, however, for payments and expenditures made by the Commission to insured depositors of banks which have failed and expenditures made in connection with the liquidation of banks.

Third. This bill makes it clear that all of the Commission's activities are subject to full auditing by the Government Accounting Office. The GAO is required by these provisions to submit an audit of the Commission's activities each year to the Congress. Full GAO audit will serve to facilitate congressional oversight over the exercise of the Commission's functions in the public interest both in respect to its expenditures but also respecting the efficiency of the exercise of its management of supervisory and regulatory functions under Federal law to insure a safe and sound banking system.

THE VICE PRESIDENT,
Washington, D.C., January 26, 1983.

Hon. WILLIAM PROXMIRE,
U.S. Senate, Washington, D.C.

DEAR BILL: Thank you for your letter of January 18 concerning the overlap and duplication in the current federal regulation of commercial banking. Your previous attempts to pass legislation to consolidate the multiple regulatory agencies represent a significant base upon which we hope to build in the course of our new effort. If anything, recent developments in the market have proved that you were right about the need to reform and streamline the current system. Of course, we must now address the tough issues of how to accomplish that goal, and I hope that we will be able to call on your experience and insight as we develop a proposal and attempt to steer it through the Congress.

I have asked Richard C. Breeden of my staff, who is directing the working group for our Task Group, to be certain that the previous work of the Senate Banking Committee is incorporated in the analysis and recommendations which will be presented to the Task Group. In addition, I hope that you will ask your staff to give us any additional ideas and perspectives which you may have concerning the other related areas of the federal regulatory structure which the Task Group will review.

Thanks very much for your advice. I hope that we will be able to work together over the next few months to develop a viable plan which will begin to reduce the enormous costs which the current system imposes on the public.

Sincerely,

GEORGE BUSH.

By Mr. HOLLINGS (for himself, Mr. BENTSEN, Mr. GOLDWATER, and Mr. HEFLIN):

S. 560. A bill to authorize and regulate the launch of space objects by nongovernmental entities, and for other purposes; to the Committee on Commerce, Science, and Transportation.

PRIVATE SATELLITE LAUNCHING AUTHORIZATION ACT OF 1983

Mr. HOLLINGS. Mr. President, today I am reintroducing the Private Satellite Launching Authorization Act, a bill I cosponsored with Senator Howard Cannon in the 97th Congress. The bill would authorize the launching of rockets and satellites by the private sector.

I have been a long-time supporter of the U.S. space program. I am particularly impressed by NASA's fine accomplishments in the past 25 years. One of the reasons I chose to be the ranking Democrat on the Committee on Commerce, Science, and Transportation is that it will give me a greater opportunity to review our various space-related efforts.

In the area of space, I note a new era evolving, one of greater economic opportunity and increased participation by the private sector. NASA opened the frontier of space. Others, such as our communications industry, increasingly are using the space environment for commercial purposes. There are other commercial and economic opportunities. The one this bill addresses involves private launch services.

On September 9, 1982, a small U.S. firm, Space Services, Inc. (SSI) successfully launched a rocket into a suborbital trajectory off the coast of Texas. This experimental flight will lead to future operational flights by SSI perhaps as early as 1984. I am encouraged by their entrepreneurial efforts, especially since that same day the French Ariane rocket flight was a failure.

SSI's efforts now are but one of a number of private launch related activities. This is a burgeoning field where the policy and regulatory framework is often unclear. We need to protect the public interest while at the same time encourage economic activity. A clear and efficient procedure is needed to handle the public safety, international, liability, and other implications in such private operations. This bill would clarify Federal responsibility.

This bill would establish the Federal Aviation Administration as the lead agency and authorize them to issue licenses for any private launch of space objects. The FAA would receive technical assistance from NASA with regard to safety. The State Department would provide guidance with regard to international obligations, the Defense Department with regard to any national security consequences, and the Federal Communications Commission with regard to communications activities.

Mr. President, a comparable bill has now been introduced in the House of Representatives. I think it would be in the national interest to pass such legislation and hope we do so in the 98th Congress.

By Mr. PERCY (for himself, Mr. ABDNOR, and Mr. THURMOND):

S. 561. A bill to authorize a youth minimum wage differential under the Fair Labor Standards Act of 1938, and for other purposes; to the Committee on Labor and Human Resources.

YOUTH EMPLOYMENT OPPORTUNITY ACT OF 1983

Mr. PERCY. Mr. President, on behalf of my distinguished cosponsors, Senators ABDNOR and THURMOND, and myself, I am once again introducing for Senate consideration the Youth Employment Opportunity Act to establish a special youth minimum wage.

The unemployment rate among young people in this country between the ages of 16 and 19 is worse than ever and has reached intolerable levels. When I last introduced this legislation in 1981, the latest unemployment figure for teenagers was 17.8 percent. Today it is 22.7 percent. Two years ago, the unemployment rate for black youth was 37.5 percent. Today it stands at 45.7 percent nationwide and certainly runs higher than that in many of our major cities. We have tried a number of alternative plans designed to alleviate the problem, but none has succeeded. It is my feeling that, all else having failed, we ought to turn—on an experimental basis—to one of the more controversial proposed solutions with the idea of determining whether or not it can work on a long-term basis.

The legislation which Senators ABDNOR and THURMOND join me in offering today would authorize for a 3-year period a special minimum wage for young persons 16 to 19 years of age at 85 percent of the adult minimum wage. At this time, the youth wage would be $2.85 per hour. Based on the premise that a young person is at a disadvantage in entering the job market because of a lack of experience, this youth wage would serve as a training wage for the first 6 months of employment of an individual in the specified age bracket by a single employer.

Employers generally will not hire someone whose expected productivity is below the cost of their employment. A youth wage is, in essence, a short-term subsidy to overcome that productivity gap in the early months of employment. It is my hope that it would be an incentive for the employer—who is otherwise reluctant to create a new position at all or to hire an inexperienced young person to fill it—to take a risk.

Without creating a new Federal program, without creating a new Federal bureaucracy, without creating new and substantial Federal spending, we may have a way here of overcoming some of the reluctance businesses express about hiring inexperienced

youth at the current $3.35 minimum wage level.

I mentioned earlier that such a proposal is controversial. A similar measure was defeated by very close margins in the House and Senate in 1977, the last time it was voted on. Studies have been issued, both pro and con, on what the impact of such legislation would be, if enacted.

In a budget issue paper for fiscal year 1981 prepared by the Congressional Budget Office, the following is stated:

Estimates of the effects of minimum wages on youth employment vary, but many researchers believe that each ten percent rise in the minimum wage relative to the average hourly wage reduces youth employment by something between one and four percent. If the one percent estimate is valid, then lowering the minimum wage for all persons in 1981 from $3.35 to $2.85 could increase employment among youth aged 16-19 by perhaps 60,000 jobs. Establishing a subminimum wage only for youth might bring about even greater increase, although these increases might be offset by rising joblessness among older workers.

The 1982 report of the Minimum Wage Study Commission, created by Congress to produce this report by the Fair Labor Standards Amendments of 1977 reached a similar conclusion:

. . . we would expect that a youth differential would have greater effects on teenage employment than would a comparable reduction in the basic minimum because the youth differential improves the competitive position of minimum wage teenagers . . . Thus, if a 10 percent reduction in the general minimum wage raises teenage employment 1 percent, a 10 percent youth differential would increase it by more than 1 percent.

A lower minimum wage for teenagers will have two effects. First, production costs will be lower, and firms will have an incentive to reduce prices so that they can produce and sell more of their products . . .

The second effect of a youth differential is to encourage firms to substitute minimum wage teenagers in place of . . . adults . . . The prospect of such substitution, particularly for minimum wage adults, is responsible for much of the controversy surrounding the youth differential.

I realize that substitution is a grave concern among many. It is my hope that, by authorizing a youth minimum for a limited period of time and with adequate safeguards, we may be able to achieve a satisfactory situation where we can reap the benefits of a youth wage, without the drawbacks that have been so frequently cited. To address the concern about substitution, our legislation provides penalties for the abuse of the the youth wage, that is, if it is used for the purpose of displacing older workers, or other young people entitled by law to be paid the standard minimum wage. It further provides for close monitoring of this experiment by the Secretary of Labor in that he or she will be required to report twice yearly to the Congress on the effect of the youth wage on both youth and adult employment.

Finally, Mr. President, I want to emphasize the experimental nature of my proposal. I agree with the Minimum Wage Study Commission's statement:

The fundamental difficulty in estimating the effects of such a differential is that we have never had one.

Why not make an attempt to find out, once and for all, whether or not such a youth wage can work without an onerous effect on adults? We have tried so many other solutions for youth unemployment, and the problem is still with us. Why not at least try this one for a while?

Our legislation, therefore, has a sunset provision. After 3 years, the youth wage would have to be reviewed by Congress and would expire, unless specifically reauthorized. Since, as has been noted, the experts differ on the precise effect of a youth differential, we believe that a 3-year, experimental period would provide a sufficient data base and some practical experience on which to judge its usefulness as a weapon in the battle against youth unemployment. In addition, when I testified before the Labor Subcommittee 2 years ago in favor of such an experiment I told them that I would not necessarily insist on 3 years. Two years, one year, a limited pilot project in 10 cities around the country with the worst youth unemployment: Any of these, if properly handled, could provide us with some definitive information on whether a permanent youth wage statute is necessary or desirable. What I urge is that we develop a way of determining the practical utility of the youth wage instead of endlessly arguing about it on a hypothetical basis while thousands of young people who want to work are being denied that opportunity.

I very much appreciate the support of my cosponsors and the cooperation I have enjoyed over the last 2 years from the chairmen and staffs of the Labor and Human Resources Committee and its Labor Subcommittee. I look forward to continuing this working relationship with Senators HATCH and NICKLES as we seek solutions to this troubling problem.

My friend from South Dakota, Senator ABDNOR, has some remarks he would like to make on behalf of this legislation. He has been a very helpful and enthusiastic cosponsor and I look forward to working with him as well.

I ask unanimous consent, Mr. President, that there be printed in the RECORD the text of our bill and a fact sheet outlining its major provisions.

I further ask unanimous consent that four newspaper editorials in support of this legislation also be printed in the RECORD: From the January 19, 1983, Chicago Sun-Times; the January 14, 1983, Christian Science Monitor; the March 27, 1981, Alton Telegraph; and the April 1, 1981, Rock Island Argus.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 561

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Youth Employment Opportunity Act of 1983".

YOUTH EMPLOYMENT OPPORTUNITY PROVISIONS

SEC. 2. (a) Section 14(b) of the Fair Labor Standards Act of 1938 (29 U.S.C. 214(b)) is amended to read as follows:

"(b)(1)(A) To increase the opportunities for employment for youth, an employer may, in accordance with this paragraph, employ any youth at a wage rate not less than 85 per centum of the otherwise applicable minimum wage rate in effect under section 6.

"(B) The employment of a youth under subparagraph (A)—

"(i) may be made without prior or special certification by the Secretary,

"(ii) may be made for a period not to exceed one hundred and eighty days, and

"(iii) shall be made in compliance with applicable child labor laws.

"(C) An employer may not employ a youth under subparagraph (A) if—

"(i) the youth has been employed at a wage rate which is at least the minimum wage rate in effect under section 6, or

"(ii) the employer has employed the youth for a period of at least one hundred and eighty days.

"(D) For the purpose of this subsection, the term 'youth' means an individual who has not attained the age of twenty.

"(2)(A) The Secretary shall have general authority under this Act to assure compliance with the requirements of paragraph (1).

"(B) If the Secretary determines that—

"(i) an employer employing an individual under paragraph (1) is not in compliance with the requirements of such paragraph, or

"(ii) an employer is engaged in a pattern and practice of—

"(I) substituting youth employees employed at the special minimum wage authorized by paragraph (1)(A) for employees employed at or above the applicable minimum wage under section 6, or

"(II) terminating the employment of youth employees employed under paragraph (1)(A) and employing other youth employees in order to gain continual advantage of the wage provided for under this subsection,

the employer shall be deemed to have violated section 6 of this Act.

"(C) The liability of the employer under this paragraph shall include—

"(i) unpaid wages and overtime compensation determined on the basis of otherwise applicable minimum wage and overtime rates pursuant to sections 6 and 7 of this Act, and

"(ii) a fine to be determined by the Secretary not to exceed $2,500 for the first offense by an employer and not to exceed $10,000 for any subsequent offense by the same employer.".

(b) Section 13(a)(7) (29 U.S.C. 312(a)(7)) is amended to read as follows:

"(7) any employee to the extent that such employee is exempted by regulations, order, or certificate of the Secretary under section

14, or in accordance with the provisions of section 14(b); or".

TERMINATION DATE

SEC. 3. The amendments made by this Act are repealed effective three years after the date of enactment of this Act.

REPORT

SEC. 4. The Secretary of Labor shall prepare and submit a biannual report to the Congress on the effect of the amendments made by this Act. Such report shall include—

(1) the number of persons employed at the wages prescribed under the amendments made by this Act;

(2) the number of employers employing persons at wages prescribed under the amendments made by this Act;

(3) the general rate of unemployment of persons under twenty years of age;

(4) the effect of the amendments made by this Act upon employment of adults and persons under twenty years of age;

(5) the number and extent of violations under the amendments made by this Act; and

(6) such other information as the Secretary of Labor determines appropriate.

FACTSHEET—YOUTH EMPLOYMENT OPPORTUNITY ACT

1. Coverage: persons aged 16-19 years inclusive

2. Duration: first 180 days of employment by each employer

3. Wage level: 85 percent of the adult minimum wage in effect during the period of employment; currently, the youth wage level would be $2.85 per hour

4. Exceptions: shall not apply to any youth employee who has been employed by the same employer for a period of at least six months or who is employed at the time of enactment at a rate of at least the adult minimum wage

5. Penalties: a maximum of $2,500 for the first offense; a maximum of $10,000 for subsequent offenses

6. Violations: substituting younger workers employed at the youth wage level for adults employed at or above the standard minimum wage; terminating the employment of youth employees and employing other youth in order to gain continual advantage of the youth wage

7. Effective period of authorization: until three years from the date of enactment

8. Additional enforcement: the Secretary of labor shall report to the Congress twice yearly during each year that the law is in effect and the report shall include at least the following information:

The number of young people employed at the youth wage rate and the number of employers using the youth wage;

The youth unemployment rate;

Number and extent of violations under the Act; and

Impact on adult employment.

[From the Chicago Sun-Times, Jan. 19, 1983]

BETTER YOUTH WAGE IDEA

As the recession drags on, the Reagan administration has dredged up an old idea, a subminimum wage to encourage employers to hire young workers.

We've never liked the concept. It can be used to displace older workers or youths already employed at higher pay. It implies that a job is worth less merely because a young person holds it. In short, such a plan is ripe for potential abuses.

Nonetheless, three harsh facts need to be considered:

Some employers won't—or can't—pay unskilled youths the current $3.35-an-hour minimum wage. Unqualified youngsters may never find jobs.

Unemployment among out-of-school teenagers hit a record 24.5 percent last month. That's intolerable.

Unemployment will remain high even if a recovery begins soon. It always lags behind an economic upturn. Some action to limit the toll is necessary.

Reagan could make a subminimum wage more tolerable by dusting off a 1981 bill by Sen. Charles H. Percy (R-Ill.) for a three-year demonstration project.

Percy suggested a pay scale at 85 percent of the minimum wage. It would apply for only six months on the job—a training period, actually. After that, young workers who performed well would be kept on at higher pay.

Percy offered safeguards against displacing older workers and current employees. And, while Reagan's plan reportedly would apply through age 22, Percy's was limited to ages 16 through 19, many people in their 20s have families, college debts and other obligations.

Estimates vary, but one study suggests a subminimum wage will create a half million jobs for youths. That could prod Congress to at least consider the idea.

If it does, Percy's approach is the way to go.

[From the Christian Science Monitor, Jan. 14, 1983]

A SUBMINIMUM WAGE?

With teenage unemployment reaching 24.5 percent in December—the highest level ever recorded by the U.S. Labor Department—there is a strong case for not rejecting out of hand the notion of a subminimum wage for young people. The Reagan administration is studying just such a proposal.

Imposing a wage differential between young and adult workers raises concern among organized labor and its congressional allies that this would merely be a "Trojan horse," designed to *substitute* younger workers for older workers currently earning the $3.35-an-hour minimum wage. Yet a substantial body of analysis has been developed over the past decade suggesting that a subminimum wage—if restricted to young people in short-term, i.e. summer, jobs—could actually create new jobs. Thus, a national commission in 1981 estimated that a 25 percent decrease in the minimum wage would create up to half a million jobs for youth.

In weighing this issue, it is important to recognize that wage differentials now exist. Federal laws allow full-time students, students in vocational programs, and some handicapped persons to work at 85 percent of the official minimum. In fiscal 1982 the Labor Department approved requests for some 432,000 persons in these categories to be paid less than the minimum wage. Nor is such a differential limited to the U.S. West Germany, Austria, and Switzerland have a youth differential. The U.S. Congress itself came close to enacting such a provision back in 1977.

The Reagan administration is known to be considering a plan that would involve the following elements: The youth differential would apply only to summer jobs and to persons between 16 and 22 years of age. The differential would be pegged at 75 percent of the current wage, or $2.50 an hour.

To avoid charges that it was seeking to undercut the minimum wage, the administration might consider adopting elements of a proposal made by Senator Percy in 1981. The Percy plan was not just a summer program. It was a carefully balanced plan that sought to prevent adult displacement. It restricted a differential to youths between 16 and 19 years of age, as many persons in their 20s have family or financial obligations. The lower wage (pegged at 85 percent of the minimum wage) would only apply during the first six months of employment. At the same time, the Percy plan—which would have been a three-year experimental program—would have penalized employers who fired older workers in order to substitute younger persons.

Congress should examine the issue with utmost care. The minimum wage, one of the most enduring legacies of the New Deal, has ensured a modest safety net for millions of Americans. At the same time, because of the high unemployment affecting young people, especially minority youth, it seems reasonable to consider whether the present minimum wage is not too high for thousands of teenagers who find themselves locked out of the employment stream altogether—and would be able to find at least summer jobs if the wage were lowered.

[From the Alton Telegraph, Mar. 27, 1981]

DOUBLE-DECKER SYSTEM

A two-tiered minimum wage which would enable teenagers who want to work to find employment could go a long way toward solving many problems in this country.

Young people are advanced in every experience but working in this fast-moving society.

"Idle teenagers in every city in this country are turning to street crime because they are so desperate," said Sen. Chuck Percy. "It seems senseless to me to allow this to continue simply because key members of Congress—particularly in the House—and interest groups are locked into inflexible positions."

One approach would be to lower the $3.35 minimum wage by 15 percent for three years for teenagers on a trial basis. Other bills want to eliminate the minimum wage for teenagers.

The tragedy of our times is the unavailability of work for those who want to work.—STEPHEN A. COUSLEY

[From the Rock Island Argus, Apr. 1, 1981]

GIVE SUBMINIMUM WAGE A TRY

Debate continues over the merit, or the lack of merit, in legislation which would establish a sub-minimum wage for teen-age workers. While President Reagan endorsed the idea throughout his campaign, he has backed off a bit now, continuing to hail the principle but without backing any specific legislation which would implement it.

Organized labor is staunchly opposed to the sub-minimum wage for teens, Democrats who control the House Labor Committee and subcommittee oppose it, the U.S. Chamber of Commerce has cooled in its support of it while Labor Secretary Raymond Donovan says he would support such legislation even though he is "not certain the subminimum is a cureall."

We cannot be sure of what effect a special minimum wage for teens would have any more than anyone else. That's why we back the recent proposal of Sen. Charles Percy,

R-Ill., which would establish a trial period for the plan.

The question of what to do about the unemployed youth of this country is an especially acute one in Illinois where one of five job-seekers is a teen-ager. Percy's plan would address the problem by permitting employers to pay 85 percent ($2.85) of the minimum wage per hour ($3.35) to teens until they have completed six months on the job when they would be moved up to the full minimum wage.

That much of Percy's plan contains nothing new. It's the "sunset" provision in his proposal which separates it from similar legislation. That sunset provision calls for the lower minimum wage for workers between 16 and 19 to expire in three years unless Congress specifically acts to renew it.

We believe that is a sensible compromise to placate the warring factions, some of whom say that the sub-minimum would provide more jobs for teens while others say that it would merely take jobs away from older workers. Percy's proposed legislation takes the try it and find out approach, an angle that can establish the facts conclusively without much danger.

With the Illinois Department of Labor reporting that in February, of the nearly 475,000 Illinois residents seeking jobs, about 100,000 were between the ages of 16 and 19, it seems clear enough that some sort of action needs to be taken quickly. The unemployment rate in Illinois was 8.8 percent in February, but the rate was 22.5 percent among teens. That was about three percent higher than the national average for teenagers.

Minority unemployment figures for Illinois are even worse. About 110,000 nonwhite Illinois residents were unable to find jobs in February—an unemployment rate of 16.4 percent. The rate for non-white teens in the state hit a staggering 47 percent. Nationwide the unemployment rate for minority teens in February was 35.4 percent.

That's why we back Percy's response to the sub-minimum wage proposal's friends and foes alike: Give it a try. If it doesn't work we can try something else and no one will have suffered. And if it does work—great.

Percy is even willing to compromise on the length of time for the trial period, for while his proposed bill calls for a three-year trial, he has said he would also accept a two-year period or even as short a time as 18 months. And if even that isn't enough to persuade the Congress to give the sub-minimum a try, Percy says he would welcome the approval of perhaps a dozen pilot projects in those cities suffering most acutely from youth unemployment.

Whether the sub-minimum wage for teens works or not ought to be discovered at the earliest possible moment. Let's stop debating the possibilities and establish the realities. If the sub-minimum proves not to be the answer to youth unemployment, the sooner we find out and the sooner we begin looking elsewhere for a solution, the better for us all.

● Mr. ABDNOR. Mr. President, I am pleased to join with the distinguished senior Senator from Illinois, Mr. PERCY, in reintroducing legislation to establish a youth minimum wage.

His concern about the employment situation of our youth is well known and is shared by many of us who strongly support the creation of such a wage.

This youth minimum wage bill will help alleviate one of the most distressing problems that face our youth today. Twelve million Americans were out of work this past December. Of that total, nearly 40 percent were under the age of 25. Even more disheartening is the 24 percent unemployment rate for those between the ages of 16 and 19. Our minority youth unemployment level is even more distressing with figures ranging above 60 percent in many areas.

This is a situation that cannot be ignored. I believe that this legislation is even more important in this Congress than the last. We must assist these youngsters in their efforts to find job opportunities. Most of these young Americans have few skills, little or no work experience or training and often insufficient education to compete in the difficult job market.

If this legislation succeeds in only placing a small fraction of these youngsters to work—it is worthy of serious consideration. The passage of such legislation will have beneficial results for our Nation by increasing tax revenues and bolstering social security and unemployment insurance payments to assist others.

There are, I know, those who in good faith oppose this legislation because they believe it would only result in employers taking advantage of these workers by compensating them at a lower rate. Well, I believe that a lot of our young people would rather have a job paying $2.85 per hour than not having one at all.

I commend Mr. PERCY's efforts to assist in formulating a plan that will address this serious problem. We owe young Americans the chance to be contributing members of our society and learn firsthand the challenges, lessons, and rewards that come with a productive employment opportunity and I hope that each Member of this body will review this legislation and come to support this effort to assist in the problem of teenage unemployment.●

By Mr. CHILES (for himself, Mr. PRYOR, Mrs. KASSEBAUM, Mr. PROXMIRE, Mr. BURDICK, Mr. COHEN, Mr. DECONCINI, Mr. HOLLINGS, and Mr. SASSER):

S. 563. A bill to reform the laws relating to former Presidents; to the Committee on Governmental Affairs.

FORMER PRESIDENTS FACILITIES AND SERVICES ACT OF 1983

● Mr. CHILES. Mr. President, today I am introducing the Former Presidents Facilities and Services Reform Act of 1983. The bill's purpose is to stop, and then reverse, the ever-increasing costs of services and protection currently provided former Presidents.

An examination of the former Presidents program reveals we have entered the era of the imperial former Presidency, with lavish libraries, special staffs and benefits, around-the-clock Secret Service protection for life, and other badges of privilege.

The program has grown out of control and shows no sign of stopping. The cost of former Presidents has leaped from $64,000 in 1955 to $6.3 million in 1975 to some $27 million in fiscal 1983. That amounts to over a fourfold increase in just the last 10 years. Since 1981, the program has cost more than the expense of running the White House itself for our incumbent President.

I believe our policy should insure each former President is able to lead a dignified, retired life, free from danger, and have the ability to respond to the many requests received as a result of their service as President.

The original purpose of the various laws governing former Presidents reflect that belief. They were designed to make sure the prestige and dignity of the office would not be compromised. Prior to 1958, for example, the President of the United States was virtually the only officer or employee of the Federal Government not covered by some sort of retirement program, much less the other benefits they receive today.

Now, by failing to place reasonable limits on Presidential libraries, Secret Service protection, office and staff allowances, the Congress is permitting the former Presidents program to go beyond its original intent and character. We are permitting our former Presidents to use tax dollars to become wealthy. I feel strongly this is waste that should be stopped.

I first became alarmed by the proliferation of benefits and the continuing growth of taxpayer dollars going to their maintenance in 1979, during the 96th Congress. I chaired the appropriations subcommittee which has jurisdiction over the support programs for former Presidents. Senator PRYOR and I conducted 3 days of oversight hearings on the problem.

We heard testimony from the executive branch, the General Accounting Office, and experts in the private sector. After the hearings, we and 13 of our colleagues introduced legislation (S. 2408) to discipline and limit the overall program.

After introduction and consultation with our living former Presidents we further refined the bill.

In the last Congress, I again introduced this legislation (S. 1325). The Committee on Governmental Affairs held hearings and received testimony from the Secret Service, the General Services Administration, the National Archives, and others. I should add that I am appreciative of that committee's continued interest in this legislation and Chairman ROTH's help in get-

ting this issue the attention it deserves.

An overview of the inflationary situation that characterizes our Federal spending for former Presidents shows three major areas of growth: First, in the money spent to operate Presidential libraries; second, in office and staff allowances; and third, in the cost to provide Secret Service protection to former Presidents, their spouses, or widows, and their minor children.

Mr. President, the bill I am introducing today establishes controls for each of these areas. It keeps the current decentralized system of Presidential libraries in place, but establishes a limit on the Government's obligation to maintain them. Currently, Presidential libraries are built with private funds, but maintained and operated with public money. In practice, the Government has no control over the size of the building it will be asked to operate in perpetuity. This bill limits the size of any new Presidential library to 40,000 square feet—enough space for archival records and a modest museum, but not for an extravagant monument.

The bill also sets a $300,000 ceiling, which will be reduced over a 9-year period to $200,000, on the staff allowances for former Presidents.

The use of office funds for partisan political activities or for income-generating activities is prohibited. A former President is allowed to use Government funds to prepare his memoirs, but only if he were to agree to have the memoirs published by the Government Printing Office, with the proceeds to be paid into the U.S. Treasury.

The bill changes the current provisions of law dealing with Secret Service protection for former Presidents, their spouses, and family. Each former President is provided automatic protection for the first 8 years he is out of office. Afterward, protection is limited to periods of actual threat. Spouses and minor children are given protection only to the extent it is incidental to protection of the former President. Widows of former Presidents are given protection for 6 months after the President has died.

The bill also provides guidelines for the creation of an advisory committee, composed of nine persons; six from Federal, State, and local law enforcement and three from the public. The panel will review petitions for protection requested beyond the limits set in the bill. The mission of the panel will be to insure adequate and necessary protection for former Presidents and their families, while at the same time insuring such services will not be abused. Perpetual lifelong protection will no longer be automatic.

The provisions of this bill will enable each former President to lead a dignified, retired life. That is appropriate and fitting for those individuals who are the senior statesmen or women of our Nation. Each will be able to lead a life secure from threats of physical harm. Each will have assistance to respond to the many requests and inquiries received as a result of their tenure. But there is a need for placing reasonable controls on expenditures which are presently unrestrained. This bill will serve that taxpayer interest as well.

I want to add this bill will not balance the budget. Nevertheless, I believe we here in Congress should not fail to recognize the need to cut back on all areas of unnecessary spending, particularly one that is as visible and symbolic as the former Presidents program. Moreover, there is an important need to restore the original intent and character of this program. We have gone way, way beyond the idea our former Presidents should not suffer indignities and hardships as a result of their service.

I invite all of my colleagues who wish to join me in this effort to cosponsor this legislation, and ask unanimous consent that a summary of the bill be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY

WHAT THE BILL DOES

Establishes the Administrator of the General Services Administration as responsible for managing Presidential Libraries. He is to create architectural and design standards and may accept responsibility for the maintenance of Presidential Libraries by taking title to certain land or buildings.

Requires all new libraries to be a single building whose size may not exceed 40,000 square feet, including museum space. The Administrator must submit a new library prospectus to Congress for review. Submission must include a cost estimate of annual cost to the government for maintenance. A prospectus which does not meet space and location standards may not be accepted unless Congress passes a concurrent resolution. Modifications for existing libraries must also be voted upon and approved.

Establishes an original staff allowance of $300,000 a year, which will be reduced over a nine year period to a ceiling of $200,000.

Limits each former President to one office, not to exceed 4,000 square feet.

Prohibits absolutely the use of funds for either partisan political activities or income generating activities. Funds can be used for the preparation of memoirs provided receipts from the sale of such memoirs are paid into the treasury.

Insists that memoirs prepared by a former President who used his staff allowance funds to do so will be printed by the Government Printing Office and distributed and sold by the Superintendent of Documents.

Requires each former President submit a report by March 1 of each year detailing his activities and their expense.

Mandates a 10 year "sunset" provision for the authorization of staff allowances. The automatic termination forces Congress to redetermine what the proper funding should be at least every 10 years.

Places the pensions of widows of former Presidents at a rate which equals two-thirds of what the former President would receive if he were alive.

Specifies a former President may have eight years of secret service protection instead of for life. A spouse and children are entitled to protection only if their safety is related to the former President's.

Authorizes the Secretary of Treasury to extend protection for former Presidents for a year, for widows and children six months, if a serious threat exists.

Authorizes the Secretary to make additional extensions if requested by person seeking protection and approved by an Advisory Panel.

Creates Advisory Panel on Secret Service Protection. Comptroller General to select 9 members for six year terms. Membership is to be three federal law enforcement employees outside Secret Service, three state and local law enforcement leaders, and three prominent citizens.

Limits protection of former Vice President from his last day in office to the end of that fiscal year. Such protection is provided only if requested and Secretary of Treasury finds a serious threat.●

● Mr. PRYOR. Mr. President, I am pleased to join in the introduction of the Former Presidents Facilities and Services Reform Act of 1983.

This legislation is designed to control the approximate $22 million cost in fiscal 1981 for Presidential pensions, office staff allowances, Presidential libraries, and Secret Service protection for former Presidents and their families.

The services and activities provided currently to our Presidents are very expensive and the cost is growing at an alarming rate. In fiscal year 1980, these statutory programs cost approximately $18.3 million—an amount which exceeded the appropriation for the entire White House operation. The libraries cost over $9 million in fiscal 1980 and the protection required $8 million. A little over a decade ago, in fiscal 1970, the library costs were less than $2 million and protection costs were about $730,000. Action to control these costs is very much needed.

It has become apparent over recent months and years that the American taxpayers want to see all Federal expenditures reviewed, and where appropriate, reduced. They believe, as I do, that these programs must not be an exception to this rule.

The legislation being offered today will do a great deal to introduce controls in this area. It will provide guidelines that will apply to Presidential libraries and reduce those costs. It will also place ceilings on the funds authorized for the staffs and office expenditures of former Presidents and their families.

Finally, the legislation will resolve inconsistencies between the Former Presidents Act and the Transition Act by removing former Presidents from coverage of the Transition Act and

assure that Federal funds may not be used for partisan political or income-generating activities.

This legislation was developed as a result of hearings in the 96th and 97th Congresses in both the Governmental Affairs Subcommittee on Civil Service and General Services and the Appropriations Subcommittee on Treasury, Postal Service, and General Government. The hearings served to call attention to the ambiguities and deficiencies present in the current statutes. These weaknesses have been noted in reports of the General Accounting Office and I believe that everyone concerned with these statutes, including former Presidents and their families, will welcome further clarification of the provisions.

The review of these statutes has been aimed at developing good public policy. It has been our intention to enhance rather than diminish the Nation's respect and affection for its Presidents and their families.

This legislation should provide for better oversight and control over rapid growth of Federal expenditures. It maintains and improves programs while also responding to the interest of the taxpayers.

I urge my colleagues to give this legislation favorable consideration.●

By Mr. MATSUNAGA (for himself, Mr. RANDOLPH, Mr. HATFIELD, Mr. JEPSEN, Mr. STAFFORD, Mr. BYRD, Mr. ANDREWS, Mr. BAUCUS, Mr. BIDEN, Mr. BINGAMAN, Mr. BOSCHWITZ, Mr. BRADLEY, Mr. BUMPERS, Mr. BURDICK, Mr. CHAFEE, Mr. CHILES, Mr. COCHRAN, Mr. CRANSTON, Mr. DANFORTH, Mr. DECONCINI, Mr. DODD, Mr. DURENBERGER, Mr. EAGLETON, Mr. EXON, Mr. FORD, Mr. HART, Mr. HEINZ, Mr. HUDDLESTON, Mr. INOUYE, Mr. JOHNSTON, Mrs. KASSEBAUM, Mr. KENNEDY, Mr. LAUTENBERG, Mr. LEAHY, Mr. LEVIN, Mr. LONG, Mr. MATHIAS, Mr. MELCHER, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. MURKOWSKI, Mr. PELL, Mr. PRESSLER, Mr. PRYOR, Mr. RIEGLE, Mr. ROTH, Mr. SARBANES, Mr. SASSER, Mr. SIMPSON, Mr. SPECTER, Mr. STENNIS, and Mr. TSONGAS):

S. 564. A bill to establish the U.S. Academy of Peace, and for other purposes; to the Committee on Labor and Human Resources.

U.S. ACADEMY OF PEACE ACT

Mr. MATSUNAGA. Mr. President, I am most pleased to announce that I am introducing today, with Senators JENNINGS RANDOLPH, MARK O. HATFIELD, ROGER JEPSEN, ROBERT T. STAFFORD, ROBERT C. BYRD, MARK N. ANDREWS, MAX BAUCUS, JOSEPH BIDEN, JEFF BINGAMAN, RUDY BOSCHWITZ, BILL BRADLEY, DALE BUMPERS, QUENTIN BURDICK, JOHN CHAFEE, LAWTON CHILES, THAD COCHRAN, ALAN CRANSTON, JOHN DANFORTH, DENNIS DECONCINI, CHRISTOPHER DODD, DAVID DURENBERGER, THOMAS EAGLETON, JAMES EXON, WENDELL FORD, GARY HART, JOHN HEINZ, WALTER D. HUDDLESTON, DANIEL K. INOUYE, J. BENNETT JOHNSTON, NANCY KASSEBAUM, EDWARD M. KENNEDY, FRANK LAUTENBERG, PATRICK LEAHY, CARL LEVIN, RUSSELL LONG, CHARLES MATHIAS, JOHN MELCHER, HOWARD METZENBAUM, GEORGE MITCHELL, DANIEL P. MOYNIHAN, FRANK MURKOWSKI, CLAIBORNE PELL, LARRY PRESSLER, DAVID PRYOR, DONALD RIEGLE, WILLIAM ROTH, PAUL SARBANES, JIM SASSER, ALAN SIMPSON, ARLEN SPECTER, JOHN STENNIS, and PAUL TSONGAS, a bill which would establish the U.S. Academy of Peace—a grand total of 53 Senators, constituting more than the necessary majority to pass the bill.

The fact that so many would join in introducing a bill to establish an academy of peace is irrefutable evidence of a recognition on the part of our Nation's leaders that the United States because of its heritage, power, and prestige must continue as a major force for world peace. Indeed, the American commitment to peace is as old as our Republic itself. At the end of the American Revolution, when the Founders of our Nation were framing a Constitution, a plan for a Peace Office was published in a popular almanac. The proposed Peace Office was envisioned as an integral component of the new government, and it was to have as its principal objective the education of Americans in the art and science of peace. George Washington, himself, whose birthday we appropriately celebrated yesterday, in a circular addressed to the former colonies, called for the establishment of "a proper peace establishment" within the new government.

In the 20th century, the desire for a national institution devoted to peace reappeared in 1935 when U.S. Senator Matthew M. Neely of West Virginia introduced legislation providing for the establishment of a Federal Department of Peace. The proposed Department closely resembled the Revolutionary War-era Peace Office.

A Bureau of Peace and Friendship, to be located in the U.S. Department of Labor, was also proposed in 1935 by U.S. Representative Fred Bierman of Iowa. The Bureau, to be headed by an eminent sociologist, was to carry out sociological research on matters pertaining to peace and war. Research was also the focus of two resolutions introduced in the House in 1945 and 1947 by then-Representative Everett M. Dirksen of Illinois. The Dirksen resolutions would have established a Division of Peace within the U.S. Department of State.

Research and Education were the principal objectives of these early proposals, but, in later years, the concept of a Federal institution devoted to peace was expanded. In 1945, Senator Alexander Wiley of Wisconsin introduced legislation to create a small, high-level Department of Peace with the Secretary serving, among other things, as the U.S. Representative in the United Nations Security Council.

In that same year, then Representative JENNINGS RANDOLPH of West Virginia introduced a Department of Peace bill which incorporated for the first time the concept that the international exchange of people and ideas is an effective means of promoting peace. Now a distinguished Senator from West Virginia, JENNINGS RANDOLPH has remained one of the principal supporters of the Peace Academy concept and his ideas are an integral component of this bill and I am certainly delighted to be associated with the senior Senator from West Virginia (Mr. RANDOLPH) in the introduction of this bill.

Although hearings were held on the measures introduced in 1945 and 1947, the real foreign policy developments immediately after World War II were the Marshall plan and the subsequent addition of a technical assistance program in 1949.

In 1955, President Dwight D. Eisenhower pointed with concern to the "unprecedented destructive power of the new weapons and the international tensions which powerful armaments aggravate." He appointed a Special Assistant to the President for Disarmament. That individual, Gov. Harold Stassen of Minnesota, was given Cabinet rank and was often called the Secretary of Peace.

Also in 1955, Congressman Harold Ostertag of New York introduced legislation providing for the establishment of a National Peace College to carry out both education and training.

Between 1959 and 1961, the concept which became the Arms Control and Disarmament Agency took shape in Congress. Two of its most prominent sponsors in the Senate were Senator Hubert H. Humphrey of Minnesota, who proposed a national peace academy, and Senator John F. Kennedy of Massachusetts, who proposed an arms control research institute.

In 1963, President Kennedy, speaking at the American University commencement exercises here in the Nation's Capital, observed that: "The pursuit of peace is not as dramatic as the pursuit of war, but we have no more urgent task." He spoke of peace as "the necessary rational end of rational men," and made it clear that he was not referring to some vague concept of universal goodwill, but to a practical and attainable peace, "based not on a sudden revolution in human

nature, but on a gradual evolution in human institutions."

As can be readily observed from this history of the concept, the Peace Academy is not a new idea or a foreign idea, but one which is deeply rooted in American history. For nearly 200 years, it has had the support of men and women of vision both within the Congress and in the private sector. Since 1963, I myself have sponsored legislation providing for the establishment of a national institution devoted to peace. In 1976, after my election to the Senate, I joined Senator RANDOLPH and Senator MARK HATFIELD in introducing comprehensive legislation which included a national peace academy. We decided that the American people were probably unaware of the long history of this proposal and its great potential, so we decided to pursue a strategy calling for a study of the various peace academy proposals. In 1978, Congress authorized a 1-year study as part of the Education Act amendments of that year, Public Law 95-561. A nine-member study commission, with three members appointed by the President of the United States, three by the President pro tempore of the Senate, and three by the Speaker of the House of Representatives was appointed in the latter part of 1979, after Congress had appropriated funds for the study. The new U.S. Commission on Proposals for the National Academy of Peace and Conflict Resolution was mandated by Congress to examine the various proposals for a national peace academy, to decide whether or not such an institution should be established, and to make recommendations to Congress with respect to its size, scope, and location.

The Commission, which I chaired, held 12 public hearings in as many American cities, from Boston to Honolulu. The Commissioners held a number of less formal meetings with other governmental bodies and reviewed the existing literature relating to peace and conflict resolution.

Upon the conclusion of its study, the Commission recommended that the United States undertake a focussed, Federal investment in peace education and training. The Commission concluded that such an effort would help the United States achieve its twin goals of international peace and international security. The Commission found ample evidence that conflict resolution skills exist and are being used on the local, State, and national levels, but they have never been fully recognized or effectively utilized by the United States in the international arena.

After the Commission filed its formal report, in 1981, I introduced legislation to implement its findings and recommendations. By the end of the 97th Congress, that bill had 56 cosponsors. Subcommittee hearings on the measure were held in April 1982 and, in July of last year, the bill was favorably reported by the Senate Labor and Human Resources Committee. The bill was placed on the Senate Calendar and its failure to pass the Senate last year was due only to the press of other very urgent legislation at the end of the Congress.

The bill that I am introducing today is identical to the one reported by the Labor and Human Resources Committee and incorporates the recommendations of the Commission on Proposals for the National Academy of Peace and Conflict Resolution.

The proposed U.S. Academy of Peace would be a federally chartered, nonprofit corporation with headquarters in Washington, D.C. Its core budget would come from congressional appropriations, but it would solicit supplemental funding from the private sector.

The Academy would have three major functions: First, it would perform research on its own and would fund research at other institutions of higher education; second, it would provide graduate and postgraduate educational programs for which students at other institutions could receive academic credit, and it would provide continuing education services such as seminars and workshops for individuals and organizations in both the public and private sectors; third, the Academy would publish the results of its research and disseminate information about its findings.

The Academy would not intervene in international disputes, nor would it duplicate services already provided by the State Department. It would complement and strengthen programs already existing at other institutions of higher education.

The Academy would also help to strengthen and improve existing political leadership here at home and abroad by establishing a Center for International Peace to which leaders from this Nation and abroad would be appointed to study.

The cost of the proposed Peace Academy would be modest indeed. The bill would authorize a total of $31 million for the Peace Academy—$6 million in operating funds for its first year, $10 million in operating funds for its second year, and a one-time authorization of $15 million for the acquisition of Academy facilities. Since the end of World War II, the United States has provided other nations with over $236 billion in military assistance, economic and technical aid, much of it to repair the ravages of that war. In the near future, we will be receiving from the President a request for $65 million which, as I understand it, will be used to teach democracy to the leaders of nations where that form of government is said to be "shaky." Considered in that light, the proposed U.S. Academy of Peace is a real bargain. While it will not put an end to international conflict overnight or totally eliminate our need for a strong national defense, it has the potential to increase national security by teaching the world's leaders to cope with conflict without resort to war.

And, finally, the establishment of the Peace Academy would allow us to say without reservation that peace really is the rational end of rational Americans. It would establish the United States as the first industrialized nation in the world to take positive action toward insuring world peace in the future by teaching future leaders the art of peacemaking, the art of settling conflict without resort to war.

Mr. President, the art of peacemaking, the art of settling conflicts without resort to war, is what our leaders not only of this Nation but all other nations need. The Peace Academy is an idea whose time has come at long last.

Mr. President, I ask unanimous consent that the text of the U.S. Academy of Peace Act be printed in the CONGRESSIONAL RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 564

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "United States Academy of Peace Act".

DECLARATION OF FINDINGS AND PURPOSES

SEC. 2. (a) The Congress finds and declares that—

(1) a living institution embodying the heritage, ideals, and concerns of the American people for peace would be a significant response to the deep public need for the Nation to develop fully a range of effective options, in addition to armed capacity, that can leash international violence and manage international conflict;

(2) people throughout the world are fearful of nuclear war, are divided by war and threats of war, are experiencing social and cultural hostilities from rapid international change and real and perceived conflicts over interests, and are diverted from peace by the lack of problem-solving skills for dealing with such conflicts;

(3) many potentially destructive conflicts among nations and peoples have been resolved constructively and with cost efficiency at the international, national, and community levels through proper use of such techniques as negotiation, conciliation, mediation, and arbitration;

(4) there is a national need to examine the disciplines in the social, behavioral, and physical sciences and the arts and humanities with regard to the history, nature, elements, and future of peace processes, and to bring together and develop new and tested techniques to promote peaceful economic, political, social, and cultural relations in the world;

(5) the peacemaking activities of Americans throughout government, private enterprise, and voluntary associations can be

strengthened by a national institution devoted to international peace research, education and training, and information services;

(6) there is a need for Federal leadership to expand and support the existing international peace and conflict resolution efforts of the Nation and to develop new comprehensive peace education and training programs, basic and applied research projects, and programs providing peace information;

(7) the Commission on Proposals for the National Academy of Peace and Conflict Resolution, created by the Education Amendments of 1978, recommended establishing an academy as a highly desirable investment to further the Nation's interest in promoting international peace;

(8) an academy, strengthening and symbolizing the fruitful relation between the world of learning and the world of public affairs, would be the most efficient and immediate means for the Nation to enlarge its capacity to promote the peaceful resolution of international conflicts; and

(9) the establishment of an academy is an appropriate investment by the people of this Nation to advance the history, science, art, and practice of international peace and the resolution of conflicts among nations without the use of violence.

(b) It is the purpose of this Act to establish an independent, nonprofit, national institution to serve the people and the Government through the widest possible range of education and training, basic and applied research opportunities, and peace information services on the means to promote international peace and the resolution of conflicts among the nations and peoples of the world without recourse to violence.

DEFINITIONS

SEC. 3. As used in this Act, the term—

(1) "Academy" means the United States Academy of Peace established under this Act;

(2) "Board" means the Board of Directors of the Academy; and

(3) "Center" means the Center for International Peace of the Academy.

ESTABLISHMENT

SEC. 4. (a) There is hereby established the United States Academy of Peace.

(b) The Academy is an independent nonprofit corporation and an organization as defined in section 170(c)(2)(B) of the Internal Revenue Code of 1954. The Academy does not have the power to issue any shares of stock or to declare or pay any dividends. No part of the financial resources, income, or assets of the Academy or of any legal entity established by the Academy may inure to the benefit of a director, officer, employee, or agent of the Academy, except as reasonable compensation for service or payment for expenses.

(c) The Academy shall maintain its principal office in the District of Columbia with a designated agent or agents to accept service of process for the corporation. Notice to or service upon an agent shall be deemed notice to or service upon the Academy.

(d) The Academy may rent, lease, purchase, or receive and hold in its name property for offices, schools, and other facilities and to carry out activities under this Act. As determined by the Board, the Academy may establish offices, schools, and other facilities outside the District of Columbia for purposes not inconsistent with this Act.

(e) As determined by the Board, the Academy may establish, under the laws of the District of Columbia, a legal entity which is capable of receiving, holding, and investing public and private funds for purposes in furtherance of the Academy under this Act. The Academy may designate such legal entity as the "Endowment of the United States Academy for Peace".

(f) The Academy is liable for the acts of its directors, officers, employees, and agents when acting within the scope of their authority.

(g)(1) The Academy has the sole and exclusive right to use and to allow or refuse others the use of the terms "United States Academy of Peace", "Center for International Peace", and "Endowment of the United States Academy of Peace" and the use of any official United States Academy of Peace emblem, badge, seal, and other mark of recognition or any colorable simulation thereof. No powers or privileges hereby granted shall interfere or conflict with established or vested rights secured as of September 1, 1981.

(2) Notwithstanding any other provision of this Act, the Academy may use "United States" or "U.S." or any other reference to the United States Government or Nation in its title or in its corporate seal, emblem, badge, or other mark of recognition or colorable simulation thereof in any fiscal year only if there is an authorization of appropriations for the Academy for such fiscal year provided by law.

POWERS AND DUTIES

SEC. 5. (a) The Academy may exercise the powers conferred upon a nonprofit corporation by the District of Columbia Nonprofit Corporation Act consistent with this Act, except for section 5(o) of the District of Columbia Nonprofit Corporation Act (section 1005(o) of title 29 of the District of Columbia Code).

(b) The Academy may—

(1) establish a Center for International Peace and appoint to it for periods up to two years scholars and leaders in peace from the United States and abroad to pursue scholarly inquiry and other appropriate forms of communication on international peace and conflict resolution and, as appropriate, provide stipends, grants, fellowships, and other support to the leaders and scholars;

(2) establish such divisions, programs, schools, and offices as the Board deems appropriate to carry out this Act;

(3) enter into formal and informal relationships with other institutions, public and private, for purposes not inconsistent with this Act;

(4) conduct research and make studies, particularly of an interdisciplinary or of a multidisciplinary nature, into the causes of war and other international conflicts and the elements of peace among the nations and peoples of the world, including peace theories, methods, techniques, programs, and systems, and into the experiences of the United States and other nations in resolving conflicts with justice and dignity and without violence as they pertain to the advancement of international peace and conflict resolution;

(5) develop programs to make international peace and conflict resolution research, education, and training more available and useful to persons in government, private enterprise, and voluntary associations, including the creation of handbooks and other practical materials;

(6) provide peace education and research programs at graduate and postgraduate levels that lead to degrees as well as to certificates and other forms of recognition;

(7) conduct training, symposia, and continuing education programs for practitioners, policymakers, policy implementers, and citizens and noncitizens directed to developing their skills in international peace and conflict resolution;

(8) develop, for publication or other public communication, and disseminate, the products of the Academy;

(9) establish a clearinghouse and other means for disseminating information from the field of peace learning to the public and to government personnel;

(10) establish a United States Medal of Peace, and any other medals or honors the Board periodically may recommend, to be awarded annually with appropriate ceremony by the President of the United States, upon recommendation to the President by the Board, to one or more individuals or groups deserving of exemplary recognition for personal or group contribution to international peace education, training, or research. A medal shall be accompanied by a cash award in an amount determined by the Board to be paid in accordance with section 10(b)(2). A person associated with the Academy may receive a medal or other award; and

(11) secure directly and without reimbursement, upon request of the president of the Academy to the head of any Federal department or agency, information necessary to enable the Academy to carry out the purposes of this Act if such release of the information would not unduly interfere with the proper functioning of a department or agency.

(c) The Academy may undertake extension and outreach activities under this Act by making grants and entering into contracts with institutions of postsecondary, community, secondary, and elementary education including combinations of such institutions, with public and private educational, training, or research institutions including libraries, and with public departments and agencies including State and territorial departments of education and of commerce. No grant may be made to an institution unless it is a nonprofit or official public institution. A grant or contract may be made to—

(1) initiate, strengthen, and support basic and applied research on international peace and conflict resolution;

(2) promote and advance the study of international peace and conflict resolution by educational, training, and research institutions, departments, and agencies;

(3) educate the Nation about and educate and train individuals in peace and conflict resolution theories, methods, techniques, programs, and systems;

(4) assist the Academy in its publication, clearinghouse, and other information services programs; and

(5) promote the other purposes of this Act.

(d) The Academy may respond to the request of a department or agency of the United States Government to investigate, examine, study, and report on any issue within the Academy's competence. A research request may be refused for reason of cost or of inappropriateness to the Academy's purposes or independence.

(e) The Academy may enter into contracts for the proper operation of the Academy, including maintenance of its offices, schools, and other facilities.

(f) The Academy may appoint and fix the compensation and duties of officers, employees, and agents and establish such advi-

sory committees, councils, or other bodies as the efficient administration of the business and purposes of the Academy may require.

(g) The Academy may adopt, amend, and alter bylaws, not inconsistent with the laws of the United States and the District of Columbia, for the management of Academy property and the regulation of Academy affairs.

(h) The Academy may obtain grants and contracts and receive gifts and contributions from government at all levels, international organizations, and private agencies, organizations, institutions, and individuals.

(i) The Academy may charge and collect subscription fees and develop, for publication or other public communication, and disseminate, periodicals and other materials.

(j) The Academy may charge and collect fees and other participation costs from persons and institutions participating in the Academy's direct activities authorized in subsection (b).

(k) The Academy may sue and be sued, complain, and defend in any court of competent jurisdiction.

(l) The Academy may adopt, alter, use, and display a corporate seal, emblem, badge, and other mark of recognition and colorable simulations thereof.

(m) The Academy may do any and all lawful acts and things necessary or desirable to carry out the objectives and purposes of this Act.

(n) The Academy shall not itself undertake to influence the passage or defeat of any legislation by the Congress of the United States or by any State or local legislative bodies, or by the United Nations, except that personnel of the Academy may testify or make other appropriate communication when formally requested to do so by a legislative body, a committee, or a member thereof.

BOARD OF DIRECTORS

SEC. 6. (a) The powers of the Academy shall be vested in a Board of Directors unless otherwise specified in this Act.

(b) The Board of Directors shall consist of fifteen members appointed as follows:

(1) two Members of the Senate, one from each of the major political parties, to be appointed by the President pro tempore of the Senate no later than five days after the confirmation of the members nominated by the President;

(2) two Members of the House of Representatives, one from each of the major political parties, to be appointed by the Speaker of the House of Representatives no later than five days after the confirmation of the members nominated by the President; and

(3) eleven persons, no more than six of whom may be members of the same political party and none of whom may be employees of the Federal Government, appointed by the President, by and with the advice and consent of the Senate. Not later than ninety days after the date of enactment of this Act, the President shall nominate the eleven individuals for the initial Board and transmit their names and any other information to the Senate. If the Senate fails to confirm a nominee, it shall so inform the President. The President shall submit the name of a new nominee within fifteen days of notice of rejection by the Senate.

(c) A director shall take an oath of office administered by the Vice President of the United States within two weeks after appointment, if a Member of Congress, or after confirmation by the Senate, if a Presidential appointee.

(d) Members of the Board of Directors shall serve the following terms of office:

(1) A Member of Congress appointed to the Board shall serve for a single term of six years and only while serving as a Member of Congress.

(2) When submitting nominations for the initial Board, the President shall stipulate by name four directors who shall serve for five-year terms, four directors who shall serve for four-year terms, and three directors who shall serve for three-year terms. Thereafter, each Presidential appointee, except for a director appointed to fill an unexpired term, shall serve for a five-year term. No Presidential appointee may serve on the Board for more than ten years.

(3) No person may be appointed to less than a full term unless appointed to fill an unexpired term.

(e) Whenever a vacancy occurs on the Board before the expiration of a director's term of office, the vacancy shall be filled—

(1) if a Member of Congress, pursuant to paragraph (1) or (2) of subsection (b) with the appointment made to a full term no later than thirty calendar days after the vacancy occurs; or

(2) if a Presidential appointee, by the Board submitting a list of nominees of no less than three and no more than five names to the President no later than thirty calendar days after the vacancy occurs. The President shall select a nominee from the list and submit the nominee's name to the Senate for confirmation no later than thirty calendar days after receiving the Board's recommendations.

(f) At least ninety days but no more than one hundred and twenty days before the timely expiration of the term of office of any Presidential appointee to the Board, the Board shall submit to the President a list of no less than three and no more than five recommendations for each position. The President shall submit the name of the nominee for each position, selected from the Board's list of recommendations, to the Senate for confirmation at least forty-five calendar days before expiration of the term of office to be filled.

(g) A director may be removed from the Board as follows:

(1) A member of the Board appointed from the Congress may be removed by the appointing authority for malfeasance in office, persistent neglect of duties, or inability to discharge duties.

(2) A member of the Board appointed by the President may be removed by the President—

(A) in consultation with the Board, for conviction of a felony, malfeasance in office, persistent neglect of duties, or inability to discharge duties;

(B) upon the recommendation of ten members of the Board; or

(C) upon the recommendation of a majority of the members of the Committee on Foreign Affairs and the Committee on Education and Labor of the House of Representatives and a majority of the members of the Committee on Foreign Relations and the Committee on Labor and Human Resources of the Senate.

A recommendation made in accordance with clause (B) may be made only pursuant to action taken at a meeting of the Board, which may be closed pursuant to the procedures of subsection (i). Only members who are present may vote. A record of the vote shall be maintained. The President shall be informed immediately by the Board of the recommendation. If the President removes the member based on any of the grounds described in clauses (A) through (C), the President shall nominate a successor pursuant to subsection (e).

(h) No member of the Board may participate in any decision, action, or recommendation with respect to any matter which directly and financially benefits the member or pertains specifically to any public body or any private or nonprofit firm or organization with which the member is then formally associated or has been formally associated within a period of two years.

(i) Meetings of the Board shall be conducted as follows:

(1) The President shall stipulate by name the nominee who shall be the first Chairman of the Board. The first Chairman shall serve for a term of three years. Thereafter, the Board shall elect a Chairman every three years from among the directors appointed by the President and may elect a Vice Chairman if so provided by the Academy's bylaws.

(2) The Board shall meet at least semiannually, at any time pursuant to the call of the Chairman or as requested in writing to the Chairman by at least five members of the Board, and as may be provided by the bylaws of the Academy not inconsistent with this Act. A majority of the members of the Board shall constitute a quorum for any Board meeting.

(3) Upon majority vote of the members of the Board, the Board shall adopt, and may from time to time amend, such bylaws as are necessary for the proper management and functioning of the Academy.

(4) All meetings of the Board shall be open to public observation and shall be preceded by reasonable public notice. Notice in the Federal Register shall be deemed to be reasonable public notice for purposes of the preceding sentence. In exceptional circumstances, the Board may close those portions of a meeting, upon a majority vote of its members present and with the vote taken in public session, which are likely to disclose information likely to affect adversely any ongoing peace proceeding or activity or to disclose information or matters exempted from public disclosure pursuant to subsection (c) of section 552b of title 5, United States Code.

(j) A director appointed by the President shall be entitled to receive the daily equivalent of the annual rate of basic pay in effect for grade GS-18 of the General Schedule in section 5332 of title 5, United States Code, for each day during which the director is engaged in the performance of duties as a member of the Board.

(k) While away from his home or regular place of business in the performance of duties for the Academy, a director shall be allowed travel expenses, including a per diem in lieu of subsistence, not to exceed the expenses allowed persons employed intermittently in Government service under section 5703(b) of title 5, United States Code.

OFFICERS AND EMPLOYEES OF THE ACADEMY

SEC. 7. (a) The Board shall appoint the president of the Academy and such other officers as the Board determines to be necessary. The president shall be a nonvoting ex officio member of the Board. All officers shall serve at the pleasure of the Board. The president shall be appointed for an explicit term of years. Notwithstanding any other provision of law limiting the payment of compensation, the president and other officers appointed by the Board shall be

compensated at rates determined by the Board, but no greater than those provided for by level I of the Executive Schedule of chapter 53 of title 5, United States Code.

(b) The Board shall authorize the president and any other officials or employees it designates to receive and disburse public and private moneys, obtain and make grants, enter into contracts, establish and collect fees, issue certificates and other honorifics, and undertake all other activities necessary for the efficient and proper functioning of the Academy.

(c) The president, subject to Academy bylaws and general policies established by the Board, may appoint, fix the compensation of, and remove such employees of the Academy as the president determines necessary to carry out the purposes of the Academy. In determining employee rates of compensation, the president shall be guided by the provisions of title 5, United States Code, relating to classification and General Schedule pay rates.

(d) The president may request the assignment of any Federal officer or employee to the Academy by an appropriate department, agency, or congressional official or Member of Congress and may enter into agreement for such assignment, if the affected officer or employee agrees to such assignment and such assignment causes no prejudice to the salary, benefits, status, or advancement within the department, agency, or congressional staff of such officer or employee.

(e) No officer or full-time employee of the Academy may receive any salary or other compensation for services from any source other than the Academy during the officer's or employee's period of employment by the Academy, except as authorized by the Board.

(f) Officers and employees of the Academy shall not be considered officers and employees of the Federal Government except for purposes of the provisions of title 28, United States Code, which relate to Federal tort claims liability, and the following provisions of title 5 of the United States Code: subchapter I of chapter 81 (relating to compensation for work injuries); chapter 83 (relating to civil service retirement); chapter 87 (relating to life insurance); and chapter 89 (relating to health insurance). The Academy shall make contributions at the same rates applicable to agencies of the Federal Government under the provisions of title 5 referred to in this section.

(g) No part of the income or assets of the Academy or of any legal entity created by the Academy shall inure to any agent, employee, officer, or director or be distributable to any such person during the life of the corporation or upon dissolution or final liquidation. Nothing in this section may be construed to prevent the payment of reasonable compensation for services or expenses to the directors, officers, employees, and agents of the Academy in amounts approved in accordance with the provisions of this Act.

(h) The Academy shall not make loans to its directors, officers, employees, or agents, or to any legal entity created by the Academy. A director, officer, employee, or agent who votes for or assents to the making of a loan or who participates in the making of a loan shall be jointly and severally liable to the Academy for the amount of the loan until repayment thereof.

PROCEDURES AND RECORDS

SEC. 8. (a) The Academy shall monitor and evaluate and provide for independent evaluation if necessary of programs supported in whole or in part under this Act to ensure that the provisions of this Act and the bylaws, rules, regulations, and guidelines promulgated pursuant to this Act are adhered to.

(b) The Academy shall prescribe procedures to ensure that grants, contracts, and financial support under this Act are not suspended unless the grantee, contractor, or person or entity receiving financial support has been given reasonable notice and opportunity to show cause why the action should not be taken.

(c) In selecting persons to participate in Academy activities, the Academy may consider a person's practical experience or equivalency in peace study and activity as well as other formal requirements.

(d) The Academy shall keep correct and complete books and records of account, including separate and distinct accounts of receipts and disbursements of Federal funds and of non-Federal funds. The Academy's annual financial report shall identify the use of each source of funding and shall present a clear description of the full financial situation of the Academy. Nothing in this section prevents the Academy from using Federal and non-Federal funds together in any grant, contract, program, or other expenditure of the Academy consistent with this Act.

(e) The Academy shall keep minutes of the proceedings of its Board and of any committees having authority under the Board.

(f) The Academy shall keep at its principal office a record of the names and addresses of its Board members; copies of this Act, of any other Acts relating to the Academy, and of all Academy bylaws, rules, regulations, and guidelines; required minutes of proceedings; a record of all applications and proposals and issued or received contracts and grants; and financial records of the Academy. All items required by this subsection may be inspected by any Board member or the member's agent or attorney for any proper purpose at any reasonable time.

(g) The accounts of the Academy shall be audited annually in accordance with generally accepted auditing standards by independent certified public accountants or independent licensed public accountants, certified or licensed by a regulatory authority of a State or other political subdivision of the United States. The audit shall be conducted at the place or places where the accounts of the Academy are normally kept. All books, accounts, financial records, files, and other papers, things, and property belonging to or in use by the Academy and necessary to facilitate the audit shall be made available to the person or persons conducting the audit, and full facilities for verifying transactions with the balances or securities held by depositories, fiscal agents, and custodians shall be afforded to such person or persons.

(h) The Academy shall provide a report of the audit to the President of the United States and to each House of Congress no later than six months following the close of the fiscal year for which the audit is made. The report shall set forth the scope of the audit and include such statements, together with the independent auditor's opinion of those statements, as are necessary to present fairly the Academy's assets and liabilities, surplus or deficit, with reasonable detail, including a statement of the Academy's income and expenses during the year including a schedule of all contracts and grants requiring payments in excess of $5,000 and any payments of compensation, salaries, or fees at a rate in excess of $5,000 per annum. The report shall be produced in sufficient copies for the public.

(i) The Academy and its directors, officers, employees, and agents shall be subject to the provisions of section 552 of title 5, United States Code (relating to freedom of information).

INDEPENDENCE AND LIMITATIONS

SEC. 9. (a) Except as otherwise provided in this Act, the Academy shall not be considered a department, agency, or instrumentality of the Federal Government. Nothing in this Act may be construed as limiting the authority of the Office of Management and Budget to review and submit comments on the Academy's budget request at the time it is transmitted to the Congress.

(b) No political test or political qualification may be used in selecting, appointing, promoting, or taking any other personnel action with respect to any officer, employee, agent, or recipient of Academy funds or services or in selecting or monitoring any grantee, contractor, person, or entity receiving financial assistance under this Act.

FUNDING

SEC. 10. (a) For the purpose of purchasing, leasing, renting, or otherwise acquiring and improving a suitable site for a principal office for the Academy, the Center for International Peace, and for the legal entity authorized to be established under section 4 of this Act, in or within easy reach of the District of Columbia, there are authorized to be appropriated on or after October 1, 1983, to the Academy a capitalization fund of $15,000,000 which shall remain available to the Academy without regard to fiscal year limitations.

(b)(1) For the purpose of establishing the programs and administering the affairs of the Academy as authorized by this Act (except for paragraph (10) of section 5(b)), there are authorized to be appropriated for the fiscal year 1984, $6,000,000 and for the fiscal year 1985, $10,000,000. Monies appropriated for the fiscal year 1984 shall remain available to the Academy through the fiscal year 1985.

(2) Any necessary expenses incurred by the Academy in establishing or awarding a United States Medal of Peace or in making a cash award in connection with the awarding of such medal under paragraph (10) of section 5(b) shall be paid out of the private funds of the legal entity established under section 4(e).

(c) The Board of Directors may transfer to the legal entity authorized to be established under section 4(e) any funds not obligated or expended from appropriations to the Academy for a fiscal year, and such funds shall remain available for obligation or expenditure for the purposes of such legal entity without regard to fiscal year limitations. Any use by such legal entity of appropriated funds shall be reported to each House of the Congress and to the President of the United States.

(d) Any authority provided by this Act to make contracts shall be effective for a fiscal year only to such extent or in such amounts as are provided in appropriation Acts.

DISSOLUTION OR LIQUIDATION

SEC. 11. Upon dissolution or final liquidation of the Academy or of any legal entity created pursuant to this Act, all income and assets of the corporation or other legal entity shall revert to the Treasury of the United States.

REPORTING REQUIREMENT AND REQUIREMENT TO HOLD HEARINGS

SEC. 12. Beginning two years after the date of enactment of this Act, and at intervals of two years thereafter, the Chairman of the Board of Directors of the Academy shall prepare and transmit to the Congress and the President a report detailing the progress the Academy has made in carrying out the purposes of this Act during the preceding two-year period. The President shall prepare and transmit to the Congress within a reasonable time after the receipt of such report the written comments and recommendations of the appropriate agencies of the United States with respect to the contents of such report and their recommendations with respect to any legislation which may be required concerning the Academy. After receipt of such report by the Congress, the Committee on Foreign Affairs and the Committee on Education and Labor of the House of Representatives and the Committee on Foreign Relations and the Committee on Labor and Human Resources of the Senate shall hold hearings to review the findings and recommendations of such report and the written comments received from the President.

Mr. RANDOLPH. Mr. President, it is gratifying for many Members of this Senate—they are not present on the floor at this moment—but for 53 Members of the 100 Members of this body, whose names have been attached to this measure. The same number of names was attached when we introduced S. 1889 last year, and then later other names were added until the total number of Members who were cosponsoring had reached 56.

We have the hope that there will be even more, as we reintroduce an identical bill to S. 1889, as amended, and favorably reported by a vote of 10 to 6 in the Committee on Labor and Human Resources.

Certainly words of accolade can be placed one on top of the other for the leadership of Senator MATSUNAGA, who has been very, very helpful, not only in working within the Subcommittee on Education and the full committee, but working also among groups throughout the United States in an effort to have them understand the basics of this legislation.

I know that many of my colleagues have realized that through the years since the early 1940's it has been my not so much privilege, although I have looked upon it as a privilege, but I have thought of it as a responsibility to work on the subject of peace which is being discussed this afternoon. And over the years, not in a spasmodic way, but continuing from the days of Matthew Neely from West Virginia, who served in this body, until this moment, there have been efforts made, and we think constructive efforts, to establish an official arm of our U.S. Government committed first of all to peace.

During the 97th Congress, we introduced, as I have indicated, legislation to establish a National Peace Academy with 52 sponsors. By the time we had worked our way through the subcommittee and the committee, we had a reasonable chance, we thought of passing that measure before the Congress adjourned in December. It had been, I remind my colleagues, reported from the Committee on Labor and Human Resources by a vote of 10 to 6. And that was encouraging to us, as we thought in terms of having it considered on the floor and, with 56 sponsors, we believed it would pass. But there was no time to take it up prior to adjournment.

And so today, as I have indicated, we come back not to the battle so much. This is not a battle or, at least, should not be a battle. Frankly, it is a crusade for peace along a road which many travelers can walk hand in hand and heart in heart for, ultimately, peace and understanding between the peoples of the world.

I remember many years ago when people did not want to admit Hawaii into the United States of America. "It is so far away," they would say. Well, today our communications technology allows us to rub shoulders in a matter of seconds and minutes with the populations of this world who are torn by violence and misunderstanding.

A National Peace Academy will not be the answer finally, but it will be an aid, because it will become a teaching and training process by which we can develop a better understanding of the basic techniques of conflict resolution.

Now, I do not want to be flippant about this, but I do want to indicate for the record that we have had a certain organization in this country that, through its president, called Senators who cosponsored this bill the "Jane Fondas of the Senate." I am not going to name those groups that oppose us.

But we come now with the feeling that, in a sense, this is a challenge. Our crusade for peace is coming together because perhaps now—and I am not going to discuss the subject of a nuclear freeze—we may have the ability to bring this measure to passage in the Senate in a rather short time. There is desperation in the world today and fear on the part of our people. It has grown steadily since 1945, shortly after we used the first nuclear weapon on Hiroshima and learned that in the blink of a gnats eyelash we could and did literally decimate entire cities and hundreds of thousands of human beings. And we are all human beings, with frailties as well as strengths. Since Hiroshima, all of us know that now, more than ever, we can destroy humankind from sea to shining sea many, many times over.

We need to learn more about the roots, the dangerous roots that spring up in conflict; we need to study the causes of war, the conditions and the processes and the stages in its development. A National Peace Academy will permit us to study those roots.

So we just ask that we be given the opportunity in this country to do what is intended by this legislation; what we call a very necessary step on the road, to peace and understanding among the peoples of the Earth. If peace has been a universal goal, and I think it has, of civilization, for over 2,000 years, we are far away, perhaps farther away than ever before, in a sense, from achieving it. And why have we not ourselves within this Congress, especially within the Senate, why have we not studied this subject and why have we not developed a cohesive program such as is envisaged in the program that is the heart of this legislation?

We need to seek answers to thousands of questions about how to assure global peace in a world filled with nuclear weapons.

We do not have the luxury, Mr. President, of waiting. We cannot wait. We have no backyards, we have no front yards anymore, we live in an interdependent world. We are side by side with the peoples of the Earth. And we must realize that wars and continuing wars of greater devastation will be, in a sense, a part of our collective failure, if we fail now, to pass this legislation. It will not do everything, but we can learn better ways of managing conflicts. Through men and women trained and educated at the Academy, we can do at least a part of the job of stopping untold human misery, untold suffering, and an untold loss of life on this Earth where men and women should love one another, live and labor with one another.

This is a goal that is not too great for people like the Members of the U.S. Senate and the people of the United States of America, 245 million of them now. When I was beginning this in the 1940's, we had, of course, a population of 100 million less men and women and children living in this country.

The hour has come. Let us act.

For those who belittle us for this initiative—this goal of peace—I remind them of the still-audible echoes of recent public demands for a unilateral—not a bilateral—nuclear disarmament agreement and a nuclear freeze.

For those who taunt us and call us names, and tell us that we already have the Foreign Service, the Diplomatic Corps, and the United Nations to keep the peace—I remind them that we are still outnumbered.

Every Monday morning approximately 200,000 scientists go forth to jobs where they apply their scientific findings to the development of and improvement of our country's warmaking potential.

Yet fewer than 200 scientists will report to work on Government-funded projects to develop our Nation's capa-

bility of waging and maintaining global peace and security.

We can close that terrifying gap by creating institutions to direct resources into peace research, education, and training. And we can quickly begin by enacting into law the National Peace Academy bill we introduce today.

Conflict resolution, or management skills, is an emerging social science. It has so much to gain from so many fields, and there is a desperate need to pull together, collect and correlate the work already being done in those fields. Somehow we must work to find ways to incorporate all this immense, diverse growing fund of human knowledge into a workable new science of peace learning—and then we must transmit it to others.

The Peace Academy proposal we are introducing today calls for an expenditure of $31 million over a 2-year period. That amounts to approximately 6 cents per year for each U.S. citizen.

Last week, the President, using the powerful Executive order, bypassed the Congress and created a "public diplomacy campaign," or "institutes for democracy" to promote his version of arms control and foreign policies to skeptical Europeans. This new initiative will cost $65 million per year. Last year, the President declined to endorse the Peace Academy bill because of its costs—$31 million dollars—and called it a "budget buster." Yet his "public diplomacy campaign" proposal, costing twice as much in 1 year, is not considered to be a "budget buster." These funds will pay for scholarships and institutes for democracy for Western European politicans, trade unionists, academics and young people. If that sounds familiar to you—it is because a national Peace Academy would do the same kind of things—but with a difference. Where as the President's proposal is clearly politically motivated and will be used for stated propaganda activities, the Peace Academy would be an independent entity, free of political intervention, and have nothing at all to do with setting or otherwise intervening in our country's foreign policy decisions.

The President has included in his fiscal year 1984 budget proposals a request for $45 million with which to fund his new initiative. I hope that my colleagues in the Senate will ask to at least see a format, outline or a blueprint for these "Institutes of Democracy" before they approve the $45 million request. The Peace Academy concept has been criticized as being "vague" and lacking in specificity. If you think our bill is "vague," and that that is a good reason for opposing it, then you might want to consider the "Vagueness" of the President's "public diplomacy campaign" initiative.

If we can afford to spend $820 million a day, rising to $1 billion a day by 1985, in order to commit $1.5 trillion to national defense and military buildups, and in addition we can afford to spend $65 million a year on the President's Institutes for Democracy, then we can surely afford an additional $31 milion for a Peace Academy initiative.

My record will show, as will the record of others who support the Peace Academy bill, that we are in favor of a strong defense structure for our country. Let us face it, it is a nasty world out there.

But we will have passed the bounds of rational action if we push for a trillion dollars in military spending, and fail to push equally as hard for the funding of peace studies.

I am not a cosponsor of pending nuclear freeze resolutions. If you asked me today what I think about unilateral disarmament, I would probably liken it to being put in charge of governing New York City—but without its police force. But how long can I, or anyone else, deny the public demand for doing something to bring about global peace—even total disarmament—when there is nothing else on the books—symbolically or otherwise—to encourage them to believe that we will not bring about a nuclear holocaust—by accident or design?

For at least 2,000 years we have been wishing for peace, and preparing for war. As a result, millions have suffered and died, and our resources have been exhausted. The Peace Academy concept can be the next step in the flow of history, and it is a critical one for it would commit history's most powerful nation to a long-term program of research and training into the ways and means of waging peace.

I believe strongly in the essential rightness of the concept of educating toward international understanding and interdependence.

If we are going to reverse the already advanced, self-destructive trend we are on that results in nothing more than forging more and more weapons of war, then all of us are going to have to bend to the task in our different ways.

Amid budget-cutting initiatives and inflation and public disgruntlement, such issues as "peace studies" are easily brushed aside as distractions from more pressing issues. That is a grievous mistake. We are not alone on this planet. The problems and promises of others are inescapably ours, and our reluctance to acknowledge that fact only jeopardizes our hopes for a peaceful future. We are an interdependent world. Those other countries we hear about are not so far away—they are our backyard.

It is time to do away with shallow debates, and the use of tough-sounding slogans. It is time to create instruments and institutions of cooperation to take the place of the confrontation politics of the past.

It is my genuine hope that my colleagues will support and help guide to enactment the Peace Academy bill—so that peacemaking ceases being everybody's business, and becomes somebody's job.

I argue here for a new type of learning. We must not hope to learn only from experience—lest the experience itself prove fatal.

Neither innocense nor ignorance provides protection against manipulation. Lack of knowledge may often make action easier to take, but such action could prove self-defeating if not self-destructive.

Let us prepare and provide for an adequate defense structure, but while we do that, let us also prepare and provide for an adequate peacemaking capability—through education, research, and training at the National Peace Academy for people from all walks of life and from other Nations, who desire to avail themselves of the Academy's purpose to fulfill this Nation's commitment to global peace.

Mr. PROXMIRE. I congratulate both Senators, fine and outstanding Senators, on their statements. I have been somewhat hesitant on this legislation, but I believe there is great merit in it. Heaven knows, there never was a time when we more earnestly and urgently need to do everything we can to achieve peace.

I know the distinguished occupant of the chair (Mr. PRESSLER) has been doing a fine job in that regard in the Foreign Relations Committee.

By Mr. HELMS (for himself and Mr. EAST):

S. 565. A bill to require the Secretary of the Interior to enter into an agreement with the State of North Carolina with respect to the repair and maintenance of a certain highway of such State located within Cape Hatteras National Seashore Recreation Area; to the Committee on Energy and Natural Resources.

REPAIR AND MAINTENANCE OF A ROAD WITHIN THE CAPE HATTERAS NATIONAL SEASHORE RECREATION AREA

● Mr. HELMS. Mr. President, on behalf of my distinguished colleague, Senator EAST, and myself, I am today introducing legislation to authorize the Department of the Interior to assist the State of North Carolina in improving and maintaining N.C. Highway 12, which lies within the confines of the Cape Hatteras National Seashore Recreational Area.

The Cape Hatteras National Seashore Park is a beautiful jewel in the necklace of barrier islands that stretch along the scenic coastline of North Carolina. Unfortunately, however, this jewel has a flaw—the highway

through the park is in a state of serious disrepair.

Mr. President, the State built N.C. 12 primarily to serve the needs of its citizens who live in several villages that are now enclaves within the park. When the park was created in 1953, the State retained jurisdiction over the highway to protect access to these villages. Since that time, however, large numbers of visitors have been attracted to the area. N.C. 12 has had to bear much more traffic than it was designed and built for. Traffic in the park often numbers more than 5,000 vehicles per day. More than 85 percent of that volume is attributable to the park, and at least 50 percent of it is from outside North Carolina.

The State maintains the 21 miles of N.C. 12 within the park's boundaries that lie within the eight village enclaves. The States also provides ferry service connecting N.C. 12 across Hatteras Inlet and Ockracoke Inlet. But the U.S. Park Service should at least assist in the improvement and maintenance of the highway through the park. This is what my proposed legislation would authorize. Mr. President, this proposal has been developed with input from local, State, and Federal officials. I have a resolution from the North Carolina Department of Transportation asking Congress to authorize the Department of the Interior's participation in this project. I ask unanimous consent that the text of this resolution be printed at this point in the RECORD.

Mr. President, I ask unanimous consent that the bill be printed at this point in the RECORD, and I urge my colleagues to support it.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 565

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "An Act to provide for the establishment of the Cape Hatteras National Recreational Seashore in the State of North Carolina, and for other purposes", approved August 17, 1937 (16 U.S.C. 459-459a-3), is amended by adding at the end the following new section:

"SEC. 6. (a) The Secretary of the Interior shall enter into an agreement with the State of North Carolina, upon terms and conditions acceptable to the Secretary of the Interior and such State, under which the Secretary of the Interior and such State, under which the Secretary of the Interior shall pay up to 100 per centum of the costs of repairing and maintaining the portion of North Carolina Highway Numbered 12 located within the boundaries of the aforesaid national seashore recreational area.

"(b) Any amount appropriated to the Secretary of the Interior for purposes of carrying out an agreement entered into under subsection (a) shall be in addition to, and not in lieu of, any other Federal assistance to which the State of North Carolina is entitled.".

SEC. 2. No authority under the amendment made by this Act to enter into countracts or payments shall be effective except to the extent and in such amounts as provided in advance in appropriations Acts. Any provision of the amendment made by this Act which, directly or indirectly, authorizes the enactment of new budget authority shall be effective only for fiscal years beginning after September 30, 1983.

RESOLUTION TO SEEK ENABLING LEGISLATION TO AUTHORIZE THE U.S. DEPARTMENT OF THE INTERIOR TO PARTICIPATE IN THE CONSTRUCTION AND MAINTENANCE OF N.C. 12 IN THE CAPE HATTERAS NATIONAL SEASHORE

"Whereas, much of N.C. 12 in Dare and Hyde Counties is located entirely within the confines of the Cape Hatteras National Seashore:

"Whereas, because of State ownership, said right-of-way is technically not a part of the National Seashore; and

"Whereas, the Department of the Interior is precluded by Federal law from making expenditures outside of the property of the Cape Hatteras National Seashore and consequently has not been able to assume any responsibility for an area that is in effect a part of the Cape Hatteras National Seashore, and

"Whereas, the majority of the use of N.C. 12 in the Cape Hatteras National Seashore is by National Seashore visitors: Now, therefore, be it

Resolved, That the Board of Transportation requests the North Carolina Congressional Delegation seek an act to authorize the U.S. Department of the Interior to participate in the construction and maintenance of the segments of N.C. 12 within the Cape Hatteras National Seashore so as to facilitate visitor travel within the National Seashore."●

By Mr. THURMOND:

S. 567. A bill to amend title 38, United States Code, to authorize reimbursement for the reasonable charge for chiropractic services provided to certain veterans; to the Committee on Veterans' Affairs.

CHIROPRACTIC SERVICES

Mr. THURMOND. Mr. President, I rise today to introduce a bill which would amend title 38 of the United States Code to authorize eligible veterans to receive reimbursement for chiropractic services received in certain circumstances through the Veterans' Administration medical care program.

Under current law, the VA has the authority to provide chiropractic services to veterans and any VA physician may, on a case-by-case basis, refer an eligible veteran to a chiropractor for treatment. Despite this authority, only a few, if any, veterans have ever been referred by VA physicians to a chiropractor at VA expense.

Mr. President, I believe our Nation's veterans deserve the same access to medical treatment, including chiropractic treatment, as do recipients of other Federal and State health care programs, many of which now provide chiropractic treatment to their beneficiaries. It is time that the VA's policy and practice be brought more in line with these programs. For instance, under the medicare program which is administered by the Department of Health and Human Services, it is typical for eligible persons in need of chiropractic care to seek and obtain the services of a doctor of chiropractic and to receive reimbursement for such services from HHS. Reimbursement for chiropractic services is also currently provided under the Federal Employees Compensation Act and a number of States include chiropractic services under their medical assistance programs.

Mr. President, the legislation which I propose today is nearly identical to S. 1956, a bill which I introduced and which was passed by the Senate during the 97th Congress. It will establish a pilot program to compel the use of chiropractors within the VA. It limits the number of veterans who are eligible for its benefits and also limits total expenditures for chiropractic services under the pilot program to $2 million in any fiscal year. Unless extended, the program as proposed will expire on September 30, 1986.

In conclusion, Mr. President, let me say that while the House has, on two occasions, rejected this Senate-passed pilot program, it has joined the Senate in strongly urging the VA's Department of Medicine and Surgery to reevaluate its position and to use its existing authorities to provide, at least on a pilot basis, chiropractic services in appropriate cases as part of the hospital care or medical services furnished to veterans. This message was ignored by the VA. I, therefore, urge Congress to send a stronger message to the VA on this matter by favorably considering this bill.

Mr. President, I send the bill to the desk and ask that it be referred to the appropriate committee for prompt consideration, and I ask unanimous consent that it be printed in the RECORD at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 567

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 601 of title 38, United States Code, is amended by adding at the end thereof the following new paragraph:

"(9) The term 'chiropractic services' means the manual manipulation of the spine performed by a chiropractor (who is licensed as such by the State in which he or she performs such services and who meets the uniform minimum standards promulgated for chiropractors under section 1861(r)(5) of the Social Security Act (42 U.S.C. 1395x(r)(5))) to correct a subluxation of the spine. For the purposes of this paragraph, such term does not include physical examinations, laboratory tests, radiologic services, or other tests or services determined by the Administrator to be excluded.".

(b)(1) Subchapter III of chapter 17 of such title is amended by adding at the end thereof the following new section:

§ 630. Chiropractic services

"(a) The Administrator shall, under regulations which the Administrator shall prescribe, reimburse a veteran eligible for medical services under this chapter for the reasonable charge for chiropractic services, for which such veteran has made payment, if—

"(1) such chiropractic services were for the treatment of a service-connected neuromusculoskeletal condition of the spine,

"(2) the veteran is a veteran who has been furnished hospital care by the Veterans' Administration for a neuromusculoskeletal condition of the spine within a twelve-month period prior to the provision of such chiropractic services, or

"(3) the veteran is a veteran described in section 612(f)(2) of this title who has been furnished hospital care or medical services by the Veterans' Administration for a neuromusculoskeletal condition of the spine, to the extent that such veteran is not entitled to such chiropractic services or reimbursement for the expenses of such services under an insurance policy or contract, medical or hospital service agreement, membership or subscription contract, or similar arrangement for the purpose of providing, paying for, or reimbursing expenses for such services.

"(b) In any case in which reimbursement may be made under this section, the Administrator may, in lieu of reimbursing such veteran, make payment of the reasonable charge for such chiropractic services directly to the chiropractor who furnished such services.

"(c)(1) The Administrator shall, in consultation with appropriate public and nonprofit private organizations and other Federal departments and agencies that provide reimbursement for chiropractic services, establish a schedule of reasonable charges for such services, which schedule shall be consistent with the reasonable charges allowed under title XVIII of the Social Security Act (42 U.S.C. ch. 7).

"(2) The amount payable by the Administrator for chiropractic services furnished under this section shall not exceed $600 in any twelve-month period in the case of any veteran.

"(d) Notwithstanding any other provision of this title, total expenditures for chiropractic services reimbursed under this section shall not exceed $2,000,000 in any fiscal year and no reimbursement or payment may be made under this section for chiropractic services furnished after September 30, 1987.".

(B) The table of sections at the beginning of chapter 17 of such title is amended by inserting after the item relating to section 629 the following new item:

"630. Chiropractic services.".

(b) Not later than December 31, 1984, and not later than December 31 of each of the next three years thereafter, the Administrator of Veterans' Affairs shall prepare and submit to the Committees on Veterans' Affairs of the Senate and the House of Representatives reports on the use made of the authority provided for in the amendments made by the first section. Each such report shall include—

(1) the number of requests by eligible veterans for reimbursement or payment for chiropractic services in the most recent fiscal year under section 630 of title 38, United States Code (as added by subsection (a)(2)(A) of this section), and the number of such veterans who made such requests;

(2) the number of reimbursements or payments made by the Administrator of Veterans' Affairs under such section in such fiscal year and the number of veterans to or for whom such reimbursements or payments were made; and

(3) the total amounts of expenditures by the Administrator of Veterans' Affairs for such reimbursements and payments under such section in such fiscal year.

By Mr. TSONGAS:

S. 568. A bill to enhance competition by allowing for joint research and development ventures; to the Committee on the Judiciary.

JOINT RESEARCH AND DEVELOPMENT VENTURES ACT

● Mr. TSONGAS. Mr. President, U.S. technological leadership is eroding. Japan and European nations are vying with U.S. industry. As never before, the Japanese, in particular, have learned to capitalize on scientific research more effectively than we, granted that much of the basic research and development on which they rely is ours.

R&D is critical to technological innovation, industrial competitiveness, increased productivity and economic growth. We must expand the extent and diversity of U.S. R&D to maintain our leadership in basic research and to launch new efforts in manufacturing technology.

Research and development is often expensive, and results are highly uncertain. Basic research is unlikely to provide short-term returns on investments. Industry tends to focus on incremental product improvements that can return quick profits. Industries composed of small firms—say, housing—frequently spend very little on R&D and rarely achieve innovations. Improvements in technology—such as automation, machining, and chemical processing—are often important to an industry as a whole, but too costly and risky for a single firm to pursue. The social rate of return of R&D is often twice the private rate of return.

Industrywide, joint research and development ventures can surmount some of these barriers. In joint R&D ventures individual firms share risks, pool resources for large projects and undertook R&D on a scale that maximizes efficiency. Joint R&D ventures also can combine complementary resources and talents of different firms to accelerate innovation.

The Japanese are a case in point. They have used joint R&D efforts to accelerate technological development in a number of areas. One is the very large scale integration project in semiconductors. Another is the fifth generation computer project.

In Japan joint research and development projects are exempt from antimonopoly law. In the United States joint R&D ventures can pose serious antitrust problems. Ambiguities in the law and vagaries of enforcement create an uncertain legal environment that can expose a joint venture to Federal or State antitrust action, as well as to private suits.

In 1980, the Justice Department issued guidelines on the legality of joint R&D ventures and instituted a review procedure for firms contemplating joint R&D ventures. But the Justice Department's procedure is inadequate. It provides only a statement of present enforcement intentions and does not preclude eventual action that could be retroactive nor private suits. Though the Justice Department procedure provides substantial guidance, it still leaves uncertainty.

The legislation I am introducing today would clarify antitrust law by granting immunity to joint research and development ventures approved by the Attorney General. This bill is a modified version of a bill I introduced last year and incorporates some provisions of similar legislation.

The bill would require the Attorney General to approve a joint R&D venture when he finds:

First, participation in a joint R&D venture is open to all firms;

Second, the fruits of the research and development will be made available within 6 years to all firms on reasonable, nondiscriminatory terms;

Third, any restraints associated with the joint R&D venture are necessary to the lawful purpose of the agreement to form the venture and are not part of an overall pattern of anticompetitive, restrictive agreements;

Fourth, participants in a venture are not subject to restriction on their own research and development activities, nor are they obligated to provide the venture with results from previous or future research and development;

And, fifth, even if it is found that the joint research and development venture complies with these four conditions, the Attorney General shall not approve a venture if he concludes that it will lessen competition. Joint R&D ventures approved by the Attorney General would be immune from prosecution under Federal or State antitrust laws.

In a separate provision, the bill would allow a joint R&D venture to exclude foreign companies if their countries do not allow participation of U.S. firms in their joint research and development ventures.

The approach of this bill is by no means the only way to resolve the antitrust uncertainty that now deters the formation of joint R&D ventures. Last year, three bills aimed at reducing that uncertainty were introduced in the Senate: S. 2717, by Senators, GLENN and KENNEDY; S. 3116, by Senators MATHIAS and HART; and S. 2714, which I introduced. The bills differed in method of certification and level of

immunity. It is my hope that the Judiciary Committee will hold hearings and invite industry representatives to identify those features of each bill, or combination of features, that would be most effective.

In any event, I feel that it is critical that we act on one version of this legislation or another to strengthen U.S. industrial competitiveness now—before it is too late.

Mr. President, I ask unanimous consent that a summary of provisions and a copy of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SUMMARY OF PROVISIONS JOINT RESEARCH AND DEVELOPMENT VENTURES ACT

PURPOSE

To encourage the formation of joint research and development ventures by providing immunity from prosecution under federal or state antitrust laws.

ATTORNEY GENERAL REVIEW

In order to receive antitrust immunity a joint research and development venture must obtain approval from the U.S. Attorney General. The Attorney General shall approve a joint research and development venture if he finds that:

1. participation in the joint research and development venture is open to all firms;

2. any firm can obtain on reasonable and nondiscriminatory terms the results of the research and development within six years after the venture receives title to such results;

3. restraints associated with a participant's involvement in the venture are not part of an overall pattern of restrictive agreements that restrain competition; and

4. the venture places no restrictions on the participants' individual research nor obligations to provide the venture the results of its previous or future research.

The Attorney General may deny approval if he finds that the venture will lessen competition.

Although a venture must apply for approval, once approved it doesn't walk the legal tightrope of uncertainty. Attorney General approval guarantees certainty.

The Attorney General may at any time commence withdrawal of approval if the venture strays from compliance. The Attorney General must give notice to the venture and provide it with the opportunity to move back into compliance.

This affords joint ventures the chance to avoid the expense and inconvenience of starting the lengthy application process anew. If the joint venture fails to make the necessary corrections, the Attorney General shall give final notice of withdrawal or modification of such previous approval.

The Court of Appeals for the District of Columbia may review the Attorney General's withdrawal, modification, or denial of an application for approval of a joint research and development venture or amendment thereof.

This discourages arbitrary Attorney General decision-making. Review by the Court of Appeals for the District of Columbia fosters uniform judicial decision-making. Promoting certainty of immunity from Federal or state antitrust prosecution encourages U.S. firms to pursue joint research and development ventures.

The Attorney General may approve a joint research and development venture which excludes firms if their countries do not allow U.S. firms to participate in their joint research and development ventures.

This encourages foreign countries to allow U.S. firms to participate in joint research and development ventures on an equal basis with their foreign counterparts.

IMMUNITY

Approved joint research and development ventures are immune from the prohibitions of sections 1 and 2 of the Sherman Antitrust Act, sections 7 and 16 of the Clayton Act, the Federal Trade Commission Act and relevant state laws.

Awarding court costs to the defendants of spurious litigation discourages antitrust claims against approved joint research and development ventures.

TECHNOLOGY TRANSFER

The Attorney General must withdraw approval of all or part of a joint venture failing to provide, within six years, access on reasonable terms to any innovation or knowledge resulting from its approved activities.

This withdrawal allows the Attorney general to treat the venture as if it never received immunity.

Many patients lose their usefulness within 10 years of their issuance. The six year exclusivity period to such innovation or knowledge allows the joint venture to reap the harvest of its labor while minimizing its negative impact on competition.

REPORTING REQUIREMENT; AMENDMENT OF APPROVED VENTURES

Approved joint research and development ventures must promptly report to the Attorney General any change relevant to its prior approval.

To remain safe from antitrust prosecution the joint venture must submit an application to amend its approval to reflect such change.

Providing an amendment process allows the joint venture to avoid the expense and inconvenience of reapplying for initial approval. Requiring the joint venture to undertake such processes prevents such venture from abusing the privilege of antitrust immunity.

DISCLOSURE OF INFORMATION

Information submitted by an applicant or approved joint research and development venture is exempt from public disclosure as required by the Freedom of Information Act.

This prevents U.S. firms from the possible loss of competitive advantages stemming from the disclosure of confidential information. It provides U.S. firms with an incentive to engage in joint ventures.

No United States officer or employee shall disclose information submitted by an applicant or an approval joint research and development venture except upon a Congressional request, in a judicial or administrative proceeding, with the consent of the person who submitted the information, where the Attorney General deems disclosure necessary to making the determination, or in accordance with any federal statutory requirement. The Attorney General may also disclose such information to Federal or state agencies promising not to disclose the information.

Allowing such disclosure insures that governmental operations shall continue without interruption of the flow of information.

S. 568

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Joint Research and Development Ventures Act".

FINDINGS

SEC. 2. The Congress finds that—

(1) research and development are major factors in the growth and progress of our industry and national economy;

(2) many firms are unable to perform their desired level of research and development due to the capital intensive nature of such research and development programs;

(3) the expense of carrying on certain research and development programs is prohibitive for many businesses;

(4) a firm's or an industry's ability to commit capital to research and development programs is sometimes dependent upon such firm or industry being able to share the risks which such projects often entail;

(5) to the extent that new information or products are brought forward as a result of such sharing, there are genuine procompetitive benefits; and

(6) the uncertainty of interpretation and enforcement of present antitrust laws discourages cooperative research and development, often where such cooperative activity would foster innovation and enhance competition.

PURPOSES

SEC. 3. The purposes of this Act are to—

(1) encourage business concerns to undertake and obtain the benefits of research and development in order to strengthen the national economy and the United States international industrial competitive position;

(2) encourage greater use of joint research and development ventures by the private sector as a means of augmenting the total amount of research and development performed as well as increasing the diversity of research;

(3) provide immunity under the antitrust laws of the United States or any State to an applicant from any prosecution from the moment the Attorney General approves a joint research and development venture until the completion of programs of such venture, or the Attorney General considers it injurious to the competitive balance for such venture to continue and terminates such venture; and

(4) enhance competition by enabling participants in joint research and development ventures, and nonparticipants, on reasonable terms, to have access to and use base technologies resulting from such joint venture.

DEFINITIONS

SEC. 4. For the purposes of this Act—

(1) the term "applicant" means an individual who is a citizen of the United States or an association, partnership, corporation, or other legal entity organized under the laws of the United States or any State or territory of the United States seeking approval of a joint program for research and development;

(2) the term "research and development program" means a program which is—

(A) a systematic, intensive study directed toward greater knowledge or understanding of the subject studied;

(B) a systematic study directed specifically toward applying new knowledge to meet a recognized need; or

(C) a systematic application of knowledge toward the production of useful materials,

devices, and systems or methods, including design, development, and improvement of prototypes and new processes to meet specific requirements;

(3) the term "joint research and development venture" means an association, corporation, partnership, or other multifirm entity organized under the laws of the United States or any State or territory of the United States established to carry out cooperative research and development programs;

(4) the term "State" shall have the meaning given it in section 4G of the Clayton Act (15 U.S.C. 15g);

(5) the term "Attorney General" means the Attorney General of the United States or his designee; and

(6) the term "United States firm" means an individual who is a citizen of the United States or an association, partnership, corporation, or other legal entity organized under the laws of the United States or any State or territory of the United States.

ATTORNEY GENERAL REVIEW

SEC. 5. (a) Except as provided in subsection (1) prior to the initiation of any joint research and development venture, the applicants must request and obtain the approval of the Attorney General in order to gain an antitrust exemption pursuant to section 6.

(b) The request required by this section shall be in such form and contain such information and documentary materials as the Attorney General shall by general regulations prescribe pursuant to section 553 of title 5, United States Code.

(c)(1) The Attorney General shall notify the applicants of his decision within 60 days after the filing of such request.

(2) Such decision shall be accompanied by Attorney General's findings.

(d) The Attorney General shall approve any joint research and development venture—

(1) if he finds that—

(A) participation in all programs in the joint research and development venture is open to all United States firms and domestic subsidiaries of foreign firms to the extent provided in subsection (k);

(B) the results of all joint research and development programs will be made available within 6 years after the participants in such venture receive title pursuant to section 7 (a) (4) to all firms on reasonable and nondiscriminatory terms whether such firms are members of such venture or not;

(C) any restraints associated with the joint research and development venture—

(i) are necessary to the lawful main purpose of the agreement to form the joint research and development venture;

(ii) have a scope and duration no greater than is necessary to achieve that purpose; and

(iii) are not part of an overall pattern of restrictive agreements that have unwarranted anticompetitive effects; and

(D) no participant in any joint research and development venture is subject to—

(i) any restriction on its own individual research and development activities; or

(ii) any obligations to provide the venture results from its previous or future research and development; and

(2) unless he finds that any of the joint research and development programs will lessen existing or potential competition between firms to such an extent as to foreclose the existing or potential competitors from participating in such market.

(e) Any approved joint research and development venture obtained by fraud is void ab initio.

(f) If the Attorney General denies an application for the approval of a joint research and development venture and thereafter receives from the applicants a request for the return of all documents submitted by the applicant or applicants in connection with the issuance of such approval, the Attorney General shall return to the applicant, not later than 30 days after receiving the request, the documents and all copies of the documents available to the Attorney General, except to the extent that the information contained in a document has been made available to the public.

(g) The Attorney General may at any time commence withdrawal of approval of all or any part of the joint research and development venture by giving to such venture a written copy of findings and a preliminary notice of the withdrawal or modification of such pervious approval. Such notice shall—

(1) include a statement of the circumstances underlying, and reasons in support of, the determination; and

(2) state with specificity any actions required in order for the venture of program to come into compliance.

(h) If the program or venture fails to take the actions specified by the Attorney General within 30 days after notice by the Attorney General is given, the Attorney General shall immediately issue to such venture final notice of the withdrawal or modification of such previous approval.

(i) Such withdrawal, modification, or denial of an application for approval of a joint research and development venture or amendment thereof is reviewable by the Court of Appeals for the District of Columbia to determine if the Attorney General's findings were clearly erroneous.

(j) Except as provided in subsection (i) no determination made by the Attorney General with respect to issuance, amendment, modification, or revocation of approval of a joint research and development venture shall be admissible in evidence in any administrative or judicial proceeding in support of any claim under the antitrust laws.

(k) The Attorney General may approve a joint research and development venture which fulfills the requirements of subsection (d) even if it does not provide access to participation to domestic subsidiaries of firms of another nation if it is found that such nation does not provide access to participation in joint research and development efforts to United States firms operating in such nation equivalent to the access provided domestic firms of that nation.

(l) For any joint research and development venture established prior to the date of enactment of this Act the Attorney General shall approve any such venture retroactive to the date such venture satisfied the requirements of subsection (d).

IMMUNITY

SEC. 6. (a) No act or failure to act pursuant to and within the scope of any Attorney General approved joint research and development venture shall be construed to be within the prohibitions of sections 1 and 2 of the Sherman Act, sections 7 and 16 of the Clayton Act, the Federal Trade Commission Act, or any State law in pari materia.

(b) None of the participants in a joint research and development venture, nor the venture, shall be liable under section 16 of the Clayton Act with respect to threatened loss or damage by a violation of the antitrust laws if the threatened loss or damage arises from conduct undertaken in connection with the operation of an approved joint research and development venture.

(c) If, with respect to any claim brought by a person under the antitrust laws against the joint research and development venture, its employees, or the participants, or employees of such participants, the court finds that the violation alleged arises from conduct undertaken in connection with the operation of an approved venture, and—

(1) the venture was formed and operated in conformance with the characteristics set forth in section 5 of this Act, or

(2) the conduct alleged to violate the antitrust laws does not violate the antitrust laws,

then the court shall award to the person or persons against whom the claim is brought the cost of suit attributable to defending against the claim, including reasonable attorney fees.

(d) Upon notice of withdrawal of the approval of the Attorney General, the provisions of this section shall not apply to any subsequent act or failure to act pursuant to such program.

TECHNOLOGY TRANSFER

SEC. 7. (a) Pursuant to subsections (g) and (h) of section 5, the Attorney General shall withdraw approval of all or part of the joint research and development venture if any of the following terms are not satisfied:

(1) all inventions and knowledge developed in the course of a research and development program are promptly reported by the venture to the participant firms;

(2) applications for patents on patentable inventions and methodology are made by the venture on behalf of program participants and the venture retains the title to all inventions, patents and methodologies,

(3) any firm that is a participant in a program at the time of an invention, or the time a methodology is developed is at such time entitled to access to all such resulting patents, inventions and methodologies; and

(4) no later than six years after the venture receives title to any invention, patent or methodology, it shall make access available to any other United States firms, such invention, patent or methodology on reasonable, fair and nondiscriminatory terms in light of the risks assumed and resources expended by the participants.

REPORTING REQUIREMENT; AMENDMENT OF APPROVED VENTURE

SEC. 8. (a) An approved joint research and development venture—

(1) shall promptly report to the Attorney General any change or update relevant to the matters specified under section 5(d), and shall annually submit to the Attorney General a report in such form and at such time as the Attorney General requires; and

(2) shall, in order to maintain immunity under section 6, submit to the Attorney General an application to amend the terms or scope of the previously approved venture to reflect the fact and effect of the change on the conduct specified in the previously approved venture.

(b) For purposes of section 5, an application for an amendment to an approved venture shall be deemed to be a request for approval of a venture, except that the Attorney General shall give written notification of his decision to the applicants within 30 days after the filing of such request. Such applicants decision shall be accompanied by the Attorney General's written findings.

DISCLOSURE OF INFORMATION

SEC. 9. (a) Information submitted by any person in connection with the issuance, amendment, modification, or revocation of the Attorney General approval shall be exempt from disclosure under section 552 of title 5, United States Code.

(b)(1) Except as provided in paragraph (2), no officer or employee of the United States shall disclose commercial or financial information submitted in connection with the issuance, amendment, modification of revocation of Attorney General approval if the information is privileged or confidential and if disclosure of the information would cause harm to the person who submitted such information.

(2) Paragraph (1) shall not apply with respect to information disclosed—

(A) upon a request made by the Congress or any committee of the Congress,

(B) in a judicial or administrative proceeding,

(C) with the consent of the person who submitted the information,

(D) in the course of making a determination with respect to the issuance, amendment, modification, or revocation of Attorney General approval, if the Attorney General deems disclosure of the information to be necessary in connection with making the determination,

(E) in accordance with any requirement imposed by a statute of the United States, or

(F) in accordance with any rule issued under section 10 permitting the disclosure of the information to an agency of the United States or of a State on the condition that the agency will disclose the information only under the circumstances specified in subparagraphs (A) through (E).

ISSUANCE OF GENERAL REGULATIONS

SEC. 10. Not later than 90 days after the date of enactment of this Act, the Attorney General shall issue rules to carry out this Act.

EFFECTIVE DATE

SEC. 11. This Act shall take effect on the date of enactment and shall also apply to any joint research and development venture established prior to such date.●

By Mr. MATHIAS:

S. 569. A bill to preserve, protect, and maintain the original boundary stones of the Nation's Capital; to the Committee on Energy and Natural Resources.

NATIONAL CAPITAL BOUNDARY STONES ACT

● Mr. MATHIAS. Mr. President, I am introducing today a bill to restore and protect the original 40 boundary markers of our Nation's Capital City. This is the third consecutive Congress in which I have introduced this legislation. In the 96th Congress, the House companion bill successfully passed the House, but in the press of the Senate business in the final days of that session, it was not considered by the Senate. A hearing was held in the Senate in the 97th Congress, but once again, there was no final action on this legislation.

We cannot delay this protective measure much longer before these markers, of significant historical value, are lost forever.

These sandstone markers are now 190 years old and are category II landmarks designated by the Joint Committee on Landmarks of the Nation's Capital. They have fallen on hard times with no one really charged with their maintenance and upkeep. Yet they are important testimonials to the history of the founding of the Nation's Capital, the work of Andrew Ellicott and Benjamin Banneker and the history of early surveying and civil engineering in the United Staes.

The question of a permanent site for the national seat of Government was debated by Congress from 1783 until 1791, when President Washington signed into law an amendment to the Residence Act of 1790 expanding the site of the Nation's Capital to include the eastern shore of the eastern branch of the Anacostia River and including the Port of Alexandria, Va.

The site of our Nation's Capital was, thus finally determined—a 100-square-mile district, with boundary lines 10 miles on each of the 4 sides.

Perhaps because they feared the decision on a permanent site would somehow be abrogated, President Washington and Secretary of State Thomas Jefferson wasted no time in engaging a surveyor as well as private individuals to begin quietly purchasing property on behalf of the Government.

To survey and mark the boundaries of the new District of Columbia, Mr. Jefferson immediately commissioned Maj. Andrew Ellicott of Philadelphia.

Ellicott was a well-known surveyor possessing some of the most advanced surveying instruments in the United States at that time. Most of those instruments are now housed in the Smithsonian Institution.

Ellicott accepted the commission and quickly began looking for an assistant to make the astronomical observations upon which the survey lines and markers would be based. He turned to Benjamin Banneker, a free black man who was a friend and neighbor of his cousin in Ellicott Mills, Md.

Banneker, a self-taught astronomer, was over 60 at the time. He readily agreed to make the astronomical observations for the south corner stone while Ellicott and field crews did the actual surveying. Between February and April of 1791, Banneker made observations and mathematical calculations upon which the first stone marker was placed at Jones Point on the Potomac River in Alexandria, Va. Ill health forced him to return home in April.

Ellicott completed the survey and setting of markers—40 in all—by January 1793.

The 39-year-old surveyor described the marker stones, which were of standstone quarried at Acquia, Va., as follows:

Lines are opened and cleared forty feet wide that is twenty feet on each side of the lines limiting the Territory, and in order to perpetuate the work I have set up square mile stones marked progressively with the number of miles from the beginning on Jones' Point to the West corner thence from the West corner to the North corner to the East corner and from thence to the place of beginning on Jones' Point; except in a few cases where the miles terminated on declivities or in waters; the stones are then placed on a the first firm ground, and their true distances in miles and poles marked on them. On the sides of the stones facing the Territory is inscribed, "Jurisdiction of the United States". On the opposite side of those placed in the Commonwealth of Virginia is inscribed "Virginia". And on those in the State of Maryland, "Maryland". On the third and fourth sides, or faces, inscribed the year in which the stone was set up, and the conditions of the Magnetic Needle at that place.

In 1914, a committee of the D.C. Daughters of the American Revolution set about reclaiming the boundary markers. Over the course of the following 3 years, members of the DAR once again located the stones, secured deeds from affected property owners to place a fence, installed protective iron fences around them, marked them with a bronze plaque, and assigned continued maintenance responsibility for each stone to one of its chapters.

Were it not for this pioneering preservation effort by the Daughters of the American Revolution, it is very likely the boundary stones of the Nation's Capitol would not have survived today. But development, traffic, remote locations, and vandalism have all taken their toll. The DAR, while as committed as ever to continuing its stewardship role, can no longer assume the financial and personal burden necessary to assure the maintenance of these stones.

Thanks to the efforts of the National Capital section of the American Society of Civil Engineers, in cooperation with the DAR, and the National Capital Planning Commission, a report was prepared on the stone markers as a bicentennial project.

That report titled, "Boundary Markers of the Nation's Capital: A Proposal for Their Preservation and Protection," is a careful history of the survey of the District of Columbia and the current status of the markers.

Several stones are overgrown with weeds; a few are missing; some have been relocated; some badly weathered. Yet others are well cared for by concerned citizens.

There is a clear need to fix responsibility for the stones and their protection and maintenance. It is with this purpose in mind that I am reintroducing legislation today that assigns responsibility for the preservation, protection, and maintenance of the boundary stones to the National Park Service. Such continuing maintenance

needs are to be identified by the D.C. Daughters of the American Revolution and reported directly to the National Park Service Director for appropriate action. This arrangement, I believe, will continue the DAR's stewardship of those important historic markers and assure their continued maintenance.

An estimate of costs for surveying the stones, preparing a conditions report, and preparing a relocation, replacement, and marker plan is $245,000, according to the National Park Service. They estimate that capital costs to replace protective fences, replace DAR markers, clean and protectively coat the stones against weathering, and trim the immediate area around those stones now neglected is $115,000.

The second purpose of my bill is to assure recognition for the two original surveyors of the Nation's Capital, and the history of their survey, its instruments, and techniques. As I noted earlier, many of Andrew Ellicott's surveying instruments are held by the Smithsonian Institution. My bill directs the National Park Service in coordination with the Smithsonian to develop such a display, which I hope would be in one of the Smithsonian museums.

Mr. President, too often we find ourselves mourning the loss of some significant historical feature of our Nation. The boundary markers of the Nation's Capital are such endangered monuments of the history of the Federal City. Despite rather overwhelming odds these markers have survived 190 years. With just a little bit of care they can be assured of preservation for decades to come.

Mr. President, I would further like to note that I have received letters supporting the intent of this legislation from the National Capital Planning Commission, the Smithsonian Institution, the D.C. Commission on Fine Arts, the American Society of Civil Engineers, and the D.C. Chapter of the Daughters of the American Revolution, as well as the District of Columbia, Maryland, and Virginia State Historic Preservation officers. I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 569

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Capital Boundary Stones Act".

SEC. 2. (a) Congress finds that because of the deteriorating condition and neglect of the forty original boundary stones delimiting the ten-mile square first set aside by the State of Maryland and the Commonwealth of Virginia as the "seat of government of the United States", there is a need to provide for the preservation, protection, and maintenance of such stones.

(b) The purposes of this Act are to—

(1) assign responsibility for the preservation, protection, and maintenance of the boundary stones;

(2) assure perpetuity of these important historic boundary stones for future generations of Americans to view and enjoy;

(3) provide an adequate mechanism for ensuring that the boundary stones are protected and maintained; and

(4) to make available to the public, information, data, and items involving or pertaining to the history of the original survey of the Nation's Capital, including the surveyors, and the instruments and techniques used in connection therewith.

SEC. 3. (a) The Secretary of the Interior, acting through the National Park Service, shall have the responsibility for the preservation, protection, and maintenance of the boundary stones referred to in section 2 of this Act.

(b) Within the twelve-month period following the date of the enactment of this Act, the Director of the National Park Service shall prepare and submit to the Secretary for his approval a program for preserving, protecting, and maintaining such boundary stones. Such program shall include—

(1) a location and condition survey of each cornerstone and boundary stone, conducted in consultation with the District of Columbia Daughters of the American Revolution, which shall be referenced to the appropriate State plane grid coordinate system with appropriate ties to property lines and which shall provide for the results to be shown on plats of survey in such form as may be suitable for recording purposes;

(2) with respect to each boundary stone located at each of the four cardinal points of the compass at the corners of the ten-mile square delineating the original site of the Nation's Capital a plan for preserving, protecting, and maintaining such cornerstones;

(3) with respect to each of the other boundary stones, a plan to preserve, protect, and maintain each such boundary stone;

(4) a relocation, replacement, and marker plan for those boundary stones which have been moved or which are missing or which cannot be placed in their original location;

(5) alternative plans for the long-term care, protection, and maintenance of the boundary stones which may include agreements among private individuals, the Federal Government, local governments of areas within the State of Maryland or the Commonwealth of Virginia within which such boundary stones are located, and the governments of the State of Maryland, the Commonwealth of Virginia, and the District of Columbia;

(6) a schedule and financial plan for providing such preservation, protection, and maintenance of such boundary stones; and

(7) in coordination with the Smithsonian Institution, a plan setting forth a display on the history of the survey of the District of Columbia conducted during the years 1791 and 1792, the original surveyors, the instruments and techniques used by such surveyors in conducting the survey of the District of Columbia, and surveying methods and techniques currently in use.

(c) Within the twenty-four-month period following the date of the approval by the Secretary of the Interior of the program pursuant to subsection (b) of this section, the Secretary of the Interior, acting through the National Park Service, shall, in consulation with the District of Columbia Daughters of the American Revolution, implement such program and provide for the preservation, protection, and maintenance of such boundary stones.

SEC. 4. In carrying out the program approved pursuant to section 3 of this Act, the Secretary of the Interior is authorized to acquire, by donation, purchase with appropriated or donated funds, exchange, or condemnation, such lands and interests therein (including easements), together with improvements thereon, as may be necessary to carry out such program.

SEC. 5. Whoever willfully damages or removes any boundary stone referred to in this Act shall be fined not more than $500, or imprisoned not more than six months, or both.

SEC. 6. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.●

By Mr. ROTH:

S. 571. A bill to amend the Federal Property and Administrative Services Act of 1949 to make Federal surplus property more accessible to local emergency preparedness and volunteer firefighting organizations and to authorize and direct the Federal Emergency Management Agency to recommend available Federal surplus to the Administrator of the General Services Administration for transfer to such organizations, and for other purposes; to the Committee on Governmental Affairs.

EMERGENCY SERVICES IMPROVEMENT ACT OF 1982

● Mr. ROTH. Mr. President, I am today introducing the Emergency Services Improvement Act of 1983, a revised version of legislation which I first introduced 3 years ago. This bill is intended to improve the availability of surplus Federal property to State and local emergency services organizations by establishing emergency preparedness as an important national priority. I believe the legislation is an efficient and effective way to assist State and local emergency preparedness organizations perform their lifesaving duties and I urge my colleagues to support it.

The Emergency Services Improvement Act would help address the needs of State and local emergency and disaster preparedness organizations for trucks, generators, firehoses, tools, and other emergency supplies. Currently, there are over 1½ million volunteer firefighters, 28,000 fire companies, some 6,000 civil defense agencies, and countless local rescue squads providing services to their local communities in fighting fires, rescuing and treating hurt or trapped persons, and planning for natural or manmade disasters. Many of these organizations are volunteer based and operate on funds raised from private sources. They do not have the time or the money to become knowledgeable concerning Federal property programs

and have found themselves, over the past 5 years, less and less accessible to Federal personal property declared as surplus.

Before 1977, many of these groups relied, to some degree, on their ability to obtain usable surplus equipment from the Federal Government to help them maintain and improve their services. Most often, the property they obtained was old and in a state of disrepair but they utilized their talents to restore the equipment to working order. In many cases, the trucks and generators they received were of Korean war vintage and their willingness and ability to devote considerable time and effort to revamp the aged Federal equipment was commendable. My Committee on Governmental Affairs received dozens of letters and photographs detailing how the equipment was being rebuilt and used from local disaster preparedness groups across the country.

Changes made in the law in the 1970's greatly reduced the availability of surplus Federal personal property to State and local firefighting, rescue, and civil defense organizations. Civil defense organizations at the local level have operated for many years as coordinating groups for all disaster preparedness organizations in their efforts to acquire surplus personal property from the Federal Government. In 1976, over $170 million worth of surplus equipment was sent through civil defense organizations to volunteer firefighting companies, sheriffs' offices, and rescue squads. Last year, only $30 million went to these same organizations. Many civil defense organizations have been unable to acquire equipment for disaster preparedness groups in their areas.

Local emergency preparedness organizations make good use of available Federal surplus property. In my own State, the Frankford Volunteer Fire Co. used surplus military equipment in the blizzard of 1980 to provide shelter and aid to 35 people in its firehouse. One of my constituents, Mr. Wayne Ellingsworth, director of Sussex County, Del., Department of Emergency Services, noted in testimony before my committee concerning a severe blizzard which struck the county in 1980:

> Most of our success in saving lives during this blizzard was attributed to those 41 four-wheel drive vehicles that my department had acquired through the excess equipment program then administered by the Defense Civil Preparedness Agency.

Mr. President, S. 2625 would establish emergency preparedness in the law as a priority need for the donation of surplus Federal property. It would require the Federal Emergency Management Agency (FEMA) to continuously survey available Federal property in the Defense Department and the civilian agencies to locate equipment appropriate for emergency services. When such equipment is found, FEMA would notify the General Services Administration (GSA) to transfer it to local emergency service organizations. GSA is the agency responsible for Federal property programs. The bill also specifically requires the Defense Department to consider the emergency preparedness needs of local organizations before sending its surplus equipment to the GSA for all final disposal.

I think this legislation will improve the access of State and local emergency preparedness organizations to available surplus Federal property. It represents a cost-effective method of enhancing the ability of local volunteer fire and rescue squads to perform their lifesaving duties without increasing local taxes.

A bill identical to the one I am introducing today passed the Senate last August but time did not permit its approval by the House. The legislation is under the jurisdiction of the Committee on Governmental Affairs which I chair and I intend to schedule it for quick action in my committee. I urge my colleagues to support this important legislation.

I ask that the text of the bill be printed in the RECORD at this time.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 571

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Emergency Services Improvement Act of 1982".

SEC. 2. Section 484(j) of title 40, United States Code, is amended by striking subsection (j)(2) and inserting in lieu thereof the following new paragraph:

"(2)(A) In the case of surplus personal property under the control of the Department of Defense, the Secretary of Defense shall determine whether such property is usable and necessary for the civil defense needs of the United States or for educational activities which are of special interest to the armed services, such as maritime academies, or military, naval, Air Force, or Coast Guard preparatory schools. If the Secretary determines that such property is usable and necessary for said purposes, the Secretary shall allocate it for transfer by the Administrator to the appropriate State agency for distribution, through donation, to such activities. If the Secretary determines that such property is not usable and necessary for such purposes, it may be disposed of in accordance with paragraph (3) of this subsection.

"(B) Before making any determination concerning the property described in paragraph (2)(A), the Secretary shall confer with and ask the guidance of the Director of the Federal Emergency Management Agency. The Director shall continuously review the available property under the control of the Department of Defense and shall immediately notify the Secretary whenever he has identified property appropriate for civil defense purposes.

"(C) The Director shall notify the Congress whenever the Secretary has refused to accept his recommendation to allocate property to the Administrator of the General Services Administration as provided under subsection (2)(A).".

SEC. 3. (a) The Federal Civil Defense Act of 1950 is amended by inserting after section 207 the following new section:

"TRANSFER OF PROPERTY TO STATE AND LOCAL GOVERNMENTS

"SEC. 208. (a) Upon notification of the Administrator of General Services in accordance with the Federal Property and Administrative Services Act of 1949 by any agency other than a department or organization within the Department of Defense that such agency has surplus property under its control, the Director shall be notified by the Administrator of General Services of the availability of such surplus property. Before transferring or allocating any such property, the Administrator shall consult with and ask the guidance of the Director of the Federal Emergency Management Agency concerning which such property would be suitable for civil defense purposes. The Administrator shall carefully and completely consider the recommendations of the Director and, based on such recommendations, shall transfer property to the appropriate State agency for distribution to the civil defense organizations identified by the Director.

"(b) The Director shall notify the Congress whenever the Administrator has refused to accept his recommendations to transfer property identified by the Director as provided in section 208(a).".

(b) The table of contents of such Act is amended by inserting after the item relating to section 207 the following new item:

"Sec. 208. Transfer of property to State and local governments.".●

By Mr. DODD (for himself, Mr. CRANSTON, Mr. KENNEDY, Mr. TSONGAS, and Mr. RIEGLE):

S. 572. A bill to provide emergency assistance for children; to the Committee on Finance.

EMERGENCY ASSISTANCE FOR CHILDREN

● Mr. DODD. Mr. President, today I am introducing a bill to restore essential health, nutrition, and education programs for our Nation's youth. I am pleased to have Senator CRANSTON, Senator KENNEDY, Senator TSONGAS, and Senator RIEGLE join me in sponsoring this emergency assistance legislation for children.

Some 64 million Americans are children. They constitute one-third of our citizenry. Yet despite their overwhelming numbers, younger Americans represent what is often called an invisible constituency. Unlike the rest of us over the age of 18, they cannot vote. Rather, they must rely upon us to vote on their behalf in the same manner as they rely on us to feed, clothe, educate, and protect them.

If this country's young people could speak as an organized group here today, I am certain they would tell us that we have not done a very good job of looking after their safety or welfare. The budget actions of the past 2 years have cut into the muscle and bone of many crucial services for children, including food stamps and school

lunches, day care, financial support under aid for dependent children, and health benefits under medicaid.

Preliminary reports from States around the country show that children's programs are being cut before all others in the battle over scarce block-grant dollars. And, officials from my State of Connecticut to California predict that the recent alarming increase in child abuse will only get worse as a result of the strains which unemployment and cutbacks in social services have placed upon families.

The bill I am introducing today focuses on the following crucial services for children: First, child welfare, second, child care, third, family supports, fourth, health care for mothers and children, fifth, child nutrition, sixth, education, and seventh, youth employment. Essential funding cut from such services over the past 2 years would be restored by the provisions of this emergency assistance legislation for children. Where necessary, this bill also targets certain programs for additional emergency funding.

Under child welfare, this bill provides money to develop cost-effective alternatives to out-of-home care, to support children placed voluntarily by their parents in foster care, and to assist the victims of child abuse. In addition, it seeks to aid States in their efforts to remove children from adult jails and provide more shelters for runaway youth. With some one-half million children locked up in adult jails each year, such assistance can come none too soon.

The child care provisions of this legislation provide additional funding for Head Start, the child care food program, and title XX child care. At the same time, it establishes a refundable child care tax credit and allows child care facilities to qualify for income tax exemption.

In terms of health care for mothers and children, the bill restores budget cuts in such vital programs as WIC and childhood immunization as well as in those contained in the maternal and child health and the primary care block grants. Furthermore, it makes medicaid available to children and pregnant women who meet income standards but are now excluded because they are part of a two-parent family.

Poor families, especially the working poor, would have such services as child care and crisis assistance restored to them under the family support provisions of this bill. At the same time, limits on work incentives for AFDC recipients would be eliminated while tax relief for working families with dependent children would be enhanced.

Under child nutrition programs, this bill raises eligibility standards for children in need of free or reduced price school breakfasts and lunches. It also restores food stamp benefits taken away from working, poor families by the 1981 reduction in the "earned-income disregard."

The education provisions contained in this legislation will allow hundreds of thousands of children to regain access to the remedial math and reading program under chapter 1 of the Education Consolidation and Improvement Act. Additional funding for the Education of All Handicapped Children Act included in the bill will insure that States continue to assist eligible children to become self-supporting adults.

Finally, this legislation would target additional funding for youth employment programs. Such action is imperative in light of recent evidence that minority youth unemployment is nearly 70 percent.

Mr. President, this legislation would make children's programs a high priority in our budget. The need for doing just that becomes more apparent every day. More children now live below the poverty line than any other age group in this country, and the poverty rate for children keeps climbing, having jumped from 15 percent in 1970 to more than 20 percent in 1981.

Infant mortality is on the rise again, with millions of American babies and pregnant women unable to obtain special nutrutional and medical assistance. The rate of infant deaths in cities like Detroit and Birmingham now parallels that in some of the poorest Latin American and African nations. And, some 15 percent of all 17 year old Americans can neither read, write nor count at a time when jobs are available for those with only the most advanced skills.

If we neglect to care for our children today, we neglect tomorrow's national scientific and technological capabilities, economic growth and security. Although our younger citizens are silent in that they do not vote, they must not be ignored. I urge my colleagues to join with me in sponsoring this legislation to insure that children do not become forgotten Americans.●

By request of Mr. BYRD, the following statement was ordered to be printed in the RECORD:

HELP FOR AMERICA'S CHILDREN

● Mr. CRANSTON. Mr. President, I am pleased to join my good friend, the Senator from Connecticut (Mr. DODD), in introducing S. 572, this symbolic measure aimed at restoring some of the funds that have been slashed over the past 2 years from programs that provide services that are essential to the survival of millions of young children in this Nation and making certain changes in other programs to help reduce the economic hardships faced by low-income working families throughout the country.

Mr. President, the Senator from Connecticut (Mr. DODD), was recently named the ranking minority member of the Family and Human Services Subcommittee of the Labor and Human Resources Committee. It is particularly noteworthy that as one of his first actions since assuming that position on the only Senate subcommittee focused primarily on programs involving the needs of America's children and families, Senator DODD has introduced this measure, demonstrating his commitment and dedication to the welfare of our most precious resource—our young. As the chairman of the predecessor subcommittee—the Child and Human Development Subcommittee—during the 95th and 96th Congresses, I am proud to join the Senator from Connecticut in sponsoring this symbolic measure. I look forward to working with him on behalf of the well-being of our Nation's children.

As my colleagues know, throughout my Senate career, I have had a special interest in programs relating to the needs of children and families. I served as a primary Senate sponsor of many of the programs affected by this legislation which have suffered enormously under the Reagan administration. The measure we are introducing today symbolizes the need to undo some of the damage done in the past 2 years to these programs.

IMPACT OF REAGANOMICS ON CHILDREN

Mr. President, children constitute the largest age group living in poverty in our Nation, and sadly, their numbers are growing. Over the past 2 years, more than 2.5 million more children fell into poverty. Today, 20 percent of the children in this great Nation—one in five—are living in poverty.

These figures are a national disgrace.

Children are the primary recipients of assistance under Federal programs providing aid to poverty-stricken Americans and they have been the primary victims of the Reagan budget cuts. Virtually every Federal program providing assistance to vulnerable children and their families has suffered devastating cutbacks in the past 2 years under the Reagan administration's misguided budget priorities. While we have watched the military budget become bloated and the well to do given tax break after tax break, programs providing food and health services to needy children have been drastically reduced.

The tragic story told by the statistics is overwhelming. Over a million children have lost their subsidized school lunches since President Reagan took office. Almost 300,000 children are estimated to have lost access to health services formerly provided through community health centers. Another 200,000 children and mothers have been eliminated from the maternal and child health program. An esti-

mated 1.5 million children have lost AFDC assistance. In many cases, loss of AFDC has meant loss of medicaid services as well.

The consequences of these shortsighted policies which have robbed children and families of vital services are just beginning to become apparent. Alarming reports are now reaching us of increases in infant mortality rates in communities which have been hard hit by the economic devastation caused by raging unemployment and reductions in health care services. The incidence and severity of child abuse appears to be increasing in communities throughout the country as services are being cut for child abuse prevention programs. A survey conducted by the National Committee for Prevention of Child Abuse last fall found 39 States with an increase in child abuse reports, 33 with more serious abuse cases, and 14 with increases in deaths due to abuse.

Abandonment of children also appears to be on the rise. The Children's Defense Fund reported a 50-percent increase in abandonment cases in Philadelphia between 1981 and 1982, with 12 to 15 new cases of abandoned children occurring each month in that city. Yet, funds for programs like child welfare services that are designed to help reduce family break-ups and distress have been reduced at a time when the dismal economic conditions brought on by Reaganomics have led to increased family tensions and an increased need for such programs. Indeed, as more and more American families have been brutally affected by the Reagan economic program and have been forced to seek assistance in their struggle for survival, they have found that the basic Federal programs to help families and children in need have been gutted by the Reagan administration.

Mr. President, I do not believe the American people have lost their compassion for vulnerable children or their willingness to lend a helping hand to their fellow Americans who have suffered misfortune. The American people do not want to see hungry children lining the streets of our great cities or a return of the dreaded diseases—like polio and diphtheria—which can be prevented only through consistent and vigilant immunization and child health programs. This symbolic measure represents a step toward dramatizing the great need to restore the infrastructure of our national programs to make sure that our Nation's young do not go without the basic elements essential for their healthy development. The strength of our Nation rests upon our commitment to insure that the next generation of Americans have the resources and opportunities necessary for them to grow up strong and well.

CHILDREN'S DEFENSE FUND INITIATIVE

Mr. President, the measure we are introducing today was developed by the Children's Defense Fund (CDF), a nonprofit organization dedicated to speaking out on behalf of children, particularly poor, minority, and handicapped children. CDF has long been a tremendous advocate for the needs of children and has contributed enormously to the development of sound policies to provide assistance to children and families in need. CDF has played an invaluable role in advocating for a constituency which is often unable to speak for itself. The efforts of this fine organization in developing the symbolic measure we are introducing today represent a major achievement in the continuation of CDF's outstanding activities on behalf of America's children.

COMPREHENSIVE CHILDREN'S LEGISLATION; S. 4, S. 6, AND S. 7

Mr. President, in cosponsoring this measure, I want to make note of the fact that on the first day of this Congress I introduced several important bills relating to the needs of children. Those bills include S. 4, the proposed Child Care Assistance Act of 1983, S. 6, the proposed Child and Maternal Health Act of 1983, and S. 7, legislation to provide medicaid coverage on a uniform basis to low-income pregnant women throughout the country.

In some cases, the provisions of the measure being submitted today coincide with the provisions of those bills. In other areas, the comprehensive legislative package I introduced on January 26 go far beyond the provisions of this measure. Although I am pleased to be an original cosponsor of this symbolic measure, I am fully committed to pursuing the comprehensive child care and child and maternal health legislative initiatives contained in the bills I introduced on January 26.

Nevertheless, this measure represents a good starting point and basis upon which to build the kind of support and consensus that is necessary to provide adequate assistance to the millions of low-income children and families throughout our Nation.

SUMMARY OF MAJOR PROVISIONS

Mr. President, I would like to describe briefly some of the provisions of the measure we are introducing today. As I indicated at the outset, in most cases, the funding levels proposed would simply restore these programs to levels applicable prior to the Reagan reductions. In a few instances, new provisions are proposed.

CHILD WELFARE PROGRAMS

Mr. President, this measure would seek funding at the full authorization level for two programs focused on abused, neglected, or homeless children—the Adoption Assistance and Child Welfare Act of 1980, Public Law 96-272, and the Child Abuse Prevention and Treatment and Adoption Opportunities Act, Public Law 95-266. I was the primary Senate sponsor of both of these laws and have consistently fought for adequate funding for these programs which are of vital importance to thousands and thousands of vulnerable children.

Funding for the title IV-B component of Public Law 96-272 would be set at $266 million—the level adopted by Congress when this landmark legislation was enacted in 1980. Funding for this program has been frozen for the past 2 years at $156 million, which is 4 percent below the fiscal year 1981 funding level. The legislation enacted by the 96th Congress contemplated increases in funds for the title IV-B program in order to implement the reform measures contained in the new law. Without adequate funds for the services necessary to implement these new provisions, States have limited ability to reduce foster-care placements and secure permanent homes for the thousands of children who have been tragically caught in the foster-care limbo.

This measure would also set funding for the programs authorized under Public Law 95-266—the child abuse and the adoption opportunities program—at $39 million, the combined level authorized when these programs were enacted during the 95th Congress. Presently, funding from the child abuse program has been reduced from the 1981 total funding level of almost $23 million to $6.7 million. Adoption opportunities has gone from $5 million to $1.9 million.

Funding for the juvenile delinquency prevention program would be set under this measure at the previous authorized level of $200 million.

Finally, the measure would set funding for the runaway youth program at $50 million, an increase over the current $21.5 million in recognition of the need to provide more resources to deal with the estimated 1.2 to 1.5 million children and adolescents who run away from home each year, often to become victims of sexual exploitation. The handful of programs currently funded under the existing program—166 programs throughout the Nation—have been highly successful in getting these runaways to return to their families. More than 50 percent of the youngsters who arrive at a runaway center are persuaded to return home.

CHILD CARE SERVICES

This measure would seek to restore the $200 million for child care services that was eliminated from the social services block grant program in 1981. As I indicated earlier, I have also introduced legislation, S. 4, the proposed Child Care Assistance Act of 1983, which would authorize an additional $200 million for child care services in

fiscal year 1984 to compensate for the loss of the $200 million for child care under the former title XX program. Both this provision and S. 4 are aimed at the same goal—restoring funds for essential child care services. S. 4 would also seek to provide for the comprehensive and coordinated development of child care assistance programs to meet the growing need for cost-effective and adequate child care services.

The proposal being submitted today would also seek to provide additional funds for the child care food program to restore prior levels of service and would set a funding level for the Head Start program at the level authorized by Congress.

Additionally, this measure would make the existing child care tax credit refundable, thereby reaching the thousands of low-income working families who currently do not benefit from a nonrefundable credit. The Senate approved the refundability provision in the 1981 tax bill, but that provision unfortunately was deleted in conference.

HEALTH SERVICES

This measure would seek to restore funds for several important health programs providing services to children and mothers.

It would set a funding level for the maternal and child health block grant at the level which existed prior to 1981. This would result in an additional $83.2 million for this program which provides low-income children and mothers with such important services as immunizations and basic prenatal and infant care. An increase of approximately $45 million would be proposed for the primary care block grant in order to provide funds for the community health center program—an important source of health care services for many low-income families. This would fund the program at the full authorization level.

An additional $31.2 million would be proposed for the title X family planning services program to bring the level of funding back up to the 1981 level. As the primary Senate sponsor of all of the major family planning legislation enacted during the 1970's, I am particularly aware of the need to provide adequate resources to provide family planning services to the millions of low-income women in this country who lack access to such services. Restoration of funds to the 1981 level would represent only a small step in the direction that is needed to help make such services available to all who seek and desire them.

An additional $4 million would be directed to the Federal immunization program to immunize children against polio, diphtheria, measles, tetanus, whooping cough, and mumps. These additional funds would simply offset increases in the cost of vaccines and allow the program to continue to provide the same level of service.

This measure would also make certain changes in the medicaid program to extend coverage to pregnant women and children in two-parent families, facilitate coverage of newborn eligible infants, extend coverage to an estimated 66,000 low-income children and their families who are currently not eligible, and require States to provide low-income children under medicaid with vision, dental, and hearing services.

Again, as I indicated previously, on January 26 I introduced two bills, S. 6 and S. 7, dealing with the health needs of low-income children and pregnant women. Both bills would go further than today's measure toward meeting the health needs of these individuals. For example, S. 7 would extend medicaid coverage not only to low-income pregnant women in intact, two-parent families, but would also provide coverage to low-income women who are pregnant with their first child—women who are now denied coverage in a number of States. Both S. 6 and S. 7 would establish uniform medicaid eligibility standards at 55 percent of the poverty line, thereby enabling many pregnant women and low-income children living in States with higher eligibility standards to receive medicaid services. Moreover, S. 6 would provide for improvements in child health services under medicaid beyond the mandating of vision, dental, and hearing services. Although the improvements proposed in the proposal introduced today do not go as far as S. 6 or S. 7 toward meeting the health needs of low-income mothers and children, they would clearly be a useful first step.

Finally, the measure proposes an additional $66 million for the WIC program—the vital supplemental food program for women, infants, and children. The additional funds would restore the level of services to the fiscal year 1982 level. The WIC program, which serves approximately 2.3 million women and children, is one of the most successful Federal programs and has been extraordinarily effective in reducing low birth weights, a leading cause of infant mortality and morbidity.

EDUCATION

The measure being proposed today would seek to restore the funding levels for two important education programs serving disadvantaged and handicapped children. It proposes an increase of $350 million for the Education Consolidation and Improvement Act, formerly the title I compensatory education program which serves educationally disadvantaged children from low-income areas, and proposes an additional $50 million for the Education for All Handicapped Children Act. In both cases, the level of funding provided represents the full authorization level provided in the Omnibus Budget Reconciliation Act of 1981.

NUTRITION

Changes in the school lunch program and the food stamp program—53 percent of the food stamp recipients are children—provided for in this measure would restore services to millions of children affected by the reductions in the past 2 years. Approximately $500 million of the more than $1 billion taken from the school lunch program since 1981 would be restored.

Approximately $320 million would be restored to the food stamp program—which represents only a small part of the almost $4 billion in funds taken from this program in the past 2 years.

FAMILY SUPPORT SERVICES AND INCOME PAYMENTS

An additional $800 million would be proposed for the social services block grant program, formerly title XX of the Social Security Act. This would bring the funding level up from the current $2.45 billion to $3.3 billion—the level set by Congress in 1980.

Various changes are also included to eliminate the provisions added to the AFDC program in 1981 which severely hurt low-income families trying to work their way off of welfare and back into the work force. These changes would restore approximately $475 million in funds to the AFDC program.

Two changes in the tax treatment of low-income working families have also been proposed. The first would increase the earned income tax credit by $50 for each dependent child and by an additional $50 per dependent child under age 6 in working families. The second provision would reduce the tax rate for families claiming the earned income tax credit from the current 12.5 percent to 10 percent. Both of these provisions would ease to a certain extent the economic burdens faced by these families whose incomes fall into the lowest tax bracket and whose tax rate was the only one not reduced in the 1981 tax cuts. I know of no clearer evidence of the unfairness of Reaganomics than this discrimination against those of little influence and even littler means of coping with the current economic nightmare.

YOUTH EMPLOYMENT

The measure also proposes increased funding for several employment programs—the Job Corps, summer youth employment program, and the local training program authorized under title II-A of the CETA program which is focused upon structurally unemployed and economically disadvantaged persons, at least 40 percent of whom must be young persons under the age of 22.

I have recently introduced S. 266, the proposed Community Renewal Employment Act. That legislation

would provide for almost a million employment opportunities for long-term unemployed individuals seeking to work. Likewise, these provisions in today's proposals are designed to enhance the employment outlook for 50,000 young people who are new entrants to the labor market and who may lack the necessary job skills and experience necessary to compete effectively.

CONCLUSION

Mr. President, this measure along with such bills as S. 4, S. 6, S. 7, and S. 266 signify the commitment of many in Congress and throughout the Nation to restore our national priorities toward programs that represent an investment in our human capital and in our Nation's most precious resource—our children.

I look forward to working with the chief sponsor of this measure, the Senator from Connecticut and other similarly dedicated and concerned Members of this body, as we seek to refine and develop these proposals so that we can truly achieve that goal.●

By Mr. DODD (for himself and Mr. PROXMIRE):

S. 573. A bill to require depository institutions to disclose to their customers their practices relating to the availability of funds in connection with check deposits, to require the timely payment of interest on deposits to interest bearing accounts, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

FAIR DEPOSIT AVAILABILITY ACT OF 1983

● Mr. DODD. Mr. President, we all know people who deposit a large check, wait a few days, and then write checks to pay their bills—only to have the checks returned to them as unpayable because of "insufficient funds." They immediately call their banks to find out why their checks have bounced and are told that the check they deposited to cover these amounts—sometimes their paycheck or social security check—had not cleared yet. Often the people are shocked to discover that their banks take a week to clear an in-State check and 2 weeks to clear an out-of-State check. Then these people have to suffer the embarrassment of explaining the problem to the merchants and reissuing new checks—after the appropriate amount of time. Finally, to add injury to insult, they receive notices from both the bank and the merchants that they will have to pay penalties charges because the checks bounced.

In the days of electronic banking and automated clearinghouses, there is no excuse for these problems to occur with the frequency they do. A Federal Reserve Board survey of "Consumer Experience with Delayed Funds Availability" in November 1981, found that 11 percent of the people interviewed who had checking or savings accounts had frequent problems or sometimes had problems with check holds. If 50 million Americans have checking and savings accounts (a conservative estimate), this would mean that approximately 5.5 million people have experienced frequent or sometime problems with bank check hold practices.

It is time for the banking industry to harness its marvelous technology and put an end to the disgraceful system of holding deposits for an undue period of time. The legislation I am introducing today with Senator PROXMIRE, the Fair Deposit Availability Act of 1983, is designed to help depository institutions and the marketplace solve the problem. It does not dictate specific periods of time for check cashing—as was suggested by a Federal Reserve Board-American Bankers Association Task Force in 1979 with respect to established, financially responsible customers. Instead, it requires the bank on which a bad check is written to inform the bank that cashed the check in the first place within 24 hours of the time that it determines that the check will not be paid. Banks can do this easily if they follow the American National Standards Institute's 1981 standard on "specifications for check endorsements," as also would be required by my bill. By following this system, banks that cash checks will know within 3 to 4 days whether a check has cleared.

In addition, the legislation requires depository institutions to inform customers of their hold policies both at the time a person opens a new account and at the time a person deposits a check if the funds will not be available immediately. I am hopeful that the marketplace then will operate to eliminate unduly long check holding practices and obviate the need for any proscriptive legislation.

As I indicated previously, a Federal Reserve Board-American Bankers Association Task Force produced a report on delayed funds availability in 1979. The task force concluded that "delayed funds availability is a widely employed and common banking practice." It went on to point out that there was a need for this practice because it takes banks a considerable period of time to be sure that a check has cleared because a cumbersome hand-operated system of return checks not only is used by banks but is sanctioned by the Uniform Commercial Code. Nevertheless, the task force felt that banks should differentiate between established customers and new customers and "retain the flexibility to provide established, financially responsible customers with funds availability on a schedule at least equal to the receipt of 'provisional credit' by the bank without extending similar funds availability in situations that may involve crime or financially irresponsible individuals." Practically, this would mean credit within 2 or 3 days in almost all cases. In addition, the task force said that "delayed availability practices or policies should be related to the bank's actual check collection and return experience" and that the "provisions" of the banks "delayed availability policy should be given to the public on request and disclosed to affected bank customers."

Because the problem of bank check hold practices appeared to be a continuing one, the Subcommittee on Consumer Affairs of the Banking Committee—which was chaired by Senator CHAFEE and on which I was the ranking minority member—conducted a hearing on March 10, 1982, to determine whether anything had ever been done to implement the rather mild recommendations of the task force or whether financial institutions had taken steps on their own to address the problem.

The hearings were highly educational, if unsatisfying from the standpoint of actions taken to assist bank customers. The rationale for bank holds is based upon the present check collection system. Every check that is deposited at a financial institution moves through a collection process that involves physically transporting the check from the bank where it is deposited to the bank on which it is drawn. The check collection system often involves the movement of the check through a series of collecting banks, with each bank giving the preceding bank a provisional credit, which is subject to revocation if the check is returned. Once a bank has provisional credit, it may invest those funds to make money.

As a general rule, a bank will receive provisional credit within 1 to 3 days of the time it enters the check into the collection system. However, it usually takes considerably longer before the customer can have the use of the funds represented by the check. Most banks deny customers use of the funds until they are reasonably certain that the check will clear. Usually this means a delay of about 1 week with respect to checks written on in-State banks and 2 weeks when checks are written in out-of-State banks.

These delay periods were reported by the Federal Reserve Board in a 1978 survey and confirmed in a survey done by the Consumer Affairs Subcommittee staff in conjunction with the hearing. The staff surveyed the hold practices of more than 50 financial institutions in the metropolitan areas of Washington, D.C., Hartford, Conn., and New Haven, Conn., as well as in various cities in Rhode Island. They found that most banks will not credit a personal check drawn on an in-State bank for 5 business days and

on an out-of-State bank for more than 10 business days.

The reason for the delay lies in the present system of processing checks. Generally, it takes only 1 to 3 days for a check to be presented for payment to the bank on which it is drawn. However, it may take another 8 days or longer for the check to be returned to the paying bank if the check is not honored. The long return time is due to the fact that uncollectible checks are handled manually and are returned to each collecting bank in the chain (often three or four banks) before they get to the original paying bank. This practice is authorized by the Uniform Commercial Code, which permits a collecting bank to drop a return item in the mail as late as midnight of the day following the receipt of the item. It is only when this entire time period has been completed that the paying bank knows for sure that the check has cleared.

For most banks, the issue stops with protecting themselves against uncollectable checks. In fact, they have done this so well that the only study of bank losses from uncollected funds—conducted by the Bank Administration Institute in 1973—estimated bank losses at $5 million for the year. Banks have shown little appreciation of the needs of their customers for access to their funds nor for the fact that, according to the BAI study, only 0.67 percent of all checks are returned uncollectable.

While we would all agree that banks need to protect themselves from fraudulent check writers, the present system places too much weight on bank protection against uncollectable checks and not enough weight on the equally legitimate needs of bank customers for prompt access to their funds. Probably the single most important reason for slow bank clearance procedures lies in the fact that banks have little incentive to speed up the check collection system because every day a bank delays giving the customer use of his or her money is a day the bank can earn interest on that money by investing it.

Despite the present cumbersome and inefficient check return system, some banks have acted to provide their customers with a better system. At our hearing, a witness for the Bank of America testified that the Bank of America discloses its policy on holds in writing to customers when they open an account. In addition, if the bank plans to hold funds in a particular situation, the bank makes a specific disclosure to the depositor at the time the deposit is made indicating the date when the funds will be available. If the deposit is made in any way other than in person, the receipt mailed to the customer contains an explanation of what a hold is, why it is placed, and gives the date the funds will be available for the current deposit.

Equally important, the Bank of America does not place holds on most checks. The most common situations where holds are placed relate to large dollar checks, new customers who do not have an established relationship with the bank and where the account has a pattern of bad checks in the past.

The Bank of America witness testified that this system is more equitable:

> We believe these policies and procedures go far toward striking a balance between the need to protect the bank from the significant risk involved and providing customers access to their funds expeditiously.

I agree that the Bank of America's system is far more balanced than those of most banks. I truly wish that the private sector had solved this problem on its own long ago. However, the record suggests just the opposite. Despite the recommendations of the Federal Reserve Board-American Bankers Association task force in 1979, no concerted action was taken by the industry to solve the problem. Furthermore, no additional action was taken by the task force. During the hearings, the witness for the Federal Reserve Board testified that the Fed planned to do another study, one that "won't take very long." While I had my doubts about another study, I encouraged the industry and the Fed to work out the problem. Yet, 11 months later, we still do not have the results of the new study, and the industry has taken no independent action to solve the problem.

Therefore, I believe that the only way that we are going to solve this problem is through legislation. Even here, I have attempted to draft my bill in such a way as to encourage the marketplace to solve the problem, rather than impose upon them an untried system. By requiring banks to disclose their hold policies to customers, I hope that customers will be able to plan their check cashing practices in a way to avoid bouncing checks and to shop around for the bank hold policy that is best for them.

However, I do not think that disclosure alone is enough to encourage banks to shorten their hold practices. I think that they must all utilize a system that will enable drawing banks to notify the paying banks of any problem with a check within a short period of time. Therefore, my bill mandates that financial institutions utilize the standard on "specifications for check endorsements" devised by the American National Standards Institute. Utilization of the standard will eliminate the present obstacles to identification of the paying bank and thus enable the drawing bank to notify the paying bank immediately if an item is not honored. To insure that such notification is made in a timely fashion, the bill requires the drawing bank to notify the paying bank within 24 hours of the time that the drawing bank determines that a check of $250 or more is not payable. This cutoff amount was chosen to reduce the burden on banks at the same time that protection is afforded to customers in the most important situations. Finally, to insure customers timely crediting of interest on their deposits, the bill requires depository institutions to begin computing interest on deposits to interest bearing accounts no later than the date on which the institution receives provisional credit for the deposit (the date on which the bank can invest the funds).

Hopefully, with the obstacles to prompt notification eliminated and customers armed with information about bank hold practices, the marketplace will work to reduce dramatically the unreasonably long delays in giving customers access to their deposits.●

By Mr. BOREN:

S. 575. A bill to provide emergency price and income assistance to U.S. farmers so as to assure consumers an adequate supply of food and fiber at reasonable prices, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

EMERGENCY AGRICULTURAL ADJUSTMENT ACT OF 1983

Mr. BOREN. Mr. President, there are some who claim that the recent decline in the unemployment rate indicates that the economic recovery of our Nation has now begun. Despite this recent decline in unemployment, the American economy will never fully recover until agriculture is put back on its feet.

Not since the Great Depression have we seen 3 years of declining net farm income, yet it appears that 1983 will be the fourth year of declining net farm income, an unprecedented statistic. Net farm income for 1982, when adjusted for inflation, is lower than that in the worst year of the Depression—1932. In my own State of Oklahoma, the average net farm income for 1981 was a mere $14 per farm, the lowest in the country. Things are so bad, that on a recent tour of several communities in Oklahoma, I have had farmers ask me, "When am I going to get my $14. I haven't gotten it yet."

The farm income situation is exemplified by the increasing number of farm borrowers who are delinquent in their payments, and the rising number of farm foreclosures. Farm foreclosures have increased dramatically for the first time since the Great Depression. Unless we take drastic action now, it does not appear the situation will be reversed. In most commodities we are facing record supply levels resulting from record crop production and record carryover stocks. Exports

have declined in both volume and value for the first time in 13 years.

Because of the current supply and demand situation, farm prices are reaching levels not seen since the late 1920's. To cause prices received by the farmer to increase, we simply must bring down supplies. Mr. President. If we are ever to bring commodity supplies more in line with demand we need to have more than just a 1 or even a 2 year acreage reduction program. We need a multiyear program that ties production of commodities to demand.

All too often agricultural programs have become no more than a political tool. For example, everyone knew last summer that the 1983 wheat program the Secretary announced would be of no benefit to anyone. Yet, despite this knowledge, this administration fought every attempt to make the program work. Another example of politics can be found in last year's announcement of disaster assistance, essentially only for Texas. In Oklahoma, we suffered under the same conditions, yet we were never able to talk the Department of Agriculture into doing what was simply right.

I do, however, commend the Secretary for finally recognizing the need for a massive acreage reduction. Yet, we would not be in this position today if he would have used his authority long before now. With enactment of the 1981 farm bill—our greatest mistake in recent years—the Secretary was given discretionary authority to do just about anything he wanted. He could have offered a more responsible program in 1982, and, if he had, we might have saved the Government a lot of money. It is almost like putting out a fire—a fireman has only two options. He can either act quickly and aggressively to stop the fire before it has a chance to spread, or he can sit back, wait until the fire is really ablaze and then throw one bucket of water on it.

The point is simply this, Mr. President. It is too late for quick fix programs; the fire has been burning for too long. A 1-year program would not do any real good. We need a multiyear program that will gradually bring supplies down, and once we get them down, we need strong provisions requiring that they stay down. We do not need any more programs that just give the Secretary the authority to have effective programs; we have seen "may" enough. We have to enact a mandate.

Mr. President, the bill I am introducing today will require the Secretary of Agriculture to have effective programs. Further, it will require a multiyear program aimed at bringing supply more in line with demand. I do not pretend to have a corner on the solution to our agricultural problems. But, the one thing I know for a fact is that a 1-year, 1-shot program would not solve any of our problems.

In my opinion, the time for action is now. Within 8 months, Oklahoma farmers will be planting the 1984 wheat crop. They need to start planning now. But, how can they when they are unaware of the program requirements until almost the day they start planting, and in some cases, it is several months after they have already planted their crops?

We do not have time to wait until August. We also do not have time to wait for the export market to pick back up by itself. It is simply imperative that Congress implement an emergency agriculture bill. We do not need to be myopic or narrow minded—we need a comprehensive measure, one that addresses the supply situation, the demand situation, and the immediate needs of our farmers, such as income and credit.

The bill I am introducing today addresses all sides of the problem. I have included a provision to require the Secretary to control the level of production. With regard to exports, I have included the export-PIK, package, introduced last December and again in January by my distinguished colleagues, Senator COCHRAN and Senator HUDDLESTON. This provision has already passed the Senate Agriculture Committee once. On the income side, I have included increases in both the target prices and the loan rates. There are some who think these numbers are too high. I, personally, believe them to be too low, especially when one compares them to the actual cost of production of commodities.

Finally, I am including the FmHA deferral provision and extension of the economic emergency loan program which Senator HUDDLESTON, myself, and many others tried to enact last year and which we have again introduced this year in a separate measure, S. 24, the Emergency Agricultural Credit Act of 1983.

Mr. President, every minute we waste, the American economy, and in particular, the agricultural economy, loses. For the sake of this Nation, we cannot allow the very foundation of this country to collapse. I hope that each of my colleagues will take the time to review the state of agriculture. If you do, I believe you will join me in an effort to stop the destruction of American agriculture as we know it.

I ask unanimous consent that the full text of the bill and a summary of the bill be inserted into the RECORD at the end of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 575

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the Emergency Agricultural Adjustment Act of 1983".

TITLE I—WHEAT

WHEAT LOANS

SEC. 101. Effective for the 1984 and 1985 crops of wheat, section 107B(a) of the Agricultural Act of 1949 (7 U.S.C. 1445b-1(a)) is amended to read as follows:

"(a) The Secretary shall make available to producers loans and purchases for each of the 1984 and 1985 crops of wheat at such level, not less than $4.22 per bushel, as the Secretary determines will maintain the competitive relationship of wheat to other grains in domestic and export markets after taking into consideration the cost of producing wheat, supply and demand conditions, and world prices for wheat.".

WHEAT TARGET PRICES

SEC. 102. Section 107B(b)(1)(C) of the Agricultural Act of 1949 (7 U.S.C. 1445b-1(b)(1)(C)) is amended by striking out "$4.45 per bushel for the 1984 crop, and $4.65 per bushel for the 1985 crop" and inserting in lieu thereof "$4.60 per bushel for the 1984 crop, and $4.75 per bushel for the 1985 crop".

ACREAGE REDUCTION PROGRAM AND PAID DIVERSION FOR THE 1984 AND 1985 CROPS OF WHEAT

SEC. 103. Section 107B(e) of the Agricultural Act of 1949 (7 U.S.C. 1445b-1(e)) is amended by—

(1) in paragraph (1)—

(A) in the first sentence of subparagraph (A), striking out "subparagraph (B)" and inserting in lieu thereof "subparagraphs (B), (C), and (D)"; and

(B) adding at the end thereof new subparagraphs (C) and (D) as follows:

"(C) For the 1984 crop of wheat, the Secretary shall provide for a combination of (i) an acreage limitation program as described under paragraph (2) and (ii) a diversion program as described under paragraph (5) under which, for participating producers, the acreage on the farm planted to wheat for harvest shall be limited to the wheat acreage base for the farm, as determined under paragraph (2) of this subsection, reduced by a total of not less than 30 per centum, consisting of a reduction of 50 per centum of such amount under the acreage limitation program and a reduction of 50 per centum of such amount under the diversion program. As a condition of eligibility for loans, purchases, and payments on the 1984 crop of wheat, the producers on a farm must comply with the terms and conditions of the combined acreage limitation program and diversion program.

"(D) For the 1985 crop of wheat, the Secretary shall provide for an acreage reduction program if the Secretary determines that the total supply of wheat available during the marketing year for the 1985 crop of wheat will, in the absence of such program, exceed by more than 25 per centum the quantity the Secretary estimates will be used domestically and for export during the marketing year for such crop. Under such an acreage reduction program, the Secretary shall provide for a combination of (i) an acreage limitation program as described under paragraph (2) and (ii) a diversion program as described under paragraph (5) under which, for participating producers, the acreage on the farm planted to wheat for harvest shall be limited to the wheat acreage base for the farm, as determined under paragraph (2) of this subsection, reduced by such total percentage as the Secre-

tary determines necessary, such total percentage consisting of a reduction of 50 per centum of such amount (or such greater percentage as the Secretary determines necessary) under the diversion program and a reduction of 50 per centum of such amount (or such lesser percentage as the Secretary determines necessary) under the acreage limitation program. The Secretary shall, in establishing the total percentage of acreage on farms planted to wheat for harvest to be reduced, set the percentage at a level sufficient to ensure that the total supply of wheat available during the marketing year for the 1985 crop of wheat will be no more than 125 per centum of the quantity the Secretary estimates will be used domestically and for export during the marketing year for such crop. As a condition of eligibility for loans, purchases, and payments on the 1985 crop of wheat, the producers on a farm must comply with the terms and conditions of the combined acreage limitation program and diversion program.";

(2) in paragraph (2), inserting immediately after the sixth sentence the following: "Notwithstanding any other provision of this paragraph, for the 1984 and 1985 crop years, the acreage base for any farm for the purpose of determining any reduction required to be made for the 1984 crop or the 1985 crop as the result of a limitation under this subsection shall be the average acreage planted on the farm to wheat for harvest in two of the three crop years immediately preceding the year for which the determination is made. The producer shall have the option of determining which two years will be used for the determination of the average acreage for the farm. For the purpose of the two preceding sentences, acreage planted to wheat for harvest shall include any acreage not planted to wheat for the purpose of participating in any acreage reduction program authorized under this Act, any acreage which the producers were prevented from planting to wheat or other nonconserving crop in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers. The Secretary shall make adjustments to reflect established crop-rotation practices and summer fallowing, and the Secretary may make adjustments to reflect such other factors as he determines should be considered in determining a fair and equitable base. Where practicable, the Secretary may allow the consolidation of base acreages among farms to encourage participation in acreage reduction programs.";

(3) in paragraph (4), inserting immediately after the second sentence the following: "Notwithstanding any other provision of this paragraph, the Secretary shall permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to hay and grazing."; and

(4) in paragraph (5)—

(A) in the first sentence, striking out "The Secretary may" and inserting in lieu thereof: "Except as otherwise provided in this paragraph for the 1983, 1984, and 1985 crops of wheat, the Secretary may"; and

(B) adding at the end thereof the following: "Notwithstanding the foregoing provisions of this paragraph, the Secretary shall implement a land diversion payment program for the 1984 crop of wheat under which the Secretary shall make crop retirement and conservation payments to any producer of the 1984 crop of wheat whose farm acreage planted to wheat for harvest is reduced so that it does not exceed the wheat acreage base for the farm less an amount equivalent to 15 per centum of the wheat acreage base (or such greater percentage as the Secretary may prescribe) in addition to the reduction under the acreage limitation program for the crop under paragraph (2) of this subsection, and the producer devotes to approved conservation uses an acreage of cropland equivalent to the reduction from the wheat acreage base required under this sentence. Such payments shall be made in an amount computed by multiplying (i) the diversion payment rate, by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under the preceding sentence. The diversion payment rate shall be established by the Secretary at not less than $3.25 per bushel. The Secretary shall, upon the request of a participating producer, make all or any part of the diversion payment available to the producer in commodities rather than in cash: *Provided,* That, if Commodity Credit Corporation stocks of wheat are not readily available to effect full payment in kind to a producer participating in the program, the Secretary may substitute fully or partially payment in cash for payment in kind. If payment in kind is made as provided in this paragraph, such payments shall be made in an amount computed by multiplying (i) 80 per centum (or such greater percentage as the Secretary may prescribe) of the farm program payment yield for the crop by (ii) the additional acreage diverted under this paragraph. For the 1985 crop of wheat, if the Secretary determines that an acreage reduction program will be required, as provided in paragraph (1)(D) of this subsection, notwithstanding the foregoing provisions of this paragraph, the Secretary shall implement a land diversion payment program for the 1985 crop of wheat under which the Secretary shall make crop retirement and conservation payments to any producer of the 1985 crop of wheat whose farm acreage planted to wheat for harvest is reduced so that it does not exceed the wheat acreage base for the farm less that per centum of the wheat acreage base that is equal to 50 per centum (or such greater percentage as the Secretary may prescribe) of the overall reduction in acreage planted to wheat required under the acreage reduction program, as provided under paragraph (1)(D) of this subsection, in addition to the reduction under the acreage limitation program for the crop under paragraph (2) of this subsection, and the producer devotes to approved conservation uses an acreage of cropland equivalent to the reduction from the wheat acreage base required under this sentence. Such payments shall be made in an amount computed by multiplying (i) the diversion payment rate, by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under the preceding sentence. The diversion payment rate shall be established by the Secretary at not less than $3.25 per bushel. The Secretary shall, upon the request of a participating producer, make all or any part of the diversion payment available to the producer in commodities rather than in cash: *Provided,* That, if Commodity Credit Corporation stocks of wheat are not readily available to effect full payment in kind to a producer participating in the program, the Secretary may substitute fully or partially, payment in cash for payment in kind. If payment in kind is made as provided in this paragraph, such payments shall be in an amount computed by multiplying (i) 80 per centum (or such greater percentage as the Secretary may prescribe) of the farm program payment yield for the crop by (ii) the additional acreage diverted under this paragraph. Notwithstanding any other provision of law, in cases where a producer practices double cropping, and where participation in this program for one commodity reduces the acreage that may be planted to the second commodity, the Secretary shall make equitable adjustments in the payment made under this section to account for the reduction in the second commodity.".

WHEAT DISASTER PAYMENTS

SEC. 104. Effective on enactment through the end of the 1985 crops, Section 107(B)(2) of the Agricultural Act of 1949 (7 U.S.C. 1445b-1(b)(2)) is amended by—

(1) in subparagraph (A), in the first sentence striking out "Except as provided in subparagraph (C) of this paragraph, if" and inserting in lieu thereof "If";

(2) in subparagraph (C) inserting "reduced yield" immediately before "disaster payments"; and

(3) in subparagraph (D)—

(A) inserting "reducing yield" immediately before "disaster payments"; and

(B) in clause (i), striking out "either from being prevented from planting wheat or nonconserving crop or".

TITLE II—FEED GRAINS

FEED GRAIN LOANS

SEC. 201. Effective for the 1984 and 1985 crops of feed grains, section 105B(a)(1) of the Agricultural Act of 1949 (7 U.S.C. 1444d(a)(1)) is amended to read as follows:

"(a) The Secretry shall make available to producers loans and purchasers for each of the 1984 and 1985 crops of corn at such level, not less than $2.84 per bushel, as the Secretary determines will encourage the exportation of feed grains and not result in excessive total stocks of feed grains after taking into consideration the cost of producing corn, supply and demand conditions, and world prices for corn.".

FEED GRAIN TARGET PRICES

SEC. 202. Section 105(b)(1)(C) of the Agricultural Act of 1949 (7 U.S.C. 1444d(b)(1)(C)) is amended by striking out "$3.03 per bushel for the 1984 crop, and $3.18 per bushel for the 1985 crop" and inserting in lieu thereof "$3.08 per bushel for the 1984 crop, and $3.23 per bushel for the 1985 crop".

ACREAGE REDUCTION PROGRAM AND PAID DIVERSION FOR THE 1984 AND 1985 CROPS OF FEED GRAINS

SEC. 203. Section 105B(e) of the Agricultural Act of 1949 (7 U.S.C. 1444d(e)) is amended by—

(1) in paragraph (1)—

(A) in the first sentence of subparagraph (A), striking out "subparagraph (B)" and inserting in lieu thereof "subparagraphs (B), (C), and (D)"; and

(B) adding at the end thereof new subparagraphs (C) and (D) as follows:

"(C) For the 1984 crop of feed grains, the Secretary shall provide for a combination of (i) an acreage limitation program as described under paragraph (2) and (ii) a diversion program as described under paragraph (5) under which, for participating producers, the acreage on the farm planted to feed grains for harvest shall be limited to the feed grain acreage base for the farm, as determined under paragraph (2) of this subsection, reduced by a total of not less than 20 per centum, consisting of a reduction of 50 per centum of such amount under the

acreage limitation program and a reduction of 50 per centum of such amount under the diversion program. As a condition of eligibility for loans, purchases, and payments on the 1984 crop of feed grains, the producers on a farm must comply with the terms and conditions of the combined acreage limitation program and diversion program.

"(D) For the 1985 crop of feed grains, the Secretary shall provide for an acreage reduction program if the Secretary determines that the total supply of feed grains available during the marketing year for the 1985 crop of feed grains will, in the absence of such program, exceed by more than 25 per centum the quantity the Secretary estimates will be used domestically and for export during the marketing year for such crop. Under such an acreage reduction program, the Sercretary shall provide for a combination of (i) an acreage limitation program as described under paragraph (2) and (ii) a diversion program as described under paragraph (5) under which, for participating producers, the acreage on the farm planted to feed grains for harvest shall be limited to the feed grain acreage base for the farm, as determined under paragraph (2) of this subsection, reduced by such total percentage as the Secretary determines necessary, such total percentage consisting of a reduction of 50 per centum of such amount (or such greater percentage as the Secretary determines necessary) under the diversion program and a reduction of 50 per centum of such amount (or such lesser percentage as the Secretary determines necessary) under the acreage limitation program. The Secretary shall, in establishing the total percentage of acreage on farms planted to feed grains for harvest to be reduced, set the percentage at a level sufficient to ensure that the total supply of feed grains available during the marketing year for the 1985 crop of feed grains available during the marketing year for the 1985 crop of feed grains will be no more than 125 per centum of the quantity the Secretary estimates will be used domestically and for export during the marketing year for such crop. As a condition of eligibility for loans, purchases, and payments on the 1985 crop of feed grains, the producers on a farm must comply with the terms and conditions of the combined acreage limitation program and diversion program.";

(2) in paragraph (2), inserting immediately after the seventh sentence the following: "Notwithstanding any other provision of this paragraph, for the 1984 and 1985 crops, the acreage base for any farm for the purpose of determining any reduction required to be made for the 1984 crop or the 1985 crop as the result of a limitation under this subsection shall be the average acreage planted on the farm to feed grains for harvest in two of the three crop years immediately preceding the year for which the determination is made. The producer shall have the option of determining which two years will be used for the determination of the average acreage for the farm. For the purpose of the two preceding sentences, acreage planted on the farm to feed grains for harvest shall include any acreage not planted to feed grains for the purpose of participating in any acreage reduction program authorized under this Act, any acreage which the producers were prevented from planting to feed grains or other nonconserving crop in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers. The Secretary shall make adjustments to reflect established crop-rotation practices and the Secretary may make adjustments to reflect such other factors as he determines should be considered in determining a fair and equitable base. Where practicable, the Secretary may allow the consolidation of base acreages among farms to encourage participation in acreage reduction programs.";

(3) in paragraph 4, inserting immediately after the second sentence the following: "Notwithstanding any other provision of this paragraph, the Secretary shall permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to hay and grazing."; and

(4) in paragraph (5)—

(A) in the first sentence, striking out "The Secretary may" and inserting in lieu thereof "Except as otherwise provided in this paragraph for the 1983 and 1984 crops of feed grains, the Secretary may"; and

(B) adding at the end thereof the following: "Notwithstanding the foregoing provisions of this paragraph, the Secretary shall implement a land diversion payment program for the 1984 crop of feed grains under which the Secretary shall make crop retirement and conservation payments to any producer of the 1984 crop of feed grains whose farm acreage planted to feed grains for harvest is reduced so that it does not exceed the feed grain acreage base for the farm less an amount equivalent to 10 per centum of the feed grain acreage base (or such greater percentage as the Secretary may prescribe) in addition to the reduction under the acreage limitation program for the crop under paragraph (2) of this subsection, and the producer devotes to approved conservation uses an acreage of cropland equivalent to the reduction from the feed grain acreage base required under this sentence. Such payments shall be made in an amount computed by multiplying (i) the diversion payment rate, by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under the preceding sentence. The diversion payment rate shall be established by the Secretary at not less than $2.00 per bushel for corn. The payment rate for grain sorghums, oats, and barley shall be such rate as the Secretary determines is fair and reasonable in relation to the rate at which payments are made available for corn. The Secretary shall, upon the request of a participating producer, make all or any part of the diversion payment available to the producer in commodities rather than in cash: *Provided*, That, if Commodity Credit Corporation stocks of feed grains are not readily available to effect full payment in kind to a producer participating in the program, the Secretary may substitute, fully or partially, payment in cash for payment in kind. If payment in kind is made as provided in this paragraph, such payments shall be made in an amount computed by multiplying (i) 80 per centum (or such greater percentage as the Secretary may prescribe) of the farm program payment yield for the crop by (ii) the additional acreage diverted under this paragraph. For the 1985 crop of feed grains, if the Secretary determines that an acreage reduction program will be required, as provided in paragraph (1)(D) of this subsection, notwithstanding the foregoing provisions of this paragraph, the Secretary shall implement a land diversion payment program for the 1985 crop of feed grains under which the Secretary shall make crop retirement and conservation payments to any producer of the 1985 crop of feed grains whose farm acreage planted to feed grains for harvest is reduced so that it does not exceed the feed grains acreage base for the farm less that per centum of the feed grains acreage base that is equal to 50 per centum (or such greater percentage as the Secretary may prescribe) of the overall reduction in acreage planted to feed grains required under the acreage reduction program, as provided under paragraph (1)(D) of this subsection, in addition to the reduction under the acreage limitation program for the crop under paragraph (2) of this subsection, and the producer devotes to approved conservation uses an acreage of cropland equivalent to the reduction from the feed grains acreage base required under this sentence. Such payments shall be made in an amount computed by multiplying (i) the diversion payment rate, (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under the preceding sentence. The diversion payment rate shall be established by the Secretary at not less than $3.25 per bushel. The Secretary shall, upon the request of a participating producer, make all or any part of the diversion payment available to the producer in commodities rather than in cash: *Provided*, That, if the Commodity Credit Corporation stocks of feed grains are not readily available to effect full payment in kind to a producer participating in the program, the Secretary may substitute fully or partially, payment in cash for payment in kind. If payment in kind is made as provided in this paragraph, such payments shall be in an amount computed by multiplying (i) 80 per centum (or such greater percentage as the Secretary may prescribe) of the farm program payment yield for the crop by (ii) the additional acreage diverted under this paragraph. Notwithstanding any other provision of law, in cases where a producer practices double cropping, and where participation in this program for one commodity reduces the acreage that may be planted to the second commodity, the Secretary shall make equitable adjustment in the payment made under this section to account for the reduction in the second commodity."; and

(5) inserting at the end thereof the following: Notwithstanding any other provision of law, for the 1984 and 1985 crops of feed grains the terms fed grains shall include corn, grain sorghum, barley and oats for the purpose of this subsection.".

FEED GRAIN DISASTER PAYMENTS

SEC. 204. Effective on enactment through the end of the 1985 crops, section 105B(b)(2) of the Agricultural Act of 1949 (7 U.S.C. 1444d(b)(2)) is amended by—

(1) in subparagraph (A), in the first sentence, striking out "except as provided in subparagraph (C) of this paragraph, if" and inserting in lieu thereof "IF";

(2) in subparagraph (C), inserting "reduced yield" immediately before "disaster payments"; and

(3) in subparagraph (D)—

(A) inserting "reduced yield" immediately before "disaster payments"; and

(B) in clause (i), striking out "either from being prevented from planting feed grains or other nonconserving crop or".

TITLE III—UPLAND COTTON

UPLAND COTTON LOANS

SEC. 301. The second sentence of section 103(g)(1) of the Agricultural Act of 1949 (7 U.S.C. 1444(g)(1)) is amended by inserting immediately before the period at the end

thereof "for the 1982 and 1983 crops and not less than 70 cents per pound for the 1984 and 1985 crops.".

UPLAND COTTON TARGET PRICES

SEC. 302. Section 103(g)(3)(B) of the Agricultural Act of 1949 (7 U.S.C. 1444(g)(3)B)) is amended by striking out "$0.81 per pound for the 1984 crop, and $0.86 per pound for the 1985 crop" and inserting in lieu thereof "$0.83 per pound for the 1984 crop, and $0.88 per pound for the 1985 crop".

ACREAGE REDUCTION PROGRAM AND PAID DIVERSION FOR THE 1984 AND 1985 CROPS OF UPLAND COTTON

SEC. 303. Section 103(g)(9) of the Agricultural Act of 1949 (7 U.S.C. 1444(g)(9)) is amended by—

(1) in subparagraph (A) by—

(A) in the first sentence, striking out "Notwithstanding any other provision of this subsection" and inserting in lieu thereof "Notwithstanding any other provision of law, except as provided in the second through seventh sentences of this paragraph";

(B) inserting immediately after the first sentence the following: "For the 1984 crop of upland cotton, the Secretary shall provide for a combination of (i) an acreage limitation program as described under this subparagraph and (ii) a diversion program as described under subparagraph (B) of this paragraph under which, for participating producers, the acreage on the farm planted to upland cotton for harvest shall be limited to the upland cotton acreage base for the farm reduced by a total of not less than 20 per centum, consisting of a reduction of 50 per centum of such amount under the acreage limitation program and a reduction of 50 per centum of such amount under the diversion program. As a condition of eligibility for loans and payments on the 1984 crop of upland cotton, the producers on a farm must comply with the terms and conditions of the combined acreage limnitation program and diversion program. For the 1985 crop of upland cotton, the Secretary shall provide for an acreage reduction program if the Secretary determines that the total supply of upland cotton available during the marketing year for the 1985 crop of upland cotton will, in the absence of such program, exceed by more than 25 per centum the quantity the Secretary estimates will be used domestically and for export during the marketing year for such crop. Under such an acreage reduction program, the Secretary shall provide for a combination of (i) an acreage limitation program as described under this subparagraph and (ii) a diversion program as described under subparagraph (B) of this paragraph under which, for participating producers, the acreage on the farm planted to upland cotton for harvest shall be limited to the upland cotton acreage base for the farm, as determined under this subparagraph, reduced by such total percentage as the Secretary determines necessary, such total percentage consisting of a reduction of 50 per centum of such amount (or such greater percentage as the Secretary determines necessary) under the diversion program and a reduction of 50 per centum of such amount (or such lesser percentage as the Secretary determines necessary) under the acreage limitation program. The Secretary shall, in establishing the total percentage of acreage on farms planted to upland cotton for harvest to be reduced, set the percentage at a level sufficient to ensure that the total supply of upland cotton available during the marketing year for the 1985 crop of upland cotton will be no more than 125 per centum of the quantity the Secretary estimates will be used domestically and for export during the marketing year for such crop. As a condition of eligibility for loans and payments on the 1985 crop of upland cotton, the producers on a farm must comply with the terms and conditions of the combined acreage limitation program and diversion program.";

(C) inserting immediately after the sixth sentence the following: "Notwithstanding any other provision of this paragraph, the acreage base for any farm for the purpose of determining any reduction required to be made for the 1984 crop or the 1985 crop as the result of a limitation under this subsection shall be the average acreage planted on the farm to upland cotton for harvest in two of the three crop years immediately preceding the year for which the determination is made. The producer shall have the option of determining which two years will be used for the determination of the average acreage for the farm. For the purpose of the two preceding sentences, acreage planted to upland cotton for harvest shall include any acreage not planted to upland cotton for the purpose of participating in any acreage reduction program authorized under this Act, any acreage which the producers were prevented from planting to upland cotton on other nonconserving crop in lieu of upland cotton because of drought, flood, or other natural disaster, or other condition beyond the control of the producers. The Secretary shall make adjustments to reflect established crop-rotation practices and the Secretary may make adjustments to reflect such other factors as he determines should be considered in determining a fair and equitable base. Where practicable, the Secretary may allow the consolidation of base acreages among farms to encourage participation in acreage reduction programs.";

(D) inserting immediately after the ninth sentence the following: "Notwithstanding any other provision of this subparagraph the Secretary shall permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to hay and grazing."; and

(2) in subparagraph (B)—

(A) in the first sentence, striking out "The Secretary may" and inserting in lieu thereof "Except as otherwise provided in this subparagraph for the 1984 crop of upland cotton, the Secretary may"; and

(B) adding at the end thereof the following: "Notwithstanding the foregoing provisions of this subparagraph, the Secretary shall implement a land diversion payment program for the 1984 crop of upland cotton under which the Secretary shall make crop retirement and conservation payments to any producer of the 1984 crop of upland cotton whose farm acreage planted to upland cotton for harvest is reduced so that it does not exceed the upland cotton acreage base for the farm less an amount equivalent to 10 per centum of the upland cotton acreage base (or such greater percentage as the Secretary may prescribe) in addition to the reduction made under the acreage limitation program for the crop under subparagraph (A) of this paragraph, and the producer devotes to approved conservation uses an acreage of cropland equivalent to the reduction from the upland cotton acreage base required under this sentence. Such payments shall be made in an amount computed by multiplying (i) the diversion payment rate, by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under the preceding sentence. The diversion payment rate shall be established by the Secretary at not less than 30 cents per pound. The Secretary shall, upon the request of a participating producer, make all or any part of the diversion payment available to the producers in commodities rather than in cash: *Provided*, That, if Commodity Credit Corporation stocks of upland cotton are not readily available to effect full payment in kind to a producer participating in the program, the Secretary may substitute, fully or partially, payment in cash for payment in kind. If payment in kind is made as provided in this subparagraph, such payments shall be made in an amount computed by multiplying (i) 80 per centum (or such greater percentage as the Secretary may prescribe) of the farm program payment yield for the crop by (ii) the additional acreage diverted under this subparagraph. For the 1985 crop of upland cotton, if the Secretary determines that an acreage reduction program will be required, as provided in subparagraph (A) of this paragraph, notwithstanding the foregoing provisions of this subparagraph, the Secretary shall implement a land diversion payment program for the 1985 crop of upland cotton under which the Secretary shall make crop retirement and conservation payments to any producer of the 1985 crop of upland cotton whose farm acreage planted to upland cotton for harvest is reduced so that it does not exceed the upland cotton acreage base for the farm less that per centum of the upland cotton acreage base that is equal to 50 per centum (or such greater percentage as the Secretary may prescribe) of the overall reduction in acreage planted to upland cotton required under the acreage reduction program in addition to the reduction under the acreage limitation program for the crop under subparagraph (A) of this paragraph, and the producer devotes to approved conservation uses an acreage of cropland equivalent to the reduction from the upland cotton acreage required under this sentence. Such payments shall be made in an amount computed by multiplying (i) the diversion payment rate, by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under the preceding sentence. The diversion payment rate shall be established by the Secretary at not less than 30 cents per pound. The Secretary shall, upon the request of a participating producer, make all or any part of the diversion payment available to the producers in commodities rather than in cash: *Provided*, That, if Commodity Credit Corporation stocks of upland cotton are not readily available to effect full payment in kind to a producer participating in the program, the Secretary may substitute, fully or partially, payment in cash for payment in kind. If payment in kind is made as provided in this subparagraph, such payments shall be made in an amount computed by multiplying (i) 80 per centum (or such greater percentage as the Secretary may prescribe) of the farm program payment yield for the crop by (ii) the additional acreage diverted under this subparagraph. Notwithstanding any other provision of law, in cases where a producer practices double cropping, and where participation in this program for one commodity reduces the acreage that may be planted to the second commodity, the Secretary shall make equitable adjustments in the payments made under this section to account for the reduction in the second commodity.".

UPLAND COTTON DISASTER PAYMENTS

SEC. 304. Effective on enactment through the end of the 1985 crops, section 103(g)(4) of the Agricultural Act of 1949 (7 U.S.C. 1444(g)(4)) is amended by—

(1) in subparagraph (A), in the first sentence, striking out "Except as provided in subparagraph (C), if" and inserting in lieu thereof "If";

(2) in subparagraph (C), inserting "reduced yield" immediately before "disaster payments"; and

(3) in subparagraph (D)—

(A) inserting "reduced yield" immediately before "disaster payments"; and

(B) in clause (i), striking out "either from being prevented from planting cotton or other nonconserving crop or".

TITLE IV—RICE

RICE LOANS

SEC. 401. The second sentence of section 101(i)(1) of the Agricultural Act of 1949 (7 U.S.C. 1441(i)(1)) is amended by striking out "$8 per hundredweight" and inserting in lieu thereof "$8 per hundredweight for the 1982 and 1983 crops and not less than $8.60 per hundredweight for the 1984 and 1985 crops".

RICE TARGET PRICES

SEC. 402. Section 101(i)(2)(C) of the Agricultural Act of 1949 (7 U.S.C. 1441(i)(2)(C)) is amended by striking out "$11.90 per hundredweight for the 1984 crop, and $12.40 per hundredweight for the 1985 crop" and inserting in lieu thereof "$11.94 per hundredweight for the 1984 crop, and $12.43 per hundredweight for the 1985 crop".

ACREAGE REDUCTION PROGRAM AND PAID DIVERSION FOR THE 1984 AND 1985 CROPS OF RICE

SEC. 403. Section 101(i)(5) of the Agricultural Act of 1949 (7 U.S.C. 1441(i)(5)) is amended by—

(1) in subparagraph (A)—

(A) in the first sentence, striking out "third and fourth sentences" and inserting in lieu thereof "third through tenth sentences";

(B) inserting immediately after the fourth sentence the following: "For the 1984 crop of rice, the Secretary shall provide for a combination of (i) an acreage limitation program as described under this subparagraph and (ii) a paid diversion program as described under subparagraph (B) of this paragraph under which, for participating producers, the acreage on the farm planted to rice for harvest shall be limited to the rice acreage base for the farm reduced by a total of not less than 20 per centum, consisting of a reduction of 50 per centum of such amount under the acreage limitation program and a reduction of 50 per centum of such amount under the diversion program. As a condition of eligibility for loans and payments on the 1984 crop of rice, the producers on a farm must comply with the terms and conditions of the combined acreage limitation program and diversion program. For the 1985 crop of rice, the Secretary shall provide for an acreage reduction program if the Secretary determines that the total supply of rice available during the marketing year for the 1985 crop of rice will, in the absence of such program, exceed by more than 25 per centum the quantity the Secretary estimates will be used domestically and for export during the marketing year for such crop. Under such an acreage reduction program, the Secretary shall provide for a combination of (i) an acreage limitation program as described under this subparagraph and (ii) a diversion program as described under subparagraph (B) of this paragraph under which, for participating producers, the acreage on the farm planted to rice for harvest shall be limited to the rice acreage base for the farm, as determined under this subparagraph, reduced by such total percentage as the Secretary determines necessary, such total percentage consisting of a reduction of 50 per centum of such amount (or such greater percentage as the Secretary determines necessary) under the diversion program and a reduction of 50 per centum of such amount (or such lesser percentage as the Secretary determines necessary) under the acreage limitation program. The Secretary shall, in establishing the total percentage of acreage on farms planted to rice for harvest to be reduced, set the percentage at a level sufficient to ensure that the total supply of rice available during the marketing year for the 1985 crop of rice will be no more than 125 per centum of the quantity the Secretary estimates will be used domestically and for export during the marketing year for such crop. As a condition of eligibility for loans and payments on the 1985 crop of rice, the producers on a farm must comply with the terms and conditions of the combined acreage limitation program and diversion program."; and

(C) inserting immediately after the tenth sentence the following: "Notwithstanding any other provision of this paragraph, the acreage base for any farm for the purpose of determining any reduction required to be made for the 1984 crop or the 1985 crop as the result of a limitation under this subsection shall be the average acreage planted on the farm to rice for harvest in two of the three crop years immediately preceding the year for which the determination is made. The producer shall have the option of determining which two years will be used for the determination of the average acreage for the farm. For the purpose of the two preceding sentences, acreage planted to rice for harvest shall include any acreage not planted to rice for the purpose of participating in any acreage reduction program authorized under this Act, any acreage which the producers were prevented from planting to rice or other nonconserving crop in lieu of rice because of drought, flood, or other natural disaster, or other condition beyond the control of the producers. The Secretary shall make adjustments to reflect crop-rotation practices and the Secretary may make adjustments to reflect such other factors as he determines should be considered in determining a fair and equitable base. Where practicable, the Secretary may allow the consolidation of base acreages among farms to encourage participation in acreage reduction programs."; and

(D) inserting immediately after the twelfth sentence: "Notwithstanding any other provision of this subparagraph, the Secretary shall permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the reduced acreage to be devoted to hay and grazing."; and

(2) In subparagraph (B)—

(A) in the first sentence, striking out "The Secretary may" and inserting in lieu thereof "Except as otherwise provided in this subparagraph for the 1983, 1984, and 1985 crops of rice, the Secretary may"; and

(B) adding at the end thereof the following:

"Notwithstanding the foregoing provisions of this subparagraph, the Secretary shall implement a land diversion payment program for the 1984 crop of rice under which the Secretary shall make crop retirement and conservation payments to any producer of the 1984 crop of rice whose farm acreage planted to rice for harvest is reduced so that it does not exceed the rice acreage base for the farm less an amount equivalent to 10 per centum of the rice acreage base (or such greater percentage as the Secretary may prescribe) in addition to the reduction required under subparagraph (A) of this paragraph, and the producer devotes to approved conservation uses an acreage of cropland equivalent to the reduction from the rice acreage base required under this sentence. Such payments shall be made in an amount computed by multiplying (i) the diversion payment rate, by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under the preceding sentence. The diversion payment rate shall be established by the Secretary at not less than $3.00 per hundredweight. The Secretary shall, upon the request of a participating producer, make all or any part of the diversion payment available to producers in commodities rather than in cash: *Provided*, That, if Commodity Credit Corporation stocks of rice are not readily available to effect full payment in kind to a producer participating in the program, the Secretary may substitute, fully or partially, payment in cash for payment in kind. If payment in kind is made as provided in this subparagraph, such payments shall be made in an amount computed by multiplying (i) 80 per centum (or such greater percentage as the Secretary may prescribe) of the farm program payment yield for the crop by (ii) the additional acreage diverted under this subparagraph. For the 1985 crop of rice, if the Secretary determines that an acreage reduction program will be required, as provided in subparagraph (A) of this paragraph, notwithstanding the foreign provisions of this subparagraph, the Secretary shall implement at land diversion payment program for the 1985 crop of rice under which the Secretary shall make crop retirement and conservation payments to any producer of the 1985 crop of rice whose farm acreage planted to rice for harvest is reduced so that it does not exceed the rice acreage base for the farm less that per centum of the rice acreage base that is equal to 50 per centum (or such greater percentage as the Secretary may prescribe) of the overall reduction in acreage planted to rice required under the acreage reduction program in addition to the reduction under the acreage limitation program for the crop under subparagrah (A) of this paragraph, and the producer devotes to approved conservation uses an acreage of cropland equivalent to the reduction from the rice acreage base required under this sentence. Such payments shall be made in an amount computed by multiplying (i) the diversion payment rate, by (ii) the farm program payment yield for the crop, by (iii) the additional acreage diverted under the preceding sentence. The diversion payment rate shall be established by the Secretary at not less than $3.00 per hundredweight. The Secretary shall, upon the request of a participating producer, make all or any part of the diversion payment available to producers in commodities rather than in cash: *Provided*, That, if Commodity Credit Corporation stocks of rice are not readily available to effect full payment in kind to a producer participating in the program, the Secretary may substitute, fully or partially, payment in cash for payment in kind. If payment in kind is made as provided in this subpara-

graph, such payments shall be made in an amount computed by multiplying (i) 80 per centum (or such greater percentage as the Secretary may prescribe) of the farm program payment yield for the crop by (ii) the additional acreage diverted under this subparagraph. Notwithstanding any other provision of law, in cases where a producer practices double cropping, and where participation in this program for one commodity reduces the acreage that may be planted to the second commodity, the Secretary shall make equitable adjustments in the payment made under this section to account for the reduction in the second commodity.".

RICE DISASTER PAYMENTS

SEC. 404. Effective on enactment through the end of the 1985 crops, section 101(i)(3) of the Agricultural Act of 1949 (7 U.S.C. 1441(i)(3)) is amended by—

(1) in subparagraph (A), in the first sentence, striking out "Except as provided in subparagraph (C) of this paragraph, if" and inserting in lieu thereof "If";

(2) in subparagraph (C) inserting "reduced yield" before "disaster payments"; and

(3) in subparagraph (D)—

(A) inserting "reduced yield" immediately before "disaster payments"; and

(B) in clause (i), striking out "either from being prevented from planting rice or other nonconserving crop or".

TITLE V—SOYBEANS

SOYBEAN LOANS

SEC. 501. The first sentence of section 201(g)(1) of the Agricultural Act of 1949 (7 U.S.C. 1446(g)(1)) is amended by—

(1) striking out "5.02 per bushel" and inserting in lieu thereof "5.02 per bushel for the 1982 and 1883 marketing years and $5.40 per bushel for the 1984 and 1885 marketing years"; and

(2) striking out ": *Provided,*" and all that follows through the period at the end thereof and inserting in lieu thereof a period.

TITLE VI—SPECIAL PAYMENT-IN-KIND LAND DIVERSION PROGRAM

DEFINITIONS

SEC. 601. As used in this title—

(1) the term "payment-in-kind program" means a program under which special payments in kind are made available to producers who—

(A) divert farm acreage from production of an agricultural commodity under a land diversion program for the 1983, 1984, or 1985 crops of such commodity; and

(B) devote such acreage to conservation uses; and

(2) the term "Secretary" means the Secretary of Agriculture.

MINIMUM VALUE OF COMMODITIES

SEC. 602. Notwithstanding any other provision of law, if the Secretary establishes a payment-in-kind program for a commodity, the Secretary shall take such action as may be necessary, including the making of cash payments, to ensure that the total value of the commodity received by the producer of the commodity is equal, per unit of the commodity, to an amount not less than 90 percent of the basic county loan rate for the commodity (or, if there is no such rate, a rate determined by the Secretary to be comparable to the basic county loan rate).

MINIMUM PAYMENTS

SEC. 603. Notwithstanding any other provision of law, if the Secretary establishes a payment-in-kind program for a commodity, payment under such program shall be in an amount computed by multiplying—

(1) 80 percent (or such greater percentage as the Secretary may prescribe) of the farm program payment yield for the crop; by

(2) the additional acreage diverted under such program.

TITLE VII—ADVANCE PAYMENTS

SEC. 701. Section 107C(b)(1) of the Agricultural Act of 1949 (7 U.S.C. 1445b-2(b)(1)) is amended by striking out "commodity for such crop, the Secretary—" and all that follows down to the period at the end thereof and inserting in lieu thereof "commodity for such crop, the Secretary shall make available, as provided in this section (other than subsection(a)), advance deficiency payments for such crop to producers who agree to participate in such program.".

TITLE VIII—PAYMENT LIMITATION

SEC. 801. Effective for the 1983 through 1985 crops of wheat, feed grains, upland cotton and rice, section 1101 of the Agricultural Act of 1949 (7 U.S.C. 1308) is amended in paragraph (3) by striking out "(excluding land diversion payments)".

TITLE IX—EARLY ANNOUNCEMENT OF PROGRAMS

WHEAT

SEC. 901. Section 107B of the Agricultural Act of 1949 (7 U.S.C. 1445b-1) is amended—

(1) by striking out "August 15" in the second sentence of subsection (c)(1) and inserting in lieu thereof "June 15"; and

(2) by striking out "August 15" in the second sentence of subsection (e)(1)(A), as amended by section 122(1) of the Omnibus Budget Reconciliation Act of 1982, and inserting in lieu thereof "June 15".

FEED GRAINS

SEC. 902. Section 105B of the Agricultural Act of 1949 (7 U.S.C. 1444d) is amended—

(1) by striking out "November 15" in the second sentence of subsection (c)(1) and inserting in lieu thereof "September 15"; and

(2) by striking out "November 15" in the second sentence of subsection (e)(1)(A), as amended by section 124(1) of the Omnibus Budget Reconciliation Act of 1982, and inserting in lieu thereof "September 15".

UPLAND COTTON

SEC. 903. Section 103(g) of the Agricultural Act of 1949 (7 U.S.C. 1444(g)) is amended—

(1) by striking out "November 1" in the fourth sentence of paragraph (1) and inserting in lieu thereof "September 1"; and

(2) by striking out "November 1" in the second sentence of paragraph (5) and inserting in lieu thereof "September 1".

RICE

SEC. 904. Section 101(i) of the Agricultural Act of 1949 (7 U.S.C. 1441(i)) is amended—

(1) by striking out "March 1" in the last sentence of paragraph (1) and inserting in lieu thereof "January 1";

(2) by striking out "January 31 of each calendar year for the crop harvested in that calendar year" in the second sentence of paragraph (4)(A) and inserting in lieu thereof "November 31 of each calendar year preceding the calendar year in which the crop is harvested"; and

(3) by striking out "January 31 of" in the second sentence of paragraph (5)(A) and inserting in lieu thereof "November 31 of the calendar year preceding".

EFFECTIVE DATE

SEC. 905. The amendments made by this title shall apply to the 1984 and 1985 crops of wheat, feed grains, upland cotton, and rice.

TITLE X—SPECIAL SOIL AND WATER CONSERVATION PROGRAM

DEFINITIONS

SEC. 1001. As used in this title—

(1) the term "erosion-prone land" means land classified as Classes IIIe, IVe, VI, VII and VIII under the Land Capability Classification System used by the Soil Conservation Service and upon which cultivated or rotation crops have been grown in three out of the past five years.

(2) the term "Secretary" means the Secretary of Agriculture.

(3) the terms "owner or operator" means the owner or operator of erosion-prone land.

SPECIAL SOIL AND WATER CONSERVATION PROGRAM

SEC. 1002. (a) Notwithstanding any other provision of law, the Secretary may formulate and carry out a program with owners and operators of erosion-prone land to assist such owners or operators to make, in orderly progression, changes in their cropping and land use systems needed to conserve, develop, protect, and use the soil and water resources of their farms, ranches, or other lands and to implement the soil and water conservation measures and practices needed under such changed systems and uses. In assisting such owners and operators, the Secretary shall provide technical and financial assistance for the purpose of carrying out this section. Notwithstanding any other provision of this title, the Secretary may approve contracts covering other than erosion-prone land upon a demonstration by the soil conservation district that a serious soil erosion problem exists on such land.

(b) The Secretary may enter into contracts of not more than ten years for the purpose of carrying out this section. In such contract, the owner or operator shall agree (1) to effectuate a plan approved by a soil conservation district for the farm, ranch, or other land substantially in accordance with the schedule outlined therein unless any requirement thereof is waived or modified by the Secretary; (2) to forfeit all rights to further payments under the contract and refund to the United States all payments, with interest, received thereunder upon his violation of the contract at any stage during the time he has control of the land if the Secretary, after considering the recommendations of the soil conservation district and the Administrator of the Soil Conservation Service, determines that such violation is of such a nature as to warrant termination of the contract, or to make refunds or accept such payment adjustments as the Secretary may deem appropriate if he determines that the violation by the owner or operator does not warrant termination of the contract; (3) upon transfer of his right and interest in the farm, ranch, or other land during the contract period to forfeit all rights to further payments under the contract and refund to the United States all payments received thereunder, unless the transferee of any such land agrees with the Secretary to assume all obligations under the contract; (4) not to adopt any practice specified in the contract by the Secretary as a practice that would tend to defeat the purposes of the contract; and (5) to such additional provisions as the Secretary determines are desirable and are included in the contract to effectuate the purposes of the program or to facilitate the practical administration thereof.

(c) In return for such agreement by the owner or operator, the Secretary shall agree to provide technical assistance and to share the cost of carrying out the land use conver-

sions and conservation measures and practices set forth in the contract for which the Secretary determines that cost sharing is appropriate and in the public interest. The portion of such cost (including labor and maintenance costs) to be shared shall be that part that the Secretary determines is necessary and appropriate to effectuate the installation and maintenance of the conservation plantings and practices for a normally-expected life of such a planting or practice.

(d) Payments made under this section shall be made in accordance with a formula developed by the Secretary. In developing such formula, the Secretary shall take into consideration (1) the costs of establishing and maintaining the agreed-upon conservation measures, plantings, and practices for a normal life span; (2) the severity of the erosion hazard on the land to be converted from cropland to permanent cover; and (3) the willingness of the owner operator, as evidenced in the contract, to apply the conservation measures, specified in the contract, early in the life of the contract and maintain them for their normally-expected life.

(e) Notwithstanding any other provision of law, payments under this section shall be made in cash or in in kind commodities in such amounts as agreed upon and specified in the contract. However, the use of any Commodity Credit Corporation-held commodity in making payment under this section is subject to a finding by the Secretary that payments in kind of such commodity will not displace to any significant degree the usual marketings of such commodity. If the payment is made with in kind commodities, the payments shall be made by delivery by the Commodity Credit Corporation of the commodity involved to the owner or operator at a warehouse or other similar facility located in the county in which the farm, ranch, or other land is located or such other location as agreed to by the Secretary and the owner or operator, by the transfer of negotiable warehouse receipts, or by such other method determined by the Secretary to be appropriate, including sale of the commodity in commercial markets, to enable the owner or operator efficiently and expeditiously to receive possession of the commodity. If Commodity Credit Corporation stocks of the commodity are not readily available to effect full payment in kind to an owner or operator participating in this program, the Secretary may substitute fully or partially payment in cash for payment in kind.

(f) The Secretary shall provide the owner or operator the option to elect to receive payments under this section on a schedule, as outlined in the contract, that provides for a close correlation between the time the costs for conservation measures and practices are incurred by the owner or operator and the time the Secretary makes the payment to the owner or operator. Where appropriate, the Secretary may make payments in advance of the performance of the conservation measures and practices.

(g) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers, including provision for sharing, on a fair and equitable basis, in payments under the program.

(h) The Secretary shall provide by appropriate regulations for preservation of cropland, crop acreage, and allotment history applicable to acreage diverted from the production of crops to establish vegetative cover for the purpose of any Federal program under which such history is used as a basis for an allotment or other limitation or for participation in such program.

(i) The Secretary shall, within 60 days after the enactment of this Act, publish in the Federal Register regulations implementing this title, including the technical definition of ercsion-prone land.

(j) In carrying out the program authorized by this title, the Secretary may use the funds, facilities, and authorities of the Commodity Credit Corporation.

ADDITIONAL AUTHORITY

SEC. 1003. The authority provided by this title shall be in addition to and not in place of other authorities available to the Secretary and the Commodity Credit Corporation for carrying out soil and water conservation programs.

TITLE XI—AGRICULTURAL EXPORT MARKET EXPANSION

SEC. 1101. The Agricultural and Food Act of 1981 is amended by inserting after section 1209 a new section as follows:

"EXPANSION OF UNITED STATES AGRICULTURAL EXPORTS THROUGH THE USE OF COMMODITIES ACQUIRED BY THE COMMODITY CREDIT CORPORATION

"SEC. 1209A. (a) Notwithstanding any other provision of law, the Secretary of Agriculture may formulate and carry out a program under which commodities acquired by the Commodity Credit Corporation are tendered at no cost to United States exporters and processors for export, and foreign purchasers, to encourage development, maintenance, and expansion of markets for United States agricultural commodities and the products thereof.

"(b) In carrying out the program authorized by this section, the Secretary shall—

"(1) take such action as may be necessary to ensure that the program provides equal treatment to domestic and foreign purchasers and users of United States agricultural commodities in any case where the importation into the United States of a manufactured product made, in whole or in part, from a commodity made available for export under this section would place domestic users of the commodity at a competitive disadvantage;

"(2) ensure that any use of Commodity Credit Corporation stocks for the purposes of the program authorized under this section be made in such manner as to encourage increased use, and avoid displacing usual marketings, of United States agricultural commodities and products thereof; and

"(3) take reasonable precautions to prevent the resale or transshipment to other nations, or use for other than domestic use in the nation to which stocks of the Commodity Credit Corporation are shipped, of the stocks of the Commodity Credit Corporation made available to export participants in the program.

"(c) The Secretary of Agriculture shall carry out the program authorized by this section through the Commodity Credit Corporation.

"(d) The Secretary of Agriculture may issue such regulations as the Secretary deems necessary to carry out this section.

"(e) The authority provided under this section shall be in addition to, and not in place of, any authority granted to the Secretary of Agriculture or the Commodity Credit Corporation under any other provision of law.".

EXPANDED AUTHORITY FOR THE DONATION ABROAD OF COMMODITY CREDIT CORPORATION STOCKS

SEC. 1102. Section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431) is amended by striking out the last two sentences and inserting in lieu thereof the following: "Such dairy products and other agricultural commodities and products thereof acquired by the Commodity Credit Corporation also may be donated through foreign governments and public and nonprofit private humanitarian organizations for the assistance of needy persons outside the United States, and the Commodity Credit Corporation may pay, with respect to commodities and products thereof so donated, reprocessing, packaging, transporting, handling, and other charges, including the cost of overseas delivery. To ensure that any such donations for use outside the United States complement, and are coordinated with, other United States foreign assistance, such donations shall be coordinated through the mechanism designated by the President to coordinate assistance under the Agricultural Trade Development and Assistance Act of 1954 and shall be in addition to the level of assistance programmed under that Act. Agricultural commodities and products thereof acquired by the Commodity Credit Corporation may also be used to increase the level of agricultural exports under titles I and III of the Agricultural Trade Development and Assistance Act of 1954 consistent with the purposes of that Act and shall be in addition to the level of assistance programmed under that Act.".

LIMITED USE OF WHEAT IN THE FOOD SECURITY RESERVE FOR THE PURPOSES OF EXPORT DEVELOPMENT

SEC. 1103. (a) Notwithstanding any other provision of law, effective only during the 1983 and 1984 fiscal years, up to 2,000,000 metric tons of wheat available under section 302(a) of the Food Security Wheat Reserve Act of 1980 (7 U.S.C. 1736f-1(a)) may be used for the purpose of the development, maintenance, and expansion of markets for wheat as provided in Section 1209A of the Agriculture and Food Act of 1981: *Provided*, That, if wheat from the reserve is so used, the Secretary of Agriculture shall replenish the reserve with a quantity of wheat, equal to or greater than the quantity of wheat used, pursuant to the provisions of section 302(b) of the Food Security Wheat Reserve Act of 1980, by such date as is practicable, but in no case later than September 30, 1984.

(b) Section 302(b)(2) of the Food Security Wheat Reserve Act of 1980 (7 U.S.C. 1736f-1(b)(2)) is amended by striking out the second sentence.

TITLE XII: AGRICULTURAL CREDIT

LOAN DEFERRALS AND MORATORIUM ON FORECLOSURES

SEC. 1201. Section 331A of the Consolidated Farm and Rural Development Act (7 USC 1981a) is amended by—

(1) inserting the designation "(a)" before the existing text thereof;

(2) in the second sentence, striking out "section" and inserting in lieu thereof "subsection"; and

(3) adding at the end thereof the following new subsections:

"(b) During the period beginning with the date of enactment of this subsection and ending September 30, 1983, the Secretary shall permit, at the request of the borrower, the deferral of principal and interest on any

outstanding loan made, insured, or held by the Secretary for farm ownership purposes under subtitle A of this title, farm operating purposes under subtitle B of this title, or economic emergency purposes under the Emergency Agricultural Credit Adjustment Act of 1978, and shall forgo foreclosure of any such loan, in both cases on a showing by the borrower that the borrower (1) has followed good management practices, (2) due to circumstances beyond the borrower's control, is temporarily unable to continue making payment on such principal and interest when due, and (3) has a reasonable chance of repayment of the loan after the deferral of principal and interest and forgoing of foreclosure. The Secretary shall waive the payment of interest that accrues during the deferral period on any loan deferred under the provisions of this subsection. The provision of this subsection shall be applicable only to borrowers who own or operate family-size farms, as certified by the county committee.

"(c) Upon the expiration of any period of deferral of payment of principal and interest and foregoing of foreclosure by the Secretary under subsection (b) of this section, the Secretary shall make available to the borrower, at the borrower's request, procedures whereby the loan may be consolidated, rescheduled, or reamortized to provide equitable repayment terms consistent with the borrower's farm and financial situation, and any loan so consolidated, rescheduled, or reamortized shall bear interest at a rate not in excess of the rate of interest on the original loan.

"(d) The Secretary shall promulgate regulations that provide (1) for notification of all farm borrowers under this Act and the Emergency Agricultural Credit Adjustment Act of 1978 of the provisions of this section and all other servicing alternatives offered by the Secretary, (2) clear procedures by which borrowers may petition the Secretary for relief under such provisions and alternatives, and (3) for appeal within the Department of Agriculture from a decision that denies relief under such provisions and alternatives.

"(e) Any farm loan deferred, consolidated, rescheduled, or reamortized under any authority of the Secretary under this title other than under subsection (b) and (c) of this section shall, notwithstanding any other provision of this title, bear interest on balance of the original loan and for the term of the original loan at a rate not in excess of the rate of interest on the original loan.".

ECONOMIC EMERGENCY LOAN PROGRAM

SEC. 1202. (a) Section 202 of the Emergency Agricultural Credit Adjustment Act of 1978 (7 U.S.C. prec. 1961 note) is amended by striking out "The Secretary of Agriculture may" and inserting in lieu thereof "The Secretary of Agriculture shall".

(b) Section 211 of the Emergency Agricultural Credit Adjustment Act of 1978 (7 U.S.C. prec. 1961 note) is amended by—

(1) striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1984"; and

(2) immediately after "$600,000,000", inserting a comma and "except that, in fiscal year 1983, such $600,000,000 shall be in addition to the total amount of money borrowed under contracts of guarantee entered into under the authorization provided in the Act of December 18, 1982 (Public Law 97-370, 96 Stat. 1799)".

TITLE XIII: PRODUCER RESERVE PROGRAM FOR WHEAT AND FEED GRAINS

LOAN RATES

SEC. 1301. The second sentence of section 110(b) of the Agricultural Act of 1949 (7 U.S.C. 1445e(b)) is amended by striking out "not be less" and inserting in lieu thereof "at least 5 percent greater".

IMMEDIATE ENTRY FOR THE 1983 THROUGH 1985 CROPS

SEC. 1302. Section 110(e) of the Agricultural Act of 1949 (7 U.S.C. 1445e(e)) is amended by inserting at the end thereof the following: "Notwithstanding any other provision of law, if the Secretary determines that a producer reserve program, as authorized in this section, will be offered for the 1983, 1984, or 1985 crops of wheat or feed grains, the Secretary shall provide for the entry of the commodity for each of such crops under the producer reserve program no later than the beginning of the marketing year for each of such crops.".

SUMMARY OF THE EMERGENCY AGRICULTURAL ADJUSTMENT ACT OF 1983

TITLE I: WHEAT

1. Establishes the minimum loan rate for the 1984 and 1985 crops at not less than $4.22 per bushel.

2. Establishes the target price for 1984 at $4.60 per bushel and for 1985 at $4.75 per bushel.

3. (a) Requires the Secretary of Agriculture to establish a minimum 30 percent acreage reduction, for 1984, consisting of a 15 percent acreage limitation program and a 15 percent paid land diversion program. Payment rate will be set at no less than $3.25 per bushel, or at the option of the producer, payment in kind at no less than 80 percent of the farm program yield.

(b) If the Secretary determines that total supply during the 1985 marketing year will exceed 125 percent of estimated domestic and export use during the marketing year, the Secretary will be required to offer an acreage reduction program at a level sufficient to bring total supply to a level that does not exceed 125 percent of domestic and export use. The acreage reduction program must be a combination of an acreage limitation program and a paid land diversion program. The percentage of paid diversion must be no less than 50 percent of the overall reduction. Payments shall be the same as for 1984.

(c) Provides that the acreage base for the 1984 and 1985 crops shall be the average of two of the three preceding years. The producer would have the option of determining which of the two years he wanted to use as his base. The Secretary would have the authority to consolidate bases for the purpose of encouraging participation in the program. Acreage that is reduced as part of an acreage reduction program shall be considered as part of the wheat acreage base.

(d) Requires the Secretary to permit hay and grazing on the reduced acreage, subject to such terms and conditions the Secretary may prescribe.

(e) Provides that adjustments be made in the payments for those producers who practice double cropping and where participation in the 1984 or 1985 program for wheat, reduces the acreage that may be planted to another commodity.

4. Requires the Secretary to provide disaster assistance for prevented plantings.

TITLE II: FEED GRAINS

1. Establishes the minimum loan rate for the 1984 and 1985 crops at not less than $2.84 per bushel.

2. Establishes the target price for 1984 at $3.08 per bushel and for 1985 at $3.23 per bushel.

3. (a) Requires the Secretary to establish a minimum 20 percent acreage reduction program, for 1984, consisting of a 10 percent acreage limitation program and a 15 percent paid land diversion program. Payment rate will be set at no less than $2.00 per bushel, or at the option of the producer, payment in kind at no less than 80 percent of the farm program yield.

(b) If the Secretary determines that total supply during the 1985 marketing year will exceed 125 percent of estimated domestic and export use during the marketing year, the Secretary will be required to offer an acreage reduction program at a level sufficient to bring total supply to a level that does not exceed 125 percent of domestic and export use. The acreage reduction program must be a combination of an acreage limitation program and a paid land diversion program. The percentage of paid diversion must be no less than 50 percent of the overall reduction. Payments shall be the same as for 1984.

(c) Provides that the acreage base for 1984 and 1985 crops shall be the average of two of the three preceding years. The producer would have the option of determining which of the two years he wanted to use as his base. The Secretary would have the authority to consolidate bases for the purposes of encouraging participation in the program. Acreage that is reduced as part of an acreage reduction program shall be considered as part of the feed grain acreage base.

(d) Requires the Secretary to permit hay and grazing on the reduced acreage, subject to such terms and conditions the Secretary may prescribe.

(e) Provides that adjustments be made in the payments for those producers who practice double cropping and where participation in the 1984 or 1985 program for feed grains, reduces the acreage that may be planted to another commodity.

(f) For the purposes of an acreage reduction program, the term "feed grains" shall include: corn, grain sorghum, barley, and oats.

4. Requires the Secretary to provide disaster assistance for prevented plantings.

TITLE III: UPLAND COTTON

1. Establishes the minimum loan rate for 1984 and 1985 at not less than 70 cents per pound.

2. Establishes the target price for 1984 at 83 cents per pound and for 1985 at 88 cents per pound.

3. (a) Requires the Secretary of Agriculture to establish a minimum 20 percent acreage reduction, for 1984, consisting of a 10 percent acreage limitation program and a 10 percent paid land diversion program. Payment rate will be set at no less than 30 cents per pound, or at the option of the producer, payment in kind at no less than 80 percent of the farm program yield.

(b) If the Secretary determines that total supply during the 1985 marketing year will exceed 125 percent of estimated domestic and export use during the marketing year, the Secretary will be required to offer an acreage reduction program at a level sufficient to bring total supply to a level that does not exceed 125 percent of domestic and export use. The acreage reduction program

must be a combination of an acreage limitation program and a paid land diversion program. The percentage of paid diversion must be no less than 50 percent of the overall reduction. Payments shall be the same as for 1984.

(c) Provides that the acreage base for the 1984 and 1985 crops shall be the average of two of the three preceding years. The producer would have the option of determining which of the two years he wanted to use as his base. The Secretary would have the authority to consolidate bases for the purpose of encouraging participation in the program. Acreage that is reduced as part of an acreage reduction program shall be considered as part of the upland cotton acreage base.

(d) Requires the Secretary to permit hay and grazing on the reduced acreage, subject to such terms and conditions as the Secretary may prescribe.

(e) Provides that adjustments be made in the payments for those producers who practice double cropping and where participation in the 1984 or 1985 program for upland cotton, reduces the acreage that may be planted to another commodity.

4. Requires the Secretary to provide disaster assistance for prevented plantings.

TITLE IV: RICE

1. Establishes the minimum loan rate for 1984 and 1985 at not less than $8.60 per hundredweight.

2. Establishes the target price for 1984 at $11.94 per hundredweight and for 1985 at $12.43 per hundredweight.

3. (a) Requires the Secretary of Agriculture to establish a minimum 20 percent acreage reduction, for 1984, consisting of a 10 percent acreage limitation program and a 10 percent paid land diversion program. Payment rate will be set at no less than $3.00 per hundredweight or, at the option of the producer, payment in kind at no less than 80 percent of the farm yield.

(b) If the Secretary determines that total supply during the 1985 marketing year will exceed 125 percent of estimated domestic and export use during the marketing year, the Secretary will be required to offer an acreage reduction program at a level sufficient to bring total supply to a level that does not exceed 125 percent of domestic and export use. The acreage reduction program must be a combination of an acreage limitation program a paid land diversion program. The percentage of paid land diversion must be no less than 50 percent of the overall reduction. Payments shall be the same as for 1984.

(c) Provides that the acreage base for the 1984 and 1985 crops shall be the average of two of the three preceding years. The producer would have the option of determining which of the two years he wanted to use as his base. The Secretary would have the authority to consolidate bases for the purpose of encouraging participation in the program. Acreage that is reduced as part of an acreage reduction program shall be considered as part of the rice acreage base.

(d) Requires the Secretary to permit hay and grazing on the reduced acreage, subject to such terms and conditions as the Secretary may prescribe.

(e) Provides that adjustments be made in the payments for those producers who practice double cropping and where participation in the 1984 or 1985 program for rice reduces the acreage that may be planted to another commodity.

(4) Requires the Secretary to provide disaster assistance for prevented plantings.

TITLE V: SOYBEANS

Establishes the minimum loan rate for the 1984 and 1985 crops at not less than $5.40 per bushel.

TITLE VI: SPECIAL PAYMENT-IN-KIND LAND DIVERSION PROGRAM

1. Provides that the Secretary must ensure that the minimum value for payment in kind commodities is not less than 90 percent of the basic county loan rate for the commodity if the Secretary uses such commodities in a land diversion program.

2. Provides that payment in kind commodities used as payment for land diversion programs must be based upon no less than 80 percent of the farm program yield.

TITLE VII: ADVANCE PAYMENTS

Requires the Secretary of Agriculture to make a portion of the projected deficiency payments in advance to farmers who agree to participate in acreage reduction programs.

TITLE VIII: PAYMENT LIMITATION

Excludes diversion payments from the payment limitation of $50,000 for the 1983 through 1985 crops of wheat, feed grains, upland cotton and rice.

TITLE IX: EARLY ANNOUNCEMENT OF PROGRAMS

Requires the Secretary of Agriculture to announce the national program acreages and acreage reduction programs for wheat, feed grains, upland cotton, and rice no later than the following dates: for wheat—June 15; for feed grains—September 15; for upland cotton—September 1; and for rice—November 1.

TITLE X: SPECIAL SOIL AND WATER CONSERVATION PROGRAM

Provides the authority for a soil and water conservation program that would provide incentives for farmers and ranchers to convert erosion-prone land from cultivated crops to permanent cover. Under the program, the Secretary would be required to share the cost of implementing the conservation measures and practices needed for the program. The portion of the costs to be shared will be determined by the Secretary and agreed to by the owner or operator of the land. Payments could be made in either cash or in kind commodities, provided that the Secretary determines that the use of such commodities will not significantly displace normal marketings of such commodities. Requires the Secretary to give the owner or operator the option to elect to receive payments on a schedule, outlined in the contract and further authorizes the Secretary to make payments in advance of the performance of the conservation measures and practices. Requires the Secretary to provide adequate safeguards to protect the interests of tenants and sharecroppers. Requires the Secretary to preserve the cropland, crop acreage, and allotment history of the land. Requires the Secretary to publish in the Federal Register the regulations to implement the program, including the technical definition of erosion-prone land.

TITLE XI: AGRICULTURAL EXPORT MARKET EXPANSION

1. Authorizes the Secretary to establish an export expansion program under which CCC commodities may be tendered at no cost to U.S. exporters and processors for export, and foreign market development for U.S. commodities and products.

2. Expands current authority in section 416 of the Agricultural Act of 1949 (to donate stocks of dairy products to needy persons in foreign countries) to include other agricultural commodities and products thereof acquired by CCC, and authorizes the use of CCC commodities under titles I and III of P.L. 480, in addition to programmed levels.

3. Authorizes the Secretary to borrow up to 2 million metric tons of wheat from the Food Security Wheat Reserve for the purpose of expanding markets, provided that the Reserve is replenished by September 30, 1984.

TITLE XII: AGRICULTURAL CREDIT

1. (a) Provides for deferrals and foregoing of foreclosure for Farmers Home Administration borrowers who (1) have followed good management practices, (2) due to circumstances beyond their control, are temporarily unable to continue making payment on such principal and interest when due, and (3) have a reasonable chance of repayment of the loan after the deferral period.

(b) Provides for rescheduling, consolidating, or reamortizing loans at the original or current interest rate, whichever is lower.

(c) Requires the Secretary to notify all borrowers of their options.

2. Extends the Economic Emergency loan program and requires that the Secretary make it available to borrowers.

TITLE XIII: PRODUCER RESERVE PROGRAM FOR WHEAT AND FEED GRAINS

1. Requires that the reserve loan be 5 percent greater than the basic loan rate for the commodity.

2. Requires the Secretary to allow for the entry of a commodity under the reserve program no later than the beginning of the marketing year for the commodity, if a reserve program is in effect for any of the 1983 through 1985 crops.

By Mr. DOLE (by request):

S. 576. A bill to provide for perspective payment rates under medicare for inpatient hospital services, and for other purposes; to the Committee on Finance.

MEDICARE PROSPECTIVE PAYMENT RATES ACT

● Mr. DOLE. Mr. President, the Senator from Kansas is pleased to introduce today by request, the administration's proposed legislation to reform the way in which medicare reimburses hospitals.

This legislation, as my colleagues are aware, is the result of congressional action last year requiring the Secretary of the Department of Health and Human Services to develop, in consultation with the Senate Committee on Finance and the House Committee on Ways and Means, a medicare prospective payment proposal for hospitals, skilled nursing facilities, and to the extent feasible, other providers. The Secretary complied with this request in part, and forwarded to the Congress a report describing an approach for reforming the hospital reimbursement system under medicare. This legislation is a result of that report.

The Senator from Kansas is looking forward to consideration of this legislation. Clearly, cost-based reimbursement is a system whose time has come and gone. We need to move toward a system where institutions have some incentives to become efficient while

still providing quality care. Prospective payment holds out that promise.

There are clearly differences between institutions, legitimate differences that must be accounted for in any payment system. But that does not necessarily argue for maintaining the status quo. It argues for seeking out ways to identify those differences and adjust for them. The subcommittee on health of the Finance Committee has just completed a series of hearings on the administration's report. It was evident throughout these hearings that the large majority of witnesses was very supportive of the concept of prospective payment. They did, however, have a number of suggestions as to how we might improve upon the administration's proposal.

We are submitting the administration's proposal today to provide an opportunity for discussion. Clearly, changes are possible and are in fact appropriate, but we must begin to sort these differences out as soon as possible.

Despite program reductions in 1981 and 1982, medicare outlays are projected to grow rapidly in future years. These outlays, which are expected to increase at an average of 14 percent per year, are a serious problem not only for the budget as a whole, but also for the solvency of the medicare health insurance trust fund.

The Senator from Kansas believes we have an obligation to protect medicare. This includes reducing its extraordinary rate of increase in expenditures. Moving forward on a prospective payment system for hospitals is a step in the right direction.

Mr. President, I ask unanimous consent that the full text and a summary of this bill be printed in the RECORD.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 576

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE AND REFERENCES IN ACT

SECTION 1. (a) This Act may be cited as the "Medicare Prospective Payment Rates Act".

(b) The amendments in this Act apply to the Social Security Act.

MEDICARE PAYMENTS FOR INPATIENT HOSPITAL SERVICES ON THE BASIS OF PROSPECTIVE RATES

SEC. 2. (a) Section 1814(b) is amended—

(1) in the matter preceding paragraph (1), by striking out "and 1886", and

(2) by amending paragraphs (1) and (2) to read as follows:

"(1) with respect to operating costs of inpatient hospital services of other than psychiatric, long-term, or children's hospitals (and such costs of inpatient hospital services of psychiatric, long-term, or children's hospitals and such other costs of inpatient hospital services as the Secretary may prescribe from time to time by regulation), the amount determined prospectively as provided by section 1886, except as provided in paragraph (3) or under an exception granted under section 1886(d);

"(2) with respect to other costs of inpatient hospital services and with respect to other services, except as provided in paragraph (3) or in section 1888—

"(A) the lesser of (i) the reasonable cost of the services, as determined under section 1861(v) and as further limited by section 1881(b)(2)(B), and (ii) the customary charges with respect to the services, or

"(B) if the services are furnished by a public provider of services free of charge or at nominal charges to the public, the amount determined on the basis of those items (specified in regulations) included in the determination of such reasonable cost as the Secretary finds will provide fair compensation to the provider for the services; or".

(b) The matter in section 1866(a)(2)(B)(ii) (42 U.S.C. 1395cc(a)(2)(B)(ii)) preceding subclause (I) is amended by inserting "or with respect to costs subject to section 1814(b)(1)" after "except with respect to emergency services".

(c)(1) Section 1886(d)(2)(A) is amended to read as follows:

"(2) Subparagraph (A)(ii) and subparagraph (B) of subsection (b)(2).".

(2) Subsection (d) of section 1886 is assigned the heading "Elimination of Lesser-of-Cost-or-Charges Provision", is redesignated as subsection (j), and is transferred to the end of section 1814.

PROSPECTIVE DETERMINATION OF MEDICARE PAYMENT RATES FOR INPATIENT HOSPITAL SERVICES

SEC. 3. (a) Section 1886 is amended to read as follows:

"PROSPECTIVE DETERMINATION OF PAYMENT RATES FOR INPATIENT HOSPITAL SERVICES

"SEC. 1886. (a)(1) The Secretary shall determine a payment amount for each inpatient hospital discharge in fiscal year 1984 involving inpatient hospital services for which payment may be made under part A of this title. That amount shall be equal to a national standard rate per discharge for the diagnosis related group to which that discharge belongs (the product of an appropriate standard cost level per discharge determined by the Secretary for all discharges involving inpatient hospital services for which payment may be made under part A of this title and an appropriate weighting factor determined by the Secretary for that diagnosis related group), adjusted for regional differences in hospital wage levels, and updated to fiscal year 1983 by the estimated rate of change of hospital costs industry-wide, and from fiscal year 1983 to fiscal year 1984 by the percentage increase defined in paragraph (2).

"(2) For purposes of paragraph (1), the 'percentage increase' shall be equal to the percentage, estimated by the Secretary, by which the cost of the mix of goods and services (including personnel costs but excluding non-operating costs) comprising routine, ancillary, and special care unit inpatient hospital services, based on an index of appropriately weighted indicators of changes in wages and prices which are representative of the mix of such goods and services, for fiscal year 1984 exceeds the cost of the mix of such goods and services for fiscal year 1983.

"(b) The Secretary may from time to time make changes (including the establishment of new groups) in the diagnosis related groups referred to in subsection (a).

"(c)(1) The Secretary shall, for hospital discharges in fiscal year 1985 and in each succeeding fiscal year, adjust (uniformly, or individually for specified diagnosis related groups) the payment amounts determined under subsection (a) so as to provide compensation that the Secretary in his judgment deems adequate for efficiently and economically operated hospitals, taking into account such factors as changes in the cost per unit of goods and services, changes in productivity, and technological and scientific advances.

"(2) The Secretary may, from time to time, adjust the payment amounts determined under subsection (a) to take into account such factors as changes made in the diagnosis related groups, changes in the portion of costs attributable to wages, changes in the kinds of costs subject to the provisions of this section (pursuant to regulations as provided in section 1814(b)(1)), or regional differences (or changes in those differences) in the cost per unit of goods or services other than wages. The Secretary may also, from time to time, establish payment amounts for new diagnosis related groups at levels comparable to amounts established for previous diagnosis related groups involving comparable use of hospital resources.

"(d)(1) The Secretary may provide (on a general, class, or individual basis) for exceptions and adjustments to the payment amounts established under the previous subsections to take into account the special needs of sole community hospitals.

"(2) The Secretary may provide for additional payment amounts (as determined by the Secretary) for any discharge whose length of stay exceeds by thirty or more days the mean length of stay of the discharges in the diagnosis related group to which that discharge belongs.

"(e) The Secretary shall publish in the Federal Register a notice of the payment amounts established under subsection (c)(1) no later than the September 1 preceding the beginning of the fiscal year to which the amounts are to apply.

"(f) Payment amounts, exceptions, adjustments, and rules established under this section shall be final and conclusive, and claims related thereto (including claims related to administrative procedures used or actions authorized but not taken) shall not be subject to review or consideration by any court under any form of judicial process or procedure.".

(b) Title XVII is amended by adding at the end the following:

"TARGET INPATIENT HOSPITAL AMOUNTS FOR CERTAIN HOSPITALS

"SEC. 1888. (a) Subject to the provisions of section 1813, if the operating costs per discharge of inpatient hospital services for a cost reporting period of a hospital that does not receive payments under section 1814(b)(1)—

"(1) are less than or equal to the target amount (as defined in subsection (c)) for that hospital for that period, the amount of the payment with respect to such operating costs payable under part A on per discharge basis shall be equal to the amount of such operating costs, plus—

"(A) 50 percent of the amount by which the target amount exceeds the amount of such operating costs, or

"(B) 5 percent of the target amount, whichever is less, or

"(2) are greater than that target amount, the amount of the payment with respect to such operating costs payable under part A on a per discharge basis shall be equal to

(A) the target amount, plus (B) in the case of cost reporting periods beginning before October 1, 1984, 25 percent of the amount by which the amount of such operating costs exceeds the target amount.

"(b)(1) For purposes of subsection (a), the term 'target amount' means, with respect to a hospital for a particular 12 month cost reporting period—

"(A) in the case of the first such reporting period for which this subsection is in effect, the target amount under section 1886(b)(3) (as in effect before enactment of the Medicare Prospective Payment Rates Act) for the preceding 12 month cost reporting period, and

"(B) in the case of a later reporting period, the target amount for the preceding 12 month cost reporting period,

increased by the applicable percentage increase under paragraph (2) for that particular cost reporting period.

"(2) For purposes of paragraph (1), the 'applicable percentage increase' for any 12 month cost reporting period shall be equal (A) the percentage, estimated by the Secretary, by which the cost of the mix of goods and services (including personnel costs but excluding non-operating costs) comprising routine, ancillary, and special care unit inpatient hospital services, based on an index of appropriately weighted indicators of changes in wages and prices which are representative of the mix of such goods and services, for that cost reporting period exceeds the cost of the mix of such goods and services for the preceding 12 month cost reporting period, plus (B) in the case of cost reporting periods beginning after September 30, 1984, 1 percent.".

"(c) The Secretary shall provide for an exemption from, or an exception and adjustment to, the method under this subsection for determining the amount of payment to a hospital where events beyond the hospital's control or extraordinary circumstances, including changes in the case mix of the hospital, create a distortion in the increase in costs for a cost reporting period (including any distortion in the costs for the base period against which the increase is measured). The Secretary may provide for such other exemptions from, and exceptions and adjustments to, the method as the Secretary deems appropriate, including those which he deems necessary to take into account a decrease in the inpatient hospital services that a hospital provides and that are customarily provided directly by similar hospitals which results in a significant distortion in the operating costs of inpatient hospital services.

"(d) In the case of any hospital having any cost reporting period of other than a 12 month period, the Secretary shall determine the 12 month period which shall be used for purposes of this section.

"(e)(1) The Secretary shall provide for an adjustment under this subsection in the amount of payment otherwise provided a hospital under this section in the case of a hospital which, as of August 15, 1982, was subject to the taxes (hereinafter in this subsection referred to as the 'FICA taxes') imposed by section 3111 of the Internal Revenue Code of 1954 and which is not subject to such taxes for part or all of a cost reporting period.

"(2) In making such an adjustment for a cost reporting period the Secretary shall estimate the amount of the operating costs of inpatient hospital services that would have resulted if the hospital was subject to the FICA taxes during that period. In making that estimate the Secretary shall reduce the amount of the FICA taxes that would have been paid (but not below zero) by the amount of costs which the hospital demonstrates to the satisfaction of the Secretary were incurred in the period for pensions, health, and other fringe benefits for employees (and former employees and family members) comparable to, and instead of, the benefits provided under title II and this title.

"(3) If a hospital's operating costs of inpatient hospital services estimated under paragraph (2) is greater than the hospital's operating costs of inpatient hospital services determined without regard to this subsection for a cost reporting period, then the Secretary shall reduce the amount otherwise paid the hospital (respecting operating costs of inpatient hospital services) under this title for the period by the amount by which the amount that would have been paid the hospital (if the amount of the operating costs of inpatient hospital services estimated under paragraph (2) were treated as the amount of the operating costs of inpatient hospital services) exceeds the amount that would have been paid the hospital if this subsection did not apply; except that, in making such a determination for a cost reporting period beginning on or after October 1, 1984, clause (B) of subsection (a)(2) shall continue to apply.".

PAYMENTS BY SECRETARY TO HOSPITALS ON BEHALF OF HEALTH MAINTENANCE ORGANIZATIONS AND COMPETITIVE MEDICAL PLANS

SEC. 4. (a) Section 1876(g) is amended by adding at the end the following:

"(4) A risk-sharing contract under this subsection may, at the option of an eligible organization, provide that the Secretary—

"(A) will reimburse hospitals either for the reasonable cost (as determined under section 18619(v)) or for payment amounts determined in accordance with section 1886, as applicable, of inpatient hospital services furnished to individuals enrolled with such organization pursuant to subsection (d), and

"(B) will deduct the amount of such reimbursement from payment which would otherwise be made to such organization.".

EFFECT OF AMENDMENTS ON AUTHORITY FOR EXPERIMENTS AND DEMONSTRATION PROJECTS

SEC. 5. The amendments enacted by this Act shall not affect the authority of the Secretary of Health and Human Services to develop, carry out, or continue experiments and demonstration projects.

CONFORMING AMENDMENTS

SEC. 6. (a) The matter in section 1814(g) preceding paragraph (1) is amended by inserting "(or would be if subsection (b)(1) did not apply)" after "1861(v)(1)(D)".

(b) Section 1814(h)(2) is amended by striking out "the reasonable costs for such services" and inserting "the amount that would be payable for such services under paragraphs (1) and (2) of subsection (b)".

(c) The matter in section 1835(e) preceding paragraph (1) is amended by inserting "(or would be if section 1814(b)(1) did not apply)" after "1861(v)(1)(D)".

(d) The matter in section 1861(v)(1)(G)(i) following subclause (III) is amended by striking out "on the basis of the reasonable cost of inpatient hospital services" and inserting instead "as provided in paragraphs (1) and (2) of section 1814(b)".

(e) Section 1861(v)(2)(A) is amended by striking out "an amount equal to the reasonable cost of" and inserting instead "the amount that would be taken into account with respect to".

(f) Section 1816(v)(2)(B) is amended by striking out "the equivalent of the reasonable cost of".

(g) Section 1861(v)(3) is amended by striking out "the reasonable cost of such bed and board furnished in semi-private accommodations (determined pursuant to paragraph (1))" and inserting instead "the amount otherwise payable under this title for such bed and board furnished in semi-private accommodations".

(h) Section 1861(v)(7)(B) is amended to read as follows:

"(B) For further limitations on reasonable cost for operating costs of inpatient hospital services, see section 1888.".

(i) Section 1861 is amended by inserting after subsection (m) the following:

"(n) The term 'operating costs' with respect to inpatient hospital services means routine operating costs, ancillary service operating costs, and special care unit operating costs.".

(j) Section 1861 is amended by inserting after subsection (aa) the following:

"(bb) The term 'long-term hospital' means a hospital whose average inpatient length of stay (as determined by the Secretary) is greater than 25 days, and any other hospital witn appropriate characteristics as determined by the Secretary.".

(k) Section 1861 is amended by adding at the end the following:

"(ee) The term 'children's hospital' means a hospital whose inpatients are predominantly individuals under 18 years of age.

"(ff) The term 'sole community hospital' means a hospital that, by reason of factors such as isolated location or absence of other hospitals (as determined by the Secretary), is the sole source of inpatient hospital services reasonably available to individuals in a geographical area who are entitled to benefits under part A.".

(l) The first sentence of section 1881(b)(2)(A) is amended by striking out "section 1861(v)" and inserting instead "paragraphs (1) and (2) of section 1814(b)".

(m) Section 1883(e) is amended—

(1) by striking out "payment" and inserting instead "reasonable costs", and

(2) by striking out "title XVIII reimbursement" and inserting instead "reasonable costs under this title".

(n) Section 1887(a)(1)(B) is amended by striking out "on a reasonable cost basis" and inserting instead "as provided in paragraphs (1) and (2) of section 1814(b)".

EFFECTIVE DATE

SEC. 7. (a)(1) The amendments made by this Act apply to items and services furnished by or under arrangements with a hospital after its last cost reporting period that has begun before October 1983.

(2) A change in a hospital's cost reporting period that has been made after November 1982 shall be recognized for purposes of this section only if the Secretary of Health and Human Services finds good cause for that change.

(b) The Secretary shall make an appropriate reduction in the payment amount under section 1814(b)(1) of the Social Security Act (as amended by section 2(a)(2) of this Act) for any discharge, if the admission has occurred before a hospital's first cost reporting period that has begun after September 1983, to take into account amounts payable under title XVIII of that Act (as in effect before the date of enactment of this Act) for items and services furnished before that period.

(c) The Secretary shall publish in the Federal Register a notice of the payment amounts established under subsection (a) of section 1886 of the Social Security Act (as amended by section 3(a) of this Act) no later than September 1, 1983, and allow for a period of public comment thereon. The payment amounts shall become effective on the following October 1 without the necessity for consideration of comments received, but the Secretary shall, by notice published in the Federal Register, affirm or modify the amounts by the following December 31 after considering those comments. A modification that reduces a payment amount shall apply only to discharges occurring after 30 days after notice of the modification is published in the Federal Register. Rules to implement that subsection shall, and exceptions, adjustments, or additional payment amounts under section 1886(d) of the Social Security Act may, be established in accordance with the procedure described in the preceding sentences of this paragraph.

SUMMARY OF PROPOSED MEDICARE PROSPECTIVE PAYMENT RATES ACT

Section 1 would assign the draft bill the short title "Medicare Prospective Payment Rates Act".

Section 2 would require prospective determination of payments under Medicare with respect to operating costs of impatient hospital services instead of payments on the basis of reasonable cost. Prospectively determined payments would not be required for psychiatric, long-term, or children's hospitals. The Secretary of Health and Human Services could, by regulation, extend the prospective method to other cost elements of inpatient hospital services (such as capital-related costs and teaching costs) and to psychiatric, long-term, and children's hospitals. Deductibles and coinsurance would continue to be required of Medicare beneficiaries as under existing law and would continue to be deducted from the Medicare payments to hospitals, but no additional charges could be imposed on beneficiaries. Medicare payments for services payable under this section on a prospective basis, to or on behalf of health maintenance organizations (HMO's) or competitive medical plans (CMP's) that contract with Medicare on a cost basis, would be paid on that prospective basis. HMO's and CMP's that receive Medicare payments on a risk basis would continue to do so as under existing law, except as otherwise provided by section 4.

Section 3 specifies how Medicare payments for inpatient hospital services would be determined prospectively:

The Secretary would set a payment amount for each Medicare inpatient hospital discharge in fiscal year 1984 equal to the national standard rate for the diagnosis related group (DRG) to which the discharge belonged, adjusted for regional differences in hospital wage levels, and updated to fiscal year 1983 by the estimated rate of change of hospital costs industry-wide, and from fiscal year 1983 to fiscal year 1984 by the estimated increase in the hospital market basket index. The national standard rate for each DRG would be equal to the product of an appropriate cost level per discharge (determined by the Secretary) for all Medicare discharges and an appropriate weighting factor (determined by the Secretary) for that DRG.

The Secretary could revise the DRGs from time to time.

The Secretary would annually adjust the payment amounts determined for fiscal year 1984 to provide compensation that the Secretary in his judgment deemed adequate for efficiently and economically operated hospitals, taking into account such factors as changes in the cost per unit of goods and services, changes in productivity, and technological and scientific advances. He could also, from time to time, adjust the payment amounts to take into account such factors as changes he had made in the DRGs, changes in the portion of costs attributable to wages, changes in the kinds of costs for which prospective payments were to be made (as he may have provided by regulation), or regional differences (or changes in those differences) in the cost per unit of goods and services other than wages. He could also establish payment amounts for new DRGs at levels comparable to amounts established for previous ones involving comparable use of hospital resources.

The Secretary could provide for exceptions and adjustments to meet the special needs of sole community hospitals. The Secretary could also pay additional amounts (as determined by the Secretary) for discharges whose length of stay exceeded by thirty days or more the mean length of stay of the discharges in a particular DRG.

The Secretary would publish a notice in the Federal Register by September 1 of fiscal year 1984 and of each succeeding fiscal year establishing the payment amounts for the coming fiscal year.

Payment amounts, exceptions, adjustments, and rules established under this section and related claims would not be subject to judicial review.

Section 3 would also repeal the cost limits and target amount provisions enacted by the Tax Equity and Fiscal Responsibility Act of 1982, except that the target amount provisions would continue to apply permanently to hospitals not paid on a prospective basis under the draft bill, and that the increase in target amounts permitted for fiscal year 1984 would be only the estimated increase in the hospital market basket index, rather than that increase plus 1 percent.

Section 4 would permit an HMO or a CMP that receives Medicare payments on a risk basis to choose to have the Secretary directly pay hospitals for inpatient hospital services furnished to Medicare enrollees of the HMO or CMP. The payment amounts would be at the appropriate DRG rate (or on the basis of reasonable cost, as applicable), and would be deducted from Medicare payments to the HMO or CMP.

Section 5 specifies that the amendments enacted by the draft bill would not affect the authority of the Secretary to develop, carry out, or continue experiments and demonstration projects.

Section 6 would enact conforming amendments.

Section 7 would make the amendments enacted by the draft bill effective with respect to items and services furnished by a hospital after its last cost reporting period that began before October 1983. The Secretary would appropriately reduce the payment amount for any discharge if the admission occurred before the first cost reporting period that began after September 1983 to take into account amounts payable under Medicare under existing provisions of law for items and services furnished before that period. The Secretary would be required to publish a notice in the Federal Register by September 1, 1983, establishing the payment amounts for fiscal year 1984, and to allow for a period of public comment. The payment amounts would be effective as of October 1 (without the necessity for consideration of comments received), but the Secretary would be required to publish a notice by December 31 affirming or modifying the amounts after considering the comments. Any decreases in payment amounts in that notice would apply only to discharges occurring more than 30 days after its publication.

● Mr. DURENBERGER. Mr. President, I rise to join with Senator DOLE in introducing S. 576.

The bill we are introducing here today begins to deal with a social security problem of no less magnitude and certainly no less importance than the cash benefit crisis currently being addressed. That problem, the financial viability of the medicare hospital insurance trust fund, is of vital concern to the almost 27 million aged and 3 million disabled individuals provided health insurance coverage under the medicare program.

But let me warn everyone that the flash point for medicare is not 10 years away, or even 5 years. Medicare is heading for trouble now and will be in serious difficulty by 1987 unless we act prudently.

Fortunately, we have the time to engage in a step-by-step analysis of medicare, fixing what is wrong and leaving untouched what is working. We have the time; the question is, Do we have the willingness? And can Congress as a whole act responsibly to address medicare now, thereby guaranteeing a sound future for this vital program and for those millions of people who depend on it? I firmly hope so.

For years, we've been adjusting this or that element of the medicare program. We've added a regulation here, some monitoring there. But we've never gotten to the heart of the problem—the way we pay for services. The result is that costs have risen unnecessarily for beneficiaries, for hospitals, and for the Federal Government. It is time for a change.

Prospective payment is the shot in the arm medicare now needs. It's a positive change; good for senior citizens, for doctors, for hospitals, and for taxpayers. And it comes at a time when it is desperately needed. We can not afford to put prospective payment off. Medicare needs it, and the entire Federal budget needs it.

The administration, and former Secretary Schweiker in particular, should be commended for developing a sound, workable prospective payment proposal. The Department has responded promptly and thoughtfully to our request in last year's Tax Equity and Fiscal Responsibility Act, and I appreciate that. It makes our job a lot easier.

There are details in the administration's proposal that still need to be

worked out. It is not a perfect system. But it is better than what we have now, and it is much better than heavy-handed regulatory alternatives.

Prospective payment gives hospitals the flexibility they need to restructure their institutions and respond to community needs. And it rewards hospitals for working with their physicians to effectively manage patient care.

The administration has chosen to limit its proposal to only the most important elements of a prospective payment plan. I think it is a wise choice. That is not to suggest that the issues of capital formation, teaching costs, or all-payer systems are unimportant. Each of these issues is complex, and each demand special attention. But none of them, in my opinion, has to be addressed in the context of prospective payment. I think it makes sense to focus on the basic elements of prospective payment now, and to come back to these other issues at a time when they can get the attention they deserve.●

By Mr. SIMPSON:

S. 578. A bill to amend title 38, United States Code, to provide for adult day health care services for veterans, to authorize the Veterans' Administration to administer a community residential care program, to establish a presumption of service connection for former prisoners of war suffering from dysthymic disorder and to revise and clarify eligibility for reimbursement of expenses of travel for Veterans' Administration health care; to the Committee on Veterans' Affairs.

VETERANS HEALTH CARE AND PROGRAMS IMPROVEMENT AMENDMENTS OF 1983

Mr. SIMPSON. Mr. President, as chairman of the Senate Committee on Veterans' Affairs, I am introducing today the proposed Veterans' Health Care and Programs Improvement Amendments of 1983. A central purpose of this legislation is to provide the VA with certain authority to further address the growing strains placed on the present VA medical-care system by what has been referred to as the graying of the American veteran.

Mr. President, there are at present some 11.4 million veterans of World War II. On the average, they are now about 62 years old. And under the provisions of section 610 of title 38, United States Code, all veterans automatically become eligible for a broad range of medical care in VA hospitals and nursing homes at age 65, regardless of need, and regardless of whether service was during a period of war or the disability for which treatment is sought is service connected.

The Senate Veterans' Affairs Committee, and the Congress as a whole, have already begun to address this situation. In 1980, the Congress authorized the establishment of 15 geriatric research, education, and clinical centers (GRECC's) each of which specializes in one area of research pertaining to aging, such as heart diseases, adult onset diabetes and Alzheimer's disease, a disease which causes severe disability in tens of thousands of aging veterans. The medical and prosthetics research program of the VA has been funded with specific emphasis on research related to the aging. The nurse scholarship program, authorized in fiscal year 1982, emphasizes geriatric nursing as a priority area. This spring the congressionally mandated Geriatrics and Gerontology Advisory Committee will be reporting on its findings and recommendation relative to the VA and aging veterans. A position of Assistant Chief Medical Director for Geriatrics was mandated in 1980, by Public Law 96-330. And in the VA's fiscal year 1984 budget which has been submitted to the Congress, the Administration has proposed a 58-percent increase in funding for construction of VA medical facilities, from $549 million in fiscal year 1983 to a proposed level of $868 million in fiscal year 1984, an increase which would provide, among other things, for seven new nursing home facilities—a total of 840 new nursing home beds across the country.

However, Mr. President, there is another part of the older veteran population, those who may not need inpatient care or the intensity of services afforded by institutional care, and who have some personal and family resources. Titles I and II of the legislation I am proposing today are aimed at reducing the need for institutionalization in VA hospitals and nursing homes of certain veterans, by making it possible for them to receive an alternative, ambulatory mode of health service when it would be more appropriate to their needs, thus freeing up hospital, nursing home, and domiciliary beds for those veterans, particularly elderly ones in coming years, who have a clear and most pressing need for institutionalization.

ADULT DAY HEALTH CARE

Mr. President, title I of the proposed Veterans' Health Care and Programs Improvement Amendments of 1983, would authorize the Administrator to operate, on a pilot-program basis through fiscal year 1987, a program of adult day health care services, aimed primarily at meeting the needs of elderly veterans whose medical treatment requirements and home living situation will permit them to receive daytime care only, thus avoiding the need for more elaborate and costly institutionalization in a VA hospital, nursing home, or domiciliary.

There is already considerable interest within the VA in the adult day health care concept. Five VA medical centers have to date developed such programs on an experimental basis, by providing the services either in the VA facilities themselves or at community facilities on a contract basis. The Administrator's statutory authority to proceed in this direction, however, may be tenuous: It appears to be derived from the "penumbras" of other statutory provisions authorizing the broad range of present VA medical operations. Title I of this bill is designed to provide specific authority for the Administrator to conduct a program of adult day health care, to specify the scope and purpose of such a program, to require periodic reports on the progress of the program, and to provide for the expiration of this authority after 4 years, in order that the Congress may have the opportunity to reassess, reshape, or reauthorize the program as appropriate on a permanent basis.

The veterans that might be expected to be served by the adult day health care program would, in general, have some need for medical treatment or supervision on a daily basis, although their needs would not be so severe as to require round-the-clock institutionalization. In addition, they would be required to have a stable home environment, where they might benefit from the care and attention of, and interaction with, family members or other concerned and motivated caregivers. The program would be especially useful in a situation where an elderly veteran is a dependent of his child or children, and living in their household. They in turn would be his primary caregivers although work or other regular responsibilities might require them to be absent from the house during regular working hours.

The services to be provided could include—in addition to medical care—rehabilitative therapy, social work, recreational therapy, meals and whatever other medical or rehabilitative services might be necessary to provide an effective and economical alternative to extended institutional care. These services would be furnished in a group setting at Veterans' Administration medical facilities during normal daytime working hours. No authority is provided in this legislation for the Administrator to contract for such services with community facilities.

In addition to the other benefits of an adult day health care program, it is very likely that care delivered in such a program will prove to be far more cost effective than care furnished through other VA channels. According to the VA's medical care reimbursement rates in effect for fiscal year 1983, the average daily cost of general medical and surgical care in a VA hospital is $260, while nursing home care costs approximately $98 a day. By comparison, the VA estimates that the average cost of adult day health care is somewhere in the range of $35 a

day. Nevertheless, I would emphasize to my colleagues, Mr. President, that the bill has been drawn so that no new appropriation will be required for this pilot program. Up to $35 million a year may be expended, but this money will become available through offsetting savings resulting from certain restrictions on eligibility for beneficiary travel reimbursement under title IV of this bill.

COMMUNITY RESIDENTIAL CARE

Title II of the bill would authorize the VA to set standards governing community residential care facilities—that is, private homes inspected by the VA but chosen by the veteran, where veterans receive, at their own expense, room, board, personal care, and supervision. Veterans who would be eligible for this program no longer require hospitalization but are not able to live independently because of their health-care needs and have no suitable family resources to provide the needed care.

The VA has been referring previously institutionalized veterans to residential care facilities since 1951—originally only certain psychiatric patients, but more recently, medical and surgical patients as well. There are now approximately 12,700 veterans in residential care facilities nationwide, of which approximately 87 percent have psychiatric or organic brain diseases, and 63 percent are considered incompetent to handle funds. However, the VA has no specific statutory authority to set standards for residential care facilities to which it refers eligible veterans. According to the VA, experience has shown that other Federal, State, or local agencies cannot always be relied upon to insure that minimal health and safety standards are met in these facilities. The VA has found that there are no uniform national standards for residential care, and that local and State standards, where they exist, are often not enforced.

Accordingly, the VA has proposed the legislative language contained in title II of this bill, and has recommended its introduction and passage. In transmitting this proposed legislation to the Congress, the VA Administrator stated that:

> By insuring the safety and well-being of veterans placed in residential care facilities, the draft bill would encourage VA medical personnel to refer more veterans, currently, in VA facilities, to residential care homes. This would permit VA medical care facilities to serve more veterans at the same cost.

The legislation would authorize the Administrator to issue regulations governing residential care homes, but would not require any facility to participate in the program or to accept the standards promulgated by the VA. If a facility owner did wish to participate, the facility would be inspected to insure that the necessary standards were met, and that a safe and otherwise suitable environment would be provided for participating veterans. If the facility were found not to be in compliance, the Administrator, after notice and an opportunity for a hearing, could cease referrals and assist in the transfer of veterans who desired to leave.

The VA advises us that this legislation would be implemented without increasing the staffing currently allocated to operate the community residential care program.

PRESUMPTION CONCERNING DYSTHYMIC DISORDER

Mr. President, title III of the bill would clarify the original intent of Public Law 97-37, The Former Prisoners of War Benefits Act of 1981, by adding dysthymic disorder—or depressive neurosis—to the list of presumptive diseases which is used as a basis for disability compensation and for eligibility for VA medical care. This legislation was intended to be a significant and appropriate expansion of benefits and services for a most worthy group of veterans—those who were held as prisoners of war while defending their country.

When this legislation was orginally introduced, the Senate committee recognized the need for some liberalization with respect to claims filed by former POW's for certain mental disorders. At the time this legislation was introduced, the VA had recently established newly expanded guidelines for POW claims which included specific instructions for the disposition of claims filed for post-traumatic stress disorder (PTSD), and it appeared to be more appropriate to allow the reopening of previously denied claims and to study the effect of the new guidelines on all POW claims—allowed and denied—rather than expanding the list of presumptions.

The House bill included a rather dramatic expansion which would have allowed a presumption for all psychoneurotic disorders. In the House and Senate Veterans' Affairs Committees compromise agreement on this legislation, the committees agreed to "* * * adding any of the anxiety states—including post-traumatic stress neurosis—to the disorders to which the presumption * * * would apply." The committees intended that the term "anxiety states" have the meaning prescribed under the heading "Anxiety States"—or "Anxiety Neuroses"—in the Diagnostic and Statistical Manual of Mental Disorders—third edition, DSM III—published by the American Psychiatric Association—pages 230-239.

Significantly, DVB circular 21-81-9 points out that suffering stress under conditions mentioned in section 309.81 of DSM III such as military combat, floods and earthquakes, and actions with serious injuries such as vehicular or airplane crashes, large fires, and certain other disasters such as shipwreck, bombing, torture, and death camps are life threatening in nature and would evoke significant distress in most persons who were involved. The circular goes on to state that if any of these above-identified events or other life-threatening episodes had their onset during active duty, service connection may be established upon reexperiencing the traumatic event. It continues to underline that:

> Some stressors frequently produce the disorder (PTSD) (e.g. torture) and others produce it only occasionally (e.g. car accidents) . . . The disorder is apparently more severe and longer lasting when the stressor is of human design.

By relating the provisions of the DVB circular to section 309.81 of the DSM III it appears clear that internment as a POW would be a stressor which could evoke significant symptoms of distress in most individuals. Under the heading "Associated Features" of PTSD, page 237 of DSM III the following is noted:

> Symptoms of depression and anxiety are common and in some instances may be sufficiently severe to be diagnoses as anxiety or a depressive disorder.

The complexity of these interrelated diagnoses has left the question of whether dysthymic disorder alone satisfies the requirements of Public Law 97-37. The specific addition of this diagnosis will answer such questions. The cost of this addition will be quite realistic as the number of claims is small but the benefit will be great as these worthy veterans who were meant to be included in the presumptions established by Public Law 97-37 will now be granted the service connection they deserve if they are diagnosed as having depressive neurosis.

BENEFICIARY TRAVEL

Under current law, the VA is authorized to reimburse certain eligible veterans for the cost of travel to and from VA medical facilities for treatment. The VA is the only major medical care system in the world that systematically pays its patients the cost of travel associated with an episode of care. For fiscal year 1984, the VA estimates that the exercise of this authority will reflect a cost to the taxpayers of this country in the sum of $91.2 million.

There have been various efforts over the years to legislatively impose some meaningful restrictions on VA beneficiary travel reimbursement. Before 1976, beneficiary travel for non-service-connected veterans was generally unrestricted. In 1976, in an effort to come to grips with increasing costs and an OMB threat to require beneficiary travel payments to be absorbed by the general medical care budget, a provision was enacted in Public Law 94-581 which permitted reimbursement only if the applicant had been determined, based on an annual declaration and certification, to be unable

to defray the expenses of travel. Although the purpose of this provision was to permit the VA to investigate the financial circumstances of applicants and to back up that investigative power with certain penalties for a false declaration, the Senate Veterans' Affairs Committee found in 1979 that "the VA had not investigated the financial circumstances—even on a sample basis—of any veteran who had certified his or her inability to defray the costs of travel expenses." Their main problem was "the great difficulty in enforcing provisions requiring advance annual certifications of inability to defray the cost of various unknown, often minor, travel expenses." As a result, the 1976 provisions proved virtually useless in restraining travel costs.

In 1979, the problem was again addressed. The Senate Veterans' Affairs Committee reported out a provision which would have limited non-service-connected beneficiary travel eligibility only to veterans in receipt of pension or whose income was lower than that of a pension recipient. The provision would have imposed a $25 deductible each year, with the next $150 subject to a 50-percent copayment by the veteran, resulting, in effect, in a maximum annual out-of-pocket expense for the veteran of $100. When this bill—which combined various provisions of H.R. 3892 and S. 1039—came to the floor of the Senate, it was amended to change the deductible to $4 per trip, and expressly to set an annual, out-of-pocket limit of $100. This amendment was intended to ease the burden that the committee version might have imposed on veterans in very remote areas, where a single trip to a VA facility could cost more than $100, in order that the veteran's $100 share might be spread out more evenly over the year.

In conference, the concept of a deductible was dropped, and was replaced with a limitation of reimbursement to persons who have "been determined, pursuant to regulations which the Administrator shall prescribe, to be unable to defray the expenses of travel"—except with respect to service-connected veterans, pension recipients, and persons whose income is lower than that of a pension recipient. The joint explanatory statement stated that this provision "requires" the promulgation of such regulations, and that by doing so "the committees intend that the VA tighten controls over the administration of such non-service-connected beneficiary travel reimbursement."

To date, no such regulations have been issued, and Congress express intention to impose some reasonable and meaningful restriction on beneficiary travel payments has again fallen short of realization.

The provisions of the legislation that I am introducing today would impose a $10 deductible on all beneficiary travel payments. Reimbursement would be authorized only for the amount by which the cost of round trip travel to a VA medical facility exceeds that $10 figure. The VA statistics indicate that 73 percent of all travel claims are for less than $10, and that the administrative cost of processing some of these smaller claims often exceeds the value of the claims themselves.

A $10 deductible could constitute a significant burden for a number of veterans who are presently eligible for unrestricted beneficiary travel reimbursement. The bill was drafted with this burden in mind, and it makes certain exemptions from the deductible requirement in the cases of veterans for whom the burden would be greatest, and whose eligibility for VA medical care is of the highest priority. Specifically, exceptions are provided for veterans seeking treatment for a service-connected disability, veterans with a service-connected disability rated at 50 percent or more who are seeking treatment for non-service-connected disability, and for medically indicated ambulance transportation such as would be required in an emergency situation. An additional exception is provided for World War I veterans receiving care through an adult day health care program under title I of this legislation. This exception is designed to recognize the daily travel requirements associated with adult day health care, as well as the critical health care needs of this most significant category of elderly veterans—the largest category of such veterans, whose average age is more than 87 years, and whose service occurred during a period of war. Finally, title IV of the bill would grant the Administrator the authority to set a lower deductible in order to minimize hardship in cases of veterans whose disabilities necessitate frequent travel to a medical facility for care. The purpose of this particular provision is to authorize the Administrator to establish a schedule of deductibles tailored to particular classes of chronic care patients, such as dialysis patients, in order that total out-of-pocket beneficiary travel payments by any veteran shall not exceed, on the average, a general limit of, for example, $100 per year.

Cost savings resulting from enactment of these restrictions on beneficiary travel are likely to be in excess of $35 million a year through the end of the present decade. As I indicated earlier, this bill contemplates that these savings will not result in reduced appropriations for the VA medical care account, but will be used only to offset the costs of the adult day health care program as established under title I of this bill.

CONCLUSION

Mr. President, this bill should considerably enhance the VA's ability to address certain long-term needs of the veteran population which it serves. In one sense, it is a resource reallocation measure, simply transferring funds from a lower priority medical account, such as non-service-connected beneficiary travel, to higher priority programs serving the needs of the growing elderly veteran population. I do look forward to working with my good friend from California, the distinguished ranking minority member of the Senate Veterans' Affairs Committee (Mr. CRANSTON), the other members of the committee, the VA, as well as concerned veterans and their national service organizations in the development of this important legislation.

Mr. President, I ask unanimous consent that the text of S. 578 be printed in the RECORD at this point.

S. 578

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) this Act may be cited as the "Veterans' Health Care and Programs Improvement Amendments of 1983".

(b) Except as otherwise expressly provided, whenever in this Act an amendment is expressed in terms of an amendment to a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

TITLE I—ADULT DAY HEALTH CARE SERVICES PILOT PROGRAM

SEC. 101. (a) Chapter 17 is amended by adding at the end thereof the following new subchapter:

"Subchapter VIII— Adult Day Health Care Services Pilot Program"

"§ 671. Purpose

"The purpose of this subchapter is to authorize the Administrator to (1) provide, as an alternative to institutionalization in a Veterans' Administration hospital, nursing home or domiciliary, certain day health care services which would enable veterans to reside in a supportive home environment while receiving the most appropriate and best possible health care during daytime hours when their families may be unavailable to afford the necessary care and attention, and (2) determine the medical efficacy and cost-effectiveness of such services.

"§ 672. Definition

"For the purposes of this subchapter, the term 'adult day health care services' shall include ambulatory medical care provided by physicians, nurses and/or other health-care personnel, and may include—

"(1) physical therapy and speech therapy;

"(2) social work;

"(3) recreational therapy;

"(4) midday meals; and

"(5) such other medical or rehabilitative services as the Administrator may determine to be necessary to provide an effective and economical alternative to extended or long-term institutional care.

"§ 673. Adult day health care services

"(a) In order to carry out the purposes of this subsection, the Administrator, in accordance with regulations which the Admin-

istrator shall prescribe, may conduct a pilot program under which the Administrator may furnish, in a congregate ambulatory setting at Veterans' Administration medical facilities during normal daytime working hours, adult day health care services to any veteran eligible for hospital or nursing home care under section 610 of this title. Such pilot program shall be planned, designed and conducted so as to demonstrate any medical efficacy and cost-effectiveness that may result from furnishing services through adult day health care programs rather than through institutionalization in a Veterans' Administration hospital, nursing home or domiciliary.

"(b) In carrying out the pilot program provided for by this subchapter, the Administrator may not furnish adult day health care services after September 30, 1987.

"(c) In order to effectuate the authority provided for in this subchapter, and to carry out such leasing of facilities, or construction or conversion of Veterans' Administration medical facilities as the Administrator may find necessary in furnishing the services provided for under this subchapter, the Administrator may expend not more than $35,000,000 in each of the fiscal years 1984 through 1987.

"§ 674. Reports

"The Administrator shall include in the annual report to the Congress required by section 214 of this title a comprehensive report on the administration and effectiveness of this subchapter in meeting its stated purpose, including such recommendations for additional legislation as the Administrator considers necessry.".

(b) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following:

"SUBCHAPTER VIII—ADULT DAY HEALTH CARE SERVICES PILOT PROGRAM"

"§ 661. Purpose
"§ 662. Definition
"§ 663. Adult day health care services
"§ 664. Reports."

TITLE II—COMMUNITY RESIDENTIAL CARE

SEC. 201. The purpose of this title is to authorize a program under which veterans who wish to participate and who are being furnished care under chapter 17 of title 38, United States Code, may be assisted by the Veterans' Administration in their return to the community residential facilities, and to ensure that such facilities provide a safe and healthful environment at a reasonable cost to the veteran.

SEC. 202. (a) Subchapter II of chapter 17 is amended by adding at the end thereof the following new section:

"§ 620B. Tranfers for community residential care

"(a) For the purpose of this section, the term 'residential care facility' means any dwelling or other facility which provides, at a minimum, room, board, limited personal care, and limited supervision.

"(b) The Administrator shall promulgate regulations to ensure the health, welfare, and safety of veterans in those residential care facilities for which an election has been made on behalf of the residential care facility to participate in the program authorized by this section.

"(c) Subject to subsection (g) the Administrator may assist any veteran who is being furnished hospital, domiciliary, nursing home care, or medical services on an outpatient basis by the Administrator by referring him or her for placement in a residential care facility.

"(d) The cost of any care or services provided under this subsection shall be the obligation of the veteran pursuant to his or her agreement with the residential care facility. The cost of that care shall not exceed the reasonable rate determined pursuant to this section.

"(e) No veteran will be provided assistance in obtaining placement in any residential care facility under this section unless such facility is approved by the Administrator as being capable of providing adequate personal home care and services to the veteran. The Administrator's approval shall be upon the basis of standards the Administrator shall prescribe. Such standards shall provide—

"(1) health and safety criteria;

"(2) guidelines by which reasonable rates for community residential care may be determined, giving consideration to such factors as (A) the level of care, supervision, and other services to be provided, (B) the cost of goods and services in the geographical area in which the facility is located, and (C) comparability with other facilities providing similar services;

"(3) criteria for determining the necessary resources for a residential care facility to provide an appropriate level of personal services to veterans; and

"(4) such other criteria as the Administrator determines are appropriate to ensure the well-being of veterans placed in residential care facilities pursuant to this section.

For the purpose of this subsection, the Administrator may, upon advice of the Chief Medical Director, delegate authority to Veterans' Administration Medical Center Directors to promulgate local standards necessary to meet requirements of State law or local ordinance in addition to those prescribed under this subsection.

"(f) The Administrator shall provide for periodic inspection of residential care facilities to meet the purposes of this section and to determine compliance with the standards established under subsection (e) of this section.

"(g) If the Administrator determines that in the case of any residential care facility, such facility is not in compliance with the regulations promulgated under subsection (b) of this section, the Administrator may:

"(1) cease to refer veterans to the noncomplying facility, and

"(2) assist in removing a veteran from a noncomplying facility, with the permission of the veteran, or the permission of the person or entity authorized by law to make that decision.

"(h) Any action taken pursuant to the authority of subsection (g) of this section with regard to a veteran in a residential care facility shall be in accordance with regulations which the Administrator shall prescribe. Such regulations shall provide for reasonable notice and, upon request made on behalf of such residential care facility, a hearing before any action authorized by subsection (g) is taken.".

(b) The table of sections at the beginning of chapter 17 is amended by adding after the item relating to section 620A the following new item:

§ 620B. Transfers for community residential care.".

TITLE III—PRESUMPTION CONCERNING DYSTHYMIC DISORDER

Sec. 301. Section 312(b) is amended by—

(a) inserting after paragraph (7) the following new paragraph:

"(8) dysthymic disorder (or depressive neurosis),",

(b) redesignating paragraphs (8) and (9) as paragraphs (9) and (10), respectively.

TITLE IV—BENEFICIARY TRAVEL

SEC. 401. Section 111(e)(2) is amended by—

(1) redesignating clauses (B) and (C) as clauses (C) and (D), respectively, and

(2) inserting after clause (A) the following new clause (B):

"(B) for the first $10 (or such lesser amount as the Administrator shall by regulation prescribe in order to minimize hardship in cases of veterans whose disabilities necessitate frequent travel to a Veterans' Administration facility for care) of the cost of travel to and from Veterans' Administration facilities (as defined in section 601(4) of this title) when a person receives medical care at such facilities. This subparagraph shall not apply when such care is provided (i) through a program of adult day health care services under subchapter VIII of chapter 17 of this title to a veteran of World War I, (ii) to a veteran for a service-connected disability, (iii) to a veteran with a service-connected disability rated at 50 percentum or more, or (iv) for medically indicated ambulance transportation when authorized by the Administrator;".

TITLE V—EFFECTIVE DATE

SEC. 501. The amendments made by this Act shall be effective on October 1, 1983.

By Mr. METZENBAUM (for himself, Mr. RIEGLE, Mr. BAUCUS, Mr. LEVIN, Mr. RANDOLPH, Mr. BURDICK, Mr. PELL, and Mr. SARBANES):

S. 579. A bill to provide that the amount of unnegotiated social security checks shall be returned to the social security trust funds; to the Committee on Finance.

RETURN OF UNNEGOTIATED SOCIAL SECURITY CHECKS

● Mr. METZENBAUM. Mr. President, Senators RIEGLE, BAUCUS, LEVIN, RANDOLPH, BURDICK, PELL, and SARBANES join me today in reintroducing legislation designed to correct an inequity in current law that prevents the Treasury from returning approximately $200 million that should rightfully be deposited in the social security trust funds. That money, which represents many thousands of uncashed social security checks, is a resource that should be made available to the hard-pressed social security system.

In the half century since the social security system was established, a considerable number of checks made out to social security recipients have not, for a variety of reasons, been cashed. In some cases, recipients died before cashing their checks. In others, the checks were simply misplaced and forgotten. But in spite of the fact that these checks have been accumulating for many years, current law prevents the Treasury from either canceling the unnegotiated checks or returning the money to the social security fund. Thus, the unclaimed money winds up in a kind of limbo.

This anomolous situation creates an unfair burden on elderly Americans. They are told on the one hand that

the social security system is poised on the brink of financial disaster. On the other, millions of dollars in unclaimed funds, which Congress clearly intended to be used for the benefit of recipients, is presently lost to the social security trust funds. As part of its efforts to resolve the financial problems of social security, Congress should take this simple and fair step of restoring to social security, funds that rightfully belong in social security accounts.

Mr. President, in addition to the estimated $200 million already accumulated in unclaimed funds, the trust funds could lose an additional $100 million in the next 4 years unless this problem is resolved.

Here, Mr. President, we have the opportunity to make a fair and noncontroversial change to benefit our elderly citizens. All those who are concerned about the system should join me in taking this simple step to credit social security with these badly needed funds.●

By Mr. SIMPSON:

S. 580. A bill to amend title 10, United States Code, to establish the Prisoner of War Recognition Medal; to the Committee on Armed Services.

PRISONER OF WAR RECOGNITION MEDAL

● Mr. SIMPSON. Mr. President, as chairman of the Senate Committee on Veterans' Affairs, I am introducing today, S. 580, a bill to establish the Prisoner of War Recognition Medal.

This medal is intended to honor those men and women who acted courageously and honorably after being taken and held as prisoners of war while serving this country during an armed conflict. Under the provisions of the bill, those Americans who were taken prisoner by enemy forces during World Wars I and II, Korea, Vietnam, and the *Pueblo* incident would be awarded the POW Medal. To qualify for the medal, the person must have been on active duty as a member of the Armed Forces of the United States after April 5, 1917.

During the time periods covered by this legislation, 142,307 prisoners were taken and held captive by enemies of the United States. The greatest number of these prisoners were taken in World War II, with 130,201 held—of whom 14,072 died. Some prisoners were only held for a short time, but in many cases our fellow Americans were held for a period of years. This is particularly true of the 766 POW's who were held during the Vietnam conflict.

The Prisoner of War Medal is an entirely and altogether fitting tribute from the American people in recognition of those who had their own freedom restricted in order that ours might endure.●

ADDITIONAL COSPONSORS

S. 19

At the request of Mr. DOLE, the name of the Senator from Illinois (Mr. PERCY) was added as a cosponsor of S. 19, a bill to amend the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code of 1954 to assure equality of economic opportunities for women and men under retirement plans.

S. 31

At the request of Mr. MATHIAS, the names of the Senator from North Dakota (Mr. BURDICK), and the Senator from North Dakota (Mr. ANDREWS) were added as cosponsors of S. 31, a bill to amend title 17 of the United States Code with respect to home recording and video and audio recording devices and media, and for other purposes.

S. 32

At the request of Mr. MATHIAS, the names of the Senator from North Dakota (Mr. BURDICK), and the Senator from North Dakota (Mr. ANDREWS) were added as cosponsors of S. 32, a bill to amend title 17 of the United States Code with respect to rental, lease or lending of sound recordings.

S. 33

At the request of Mr. MATHIAS, the names of the Senator from North Dakota (Mr. BURDICK), and the Senator from North Dakota (Mr. ANDREWS) were added as cosponsors of S. 33, a bill to amend title 17 of the United States Code with respect to rental, lease or lending of motion pictures and other audiovisual works.

S. 65

At the request of Mr. RANDOLPH, the names of the Senator from West Virginia (Mr. BYRD), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Kentucky (Mr. FORD), the Senator from Alabama (Mr. HEFLIN), the Senator from South Carolina (Mr. HOLLINGS), the Senator from New York (Mr. D'AMATO), the Senator from Mississippi (Mr. STENNIS), the Senator from Maryland (Mr. SARBANES), the Senator from Georgia (Mr. NUNN), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Ohio (Mr. GLENN), the Senator from South Carolina (Mr. THURMOND), the Senator from Ohio (Mr. METZENBAUM), the Senator from Mississippi (Mr. COCHRAN), and the Senator from Pennsylvania (Mr. SPECTER) were added as cosponsors of S. 65, a bill to extend the Appalachian Regional Development Act to provide transitional assistance to the Appalachian region.

S. 76

At the request of Mr. DOLE, the name of the Senator from Minnesota (Mr. BOSCHWITZ) was added as a cosponsor of S. 76, a bill to increase the retirement age at which full benefits are paid.

S. 137

At the request of Mr. ROTH, the names of the Senator from West Virginia (Mr. RANDOLPH) and the Senator from Maryland (Mr. SARBANES) were added as cosponsors of S. 137, a bill to amend the Internal Revenue Code of 1954 to continue to allow mortgage bonds to be issued.

S. 144

At the request of Mr. DANFORTH, the name of the Senator from Nebraska (Mr. EXON) was added as a cosponsor of S. 144, a bill to insure the continued expansion of reciprocal market opportunities in trade, trade in services, and investment for the United States, and for other purposes.

S. 175

At the request of Mr. DECONCINI, the name of the Senator from Utah (Mr. GARN) was added as a cosponsor of S. 175, a bill to amend title 17 of the United States Code to exempt the private noncommercial recording of copyrighted works on video recorders from copyright infringement.

S. 216

At the request of Mr. THURMOND, the names of the Senator from New Hampshire (Mr. HUMPHREY) and the Senator from Illinois (Mr. PERCY) were added as cosponsors of S. 216, a bill to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic, and other products with intent to cause personal injury, death, or other harm.

S. 421

At the request of Mr. PROXMIRE, the name of the Senator from Colorado (Mr. ARMSTRONG) was added as a cosponsor of S. 421, a bill to require the Comptroller General of the United States to ascertain increases in the cost of major acquisition programs of the civilian agencies of the executive branch; to limit the obligation and expenditure of Federal funds to carry out any major civil acquisition program after there has been a major increase in the cost of such civil acquisition program until enactment of a law providing new authority to carry out such acquisition program, and for other purposes.

S. 425

At the request of Mr. DENTON, the names of the Senator from Oklahoma (Mr. NICKLES), the Senator from Pennsylvania (Mr. HEINZ), the Senator from North Carolina (Mr. EAST), and the Senator from Mississippi (Mr. COCHRAN) were added as cosponsors of S. 425, a bill to provide equal access and opportunity to public school students who wish to meet voluntarily for religious purposes.

S. 432

At the request of Mr. RANDOLPH, the name of the Senator from West Virginia (Mr. BYRD) was added as a co-

sponsor of S. 432, a bill to amend the Clean Water Act to extend the 1984 compliance date for certain recently established requirements.

S. 454

At the request of Mr. BYRD, the names of the Senator from Indiana (Mr. LUGAR), the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from North Dakota (Mr. ANDREWS) were added as cosponsors of S. 454, a bill to provide for an accelerated study of the causes and effects of acidic deposition during a 5-year period, and to provide for grants for mitigation at sites where there are harmful effects on ecosystems resulting from high acidity.

S. 493

At the request of Mr. KENNEDY, the name of the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of S. 493, a bill to provide additional authorizations for programs designed to increase employment including the community development block grant, youth employment and education, senior citizens employment, and other similar programs, to provide training and retraining assistance for dislocated workers, and to provide emergency assistance for the long-term unemployed, and for other purposes.

S. 518

At the request of Mr. CHAFEE, the names of the Senator from Kentucky (Mr. HUDDLESTON) and the Senator from North Dakota (Mr. BURDICK) were added as cosponsors of S. 518, a bill to establish a program of grants administered by the Environmental Protection Agency for the purpose of aiding State and local programs of pollution abatement and control.

S. 544

At the request of Mr. DOLE, the names of the Senator from Tennessee (Mr. BAKER), the Senator from Illinois (Mr. PERCY), the Senator from Missouri (Mr. DANFORTH), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Idaho (Mr. SYMMS), and the Senator from Wyoming (Mr. WALLOP) were added as cosponsors of S. 544, a bill to promote economic revitalization and facilitate expansion of economic opportunities in the Caribbean Basin Region.

SENATE JOINT RESOLUTION 5

At the request of Mr. THURMOND, the name of the Senator from Wyoming (Mr. WALLOP) was added as a cosponsor of Senate Joint Resolution 5, a joint resolution proposing an amendment to the Constitution relating to Federal budget procedures.

SENATE JOINT RESOLUTION 18

At the request of Mr. JEPSEN, the names of the Senator from Pennsylvania (Mr. HEINZ), the Senator from Wisconsin (Mr. KASTEN), the Senator from North Dakota (Mr. ANDREWS), the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from New Mexico (Mr. DOMENICI) were added as cosponsors of Senate Joint Resolution 18, a joint resolution designating September 22, 1983, as "American Business Women's Day."

SENATE JOINT RESOLUTION 21

At the request of Mr. DECONCINI, the names of the Senator from South Carolina (Mr. THURMOND), the Senator from Florida (Mr. CHILES), the Senator from Oklahoma (Mr. NICKLES), and the Senator from California (Mr. WILSON) were added as cosponsors of Senate Joint Resolution 21, a joint resolution to designate April 1983 as "National Child Abuse Prevention Month."

SENATE JOINT RESOLUTION 37

At the request of Mr. HATCH, the name of the Senator from Kansas (Mrs. KASSEBAUM) was added as a cosponsor of Senate Joint Resolution 37, a joint resolution providing that the week containing March 8 of 1983, 1984, and 1985 shall be designated as "Women's History Week."

SENATE JOINT RESOLUTION 38

At the request of Mr. HEINZ, the names of the Senator from Nebraska (Mr. EXON), the Senator from Arizona (Mr. DECONCINI), and the Senator from Maine (Mr. COHEN) were added as cosponsors of Senate Joint Resolution 38, a joint resolution to declare March 18, 1983 as "National Energy Education Day."

SENATE RESOLUTION 49

At the request of Mr. HOLLINGS, the names of the Senator from Rhode Island (Mr. PELL), the Senator from Texas (Mr. BENTSEN), the Senator from Louisiana (Mr. LONG), the Senator from Ohio (Mr. GLENN), the Senator from Washington (Mr. JACKSON), the Senator from North Dakota (Mr. ANDREWS), and the Senator from Delaware (Mr. BIDEN) were added as cosponsors of Senate Resolution 49, a resolution disapproving deferral D83-43, relating to economic development assistance programs.

SENATE RESOLUTION 70—RELATING TO WITHHOLDING OF TAXES ON INTEREST AND DIVIDENDS

Mr. MELCHER submitted the following resolution; which was referred to the Committee on Finance:

S. RES. 70

Whereas, financial institutions and other organizations, required to withhold taxes on interest and dividend income under section 301 of the Tax Equity and Fiscal Responsibility Act of 1982, will experience startup costs beginning in early March 1983 in order to be ready to implement withholding on July 1, 1983, as required in the Act; and

Whereas, a conservative estimate puts the initial costs for the first year of withholding by banks, savings and loan associations, and credit unions at $1.5 billion, a large portion of which will be in startup costs; and

Whereas, States and local governments also face additional costs to initiate new systems to complete exemption forms for each issuer of exempt investments; and

Whereas, such startup costs will be wasted spending if Congress amends or repeals this statute: Therefore be it

Resolved, That it is the sense of the Senate that the effective date for implementation of section 301 of the Tax Equity and Fiscal Responsibility Act, dealing with withholding of taxes on interest and dividends, should be delayed until October 1, 1983, to give Congress time to act on pending legislation amending or repealing this statute prior to the need for large startup expenditures by the private sector.

● Mr. MELCHER. Mr. President, taxpayers that have savings accounts are outraged at a section of the so-called Tax Equity Act of 1982 that arbitrarily requires financial institutions to withhold taxes on the interest or dividends from these savings without regard to the fact that these earnings may not be subject to taxes due to the income levels of the savers. I share their outrage.

Mr. President, today I am submitting a resolution which states that it is the sense of the Senate that the date for implementation of the withholding provisions on interest and dividend income enacted last year should be delayed until October 1, 1983. This delay will give Congress time to act on pending legislation to repeal or amend withholding prior to the need for large startup expenditures by the private sector.

As it stands, the requirement for withholding is a bad piece of tax law and it should be modified. Support for repeal of withholding is growing rapidly in Congress, and it is likely that it will be changed at the first opportunity Congress has to vote on it.

However, financial institutions and other organizations required to withhold taxes on interest and dividend income under the law face large expenditures right now in order to be ready to implement withholding on July 1, 1983. A conservative estimate puts initial costs for banks, savings and loan associations, and credit unions at $1.5 billion for the first year of withholding, a large portion of which will be in startup costs.

In addition, States and local governments must also have new forms filled out and signed by thousands of issuers of tax-exempt bonds to establish their tax-exempt status. This will mean new financial burdens for the State and local governments.

These large expenditures for equipment, additional personnel or outside computer contracts may not be necessary if Congress amends the withholding requirements this year. The simple solution is to bring the issue to a vote right now, before these startup expenditures are made. Pending that outcome, we should make it clear that it is the sense of the Senate that the

implementation date for withholding should be postponed until Congress has a chance to vote on pending legislation to amend or repeal withholding, thus eliminating unnecessary startup expenditures.

I intend to bring this resolution before the Senate for a vote at the earliest possible date. I urge my colleagues to join me in adopting this resolution.●

NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of public hearings before the Committee on Energy and Natural Resources.

On Monday, March 7, beginning at 10 a.m. the Committee will hold an oversight hearing on the Energy Emergency Preparedness Act. Staff contact: Richard Grundy, 224-2564.

On Monday, March 14, beginning at 10 a.m., the committee will hold a hearing on S. 267, to facilitate the national distribution and utilization of coal. Staff contact: Gary Ellsworth, 224-7146.

Both hearings will be held in room SD-366 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written testimony for the hearing record should write to the Committee on Energy and Natural Resources, room SD-360, Washington, D.C. 20510.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON ARMS CONTROL, OCEANS, AND INTERNATIONAL OPERATIONS AND ENVIRONMENT

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Arms Control, Oceans and International Operations, and Environment, of the Committee on Foreign Relations, be authorized to meet during the session of the Senate on Thursday, February 24, at 11 a.m., to hold a hearing on Yellow Rain II—arms control implications.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Indian Affairs be authorized to meet during the session of the Senate on Wednesday, February 23, at 2 p.m., to hold a hearing on the Federal Budget for the administration for Native Americans in the Bureau of Indian Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Indian Affairs be authorized to meet during the session of the Senate on Thursday, February 24, at 2:30 p.m., to hold a budget hearing with the Department of Education, the Department of Housing and Urban Development, and the Indian Health Service.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT MANAGEMENT

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Oversight of Government Management of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Thursday, February 24, 1983, at 9:30 a.m., to hold a hearing on S. 461, Reauthorization of the Office of Government Ethics.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, February 23, at 10:30 a.m., to consider the nominations of Thomas F. Ellis and Michael Novak to be members of the Board for International Broadcasting; and to receive a code word briefing on Lybia and the Sudan by the Honorable Lawrence Eagleburger at 5 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY, NUCLEAR PROLIFERATION AND GOVERNMENT PROCESSES

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Energy, Nuclear Proliferation and Government Processes of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Monday, February 28, at 10 a.m., to hold an oversight hearing on the Oversight of Government Management of the Natural Gas Import Issues.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Energy, Nuclear Proliferation and Government Processes of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Monday, February 28, at 1 p.m., to hold an oversight hearing on the Oversight of Government Management of the Natural Gas Import Issues.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ARMS CONTROL, OCEANS, INTERNATIONAL OPERATIONS, AND ENVIRONMENT

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Arms Control, Oceans, International Operations, and Environment of the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, February 24, at 11 a.m., to hold a hearing on Yellow Rain II.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, February 24, at 10 a.m., to consider the nomination of Kenneth L. Adelman to be Director of the Arms Control and Disarmament Agency.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, February 24, at 5 p.m., to hold an executive session, code word level, to receive a briefing by Lawrence Eagleburger on Libya-Sudan.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Indian Affairs be authorized to meet during the session of the Senate on Wednesday, February 23, at 1:45 p.m., to hold a markup on S. 304 to hold a parcel of land interest for the Burns Paiute Tribe, S. 143 to authorize the twenty-nine Palms Band of Luiseno Mission Indians to lease for 99 years certain land held interest for such band, S. 366 to settle certain claims for the Mashantucket Pequot Indians, S. 419 to provide that per capita payments to Indians may be made by tribal governments and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate of Wednesday, February 23, 1983, in order to receive testimony concerning the following nominations:

U.S. District Judge: Judge Shirley Wohl Kram, of New York, to be U.S. District Judge for the Southern District of New York.

U.S. Court of International Trade: Gregory Wright Carman, of New York, to be a judge of the U.S. Court of International Trade.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Friday, Feb-

ruary 25, at 10 a.m., to hold a hearing on Agriculture Export Trade.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

TIMES BEACH

● Mr. DANFORTH. Mr. President, the Environmental Protection Agency yesterday announced its decision to offer permanent relocation to the citizens of Times Beach, Mo.—a community that has been buffeted by floods and poisoned by dioxin. This is the approach that I advocated to the Agency, and I applaud the decision.

I remain concerned about the Superfund process generally. I believe that the Congress intended Superfund to provide for an immediate response to situations that threaten public health; at times, the response at Times Beach seemed agonizingly slow. Dioxin was confirmed at dangerous levels in Times Beach in early December, but nearly 3 months elapsed before action could be taken.

I do not fault EPA entirely for this. I believe that the Agency took prompt action within its perceived constraints under the law. When the Centers for Disease Control notified EPA that soil samples taken after the flood continued to show a dangerous level of dioxin at Times Beach, the Agency responded virtually overnight. This is as it should be, and I commend the Agency for its action.●

U.S. RELATIONS WITH GREECE: CAUSE FOR SERIOUS CONCERN

● Mr. PELL. Mr. President, in the summer of 1974, U.S. relations with Greece and Turkey entered a period of decline from which they have yet to recover. The critical event was the Turkish invasion of Cyprus—an onslaught which, though provoked by the unsavory and ill-fated Greek junta then in power, proved extreme in brutality and opportunistic in extent. In late 1974 Congress moved to enforce provisions of U.S. military aid law—those which prohibit the use of American arms for offensive purposes—by enacting a partial arms embargo against Turkey. But in 1978 this measure was repealed in response to administration appeals that a resumption of normal United States-Turkish relations would not only serve U.S. strategic interests but would also facilitate an end to the prolonged impasse and Turkish occupation on Cyprus. Unfortunately, no substantial progress has ensued, leaving our triangular relationship in a malaise that has been exacerbated further by a festering Greek-Turkish dispute over sovereignty in and above the waters of the Eastern Mediterranean.

In the process, the American image in Greece's restored democracy has suffered badly from two widespread beliefs: First, that the United States, misguided by a narrow concept of stability, colluded with the military junta that ruled Greece so barbarically from 1967 to 1974; and second, that for similarly shortsighted reasons, the United States now leans heavily toward Turkey—even a nondemocratic Turkey—in evaluating American security interests in the Eastern Mediterranean. In short, corrosive doubts have persisted in Greek public opinion about America's true commitment to democracy—and to Greece.

In lifting the Turkish embargo in 1978, Congress sought to ameliorate such concerns by providing explicitly in U.S. foreign aid law that "the United States will furnish security assistance for Greece and Turkey only when furnishing that assistance is intended solely for defensive purposes" and that such security assistance "shall be designed to insure that the present balance of military strength among countries of the region, including between Greece and Turkey, is preserved." Moreover, to uphold this principle of balance, Congress has in recent years regularly adjusted administration security assistance proposals to provide total military aid to Greece and Turkey in a 7 to 10 ratio. Most recently, this ratio was mandated in the fiscal year 1983 continuing resolution, enacted last December, which provided $280 million in security assistance to Greece and $400 million to Turkey.

Although Congress has consistently encountered administration resistance in making these annual adjustments, the results have apparently proven benign. In 1981, Greek electors did bring to power the PASOK party of Andreas Papandreou on a platform weighted with anti-American rhetoric. But the climate of United States-Greek relations has nonetheless remained sufficiently tranquil to offer hope of an eventual reconciliation on such sensitive issues as the future of U.S. bases in Greece. Indeed, bilateral negotiations on a new United States-Greek security agreement have now been underway for several months, and until just a few days ago seemed to be proceeding toward a mutually beneficial conclusion.

Unfortunately, the recent announcement of the Reagan administration's new security assistance requests has suddenly cast a shadow on this optimistic prospect. For not only has the administration produced fiscal year 1984 aid figures which would depart grossly in Turkey's favor from the 7 to 10 norm; it has also presented a supplemental request for fiscal year 1983 that would, in this very fiscal year, raise Turkey beyond the 7 to 10 ratio mandated by Congress only 2 months ago. Specifically, the administration plan envisages providing Turkey an additional $65 million in fiscal year 1983 assistance, thereby dropping the fiscal year 1983 ratio to about 6 to 10; and then, in fiscal year 1984, increasing the level of Turkish security assistance to an unprecedented $775 million, while leaving Greece constant at $280 million, thereby shifting the ratio still further to Turkey's advantage, to about 3.5 to 10. Were Congress to approve this proposal, it would mean that Greece would suddenly decline to only one-half its previously established security assistance ratio vis-a-vis Turkey.

The result of this announcement—a result as regrettable as it was predictable—has been an outcry from the Papandreou government and a hardening of the Greek position in our bilateral negotiation. In response, administration officials have pointed out that a new United States-Greek agreement could, if and when consummated, be accompanied by substantially increased U.S. aid—and that this possibility has in fact been communicated to Greek negotiators. But this does little to explain why, during a period of great delicacy in United States-Greek relations, the administration has taken a step which, through its adverse effect on the political climate, can only add severe complications to the process of bilateral negotiation.

Related to this unceremonious assault on Greek interests and sensitivities is the Reagan administration proposal relating to Cyprus. For fiscal year 1983, in direct disregard of an explicit legislative earmark of $15 million in economic support funds for that unfortunate nation, the administration has allocated only $5 million, declaring that, if necessary, it will exercise a special waiver authority—normally used only under extraordinary circumstances—to circumvent the congressional mandate. And, as if to underscore this message of indifference, the administration's proposal for fiscal year 1984 slashes the annual Cyprus program by 80 percent, from its $15 million norm to a level of only $3 million.

There is, of course, still time and opportunity for Congress to determine the final levels of U.S. assistance to Greece, Turkey, and Cyprus for both fiscal years 1983 and 1984. But I feel constrained at this juncture to express the most serious concern that, through imprudent timing and bad judgment, the administration has done unnecessary damage to U.S. interests in this crucially important region.●

TAX CUT'S THIRD PART WOULD HELP

● Mr. McCLURE. Mr. President, I am proud to rise today in support of the

third phase of the individual income tax reduction established in the Economic Recovery Tax Act of 1981. There has been some speculation recently that the third part of this tax cut should be modified or eliminated in an effort to reduce the Federal deficit. More importantly there has also been some discussion about delaying the indexing provision, the most important part of that tax bill. I am opposed to either of these proposals or any other proposal that would further burden the American taxpayer.

In November of 1980 I heard a very clear voice coming from the American people. They wanted their taxes cut, the size of Government reduced, and its control returned to the people. The election of 1982 sent Congress a message that perhaps we have moved too quickly and minor modifications are in order. Certainly the message was not to abandon ship and find a new course.

The course we have taken has indisputable direction and long-term prospects for economic reemergence. We cannot allow for major alterations when we are on the verge of success. Inflation is down substantially, interest rates have dropped nearly 7 percent. We have also seen a dramatic upswing in the stock market while the auto and housing industries are also showing strong signs of recovery. Clearly, the most important statistic indicating a recovery is the 0.9-percent increase in industrial output during January. This increase was felt in the unemployment lines where we saw a 0.4-percent decrease.

I would like to share with my colleagues an editorial that appeared in the Idaho Statesman. While I disagree with many of the specifics in the editorial, I agree wholeheartedly with its general thrust. The editorial urges Congress not to delay or repeal the third installment of the tax cut. The best way to curb our deficit problems is to further aid the recovery, which we are in the midst of, by allowing the tax cut to go into effect on July 1. Raising taxes or eliminating the tax reduction is only a short-term answer that further magnifies a long-term problem. The American people deserve more of an effort to reduce the deficit than an initially painless stroke of a pen that increases revenue and momentarily takes the pressure off of Congress and puts it back onto the taxpayers. By cutting taxes and reducing the burden of Government we are encouraging economic productivity. Generating economic productivity that cultivates a recovery is the best way to solve all of our economic ills. Quoting President Ronald Reagan during a speech in 1981: "If not us—then who? If not now—when?" Congress must continue to directly face the challenge of today and have the political courage to administer reductions in inefficient agencies and to restrict many social welfare programs which shower benefits to the nonneedy.

Mr. President, I ask that an editorial on this subject from the Idaho Statesman be printed in the RECORD.

The editorial follows:

[From the Idaho Statesman, Feb. 7, 1983]

TAX CUT'S THIRD PART WOULD HELP

Despite our past criticism of President Reagan's tax cut, we hope Congress will neither repeal nor delay the third installment of the cut, which is scheduled to go into effect in July.

We have not converted to Reagan's supply-side economics theory, which has failed to accomplish what Reagan promised. By coincidence, however, the last phase of the tax cut promises to help the economy by achieving the liberal, Keynesian, demand-side goal of speeding up the economy.

As even Reagan's economic advisers claim, we need the last 10 percent tax-rate cut not just to stimulate supply-side savings and investment, but to put more money in the hands of consumers so they will spend it, stimulating demand and—we hope—recovery.

At the outset, the Reagan tax cut was a serious mistake. If, during his first year in office, Reagan had forsworn the tax cut, had pushed ahead with his domestic spending cuts and had set military spending at a reasonable level, he would have had a better chance of balancing the federal budget.

We believe that keeping the federal deficit down would help curb inflation, reduce interest rates and restore confidence in the economy. Instead, the economy sank into recession. While inflation abated, unemployment set post-World War II records, and the deficit in fiscal 1983—the year for which Reagan originally promised to balance the budget—is expected to soar to more than three times the pre-Reagan-era record.

Now, the deficit is beyond control. The opportunity to control the deficit by forgoing tax cuts is gone. Without tax increases, the only politically acceptable way to curb the deficit, now and for years to come, is to bring about recovery. That's where the tax cut comes into play.

Oddly, just as the demand-side potential of the tax cut's third installment starts getting its due, the Reagan administration signaled Congress last week that it will at least listen to proposals to alter the last phase of the cut. We don't know what's in the cards, but for months economists have painted two basic scenarios.

One scenario holds revoking the last phase of the cut would help the economy by curbing the deficit and high interest rates. The other theoretical script is that implementing the cut will strengthen the recovery by giving people and businesses money to spend.

We'll throw in with those who favor the latter course.●

CLINCH RIVER—STILL OUT OF FUEL

● Mr. HUMPHREY. Mr. President, on December 21 of last year I entered material into the RECORD substantiating the Department of Energy's (DOE's) own projections that it would probably run short of fuel-grade plutonium to fuel the Clinch River breeder reactor. Today I would like to return to this topic. New evidence has surfaced that corroborates my fear that we are building a reactor that we will not be able to fuel.

As I noted before in the RECORD on December 21, DOE's own Deputy Assistant Secretary for Nuclear Materials, Dr. F. Charles Gilbert, believes DOE will not have enough fuel-grade plutonium by the late 1980's to meet projected requirements for weapons blending, fueling the Fast Flux Test Facility and the Clinch River breeder reactor project.

The General Accounting Office (GAO) is also troubled by DOE's fueling plans. In their final report on Clinch River's projected cost dated December 10, 1982, the GAO emphasized that the source and price of Clinch River's plutonium fuel were uncertain.

Recently, the White House Office of Science and Technology Policy announced that it would not attempt to purchase plutonium from the British. Finally, it was made clear at the latest annual meeting of the American Nuclear Society that the owners of the only commercial nuclear fuel reprocessing plant at Barnwell, S.C. (one of DOE's prospective sources of plutonium for Clinch River) do not now believe the plant can be completed in time to supply significant quantities of plutonium for the project's initial fueling in early 1987.

Mr. President, Nuclear Engineering International ran an article last October covering the White House Office of Science and Technology Policy's announcement concerning the purchase of British plutonium. The American Nuclear Society also printed an abstract of the presentation given last November concerning the startup of the Barnwell Reprocessing Plant. I ask that these articles and a copy of a letter from myself and Senators COHEN, HART, BUMPERS, BOSCHWITZ, and TSONGAS to Secretary of Energy Hodel on the Clinch River fueling question be printed in the RECORD.

The material follows:

NO BRITISH PU FOR AMERICA

LONDON.—The United States' administration "will not countenance the use of civil plutonium for military needs" and it has abandoned all ideas of leasing or buying plutonium from Britain.

This was stated by Mr. John Marcum, assistant director, energy and natural resources, in the White House Office of Science and Technology in London last month. Speaking at the Uranium Institute's annual symposium, he said the plutonium from the Barnwell plant would be for the civil programme, especially the Clinch River breeder reactor and other advanced reactor needs.

Reaffirming the administration's strong support for commercial reprocessing, he said that the new incentive for the private sector to re-invest in Barnwell would be for the government to provide a stable market by offering to purchase "a substantial

amount" of its plutonium output. Contractual arrangements would also provide the private sector with assurances against further instabilities in domestic plutonium policies.

Mr. Marcum is reported by the *Financial Times* as saying that the US government was expecting to pay $20 to $30 per gramme for the plutonium separated from LWR spent fuel used by the US utility industry. At a conservative estimate the plant could process 1000t of spent fuel a year, which would yield up to 10t of plutonium. Thus the plant could earn about $250 million from plutonium alone, the government estimated.

Other incentives for private sector reprocessing would, Mr. Marcum said, be official encouragement of foreign participation, "both as customers and equity partners". Licensing would be made as rational and expeditious as possible.

In the meantime, there were no impediments to US utilities having their spent fuel reprocessed overseas. The new plutonium-use policy would also "provide a basis for long-term programmatic approval for advanced nations and allies to acquire reprocessing facilities on the basis of full safeguards and strong support for non-proliferation efforts".

The transfer of enrichment from the government to the private sector was, Mr. Marcum said, a longer-term objective. Initiatives would be developed in the months ahead to make the present operations more responsive to market conditions (see below), eventually facilitating commercial operation. This would help to provide a more stable market for the United States' troubled uranium mining industry, he said.

U.S. SENATE,
Washington, D.C., February 17, 1983.

Hon. DONALD P. HODEL,
Secretary of Energy,
Washington, D.C.

DEAR MR. SECRETARY: We are concerned over the Department of Energy's (DOE's) continued vagueness about the cost and source of plutonium fuel for the Clinch River Breeder Reactor project. As you know, late in 1981, Dr. Charles Gilbert, Deputy Assistant Secretary for Nuclear Materials, publicly testified that a shortfall in plutonium would occur by the end of the decade unless projected plutonium requirements are reduced or a new source of plutonium established.

Since then, we have learned that the L-reactor at Savannah River may not start operating until Spring, 1985. The DOE originally expected it to begin operating by October, 1983. We also have learned that a special DOE advisory panel recently urged the DOE to build a new materials production reactor to secure plutonium supplies for the 1990's. Because construction probably will not begin before 1985, the plant may not be completed until 1995, or later.

To stay within current cost estimates, however, the Clinch River Breeder Reactor will require substantial amounts of plutonium fuel by 1987.

Also, the White House Office of Science and Technology recently announced that the U.S. has abandoned efforts to lease or buy plutonium from Great Britain.

Finally, we have learned the nuclear industry does not now believe the commercial reprocessing plant at Barnwell, South Carolina, will be completed in time to produce significant quantities of plutonium before 1987. Given the nuclear industry's reluctance during the past two years to invest in the Barnwell plant, there is growing doubt that it will ever operate.

Because it could substantially affect the cost of the Clinch River Breeder Reactor, we would like to know when, and from what sources, the DOE intends to obtain the plutonium fuel.

We have included a copy of the General Accounting Office's recent critique of the DOE's official position on this matter. We would appreciate your addressing this critique in your answer, which we look forward to receiving before the end of March.

With warm regards, we are

Sincerely yours,

DALE BUMPERS.
GARY HART.
PAUL E. TSONGAS.
GORDON J. HUMPHREY.
WILLIAM S. COHEN.
RUDY BOSCHWITZ.
U.S. Senators.

[From Transactions of the American Nuclear Society, Nov. 14-18, 1982, Vol. 43]

STATUS OF THE BARNWELL NUCLEAR FUEL PLANT

(A. K. Williams, J. A. Buckham, W. B. Sumner, R. J. Cholister (AGNS), invited)

During the 1960s and early 1970s, the processing of spent fuel from the U.S. light water reactors (LWRs) was expected to become a logical extension of the nuclear industry as commercial nuclear power became established. By the mid-1970s, however, several impediments had emerged that caused the commercial market for reprocessing and related services to deteriorate. Licensing requirements, instead of becoming firmly established, became less definitive. In addition, concern for proliferation of nuclear weapons through use of plutonium from power reactors has complicated efforts to get reprocessing of commercial fuels moving again.

It now appears that reprocessing of LWR fuel may occur not as a purely commercial venture, but one in which the government plays some as yet undefined role. This role is expected to include both incentives for providing reprocessing services and guarantees in the event there is another abrupt change in governmental policy.

The needs for reprocessing LWR fuel include the following:

1. Relief for the problem of on-site nuclear fuel storage;

2. Preparation of the waste products in spent fuel for final disposal;

3. Initial plutonium supply for the U.S. breeder development program;

4. Development of LWR reprocessing technology as a logical basis from which to develop the reprocessing of breeder reactor fuel.

The use of the Barnwell Nuclear Fuel Plant (BNFP) represents the only near-term possibility for providing the necessary services to satisfy these needs. However, it should be recognized that although existing facilities could be ready for operation at an earlier date, completion of the additional facilities needed for continued operation would dictate an earliest startup date of 1987. A schedule for startup of existing facilities, as well as for the new facilities, is shown in Fig. 1. The estimated cost for the additional facilities is $652 million and includes the following major components:

Estimated capital cost—mid-1981

	Millions
1. Densified fuel storage	23
2. Modifications to existing plant	34
3. Security-safeguards	61
4. Site/utilities/support facilities	68
5. Pu nitrate conversion	154
6. On-site waste management	312
Total	652

If krypton recovery is required, additional costs of $80 to $100 million can be expected. The estimated annual operating costs for the existing and additional facilities at the BNFP at equilibrium conditions are approximately $107 million, and would involve a staff of ~1600 people. In the event fuel fabrication facilities are also included at the BNFP, the operating staff would increase significantly.

The major facilities that have been completed at BNFP are fuel storage, separations, and uranium hexafluoride conversion. The fuel storage and separations facilities have been utilized in various U.S. Department of Energy (DOE) funded research and development activities related to fuel storage, proliferation-resistant fuel cycles, and testing of advanced safeguards concepts. Results of these activities have been reported elsewhere. Checkout of the UF_6 facility was terminated, and the facility has been maintained in a standby condition since 1977.

The operability of the separations facility has received some attention in the past few months because of the maintenance concept that utilizes a hybrid of both remote and contact maintenance. This concept is expected to provide continuous service with minimum maintenance. The contact maintenance concept includes the use of gravity flow, no moving parts, and high-quality, high-integrity plant components and facilities, designed and built to last many years with no maintenance.

During early checkout activities and in subsequent experimental runs, several items were identified as needing corrective action prior to hot startup. These include such items as relocation of the disposal system for degraded solvent, adjustments to the air lift system to improve hydraulics, and upgrade of plant instrumentation. In addition, deposits of phosphates, silica, and normal corrosion products were found throughout the process equipment during the early tests, sources of which were identified. To conserve uranium and acid values, cold testing utilized the recycle mode, which resulted in accumulation of solids. Some titanium corrosion was also observed in the acid frationator, but was found to occur prior to 1980. The reasons for abnormal corrosion have been postulated and will be confirmed in future tests. Abnormal corrosion rates have not been detected from the 1980 and 1981 experimental runs.

In conclusion, the BNFP can be considered an operable and licensable reprocessing plant, and it can be used to support not only LWR programs, but also the national waste program and the breeder program. The startup date for Barnwell is contingent on pulling together an organization that can provide the capital for the needed additional facilities. This organization will require

governmental guarantees with respect to changes in licensing criteria and nonproliferation policy.●

LITHUANIAN INDEPENDENCE ANNIVERSARY

● Mr. WEICKER. Mr. President, February 16 marked the 65th anniversary of the establishment of the modern Republic of Lithuania. A proud nation of 3 million people, Lithuania has lived under the yoke of Soviet oppression since 1940. This anniversary should serve as a reminder the Lithuanians should no longer have to endure Soviet subjugation of human rights.

Lithuanians share with Americans a deep commitment to the ideals of freedom and equality. Daily arrests and persecution for crimes against the state cannot crush their age-old spirit of independence. The United States must continue to support this independence by denouncing Soviet injustice in Eastern Europe and defending the right of its peoples to be free.

The United States has always based its foreign policy on a commitment to human rights. We remain dedicated to the basic values of human life and continue to support and defend these values around the world. Because the Soviet Union's actions challenge these principles, we should not tolerate them.

Mr. President, as the leader of the free world, the United States has a duty and special responsibility to assist and defend nations that suffer cruel oppression. We must never forget the oppressed peoples of the world, nor allow their struggle to die.●

REMEMBERING THE CCC

● Mr. JACKSON. Mr. President, many of my colleagues no doubt remember the grim conditions that existed in this country in the 1930's. The Civilian Conservation Corps (CCC) provided hope and relief to countless unemployed and disallusioned Americans during the Depression era.

As a long-time supporter of programs like the CCC and prime sponsor of the Youth Conservation Act and the Young Adult Conservation Act, I would like to draw the attention of my colleagues to an article published in the February issue of the American Forests magazine. Robert T. Egan shares his personal experiences as a young CCC recruit and reminds us of the vital role played by this organization in restoring the physical as well as the spiritual resources of our country.

Mr. President, I ask that Mr. Egan's article be printed in the RECORD.

The article follows:

[From the American Forests, February 1983]

REMEMBERING THE CCC: CITY BOYS IN THE WOODS

RESOURCES BOTH NATURAL AND HUMAN BENEFITED ENORMOUSLY FROM THE WORK OF THE CIVILIAN CONSERVATION CORPS DURING ONE OF THIS NATION'S DARKEST ERAS—CAN THE IDEA WORK AGAIN?

(By Robert T. Egan)

To be a young man at the supper table in 1933 was to be a young man full of shame because you were unable to pay your share toward the food being ladled out by your care-worn mother.

To be a father in 1933 often meant walking the streets all day in search of a nonexistent job, or putting on a fragment of your World War I uniform and standing on a cold and windy street corner, hoping that someone would show their appreciation for your service to your country by buying a five-cent apple from the small supply you sold from an upended crate.

It was a time somewhat like the present, but with today's unemployment and economic paralysis multiplied to a fantastic degree.

It was such a world that awaited me when I was handed my high school diploma by a wise old Irish priest who had delivered the commencement address. He had not attempted to paint a rosy picture of our future, but had instead concentrated on faith in God, faith in our country, and faith in ourselves.

Tossing in my bed at night, I would often hear my mother praying aloud, asking the Lord for a specific favor: "Please don't let the utility company turn off the gas and electric this week"—to which my father, lying in bed beside her, would fervently respond, "Amen to that!"

It was in the local candy store that I first heard about the new CCC camps that were being opened up all over the country. One of my friends who was there that day was a young man who had come home on a weekend leave from a camp in a nearby section of New Jersey. He astounded me by the change in his physique and in his outlook on life—a change that was heightened by his natty forest-green uniform and cap with its golden Civilian Conservation Corps medallion. He looked absolutely transformed from the puny, pasty-faced youth I remembered. Not only was he in good health and in good spirits, but his jingling pockets informed me that he had something in them besides lint.

His version remained with me as I read the daily paper with its accounts of all the bills that were being passed in Congress, and all the agencies being created by the nation's legislators in an effort to restore confidence and enterprise in America.

Towering above all of these was the figure of Franklin D. Roosevelt, a Hudson River Valley aristocrat who was able miraculously to transcend the vast gulf between himself and the millions of unemployed and impoverished Americans who enshrined him in their hearts.

Roosevelt's favorite piece of legislation—and one of the most successful—was the Civilian Conservation Corps, which he fathered in Senate Bill S598. The bill was introduced on March 27, 1933, was passed by both houses of Congress, and the jubilant President signed it on March 31.

The immediate goal was to place 250,000 men in camps within four months. Never in peacetime had such a mass of men been recruited, moved, and billeted in such a brief period. By the time I entered the Corps, the CCC consisted of 500,000 men in 2,600 camps scattered throughout the country.

My parents had misgivings about my joining the "3 C's." My mother feared that I would be given a gun and sent to the "front," and my father thought I would be better off in the local WPA (Works Progress Administration), where he could keep an eye on me. But to a 19-year-old youth, the call was irresistible. I enlisted.

A group of fellow enlistees and myself were bused to Fort Dix, New Jersey, for indoctrination and shipment to an excitingly unknown destination. On a cold midnight in a drafty warehouse, I had flung at me an eclectic and motley collection of World War I uniforms that had been "tailored" for a man twice my size.

"Don't worry, Red; we'll fatten you up," said a tired supply sergeant as he sized up my lack of flesh and muscle.

So smoothly functioning were all the government services of that time—the Army Transportation Corps, for one—that within 48 hours I found myself being lulled to sleep by the clickety-clack of the train wheels taking me west. For the first time I realized the immensity and diversity of our country. I clearly recall the thrill of rounding Horseshoe Bend in Pennsylvania, where enrollees in the first car of the troop train could see their buddies waving to them from the last car on the opposite side of the ravine.

At night, the lights in homes on the prairie reminded me of my own home, and the melancholy whistle of the steam locomotive fittingly expressed my feelings as the train clattered over a rural crossing.

Deep in sleep, I missed the Mississippi River. But I was wide awake when the Rocky Mountains suddenly rose from the plain, bathed in early-morning sunlight that was mirrored in the snow and ice of their peaks. The train chugged on and on through this magnificent country until the greenery began to change to a dustier hue and trees gave way to sagebrush.

My unknown destination turned out to be Elko, Nevada, with a population of 5,000, making it the third largest community in the state at that time. (Las Vegas was then a sleepy Spanish hamlet, and no casinos were to be seen—not even in mirages.)

Trucks picked us up at the railroad station and headed east over dusty roads past Lamoille (I was thrilled to learn that Bing Crosby had a ranch there) to a camp at the mouth of the Ruby Valley. I was stunned by the beauty of desert flowers brought into sudden bloom by an unexpected and rare rain; the flowers were quickly wilted by a resurgent sun.

Darkness had already fallen as our small convoy pulled into the camp's motor pool. The odor of soft coal burning in the iron potbelly stoves of each barrack hung heavily in the desert air. Exhausted from toting dufflebags and clambering off and on trains and trucks, my fellow recruits and I quickly fell asleep in our assigned barracks.

Refreshed by the night's rest, I awoke to the sight of a valley floor drenched with sunlight and also with the spume from a creek that babbled down from its upper reaches in the Ruby Mountain Range.

Reveille (military discipline was very much a part of our daily lives) over, we were assigned to our work details under the supervision of foremen from the Division of Grazing. That part of Nevada contained many ranches, and sagebrush (rather than trees) carpeted the land.

Piled 20 to 30 in a rack truck, we were driven to the various ranches in the area, where we usually assisted the ranch hands as they went about their daily routine. Rare was the "spread" that turned down the offer of 30 young men at absolutely no cost for their labor! The chores there included fence repair and prairie-dog control.

My buddies and I were thrilled by the appearance, personalities, and lifestyle of the cowboys, who were a far cry from Hoot Gibson, Ken Maynard, and others we had seen in the movies. Most of these real-life cowboys regarded us as "tenderfeet" when we somewhat awkwardly performed tasks to which we were not accustomed. A camaraderie quickly was established, however, and some of my most pleasant memories of the West were gained in this manner. (I also recall dining family-style with Basque sheepherders who tended their flocks in the higher reaches of the Rockies. We sat eight to a table, and everyone helped himself from the same pot while sheepdogs looked on in the hope that a scrap would be tossed to them.)

Power lines were built by the Corps, uniting the far-flung ranches with communication and providing them with power for their buildings and equipment. We were often called upon to repair damage caused by flash floods that transformed aroyos or dry gulches into raging streams. Placid rivers became walls of water that brought death and destruction to man, beast, and property. Such tragedy often was forestalled by our work involving the removal of obstacles to the natural flow of the water. Similar to such work was the draining of swamps and bogs, creating land fit for habitation or farming. Roads were built across the desert wastes or through primeval forests.

In the mountainous regions of the East and the West, roadbuilding was particularly demanding work for the boys of the Corps. Material had to be trucked to isolated areas and carried up precipitous slopes and in rarefied air strange to our city-bred lungs. Without the sophisticated roadbuilding equipment of today, we moved huge concrete or metal culverts up the mountains, planting them so that water coursing down the slopes was caught and carried away from the surface of the road. (I often compared my buddies and myself with those ancient Egyptians who dragged blocks of stone from the quarries to the pyramids.)

The forestry camps of the CCC offered us a way of life and work that was particularly appealing. Many such camps had centrally located nurseries where the seeds of various species of trees were planted and tended until they were five or six inches tall. The seedlings grew close together so that transplanting crews could grasp them in bundles, place them in buckets of water, and rush them off to the forestry camps in the area.

I recall being a member of a 14-man crew that worked its way up and over the denuded slopes of eastern farmlands that were beginning to show the effects of soil erosion. We worked in teams—one man with a mattock with which he opened up the soil and, behind him, his teammate who inserted a tree from his pail of seedlings, tamping the soil with the heel of his shoe to "set" it.

Today, the surviving trees we planted are our monuments. Too many of them, however, perished in forest fires—even though the CCC under the supervision of the Forestry Division fought valiantly to save stands of timber (often succeeding in turning back the flames at great risk to themselves).

Trees had other enemies too. Blister rust was a threat, especially to the white pine. The blight was caused by *Cronartium*, a fungus that spread from currant and gooseberry bushes to the tree itself, causing cankers to form.

Another tree 500 feet away would eventually share the contagion if the Corps crew did not remove the fungus-carrying bushes from the entire area. We burned brush only on misty days or while the ground was wet from rain or covered with snow.

Other crews were sent in search of the gypsy moth. Sometimes foremen would put "dummy" nests on trees to test the ability of the boys to detect them. (Alas, despite our efforts, the moths are still with us!)

Watershed work also occupied a good part of our time and efforts. We constructed trails through such areas so that inspectors on horseback could easily patrol the reserves. Trails were built in rustic parks for the pleasure of tourists and local equestrians.

CCC boys were often at the scene of disasters, both national and local. We offered our services in the Great Flood of the Ohio River in 1937, and saved a million sheep in Utah during the blizzards of 1936-37. We also aided the neighboring farmer when the blaze of his barn was mirrored in the windows of our barracks—leading his livestock to safety, securing his personal possessions, and extending heartfelt sympathy for his losses. (This was one of the ways by which we overcame the objections of townspeople who did not want camps of young men in their midst—especially those people with attractive daughters.)

The worst loss of life among CCC personnel occurred on Labor Day of 1935. The tragedy is described in "Roosevelt's Tree Army," a short history of the Civilian Conservation Corps researched by Fred E. Leake and Ray Carter of the National Association of Civilian Conservation Corps Alumni: "There were three CCC camps located on the Florida Keys with 684 World War I vets. Two hundred and ninety six of the men were away on leave for the holiday. A hurricane with winds of 150 to 200 miles an hours struck the area. Knocking out bridges and railroads. The train sent from Miami to evacuate the men was overturned. The official report listed 44 identified dead, 238 missing or unidentified dead and 106 injured. Some of the men were literally sandblasted to death by the wind-driven sand, and when found had no clothing left except shoes and the skin had been rasped from their bodies."

My buddies and I, safe from such natural calamities, spent most of our days in the woods, with lazy clouds drifting above the denuded forests of winter. The coffee pot bubbled on the campfire around which we would gather on our 10-minute breaks. The silence was broken only by the wind and the ringing of axes and the rasp of the two-man saw. With rosy cheeks and the sheer joy of being alive and young, we felt like God's noblest creatures—and we were!

My participation in many of these activities gave me an early understanding of the work ethic and its application to the beautification, utilization, and conservation of my country's resources. The tremendous vistas of the West opened my eyes to natural beauty on a scale I never had experienced among the smokestacks of my home town in New Jersey.

Among the glories of nature, however, daily life continued in the pattern set by those who guided the activities of the boys and maintained discipline in the ranks. We received $30 a month, $25 of which was sent to our parents. The remaining $5 covered entertainment: the movies, the nearest hamburger heaven, the closest bowling alley—even a date with a local girl. These wild expenditures helped to stave off the failure of many small businesses near the camps.

Educational facilities were available in each camp, most of them of the correspondence-school type or civil service. (One of my buddies successfully passed the civil-service test and became a "Jr. Assistant to the Technician" (the latter was a forester) at a salary of $1,020 a year.

Drugs were unknown to us. Alcohol, though it had recently been legalized by the repeal of Prohibition, was used sparingly as befits a $5-a-month budget. In any event, most of us were proud of our new-found muscles and deepening chests. Even on recreation trips to town we either steered clear of the fleshpots or made certain that such trips would not result in anything that would hurt our standing in the Corps.

The camps consisted of three barracks, each housing 40 men. Cots lined the walls, and at the foot of each cot was a footlocker. Lord help the man whose sloppy footlocker failed to pass Saturday-morning inspection by the commanding officer and his lieutenant. The offender's weekend pass would be withheld, and he would be placed on kitchen-police duty or given some other lowly task such as filling in the old latrine and digging a new one.

Three potbellied stoves in each barrack kept us warm, thanks to the weary enrollee who had to feed it coal throughout the night.

A large mess hall, a latrine, canteen, recreation hall, infirmary, and administration building completed the camp. A flagpole was centrally located. We stood in formation in front of it and saluted Old Glory each evening as "retreat" was blown by the camp bugler. A mad dash down the path to the mess hall invariably followed the command to "Fall out!"

Eventually I was transferred back east to a camp at Stillwater, New York, in the vicinity of the Saratoga Battlefield. I was assigned to a group of archaeologists who were seeking artifacts of the engagement that was the turning point of the American Revolution. Such work was typical of the varied contributions made by the CCC to the history and welfare of the nation.

While my companions and I were preparing the dig, I was horrified when I noticed the lusty swings of mattocks as the earth was opened. I remonstrated with my buddies, telling them that spoons and tooth brushes—not pickaxes—were the tools of archaeology. I had visions of a calvary officer's helmet skewered like so much shishkebab as it entered the light of the 20th century. A group of archaeologists overheard me and inquired about my education, hobbies, and things of that nature.

"I'm a high-school graduate," I informed them, not without pride.

"Well, you're also obviously a history buff," observed one of them. "How would you like to be a guide on the battlefield?"

"Would I ever!" I exploded.

I subsequently was given the original ledgers of General Burgoyne ("Gentleman Johnny"), who had commanded the British forces at Saratoga, and the notes of some of the American generals who had defeated him, including Benedict Arnold. I shared the information with tourists.

The restoration of national monuments and parks was by no means the only accomplishment of the Civilian Conservation Corps. There were others:

Almost 97,000 miles of truck roads

89,000 miles of telephone lines

120,000 miles of trails and roads

6,459,000 man-days spent fighting forest fires

21 million acres covered in tree planting, pest control, and disease control

1,356,000,000 (yes, that's *billion*) trees planted

More important, however, were the thousands upon thousands of lives that were given meaning and direction during one of the darkest eras of America's history. Those of us who served in the C's returned home fit in mind and body and, though we did not know it at the time, prepared to stop the war machines of the totalitarian powers in World War II.

My personal rewards were many and enduring. I learned to live in close proximity with my fellow men, gaining and maintaining their confidence in me as an individual and as one of their number. I learned new skills of the type not ordinarily acquired by young men with an urban background. I gained the confidence that subsequently impressed employers and led to a series of responsible positions that were self-fulfilling as well as financially rewarding.

Most of all, I learned to be tolerant about the opinions and beliefs of those who differed from me.

It is my personal opinion, and the opinion of my fellow members in the National Association of Civilian Conservation Corps Alumni, that a similar organization would be of inestimable value to today's youth and tomorrow's natural resources. Indolence, boredom, violence, and self-destruction would be drastically reduced if today's young people were exposed to the vigorous, disciplined life that saved many of us from ourselves at a time when temptation was all around us.

An aging America, a disillusioned America, beset by deteriorating conditions in almost all areas of our national life and its physical plant, would also benefit from the labors of a youth that still is willing and anxious to help. I think especially of the questions of a young girl in the history class of a local high school that had invited me to address its students: "Where do I go to sign up, and do I have to send home all my pay?"●

ECONOMIC HARDSHIP MEASUREMENTS

● Mr. HOLLINGS. Mr. President, in a time of great change and transformation in the American economy, old ways of measurement often do grave injustice to current reality. Lacking adequate indices, we are unable to compete as effectively as we should and to deal with rapidly changing circumstances as we must if we are to remain economically viable. It is vitally important to develop the best possible standards of measurement to tell us where we are because without an adequate fix on the present we careen aimlessly into the future.

One area wherein the best tools of measurement are lacking has to do with employment and labor force hardship. The major indicators we have now—measuring unemployment and poverty—are not designed to give us a comprehensive view of economic hardship in the labor market. Recently, a distinguished panel of experts delved deeply into this issue and came up with some suggestions which I think merit the attention of every Member of this body. The panel demonstrates how unemployment figures both overestimate and underestimate economic need in the labor force, and it proposes a new set of measurements based on some important calculations which obviously need to be considered.

Members of the Advisory Committee on Hardship Measures include Lawrence Chimerine, chairman and chief economist of Chase Econometrics; Eli Ginzberg, Barton Hepburn professor of economics (emeritus), Columbia University; Robert B. Hill, senior research associate, Bureau of Social Science Research; Juanita Kreps, economist and former Secretary of Commerce, chairman of the board of MDC, Inc.; Sar Levitan, director, Center for Social Policy Studies, the George Washington University; Robert Solow, professor of economics, Massachusetts Institute of Technology; Robert Taggart, economist and author of "Hardship: The Welfare Consequences of Labor Market Problems"; and Willard Wirtz, attorney and former Secretary of Labor.

The brief report speaks for itself and speaks to an urgent question. For that reason, Mr. President, I ask that it be printed in today's issue of the RECORD, and I recommend it to my colleagues as a significant contribution to our senatorial dialog.

The report follows:

ECONOMIC POLICY PANEL CALLS CURRENT ECONOMIC HARDSHIP MEASUREMENTS "SERIOUSLY DEFICIENT," PROPOSES NEW ECONOMIC INDICATORS

A panel of economic policy experts today endorsed a new set of indicators for measuring economic hardship in the American labor force.

The panel termed the current basis for assessing labor force hardship as "seriously deficient." The panel, chaired by Juanita Kreps, concluded, "Economic policy is being made in the half-light of statistics which can give an inaccurate portrayal of national needs."

The panel concluded that addition of the new indicators to the official system of labor force measurements would provide for better-informed economic policymaking.

[Other panel members, whose views were summarized in a statement released today, include: Lawrence Chimerine, Eli Ginzberg, Robert Hill, Sar Levitan, Robert Solow, Robert Taggart, and Willard Wirtz. The group was formed in 1980 to review and advise on research on the methods for more accurately determining the extent of economic need among active members of the labor force.]

The statement pointed out that hardship estimates now rely primarily on two indicators—unemployment and poverty statistics—that are not designed to assess labor market-related economic hardship.

These indicators, according to the statement, are capable of simultaneously overestimating and underestimating economic hardship in the labor force. Because they are based on simple conclusions from the past, they do not provide for the complicated individual work patterns which apply in today's economy, the statement said.

Unemployment counts and poverty statistics "are invested with high meaning in the discussion and reporting of economic developments today," the panel stated. "[But] they do not illuminate the real economic condition of the nation's labor force. Instead, they often obscure it."

The new set of measures would supplement these traditional indicators. It would be based on three calculations:

A count of the number of persons in the work force whose individual earnings for the year are less than the minimum wage equivalent for the total number of hours they are available for work;

A count of the number of persons in the work force whose total household earnings are below the poverty level; and

A count of the number of persons in the work force whose total household earnings and unearned income are below the poverty level.

Statistics generated by the hardship counts suggest how unemployment figures both overestimate and underestimate economic need in the labor force. Analyses based on counts for 1979 (the last relatively good year for the economy) and for 1981 show that:

In 1979, more than half of those unemployed at some time lived in households with total annual incomes in excess of $15,000; and

In 1981, roughly 40 percent of those unemployed at some time still earned more than the mimimum wage equivalent for the year.

Simultaneously, however:

In 1979, approximately two-thirds of the labor force members who earned less than a minimum wage equivalent for the year experienced no unemployment; and

In 1981, more than five million workers, who were never officially unemployed, lived in poverty, and the total number of workers in poverty households exceeded the average number unemployed monthly by 1.5 million.

Calculations and analyses of findings for each year from 1974 through 1981 yield other useful economic data. Among them:

While labor market-related hardship is a continuing problem in good times and bad times, there have been dramatic increases in hardship since 1979 (see pages 7 and 8 of the statement).

The safety net under the working poor began to fray well before the arrival of the Reagan Administration (page 7).

There is a relatively higher incidence of inadequate individual and family earnings for labor force members who are women, minority group members, older men and women, and youth. The relative hardship is also greater among all workers living in central cities and rural areas (page 7).

The statement of the panel recommends immediate steps that can be taken, principally by the Bureau of the Census and the Bureau of Labor Statistics, to refine and implement labor market-related measurements (page 10 of the statement).

In conclusion, the statement says:

"It is paradoxical that 'cost' remains a major obstacle—if not the major obstacle—to translating measures of labor market-related hardship from theory to practice. Whether one favors increases or decreases in spending for social programs to relieve

poverty, the lack of measures that would enable policymakers to target those programs more accurately and to determine the extent of need among those attached to the labor market poses a constant threat of waste and extravagance."

* * * * *

The panel has worked under the auspices of MDC, Inc., a Chapel Hill, North Carolina, private, nonprofit corporation engaged in employment policy research. In 1980, MDC received grants from the Charles Stewart Mott Foundation and the Rockefeller Brothers Fund to promote, coordinate, and publicize research and development of new measures for determining labor market-related economic hardship. The work is being carried on in collaboration with the Research Triangle Institute in North Carolina and the George Washington University's Center for Social Policy Studies in Washington, D.C.

ADVISORY COMMITTEE ON HARDSHIP MEASURES

Lawrence Chimerine, Chairman and Chief Economist, Chase Econometrics.

Robert Taggart, economist and author of "Hardship: The Welfare Consequences of Labor Market Problems."

Willard Wirtz, attorney and former Secretary of Labor.

FINDINGS AND RECOMMENDATIONS ON MEASURES OF LABOR MARKET-RELATED HARDSHIP, JANUARY 15, 1983

PREFACE

In March 1980, MDC, Inc., received grants from the Charles Stewart Mott Foundation and the Rockefeller Brothers Fund to promote, coordinate, and publicize research and development of new measures for determining labor market-related economic hardship. That work has been carried on in collaboration with the Research Triangle Institute and the George Washington University's Center for Social Policy Studies. Through that collaboration, the work has also benefited from funding support by the Ford Foundation and the Edna McConnell Clark Foundation to the Center for Social Policy Studies at the George Washington University, and by the State of North Carolina to the Research Triangle Institute.

INTRODUCTION

This statement summarizes the conclusions and recommendations of an independent committee formed in 1980 to review the need for new measures of labor market-related hardship and to determine if valid hardship measures could be instituted on the basis of current research.

For reasons set out in the statement, the committee finds that (1) there is a clear and growing need for new measures linking employment with economic hardship; and (2) valid indicators have been developed and demonstrated. The committee recommends immediate steps to refine and implement those measures.

I. WE FIND A CLEAR AND GROWING NEED FOR NEW MEASUREMENTS OF ECONOMIC HARDSHIP AMONG ACTIVE PARTICIPANTS IN THE LABOR FORCE

Considering the pervasive public concern with employment and unemployment in America today, it seems only sensible that the nation should have an accurate system of measuring economic hardship among those who are working and looking for work.

And yet it does not. The basis for determining economic hardship for active members of the labor force is seriously deficient. We rely primarily on two official indicators—unemployment counts and poverty statistics—which were designed for other purposes. Although these indicators are invested with high meaning in the discussion and reporting of economic developments today, they do not illuminate the real economic condition of the nation's labor force. Instead, they often obscure it. As a result, economic policy is being made in the half-light of statistics which can give an inaccurate portrayal of national needs.

Unemployment rates serve as a barometer of economic activity and the business cycle. But they simultaneously understate and overstate the extent of hardship in the labor force. As indicators of individual need, these rates are imprisoned in history. When unemployment counts were first begun, forty years ago, having a job or not having a job was a roughly accurate measure of the difference between economic well-being and hardship. But today that simple measure no longer applies.

Consider how the impact of joblessness varies in these particular cases:

A laid-off working spouse, son, or daughter in a household where the other spouse continues to earn income at a rate well above the poverty level for families;

A laid-off auto worker with the seniority to qualify for supplemental benefits that, together with unemployment compensation, can provide income equal to 90 percent of his or her previous salary;

An unemployed farm worker who does not qualify for unemployment benefits; and

A laid-off young father, with a non-working wife and two young children, who has no other source of income except 39 weeks of unemployment compensation.

These cases obviously differ from one another to a marked degree. Yet unemployment statistics cannot distinguish between those who suffer genuine hardship and those whose economic condition is only slightly affected. The inaccuracies caused by lumping diverse individual cases into summary unemployment counts are multiplied when the full effects of public and private transfer payments, estimated at 380 billion dollars annually, are figured in.

Furthermore, unemployment rates entirely ignore many of the working poor. The numbers do not reflect those who are employed part-time, or employed at rates of pay too low to support their families. Consider these examples:

The family head with more than three dependents earning the minimum wage; or

The sales clerk who works part-time and does not qualify for unemployment compensation when not called to work.

Such cases will not show up in current unemployment rates although both may involve serious economic hardship.

General poverty statistics are valid indicators of aggregate need. But they cannot accurately indicate how well the job market—the primary source of economic support—is providing for active members of the labor force. These statistics lump the working poor together with the elderly, the handicapped, and others who are neither working nor seeking employment. They further obscure the extent of individual need by failing to take into account the receipt of non-cash benefits such as food stamps, rent subsidies, and medical care.

In short, general poverty statistics do not clarify the imprecise implications signaled by employment and unemployment statistics.

A HISTORY OF SHAKY POLICIES

The existence of these shortcomings in our national economic indicators is not a new discovery. As long ago as the mid-1960's, the Johnson Administration recognized that the lack of adequate measures of hardship hindered its efforts to deal with the problems of the working poor. That administration called for more accurate hardship measurement after it learned that poverty was increasing in ghetto areas even though unemployment in those areas was decreasing, a finding which confounded the conventional wisdom underlying the unemployment and poverty statistics. The problem then was the same as the problem now: The government lacked information on the extent and the nature of the troubles besetting the working poor. The administration did not have the necessary tools to evaluate whether its policies responded to the differing needs of those seeking to work their way out of poverty.

So it is still today. As we debate the significance of 10-plus percent unemployment, many policymakers aruge that the economic impact of current unemployment is not as bad as official rates suggest. To some extent they are right. Others say the economic impact is worse than official rates suggest. And to some extent they are right. But both are drawing their conclusions from inadequate information.

Not surprisingly, the solutions put forth by the policymakers are similarly handicapped. Many of those who play down the significance of high unemployment imply that the rates reflect cyclical unemployment which will be relieved as a natural result of efforts to stimulate general economic recovery. Many of those who see more ominous implications in the rates consider them evidence of increased structural unemployment that will not be relieved by general economic recovery alone and can be a drag on general recovery if they are ignored. Clearly there are elements of both kinds of unemployment in the current counts. But until policymakers have measurements that more accurately assess the extent of each, they will not be able to create a mix of policies to deal with them properly.

The policy predicament posed by 10-plus percent unemployment rates is only one of many areas that would benefit from the insights that more accurate hardship measurements could provide. Indeed, the current climate of sharp reductions in social program budgets makes it more imperative

than ever that our economic planning be guided by correct and thorough information, information which will enable us to identify needs and to target dollars where those needs are the greatest.

The need for federal measures of hardship is further heightened by the Reagan Administration's initiative to decentralize decision-making to state capitals. The Job Training Partnership Act (JTPA), for instance, will put responsibility for employment and training policy in the hands of 50 state councils which have no statistical basis for differentiating between structual and cyclical unemployment in their states. Without hardship data, those councils will be handicapped in trying to provide sound policy guidance for JTPA programs. And without uniform measures to assess the rise and fall of hardship rates, the federal government will be handicapped in trying to determine the effectiveness of the Act.

II. WE FIND THAT VALID INDICATORS OF LABOR MARKET-RELATED ECONOMIC HARDSHIP HAVE BEEN DEVELOPED AND DEMONSTRATED

The Means for Determining Hardship

The research and developmental work [1] reviewed by this committee demonstrates that labor market-related economic hardship can be determined from three basic counts using data that can be developed at reasonable cost from the federal Current Population Survey (CPS). These counts are:

A count of the number of persons in the work force whose individual earnings for the year are less than the minimum wage equivalent for the total number of hours they are available for work;

A count of the number of persons in the work force whose total household earnings are below the poverty level; and

A count of the number of persons in the work force whose total household earnings and unearned income are below the poverty level.

The three counts supplement traditional employment and unemployment statistics. Each count is a significant indicator of economic hardship in the work force. Taken together, they provide the basis for extensive analyses of need among the employed and unemployed and of labor market conditions.

These counts establish the number and percentage of work force participants with inadequate earnings, the number and percentage of work force participants in poverty despite the earnings of other household members, and the number and percentage of work force participants in poverty despite the earnings of other household members and income from other sources (e.g., unemployment compensation, income from savings, cash or non-cash welfare payments).

Using CPS data, it is possible to develop statistically valid hardship counts and rates for the nation and for some individual states. Those data also make it possible to determine hardship among specific occupational groups, ethnic groups, age groups, and by sex among work-force members. In addition to providing more valid indicators of hardship, hardship counts based on CPS data can be used to calculate the potential effect of policy changes, such as an increase in the minimum wage, increases or decreases in cash or non-cash welfare payments, or changes in poverty standards.

[1] The definitions and findings in this statement are based primarily on work by Robert Taggart documented in his book, "Hardship: The Welfare Consequences of Labor Market Problems," The W. E. Upjohn Institute, Kalamazoo, Mich., 1982.

What the Indicators Show

The three counts have been calculated and analyzed for each year from 1974 through 1981 to demonstrate the insights they can provide into labor market-related hardship. The calculations show that, in 1981, in a national work force of 119.7 million persons with an average annual unemployment rate of 7.6:

34.4 million (28.8 percent) had annual incomes below the minimum wage equivalent for all hours they were available for work during the year;

16.6 million (13.2 percent) lived in households with total earnings below the poverty level; and

9.5 million (8 percent) lived in households with total earnings and other unearned income below the poverty level.

The 1981 counts demonstrated how the system of hardship measures can usefully supplement employment statistics. They established that 40 percent of those listed as unemployed at some point during 1981 earned more than the minimum wage equivalent. Yet at the same time, 60 percent of those who earned less than the minimum wage equivalent were never recorded as unemployed. And the 9.5 million work-force members whose total household earnings and income were below the poverty level exceeded the average monthly unemployment figures for 1981 by 1.6 million.

Although the full impact of the current recession had not been felt by 1981, the hardship measures showed there had been dramatic increases in hardship since 1979, the last relatively good year for the economy. From 1979 to 1981, the number of work-force participants with inadequate annual earnings increased by 6.1 million. While the total work force increased by less than 3 million, work-force participants in households with inadequate earnings increased by 3.3 million. And those in households with total earnings and other income below the poverty level increased by 2.4 million.

Analysis of the full period 1974–81 showed that the safety net under the working poor began to fray even before the arrival of the Reagan Administration. The number of persons in households raised above the poverty level by public transfer payments began declining in 1976. It continued to decline in each succeeding year. And the decline was greater among the working poor than in households with no member in the labor force.

Calculations for the relatively good year of 1979 underscored the tenuous link between unemployment and labor market-related hardship. They showed that more than half of those who were unemployed at some time during 1979 lived in households with total annual incomes in excess of $15,000. They established that low hourly earnings and limited hours of employment—not unemployment—were the major causes of hardship. Thus, in 1979, two-thirds of the 28.3 million labor force members with inadequate individual earnings and a similar proportion of those in households with inadequate earnings experienced no unemployment during the year.

The analyses documented the higher rates of inadequate individual earnings for women, minority group members, older workers, and youth. They also showed relatively greater hardship among all workers living in central cities and rural areas.

The 1974–81 calculations illustrated that labor market-related hardship is a continuing structural problem. Like unemployment, it rises and falls with fluctuations in the business cycle. Fluctuations in hardship, however, are less pronounced, and they reflect the persistence of structural problems.

Application of the measures to multi-state regions and individual states showed trends like those for the national labor force—i.e., the incidence of labor market-related hardship fluctuated less than unemployment rates; and the impact of low hourly earnings and limited hours of employment had a greater impact on an annual basis than joblessness. However, state and regional applications also pointed to significant differences in some areas between unemployment rates and rates of individual and household earnings shortfalls.

Current Data Limitations

The basic hardship counters can now be calculated from CPS data for the nation as a whole, for multi-state regions, and for the 10 most populous states. The CPS survey covers too few households in the remaining 40 states to support separate calculations. And CPS data by themselves cannot be used as a basis for hardship counts for local labor market areas in even the largest states.

These gaps in the data base will be eased by the proposed federal Survey of Income and Program Participation (SIPP) which will be tested in 1983. But the lack of data will handicap attempts to assess labor market-related hardship in additional states until the CPS survey is expanded.

Recent research has, however, established a methodology for producing local hardship counts for the 10 most populous states. That methodology would use decennial census data to establish basic hardship counts in all areas of a state for the census year. The counts would be updated annually by relating them to other indicators (e.g., subemployment, discouraged worker, or unemployment statistics). Counts for all local areas would then be totaled and adjusted to coincide with statewide counts from CPS data.

That approach offers a rudimentary way to begin providing hardship counts for decentralized policymaking and funding allocations. It could be extended to additional states through an increase in the size of the CPS survey sample.

III. WE RECOMMEND IMMEDIATE STEPS TO REFINE AND IMPLEMENT LABOR MARKET-RELATED HARDSHIP MEASURES

Further refinement of hardship measures is needed. Nevertheless, steps to implement such measures can and should be taken now. We therefore recommend:

1. Publication by the Bureau of the Census of annual hardship calculations that can be made at modest cost from CPS data for national, regional, and some state work forces;

2. Continuation of the Bureau of Labor Statistics' hardship reports utilizing hardship measures such as those reviewed by this committee;

(BLS now publishes an annual report which, with the addition of the basic counts and related data calculated by Census for the analyses reviewed by this committee, would be an invaluable resource for analysts and policymakers.)

3. Implementation of the Survey of Income and Program Participation (SIPP) and an increase in the size of the annual March CPS survey sample to facilitate the calculation of hardship measures for additional states; and

4. Further research and development to test the methodology for calculating hardship measures for local labor market areas.

These steps would offer immediate help to analysts and policymakers. To promote greater recognition of hardship issues, especially among the general public, we also suggest that a lead indicator be identified among the hardship measures.

Such a lead indicator would serve as a companion to the traditional unemployment rate. It would offer a ready point of reference in judging the economic implications of changes in unemployment rates and differences in unemployment rates among states or between state and national work forces. Any of the three counts would be a valid indicator of need. The rate of inadequate household earnings, however, offers the clearest indicator of economic hardship stemming from labor market-related problems.

It is paradoxical that "cost" remains a major obstacle—if not the major obstacle—to translating measures of labor market-related hardship from theory to practice. Whether one favors increases or decreases in spending for social programs to relieve poverty, the lack of measures that would enable policymakers to target those programs more accurately and to determine the extent of need among those attached to the labor market poses a constant threat of waste and extravagance.●

SIGN UP—OR ELSE!

● Mr. HELMS. Mr. President, I wonder if Senators noted an article in the August issue of Reader's Digest, entitled, "Sign Up—Or Else!"

The article describes a situation in which New York union officials used violence and coercion in a campaign of terror to force a successful electronics company into bankruptcy.

The owner and employees of the company would have been unable to resist this terror in the courts if not for a charitable legal organization based in Springfield, Va.

I applaud the noble efforts on behalf of the workers taken up by Steve Antosh and the Center on National Labor Policy, an outstanding charitable legal foundation located in Springfield, Va.

The Elector-Harmonix case is a grim, forceful reminder to us all. Only when union officials are held responsible for their acts of intimidation and violence can workers truly enjoy the freedom to pursue the American dream.

Mr. President, I ask that the article be printed in the RECORD.

"SIGN UP—OR ELSE!"

(By Randy Fitzgerald)

With $1000 he had saved as an electrical engineer, 26-year-old Mike Matthews founded Electro-Harmonix, Inc., in 1968. The firm designed and manufactured electronic musical instruments and accessories. First-year sales amounted to only $50,000, but ten years later they had reached $5 million. Electro employed 150 persons, nearly all of them black, Hispanic or Asian.

Mike Matthews was a fair-minded employer who cared for his workers. Although most of them began on an assembly line at the minimum wage, they had unlimited opportunities to advance. For example, Willie Magee, a 38-year-old black, worked his way up from unskilled laborer to vice president of sales at an annual salary of $51,000. And Manny Zapata, a Spanish immigrant who spoke no English when he arrived at the company, became director of foreign marketing.

All the technicians who worked with the oscilloscopes, voltmeters and generators that tested Electro's complex electronic products had started out with the company as unskilled laborers. Dozens of others moved up to bookkeeping and office positions while receiving on-the-job training.

Matthews created an environment in which unskilled people could become skilled, productive citizens. His philosophy: workers should advance by merit rather than by seniority. In 1978 Matthews was named New York State Small Business Person of the Year.

The award apparently attracted the attention of the Plastic, Moulders' and Novelty Workers' Union, Local 132 of the International Ladies' Garment Workers' Union (ILGWU). Within weeks, a union official called and said he wanted Matthews to install a union shop in which all workers would have to join the ILGWU. "It won't cost you a dime," Matthews was told. "In fact, you can save money."

Matthews rejected the overture. To persuade employees to sign ILGWU cards, union organizers stationed themselves outside the company's small loft factory on New York City's West 23rd Street. They made little headway. After a few weeks the organizers withdrew in defeat, claiming that Matthews had frightened his workers into opposing the union.

Actually, the organizers failed because Matthews had a remarkable rapport with his employees. Everyone addressed him by his first name, cracking jokes and kidding him as he walked through the factory. Matthews organized parties and outings for his workers. On two occasions he closed down the factory, rented buses and took the entire work force to Long Island for a picnic. He provided his employees with medical benefits and paid vacations. They reciprocated with affection and loyalty.

Three years after the first organizing attempt, the union returned. Alleging that Matthews was abusing the exploiting minorities, organizers distributed union cards to the Electro employees. To call a representative election, signatures were needed from at least 30 percent of Matthews's workers. After a week, fewer than a dozen cards had been returned. Once again the union faced an embarrassing rejection.

On Monday, August 10, 1981, a raucous crowd of about 50 people assembled in front of Electro. As Matthews approached the building's entrance, he was accosted by five toughs. One slugged him in the face, another two pulled at him from behind, while two others kicked him. As employees emerged from the subways in the morning, they were confronted and offered money for lunch, and then asked to sign union cards. If they refused, they were pelted with eggs or threatened with fists and clubs. Pho Kham, a 20-year-old Laotian refugee who had escaped communist tyranny a year earlier, was warned, "Sign up or you'll go to a hospital!" Ecuador-born Fausto Quevedo, 48, was told by an organizer that if he did not support the union, he would be shot in the legs. Employees trying to enter the building had to run a gauntlet of shoving, kicking, punching and screaming organizers the union had sent in. Even though police arrived to set up barricades, only about 20 of Matthews's employees were able to get inside. Production came to virtual standstill.

For the rest of the week employees were threathened and taunted as they tried to report for work. On his way home one evening Steve Griffin, 25, was ambushed by four union thugs and struck over the head with a bottle. On another night union vandals crept into the building and poured glue into door and elevator locks.

The following week the union's campaign of terror resumed in full force. When he left work at 5 p.m. on Tuesday, August 18, customer-service representative Geoff Becker was accosted by several union goons. One of them slammed a fist into the side of Becker's face, knocking him unconscious. For six weeks after the attack Becker experienced horrible headaches, until a brain operation, to remove a blood clot caused by the blow, relieved the pressure inside his head.

By Wednesday Electro's labor force had been reduced to a handful of frightened, angry workers. Since police were unable to assure Matthews that his workers could be protected beyond the plant entrance, he closed the company and sent his employees home.

On Thursday morning, after a TV report the previous evening had shown union organizers involved in violent acts, police assigned additional officers to the area. The next day Matthews and about 60 of his employees assembled at the Fifth Avenue subway entrance and marched to Electro in open defiance of the pickets. They were now more determined than ever to survive the union campaign of terror.

Over this period of picketing and harassment, Matthews and his work force had maintained high morale in the face of accumulating financial problems heightened by the union's disruptive tactics. And then, convinced that Electro could not survive, the Philadelphia lender that had backed Matthews withdrew its funding. It was a savage blow. Faced with a credit cutoff, Matthews searched desperately for other financial backing. He did not find it.

On August 25, just as suddenly as they had appeared, the union organizers were gone, ending three weeks of abuse and hooliganism. But not before seven of them had been arrested on charges including assault, disorderly conduct and harassment. (The charges have since been dismissed.) It seemed to Matthews that the union had intentionally set out to bankrupt him and make unemployment statistics of his workers.

For the next five months Matthews and about 40 employees hung on valiantly in an effort to save the company and their jobs. Even when he fell four weeks behind on their wages, his employees kept reporting for work, determined to stand by Matthews in his hour of need.

On January 18, 1982, the National Labor Relations Board ordered the union to "cease and desist" from threatening employees of Electro-Harmonix, inflicting physical harm upon them, or giving them money in return for their signatures on union cards.

But this condemnation of union violence and coercion was too little and too late to help Mike Matthews and his employees. Electro-Harmonix had been without phone service or electricity for over three months, the workers toiling by candlelight. The employees, like Mike Matthews himself, were broke.

A week after the board's ruling, Matthews held a tearful farewell party with his em-

ployees, closed down the factory and filed for bankruptcy.*

Determined to get back on his feet, Matthews came up with the capital necessary to buy back many of his assets at a public auction held last March. He is once again in business and has rehired 35 of the employees who stuck with him so loyally. He vows to work his way back up to previous successful levels and is doing all he can to promote legislation that would make union terror like this a federal crime.

In a statement given to a Senate subcommittee last December, Matthews wrote: "My employees and I know from painful personal experience how terrifying life can be when government fails in its responsibility to protect its citizens from violent hooligans."●

*The union and Electro have filed claims against each other. The union alleges Electro engaged in unfair labor practices. And former Electro employees are seeking medical and other expenses from the union.

MONTREAL PROTOCOLS

● Mr. HOLLINGS. Mr. President, once again efforts are underway to bring the Montreal protocols to the floor for debate. During the last Congress I joined several of my colleagues in preventing the quick consideration and ratification of these treaties. I oppose them because of my firm conviction that they are not in the best interest of the American flying public.

Previously, Mr. President, I have, in some detail, spelled out the concerns I have with the protocols so I need not restate them here. Regardless of the impetus for the treaties, or the relative merit or lack of merit of the treaties, it is my belief that there is little general understanding of the impact that these treaties will have on the rights of the international airline traveler. In my opinion, the detriments outweigh any benefit that might be forthcoming with ratification.

The New York Times, today, offers insightful commentary on the Montreal protocols. This informative editorial voices many of the concerns I have with the Montreal protocols, Mr. President, and, therefore, I take this opportunity to call it to the attention of my colleagues.

Mr. President, I ask that the editorial appear in full at the end of my remarks.

The editorial follows:

[From the New York Times, Feb. 23, 1983]

KEEP AIRLINES ACCOUNTABLE

An obscure international agreement to set new limits on airline liability to crash victims seems finally headed for Senate debate. Negotiated eight years ago but still unratified, it would both improve and diminish protection for travelers—and clearly improve the protection for airlines. The pact's weakness outweighs its strength.

The basic agreement on international aviation was negotiated in Warsaw in 1929, just two years after Charles Lindbergh demonstrated the potential for spanning the oceans by air. Now observed by 117 countries, it set uniform rules for ticketing, baggage checks and cargo waybills. Its most controversial section establishes ceilings for how much airlines must pay for loss of life, limb or property in a crash of an international flight.

The Warsaw Convention has been modified over the years and would be changed again by the pending 1976 agreement, known as the Montreal protocols. Among other things, it would raise from $75,000 to about $120,000 the maximum liability of an airline for a passenger's injury or death. This increase was something of a concession to the United States, which for reasons of social policy or legal tradition has favored higher limits than most other signatories and fought for them. (Washington has also worked out an insurance supplement for crashes of international flights in American territory, but this would be financed by a $2-per-ticket surcharge, not by the airlines.)

Supporters argue that besides raising the liability limit the protocols would speed up the settlement of passenger claims, overcoming some obstacles of multiple jurisdictions. This could relieve much anguish.

But the protocols also contain an important catch. They would close off the present opportunities for going to court to try to prove an airline at fault and thus to break the basic liability limit.

A higher limit and greater efficiency in processing claims are desirable. But the most important consideration is air safety. The right to go to court helps to keep the airlines aware that there is no ceiling on the value of human life.●

WATT'S ECONOMIC FOLLY

● Mr. JACKSON. Mr. President, "privatization" and "good stewardship" are not synonymous terms for many of us. Interior Secretary Watt seems to be of a different opinion, however. He believes that by selling off our public lands, we will rid our Nation of excess property and at the same time help to offset its $1½ trillion public debt. Many of us have expressed our strong objections to this shortsighted and ill-conceived disposal scheme and do not view "privatization" as consistent with the Secretary's role as trustee of our Nation's public land heritage.

Thomas A. Barron's February 16 New York Times article entitled "Watt's Economic Folly" makes a compelling case for a more responsible approach for the management of the public's natural wealth. I commend this article to my colleagues and ask that it be printed in the RECORD.

The article follows:

[From the New York Times, Feb. 16, 1983]

WATT'S ECONOMIC FOLLY

HIS SALES OF PUBLIC LANDS: A DISASTER

(By Thomas A. Barron)

Take your most valuable personal property—your home, life savings or business. If you placed this property under a trustee's protection, you would demand that he manage it conservatively and sensibly, to preserve its long-term value for your children. If the trustee suddenly started liquidating your most valuable assets for only a fraction of their market value, you would fire him immediately.

Interior Secretary James G. Watt is such a trustee. You and I have entrusted him with safeguarding an immensely valuable portfolio of assets: our public lands. His job is to manage those assets wisely, to earn revenues, to develop needed resources, and, above all, to preserve the trust principal for future generations. For two centuries, administrations of all political views have managed the national assets. As prudent trustees, they have understood that mistakes can be expensive and irreversible, so they have customarily erred on the side of preservation over development. That is no longer the case.

Mr. Watt, completely rejecting his predecessors' cautious approach, has spearheaded "privatization." Although he has defended his radical departure on economic grounds, his policy is actually an economic disaster. The theory behind privatization sounds attractive: The virtues of private enterprise should be applied to any Federal properties with possible commercial value. The Administration, however, uses the theory to justify pushing as much property as possible, as rapidly as possible, into private hands regardless of market conditions. The result has been a rash of unbusinesslike sales that have driven down the market price of prime public assets, creating windfalls for lucky purchasers but robbing the taxpayers and Treasury of enormous revenues.

The Administration is selling off up to 35 million acres of public land—an area the size of Massachusetts, Maine, New Hampshire and Vermont combined. Mr. Watt openly disregards the risk that unsystematically dumping these properties on real estate markets will cause severe underpricing.

Mr. Watt is vastly accelerating the amount of Federal coal properties leased or sold, regardless of the huge oversupply of coal on the market. In the 1982 Federal coal sale in Wyoming's Powder River Basin, the Government's receipts averaged only 3.5 cents per ton, far below the average 19 cents per ton brought by comparable tracts in the region within the previous 18 months. Although independent estimates of the value of the tracts ran as high as $250 million, and the Interior Department's own regional office originally set the minimum acceptable bid at $95 million, Mr. Watt's sale garnered only $55 million. Despite such wasteful sales and a continuing market glut, he is now expediting the disposition of 10.7 billion more tons of Federal coal.

The Administration plans to double the amount of timber cut from national forests by the year 2000, despite the current three-year surplus of Federal timber that has been bought but not yet cut. This aggressive plan would remove trees faster than our forests can replenish them. It risks depleting our timber supply, causing future shortages.

Mr. Watt has tried to open several of our last remaining wilderness areas to oil and gas drilling, despite studies that show that less than 1 percent of the 48 contiguous states' potential onshore reserves are in wilderness areas.

Despite declining oil prices, he is striving to lease virtually all the remaining one billion acres of coastal waters to oil companies—25 times the total amount of acreage leased since the program began in 1953. This could cost the taxpayers up to $46 billion.

Why is the richest nation on earth conducting bankruptcy sales? Mr. Watt's answer: The cash will help offset the national debt. But even if the Government met its own goal of raising $17 billion over five years from the outright sale of proper-

ty, this would offset only 3 percent of the interest on the debt in that period—and not even touch the $1 trillion principal. Furthermore, Mr. Watt ignores the obvious dangers of dealing with a perpetual revenue problem through the onetime sale of irreplaceable assets.

This economic folly is compounded by Mr. Watt's arrogance: "I have never been criticized by anyone I respect." His missionary zeal to immediately liquidate Federal assets denies our heirs any voice in determining whether, when and how their trust principal might be sold. Does his great haste to divest spring from a fear that they might choose a different course?

No economic theory can justify privatization-at-any-cost. Only Mr. Watt's personal ideology can. His faulty economics demonstrates that he is as oblivious to the rules of the marketplace as he is to the rules of responsible leadership. He is selling off the principal of our trust—at bargain prices.

We should immediately fire the trustee.●

RULES OF THE COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

● Mr. HELMS. Mr. President, paragraph 2 of the rule XXVI of the Standing Rules of the Senate requires that each committee of the Senate publish its rules in the CONGRESSIONAL RECORD not later than March 1 of each year.

Therefore, I submit for the RECORD the following rules which were adopted by the Committee on Agriculture, Nutrition, and Forestry to govern committee procedure for the 98th Congress. These rules are identical to those adopted by the committee for the 97th Congress.

The rules follow:

RULES OF THE COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

1. Regular meetings shall be held on the first and third Wednesday of each month when Congress is in session.

2. Voting by proxy authorized in writing for specific bills or subjects shall be allowed whenever a majority of the committee is actually present.

3. To assure the equitable assignment of members to subcommittees, no member of the committee will receive assignment to a second subcommittee until, in order of seniority, all members of the committee have chosen assignments to one subcommittee, and no member shall receive assignment to a third subcommittee until, in order of seniority, all members have chosen assignments to two subcommittees.

4. Six members shall constitute a quorum for the purpose of transacting committee business: *Provided*, That for the purpose of receiving sworn testimony, a quorum of the committee and each subcommittee thereof shall consist of one member.[1]

DANIEL R. McLEOD

● Mr. HOLLINGS. Mr. President, I rise today to give recognition to a good friend and very distinguished South Carolinian, Daniel R. McLeod, who, after 24 years of dedicated service as attorney general of South Carolina, recently retired from office.

Dan McLeod sets the standard by which not only South Carolina's attorney general should be measured, but, in my opinion, the standard by which all State attorney generals should be measured. His standard was excellence. In devoted service to the citizens of South Carolina he consistently demonstrated mature judgment, expert knowledge of the legal process, outstanding character, and a loyalty to the traditions of constitutional government which we all cherish. The fact that he was six times elected by the citizens of South Carolina to this important and demanding position is tribute itself of the respect that Dan commanded.

On January 6, 1983, Dan's friends and associates joined in grateful tribute to acknowledge his exemplary contribution to our State. To commemorate the occasion and recognize my good friend, who is the "dean" of South Carolina attorney generals, if not all State attorney generals, I submit the following excerpts from the program printed in his honor and ask that they be printed in the RECORD.

The material follows:

AN HISTORICAL PERSPECTIVE

Daniel R. McLeod was born in Sumter, South Carolina, on October 6, 1913, the fourth son of the Reverend Daniel Melvin and Bertie Estelle (Guyton) McLeod. His father, a Methodist minister, served as the pastor of many churches and, for that reason, Mr. McLeod grew up throughout South Carolina. His college education was interrupted first by the Great Depression of the 1930s and then by World War II. He attended Wofford College in 1932-1933 but the next year left school to work in a CCC camp building fire towers throughout the State. He continued his college education on part-time basis from 1935 to 1940 while he was also employed full-time in a variety of jobs. As the clouds of war loomed, he joined the United States Navy and served from 1940 until 1945, primarily in decoding, spending from 1941 to 1943 in London attached to the United States Embassy as an assistant naval attache on the staff of Admiral Alan G. Kirk, Commanding Officer of Amphibious Forces—Atlantic Fleet. By the end of the War, he was the commanding officer of an LST. After being discharged as a lieutenant in 1945, he entered the University of South Carolina Law School, where he graduated with a bachelor of laws degree in 1948. He practiced law with a Columbia law firm for a short while before he joined the South Carolina Attorney General's Office in 1949 as an assistant attorney general under retiring Attorney General John Daniel. In 1958, Attorney General T. C. Callison announced his retirement after serving two terms and Dan McLeod became a candidate for the office in the Democratic primary. After winning the primary, he ran unopposed in the general election and took office on January 14, 1959. He has held the office from that date to the present.

His first term of office, 1959-1963, was in large part concerned with the then-pending civil rights legislation ultimately enacted by Congress in 1964. Along with Governor Hollings, he testified before the judiciary committees of both houses of Congress numerous times. At home, he conducted an investigation of the penitentiary system, which led to far-reaching changes including the formation of the present Department of Corrections. Following through on a campaign pledge to reform the insurance laws, he was actively involved in supporting legislation enacted during his first term which forms the basis of the State Department of Insurance today.

His second term of office, 1963-1967, was marked by the increased involvement of the federal government in the area of voting rights, culminating in the passage of the Voting Rights Act of 1965. On behalf of the State of South Carolina, he initiated the lawsuit in the original jurisdiction of the United States Supreme Court which challenged the constitutionality of that legislation. He also tested the constitutionality of the apportionment of both houses of the South Carolina General Assembly. On the State government level, he was instrumental in the enactment of legislation assuring all public officials and employees in South Carolina of representation from his office when legal actions are brought against them for acts done in the performance of their official duties.

The period 1967-1971, his third term of office, was undoubtedly the most tumultuous of his career. Declarations of martial law throughout South Carolina were commonplace—the riot at Orangeburg State College, the Charleston hospital strike, the closing of the State parks, the demonstrations at the State House, the sit-in at Rock Hill, the overturning of school buses in Lamar—all of these events occurred during this four-year period. One positive result of the upheaval was that it brought about the passage of needed legislation providing for election law reform, a public employees' grievance procedure and the interchange of local law enforcement personnel and jail facilities among cities and counties in emergency situations.

During his fourth term of office, 1971-1975, a new State Constitution was being developed and the local government and judicial reform amendments were of particular significance to his office. He initiated litigation challenging the then-current court system and thus helped to bring about the implementation of the unified judicial system. He also sued several large drug companies to halt price fixing of broad spectrum antibiotics and recovered a vast amount of money which was then earmarked for public health.

In 1975-1979, his fifth term, his office assisted in the implementation of the home rule legislation, coordinating with local legislative delegations in educating the voters about the expanded role of cities and counties in South Carolina. The recurring controversy over the ownership of the marshlands heated up again during this period. Of enormous importance was the passage of the Freedom of Information Act, which he had recommended and assisted in drafting.

His sixth and final term, 1979-1983, was marked by successful challenges to significant pieces of legislation, including the creation of a court of appeals and a joint legislative appropriations committee. His office also became increasingly involved in the prosecution of politically sensitive crimes and in the enforcement of consumer protection laws.

[1] For further restrictions with respect to proxies and quorums in the reporting of measures and recommendations, see rule XXVI, paragraph 7, of the Standing Rules of the Senate.●

Dan McLeod retires as the senior Attorney General in the United States after a career manifesting the highest caliber of public service. Among his many awards is the Wyman Award presented to him in 1967 by the National Association of Attorneys General in recognition of his outstanding accomplishments. He has been active in that organization, chairing various committees and serving on its executive committee. He is a long-standing member of the Washington Street Methodist Church, where he has taught Sunday School for many years. He also belongs to the Rotary, the Cosmos Club and the Round Fifteen Club. In December, 1958, Ellen LaBorde McLeod, his wife of seventeen years and the mother of Dan, Jr., and Elizabeth Ann, died after a long illness. In 1962, he married Virginia Hart, who has been throughout his career as Attorney General one of his greatest assets.

If leaders are best remembered for their actions taken during crisis and their decisions made amidst controversy, then Dan McLeod's greatest achievement has been his steadfastness in difficult times and decisions when, as during the turbulent 1960s, he stood:

"Like the cliff against which the waves continually break; But, which stands firm and tames the fury of the water around it."—Marcus Aurelius

---

[From the Columbia Record, 1965]

CHATTERING LIKE MAGPIES

One of our constant preachments has been a fundamental truth of American life: the studied ignoring of state responsibilities inevitably leads to the erosion of state rights.

Too many South Carolinians, for too many years, have prattled about the rights of the sovereign states without ever doing anything about local responsibilities. Like magpies, these Carolinians have whistled: "States' rights, states' rights, states' rights" and when the moment of decision has come to finance through local taxation, social needs of a state's citizens, they have whistled "No, no, no!"

The sober truth is that we in South Carolina have done nothing about very serious problems that we should have solved before the Federal government entered the picture.

It is good to find one civil servant, Attorney General Daniel McLeod, who has the courage to point out in public address our inconsistencies.

"The inaction of the states," he said in a talk to Manning Rotarians, "has led to the encroachments of the Supreme Court and of Congress upon states' rights. They (the states) have not obeyed their own Constitutional dictates. They have not kept the faith."

McLeod cited the Clarendon County school case as an example. Before the court in 1954, the state of South Carolina was forced to admit that Negro school facilities, although indeed separate, had not been kept equal and were in fact inferior to those enjoyed by white students.

Additionally, the voting rights legislation in Congress has come about "because we have not kept the faith so far as elections are concerned. There has been widespread abuse of elections. Many have often failed to vote, though all admit the importance of voting."

These matters are water over the dam. What of the future?

The attorney general's counsel should be accepted by all Carolinians. "We must exercise our system of states' rights," he said, "without too much dependence on the Federal government. States' rights begin here, at the grassroots level; their proper exercise can make our country great and make our country free."

He said that the only hope is for the states to return to an acceptance of their responsibilities to provide legislation where it is needed, tackling problems before the Federal government does.

Practically, the major problem will involve a restoration of control of tax funds by the states themselves. This is being accomplished, partially, by a maximum of local determination and control in several new Federal programs—including some of the anti-poverty programs.

But the most feasible plan advanced yet is the Heller proposal for the Federal government to return tax monies, unencumbered, to the states. Those very conservative Congressmen and Senators, including South Carolinians, who would alter the plan to retain the money at the source are behaving like Don Quixotes and are damaging, rather than assisting, state's rights.

The other immediate task is for the states to recognize the local needs of the citizenry and meet them, with courage and foresight.

Otherwise, a lot of Carolinians will be chattering like magpies: "States' rights, states' rights: no, no, no!"

[From the Greenville News, 1971]

DAN MCLEOD'S 'LAW AND ORDER'

Short, stocky Daniel R. McLeod, the graying attorney general of South Carolina, is an exemplary advocate of law and order. Though in the past he prosecuted hundreds of blacks and defended the Old South's "way of life" all the way to the U.S. Supreme Court, he believes that the law binds both whites and blacks.

That is why he could take Circuit Judge Wade Weatherford of Gaffney to the State Supreme Court last week, charging that he had no business letting the three white men convicted of rioting in the Lamar school bus incident go free after serving less than their full sentences.

It was not the kind of thing McLeod had to do. Judge Weatherford's action could have been quietly ignored, as it probably would have been by most elected officials in the South. After all, prosecuting the three initially was not popular among many white Southerners. Trying to send them back to jail is tempting political fate.

But Dan McLeod has been South Carolina's attorney general for a long time now, and the people of that state have learned to respect him. He honestly believes that the law is the law. When the state law he was charged with upholding as attorney general called for segregation, he upheld it. When federal law prevailed and called for desegragation, he upheld that, too.

He makes the phrase "law and order" mean something more than a Southern slogan for keeping black people in their places. He thinks it ought to keep convicted white rioters in their places, too.●

NEW U.S. WEAPONS ARE RAISING NUCLEAR FEARS

● Mr. DODD. Mr. President, if U.S. arms control policy is to be effective in reducing the dangers of nuclear war, it must look beyond current disputes and present capabilities and address those problems looming just over the horizon. One such emerging problem is the development by both nuclear superpowers of substantial first-strike capabilities. If current trends remain unchecked, the nuclear arms balance could become dangerously unstable, with each side's ICBM's on a hair trigger.

One perceptive and thoughtful observer of this issue is our distinguished colleague from Delaware, Senator BIDEN, who has warned us of this impending situation and has urged special attention to crisis stability in our arms control negotiations.

I ask that two articles from the Washington Post which help detail Senator BIDEN's analysis be printed in the RECORD.

The articles follow:

[From the Washington Post, Jan. 4, 1983]

(By Joseph R. Biden Jr.)

NO FIRST STRIKE

The controversy over the MX missile has obscured a much more serious issue—the projected expansion of U.S. capabilities for launching a disarming first strike against the strategic missile forces of the Soviet Union.

If these plans are unchecked by effective arms-control agreements—agreements much different from those proposed by the Reagan administration—we face the risk that both superpowers will put their nuclear forces on a hair-trigger, leaving a margin for error so narrow that a computer malfunction or a misread radar blip could lead to annihilation.

According to unclassified data analyzed by the Congressional Budget Office, the United States today has an arsenal of about 2,500 hard-target warheads, too few to permit a high-confidence attack of two nuclear weapons each on Soviet silos and command bunkers. By 1996, however the combined effect of planned U.S. strategic modernization programs—the MX, Trident II and cruise missiles, along with the B1B and Stealth bombers—will triple our capabilities. The planned 1,000 MX missile warheads would account for only slightly more than 10 percent of this potent force.

Our concern about the theoretical vulnerability of our Minuteman missiles has been mitigated by our confidence in the survivability of our Poseidon and Trident nuclear submarines and strategic bombers on alert. Even after a surprise attack, we would have several thousand surviving warheads and the means for delivering them in a devastating counterattack against the Soviet Union.

From a Soviet planner's perspective, however, a U.S. capability for destroying the U.S.S.R.'s land-based missiles (over 70 percent of Soviet strategic forces), as well as submarines in port and bombers on the ground, would constitute an overwhelming first-strike threat.

Of course, the United States does not—and should not—intend to initiate a strategic nuclear exchange. But military planners everywhere are obliged to focus on capabilities rather than intentions. Just as we structure our defense on the hard evidence of Soviet capabilities rather than on ambiguous and changeable assessments of Soviet intentions, we must expect the Kremlin to do the same. The easiest, most likely Soviet response to the expanison of American hard-target forces is to put their own mis-

siles on a quick-launch hair-trigger, the same posture our own military experts considered but rejected as too dangerous and destabilizing.

In time, the Soviets might deploy more of their missiles at sea, although they understandably have less confidence in the survivability and retaliatory effectiveness of their submarines. If instead they develop a large mobile ICBM force, the chances of obtaining tight and verifiable arms-control agreements will sharply diminish. In the meantime, with a fragile nuclear balance, we will be in a period of maximum danger.

Unfortunately, the administration's arms-control proposals will not prevent either nation from posing a first-strike threat to the other's land-based forces. Under the START plan, each side could still have 2,500 highly accurate ICBM warheads, at least three for each ICBM (up to a total of 850) allowed to its adversary. START, therefore, will not put a stop to the danger of mutual first-strike vulnerability.

The history of nuclear arms control has been disappointing precisely because arms-control agreements have consistently lagged behind the technology curve—limiting yesterday's weapons while preserving today's development programs and thus ensuring further security problems tomorrow. With the possible exception of the 1982 treaty on anti-ballistic missile systems, we have never successfully harnessed the future threats that inevitably become the present danger.

We now recognize, with the usual acuity of hindsight, the catastrophic consequences of our failure to prevent the development of multiple-warhead (MIRV) missiles in the late 1960s. Even hard-line opponents of earlier arms-control agreements now suggest a return to single-warhead missiles.

The SALT II treaty, with its limits on warheads and new missile types, would have at least postponed the period of mutual vulnerability. Now, given the rapidly developing new systems on both sides, we must devise new solutions or risk nuclear instability toward the end of this decade.

We don't have much time. We must invest the few years we do have in negotiations toward agreements conferring no first-strike advantage to either side.

It is insufficient to limit our focus to symbolic objectives like numerical equality, lower force levels and matching capabilities. Instead, we should concentrate on achieving crisis stability where neither side could gain advantage by striking first and where both have confidence in their retaliatory forces. To achieve such stability, we have to link our weapons programs directly to our negotiating strategy so that neither contradicts or cancels out the other.

Until and unless we make this linkage, our strategic programs—and, similarly, new Soviet systems—will only exacerbate, rather than solve, our security problems. Defense programs unrestrained by consideration of likely Soviet responses and their consequences will, ironically, weaken deterrence. And the tens of billions of dollars spent on these new technologies will result ultimately, not in American superiority, but in greater mutual insecurity.

[From the Washington Post, Dec. 27, 1982]

NEW U.S. WEAPONS ARE RAISING NUCLEAR FEARS

(By George C. Wilson)

A few days before Congress adjourned, Sen. Joseph R. Biden Jr. dared to suggest publicly that the Soviets soon will have more to fear from our nuclear weapons than we now fear from theirs.

While that might sound like good news, it is bad news if one accepts the popular wisdom of the nuclear age that the best way to keep the United States and the Soviet Union from blowing each other up, along with much of the world, is to make pushing the button first look suicidal.

But new nuclear weapons both sides are building challenge that wisdom as never before.

Missiles are becoming so accurate and powerful that there may be no way to keep land missiles from being destroyed in a surprise attack.

This increases the temptation to fire at the first warning of attack rather than risk having missiles caught in their silos.

War planners in both Washington and Moscow must deal with the growing arsenal of first-strike weapons threatening their countries.

The Soviets already have their SS18 and SS19 silo busters on the line and are working on a better one. The United States plans to have two new silo busters deployed before the decade is out: the MX land missile in 1986 and the D5 Trident II submarine missile in 1989.

Biden is one of the few senators who has stepped back far enough from the debate over how the MX should be based to warn of the possible long-range consequences of deploying such weapons. He told Defense Secretary Caspar W. Weinberger at the Senate Foreign Relations Committee hearing last week:

"The Soviet Union has to assume the worst, since in fact we were the only nation to ever drop a nuclear weapon; since in fact we have been the only ones who ever demonstrated the willingness to do that. I believe we never will, but it is prudent for them to plan [for] it . . . .

"With the MX missile, and with the D5, we will be in a position, if we were to choose, which we are not going to choose, to inflict serious damage, overwhelming damage upon the Soviet Union if we struck first—a first-strike capability that far exceeds what the Soviet' first-strike capability is now. Everything that I have been told leads to that conclusion.

"If that is true, I do not know how we can reach an arms control agreement with the Soviet Union if neither of those items are negotiable."

Weinberger replied, "I am not really going to get into any kind of hypothetical speculation about the United States making a first strike or what would happen if we did, because it is totally opposed to our policy. Our policy is to deter a first strike." He added that President Reagan's arms control proposal "provides for substantially, vastly lower levels than now exist on both sides."

The SS18, SS19, MX and D5 are all designed to carry several nuclear warheads into space and launch each one at a precise point along the flight path. Once dropped off the missile "bus," the warhead is supposed to glide like a paper airplane to its target and explode over the missile silo or on the ground near it. Sending two warheads to one missile silo, thus bracketing it with thousands of tons of explosive power, virtually assures destruction of present-day silos.

The Pentagon claims the Soviets already have so many silo-busting missiles that their warheads could bracket the existing U.S. force of 1,000 Minuteman and 51 Titan intercontinental ballistic missiles, destroying 90 percent of them. It would take less than half of the Soviets' land missile force to do this, according to the Pentagon.

The United States is responding to this threat both defensively and offensively. It is searching for better ways to base land missiles to ensure they could survive a surprise attack by even this new generation of warheads. It is building the MX and D5 hard target killers to threaten the Soviets in kind.

Although Weinberger stresses that the United States has no intention of launching a first strike against the Soviet Union with these new missiles, war planners the world over focus on capabilities, not proclaimed intentions. And there no longer is any secret about the first-strike capabilities of the Soviet and American blockbusters already deployed or on the way.

In contrast to the secrecy wraps the Air Force tried to put on first-strike capabilities of missiles in the past, former Air Force chief of staff Lew Allen Jr. has said that "it is a fact that the MX program will have some first-strike capability."

Air Force Brig. Gen. J. P. McCarthy, in briefing the House Appropriations subcommittee on defense on the MX "Dense Pack" deployment scheme, said that with that new weapon "we put Soviet hard targets at risk, which is the principal reason why we need the MX missile."

As for the D5 missile destined to go inside Trident submarines, it, too, will have first-strike potential, at least in the eyes of Soviet worst case planners, because its warheads will be accurate and powerful enough to blow up silos or underground command centers. Rep. Thomas J. Downey calls the D5 "the ultimate first-strike weapon" because the submarine could fire it at such a low trajectory that Soviet warning radars could not see it coming.

Edward Rowny, chief U.S. negotiator at the strategic arms reduction talks (START) in Geneva, told The Washington Post that "we want the Soviets to worry about our counterforce capabilities in the 1990s the way we have been worrying about theirs in the 1980s." A counterforce weapon is one that can destroy missile silos or other protected military forces.

Rowny reasoned that such mutual counterforce threats would help, rather than hinder, arms control negotiations, while critics contend that such a gun-to-the-temple approach threatens to destabilize the balance of terror between the two superpowers.

Forty House members are so alarmed about the dangers of the United States and the Soviet Union menacing each other with first-strike weapons that they have introduced a resolution in an attempt to force the Congress to look before it leaps any farther down this path.

The resolution, to be reintroduced next year, calls for Congress to resolve that as part of the START talks the United States and the Soviet Union "should place the highest priority on efforts to reduce and eliminate the fear by either nation of a nuclear first strike against it by the other, and should seek a verifiable agreement that produces stability in the strategic relationship between the two nations by ensuring that a nuclear first strike would not confer upon the attacking nation even a hypothetical advantage."

Rep. Albert Gore, Jr., son of the senator who took a leading role in arms control efforts in the 1960s; Rep. Les Aspin, a member of the House Armed Services Committee,

and Downey, a former delegate to the arms control talks, are at the forefront of sponsors trying to make the resolution a vehicle for assessing the long-term consequences of deploying first-strike weapons.

They contend that it is no longer the number of weapons that threatens to upset the balance of terror, but the type of weaponry. START, they warn, would allow each side to deploy so many silo busters that neither nation's land missiles would be safe from being bracketed by nuclear warheads.

A recent Library of Congress analysis buttresses this view by concluding that, under START, both the United States and the Soviet Union would be able to gang up on each other's land-based missiles with multiple, independently targetable reentry vehicles, known as MIRVs. Rowny confirmed that this could happen under START, adding that it underscores the need to find a way to make land missiles more survivable.

Gore said in an interview that the long, vain struggle to find an impregnable home for the MX should serve notice that "the only way to make it survivable is through arms control."

He said that even if the United States and the Soviet Union deployed the same number of silo-busting missiles, there would not be a stable balance of terror. Each side would still worry about losing its missiles to the other, he said, and "this would be an instable balance."

By pushing for deployment of large numbers of the MX and D5 missiles, Gore contended, the Reagan administration is trying to open up "an intimidation gap" on the Soviets. "The window of vulnerability is really vulnerability to political intimidation," he said. "The intimidation stems from the fear that one side might carry out a successful first strike."

Aspin said he believes the prime objective of arms control should be "to reduce the probability of war breaking out." Under this definition, he said, the United States and the Soviet Union would be less likely to start a nuclear war if each knew the other had so many weapons that not enough of them could be knocked out in a first strike to make it worthwhile; the retaliatory wave would be too great.

Even if both sides should agree to deploy a smaller number of first-strike weapons, Aspin reasoned, "we've got an unstable situation because the guy who fires first has the advantage."

He said he has been voting to develop the MX and D5 hard target killers because he did not want to give the Soviets a free ride and "I wanted to force the issue up" at the talks in Geneva.

Asked why Weinberger has not endorsed the first-strike resolution, Downey said, "The people around him are patently hostile to arms control." Downey added his opinion that, on the basis of congressional questioning, Weinberger does not understand the geo-political implications of strategic weapons such as the MX and the D5. Downey said it is simplistic of Weinberger and others in the administration to keep saying that the president wants to reduce the number of weapons on each side without at the same time appreciating that "it is the types of weapons that are important, not the number of weapons."

The effort to gain control of silo-busting weapons is reminiscent of the unsuccessful effort in 1969 of then senator Edward W. Brooke Jr. to persuade President Nixon to halt development of MIRV warheads, which now confront the United States and the Soviet Union with first-strike threats. Lamented former secretary of state Henry A. Kissinger in looking back in 1974 on the administration's decision to go full speed ahead with MIRV: "I wish I had thought through the implications of a MIRVed world."●

PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of a proposed sale shall be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point a notification which has been received.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., February 18, 1983.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-17, concerning the Department of the Army's proposed Letter of Offer to Lebanon for defense articles and services estimated to cost $25 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

WALTER B. LIGON,
Acting Director.

Attachments.

[Transmittal No. 83-17]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Lebanon.

(ii) Total Estimated Value: Major Defense Equipment,[1] $21 million; Other, $4 million; Total, $25 million.

(iii) Description of Articles or Services Offered: One hundred seven M113A2 armored personnel carriers, to include communications equipment and M2 .50 caliber machine guns, spares, and support equipment.

(iv) Military Department: Army (USA).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: None.

(vii) Section 28 Report: Included in report for quarter ending December 31, 1982.

(viii) Date Report Delivered to Congress: February 18, 1983.

[1] As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

LEBANON—ARMORED PERSONNEL CARRIERS

The Government of Lebanon has requested the purchase of 107 M113A2 armored personnel carriers, to include communications equipment and M2 .50 caliber machine guns, spares, and support equipment at an estimated cost of $25 million.

This sale will contribute to the foreign policy objectives of the United States by enabling Lebanon to increase its capability to provide for its own security and defense. As the Lebanese Government reasserts itself in the wake of recent hostilities, well equipped and trained armed forces are essential to assuring the nation's sovereignty.

These armored personnel carriers will be used to upgrade one brigade and equip one additional brigade of the Lebanese Army. The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be FMC of San Jose, California.

Implementation of this sale will require the assignment of four additional U.S. Government personnel to Lebanon for 10 days at the time of vehicle delivery.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

THIRTY-EIGHTH ANNIVERSARY OF IWO JIMA FLAG RAISING

● Mr. BURDICK. Mr. President, today is the 38th anniversary of the raising of the flag of the United States on Mount Suribachi, Iwo Jima, Japan, by the 28th Marines. One of the marines on Mount Suribachi that day was Tom Stallman, a lifelong resident of North Dakota, and a friend and assistant of mine.

The raising of the flag on Mount Suribachi did not end the battle for Iwo Jima. It became one of the bloodiest battles in the long and heroic history of the Marine Corps. Tom Stallman saw the battle through nearly to the end.

History has treated thoroughly the valiant and determined and successful Marine Corps assault on Iwo Jima. I cannot add to that. But, as a nation, we are everything that we as individuals have been. No single event in our long history can lay claim to any monopoly of our citizens' patriotic service. But, we need to take occasions such as today to remind us of where we have been, and honor those who served and survived, and those who served and did not.●

RULES FOR THE COMMITTEE ON SMALL BUSINESS OF THE U.S. SENATE FOR THE 98TH CONGRESS

● Mr. WEICKER. Mr. President, pursuant to rule XXVI, paragraph 2, of the standing rules of the Senate, I submit for publication in the CONGRESSIONAL RECORD, the rules of the Committee on Small Business for the 98th Congress, which were adopted by the

committee on January 26, 1983, as follows:

RULES OF PROCEDURE OF THE COMMITTEE ON SMALL BUSINESS, U.S. SENATE, 98th CONGRESS

1. GENERAL

All applicable provisions of the Standing Rules of the Senate and the Legislative Reorganization Act of 1946, as amended, shall govern the Committee and its Subcommittees. The Rules of the Committee shall be the Rules of any Subcommittee of the Committee.

2. MEETINGS AND QUORUMS

(a) The regular meeting day of the Committee shall be the first Wednesday of each month unless otherwise directed by the Chairman. All other meetings may be called by the Chairman as he deems necessary, on three days notice where practicable. If at least three Members of the Committee desire the Chairman to call a special meeting, they may file in the office of the Committee a written request therefor, addressed to the Chairman. Immediately thereafter, the Clerk of the Committee shall notify the Chairman of such request. If, within three calendar days after the filing of such request, the Chairman fails to call the requested special meeting, which is to be held within seven calendar days after the filing of such request, a majority of the Committee Members may file in the Office of the Committee their written notice that a special Committee meeting will be held, specifying the date, hour and place thereof, and the Committee shall meet at that time and place. Immediately upon the filing of such notice, the Clerk of the Committee shall notify all Committee Members that such special meeting will be held and inform them of its date, hour and place. If the Chairman is not present at any regular, additional or special meeting, the ranking majority Member present shall preside.

(b)(1) Nine Members of the Committee shall constitute a quorum for reporting any legislative measure or nomination.

(2) Six Members of the Committee shall constitute a quorum for the transaction of routine business, provided that one minority Member is present. The term "routine business" includes, but is not limited to, the consideration of legislation pending before the Committee and any amendments thereto, and voting on such amendments.

(3) In hearings, whether in public or closed session, a quorum for the taking of testimony, including sworn testimony shall consist of one Member of the Committee or subcommittee.

(c) Proxies will be permitted in voting upon the business of the Committee by Members who are unable to be present. To be valid, proxies must be signed and assign the right to vote to one of the Members who will be present. Proxies shall in no case be counted for establishing a quorum.

(d) The Chairman and Ranking Minority Member shall serve as ex officio members of all subcommittees on which they to not serve as members.

3. HEARINGS

(a)(1) The Chairman of the Committee may initiate a hearing of the Committee on his authority or upon his approval of a request by any Member of the Committee. The Chairman of any subcommittee may, after approval of the Chairman, initiate a hearing of the subcommittee on his authority or at request of any member of the subcommittee. Written notice of all hearings shall be given, as far in advance as practicable, to Members of the Committee.

(2) Hearings of the Committee or any subcommittee shall not be scheduled outside the District of Columbia unless specifically authorized by the Chairman and the Ranking Minority Member or by consent of a majority of the Committee. Such consent may be given informally, without a meeting.

(b)(1) Any Member of the Committee shall be empowered to administer the oath to any witness testifying as to fact if a quorum be present as specified in Rule 2(b).

(2) Any Member of the Committee may attend any meeting or hearing held by any subcommittee and question witnesses testifying before any subcommittee.

(3) Interrogation of witnesses at hearings shall be conducted on behalf of the Committee by Members of the Committee or such Committee staff as is authorized by the Chairman or Ranking Minority Member.

(4) Witnesses appearing before the Committee shall file with the Clerk of the Committee a written statement of the prepared testimony at least 24 hours in advance of the hearing at which the witness is to appear unless this requirement is waived by the Chairman and the Ranking Minority Member.

(c) Witnesses may be subpoenaed by the Chairman with the agreement of the Ranking Minority Member or by consent of a majority of the Members of the Committee. Such consent may be given informally, without a meeting. Subpoenas shall be issued by the Chairman or by any Member of the Committee designated by him. Subcommittees shall not have the right to authorize or issue subpoenas. A subpoena for the attendance of a witness shall state briefly the purpose of the hearing and the matter or matters to which the witness is expected to testify. A subpoena for the production of memoranda, documents and records shall identify the papers required to be produced with as much particularity as is practicable.

(d) Any witness summoned to a public or closed hearing may be accompanied by counsel of his own choosing, who shall be permitted while the witness is testifying to advise him of his legal rights.

(e) No confidential testimony taken, or confidential material presented to the Committee, or any report of the proceedings of a closed hearing, or confidential testimony or material submitted voluntarily or pursuant to a subpoena, shall be made public, either in whole or in part or by way of summary, unless authorized by a majority of the Members of the Committee.

4. AMENDMENT OF RULES

The foregoing rules may be added to, modified or amended: provided, however, that not less than a majority of the entire Membership so determine at a regular meeting with due notice, or at a meeting specifically called for that purpose.●

CONCLUSION OF MORNING BUSINESS

Mr. BAKER. Mr. President, will the Chair inquire if there is further morning business?

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

RECESS UNTIL 1:15 P.M.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now stand in recess until 1:15 p.m. today.

There being no objection, the Senate, at 12:05 p.m., recessed until 1:15 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mrs. KASSEBAUM).

QUORUM CALL

The PRESIDING OFFICER. The Chair, in her capacity as a Senator from Kansas, suggests the absence of a quorum.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HUMPHREY). Without objection, it is so ordered.

SHIPPING ACT OF 1983

Mr. BAKER. Mr. President, to review the bidding, so to speak, last evening the Senate adjourned. This morning, when we reconvened, it seemed for a brief and tantalizing moment that we might work out an arrangement for a time certain to vote at least on cloture on the bill which we are trying to consider, which is the shipping bill, so called, S. 47, Calendar Order No. 13.

After a series of conferences and conversations on that subject, it became clear that, at this moment, at least, it was not possible to work out that agreement. I choose those words, I hope, with care and precision because I place the emphasis on "this moment." I continue to hope that we can work out an arrangement that will permit us to get on this bill promptly, to debate it as the Senate may wish and finally to dispose of it, including a vote on cloture and finally the bill itself in due course. But it is clear that is not possible at this moment.

Therefore, I have no further unanimous-consent requests to make at this time. But I urge Members who have a particular and significant interest in this matter to continue to try to come to terms on how the matter might be resolved procedurally.

In the meantime, Mr. President, I think there is no alternative except to try to reach the matter by unanimous consent or by motion. In a moment I will put a request. I fully expect that my friend from Ohio will object to that. He knows, of course, if he does object I will move to the consideration of the shipping bill. That motion is debatable, the morning hour having ended.

Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar Order No. 13, S. 47.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Objection.

The PRESIDING OFFICER. There is an objection.

Mr. BAKER. Mr. President, I now move that the Senate proceed to the consideration of S. 47, the shipping bill, Calendar Order No. 13.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, while the majority leader is still on the floor, I would like to say that indeed we did come very close to striking an accord with respect to a time certain to vote on a cloture motion and agreement, if that were to be the case, to forgo further debate in connection with the motion to proceed and to get on the bill itself.

As I had indicated this morning, I was not prepared to object and attempted to make it clear that I felt that there were Members on both sides of the aisle, Members such as Senator THURMOND who has a number of amendments, Members such as Senator HATCH who has some major concerns with respect to the bill, and any number of others who do wish to address themselves to the bill.

However, I think that the discussions broke down on a question of what would happen, when and if this measure is adopted by the Senate, assuming that the Thurmond amendments might very well be adopted. A concern that some of us had was that what might be gained on the floor of the U.S. Senate might be lost in conference committee if the conference committee makeup were not sufficiently protective of the position of the Senate.

I might say that, speaking for myself—and I think I reflect a number of views from a number of other Members—if at any time you can work that matter out so that both of these committees that have strong interests in this matter—the Commerce Committee and the Judiciary Committee—are satisfied, I would be prepared to permit the motion to proceed to go forward without further debate, and I also would be accommodating and would be prepared to enter into an agreement with respect to a time certain on a cloture vote.

Having said that, we are not at that point at this moment. I understand the efforts on the part of the majority leader. Under the circumstances, I gather that there is really no alternative at this point but for us to continue to debate, at least on the motion to proceed. But if there are any developments along that line, I am, for one, prepared to sit down in a conciliatory manner and try to work the subject out.

Mr. BAKER. Will the Senator yield to me for a moment without losing his right to the floor?

Mr. METZENBAUM. Without losing my right to the floor and without it being considered as a second speech.

Mr. BAKER. Mr. President, I thank the Senator. Of course I will consult with him if there are further developments on the matter, and indeed, I hope there will be further developments. But one way or other we have to dispose of this matter, and I will keep him advised.

Mr. METZENBAUM. I appreciate the responsibility of the leader and I thank him for his efforts in attempting to bring this matter to an amicable solution.

Mr. President, I intend to debate this matter and discuss it and indicate some of the aspects of it that, in my opinion, are not in the best interest of the American people nor the economy.

But so that those who are in earshot of my remarks may know my position, I am prepared to yield to any other Member of the Senate who wishes to address themselves to this subject, whether in support of the motion to proceed or in opposition to the motion to proceed.

Yesterday, I spoke about the fact that this bill would, in the main, help financially ocean carriers who wish to engage in a cartel with respect to setting prices and allocating shipping routes and really in essence to eliminate competition. Yesterday, I pointed out that 72 percent of the cargo that is affected by this bill is carried by foreign carriers and that 80 to 85 percent of the carriers affected by this bill are foreign carriers.

I further pointed out that the Bureau of Competition, speaking on behalf of all five members of the Federal Trade Commission, in a rare and unusual circumstance, came before the committee and indicated its opposition to this legislation. Now that is unusual because that is the first time that they have done that in the last 2 years, since May of 1981.

But, beyond that, there has been some change in the makeup of the Commission. Three of those members are members of the majority party, and two are members of the minority party. Two members including the chairman are appointees of this administration. So you have this situation where this matter is so egregious that we find the Bureau of Competition making it a point that they are speaking on behalf of all five members of the FTC in opposition to this bill because they know that it will increase the cost to the American consumer.

There is not any person who believes in free competition, Democrat or Republican, conservative or liberal—no matter what the political philosophy—who really in good conscience can say that this legislation will foster competition.

I address myself for the moment to the Presiding Officer who has a different political philosophy than I have. The fact is that this bill is eliminating free competition. It is permitting a cartel to operate. It is driving up consumer prices. It is helping foreign carriers far more than American carriers. It is opposed by the House Republican Research Committee as not being good legislation and not being in accord with Republican philosophy.

This bill is opposed by the Wall Street Journal, by the New York Times, and the Washington Post.

The bill is opposed by the National Farmers Union, National Farmers Organization, the American Association of Retired Persons, the Consumer Federation of America, Congress Watch, and the Consumers Union. Every consumer would have to be against this bill, but every believer in free enterprise ought to be against this bill because it is an antifree enterprise bill.

Antitrust is not a new subject in our country. It first came into being when a Republican Senator by the name of John Sherman, who I am proud to say came from my State, caused to come into being and led through this Congress a measure known as the Sherman Antitrust Act. Over the years it has been interesting to note how both Republican and Democratic administrations have stood up and fought for effective antitrust legislation and enforcement.

I wish every Member within earshot of my voice to note what I am about to say because this Senator has on occasion after occasion sharply challenged the position of the present head of the Antitrust Division of the Department of Justice, Mr. Baxter. I have not hesitated to say that I thought he ought to return to the campus at Stanford University because he did not believe in antitrust enforcement and he did not believe in some of the decisions that the courts have made over a period of years.

But having said that, I want this body to understand that this man with whom I totally disagree in so many matters, and whom I have claimed has not been in favor of effective antitrust enforcement, on this matter, he, too, believes it is bad legislation and is opposed to it.

As a matter of fact, there was little time which the Judiciary Committee was accorded to consider this matter. Mr. Baxter was supposed to come before our committee to testify, but apparently he got his marching orders from other members of the Cabinet that he was not to appear and he did not appear. But there is no secret about the fact—and it is an openly dis-

cussed matter—that Mr. Baxter is opposed to this legislation because it has to do with horizontal price fixing. That is price fixing between two competing ships—only in this case many more than two—entering into a cartel. Under those circumstances, who wants this bill, other than the carriers' lobby?

My good friend from Washington has said "Do not worry. The bill also authorizes a cartel for the shippers."

Well, that is not going to help very much because many of the shippers involved in that cartel are big enough and strong enough to protect themselves, but it is the little guy, the small businessman, who is being forced out of business because he cannot stand the heat, because he cannot afford to keep his prices up and he wants to cut his price to get a fair share of the business.

The recyclers of this country came before our committee and said, "This bill will practically decimate our industry. We will not be able to ship overseas. The price will be too high, and if we cannot ship overseas we may not be able to be in business in this country."

That would affect our balance of payments and that would add to the bankruptcy rate in this country. So why pass it?

The American Association of Exporters & Importers indicated they are opposed to this bill. The Dow Chemical Co., indicated they are opposed to this bill. The National Farmers Union indicated they are opposed to this bill.

I would like anyone to tell me and explain to me how this bill could possibly help any farmer in this country. My colleagues in this body, including myself, each of us, have a strong constituency of farmers who are striving at the moment to keep their heads above water and to keep their farms from being foreclosed on.

Look at it. If it costs more money to ship soybeans, grain, cotton, wheat, or corn overseas, how can that help the farmer? Is it not bound to have a negative impact? Will it not add to the cost when he competes with the farmers from Argentina, the farmers from Australia, and the farmers from other parts of the world?

How can anyone in this Senate who is concerned about the American farmer vote for this bill? It is no secret that it will add $3 billion to the cost.

My good friend from Washington says, "The shippers are going to be protected because they are permitted this cartel and it is not going to hurt."

I say to Members of the Senate if it is not going to hurt, why are the carriers so much for it? The carriers are for it because they can set prices, divide markets, determine where and how ships will traverse the waters.

Now I want to say one other thing to every Member of this body who is concerned about our economy in general. How is it going to help anybody that ships their products overseas? It has to add to the cost. That means that there will be less product shipped overseas. It means that our balance of trade will be that much more negative.

How is it going to help the American people? What possible advantage can there be in permitting this cartel to fix their prices?

This legislation should never be on the floor of the U.S. Senate. This legislation is not in the public interest. This legislation is harmful, it is hurtful, and I cannot for the life of me understand why the administration is pushing it. There must be something about it that I do not understand.

It is not going to help our subsidy problem because, if anything, it may wind up costing us more in subsidy according to the House Republican Research Committee.

It is not going to help the carriers avert bankruptcy because they are not anywhere close to bankruptcy at the moment. Every single one of them is doing well, according to every published figure that I can find. Nobody has come forward and said that the American carriers, or even the foreign carriers, are desperately hurting.

The GAO has published a report based upon their investigation. That investigation indicated that the American shipping industry is not hurting. I think it was in that report, as well, that I read that every investigation of the American shipping industry has shown that the industry is not worthy of self-regulation.

Some would come and say, "Well, Senator, this bill does not do much more than that which is presently in the law, because under the law at the moment, there may be an exemption from the antitrust law by filing your tariffs with the Federal Maritime Commission." Well, indeed, that is the fact. But then, when you file it, you have the burden to prove that the rate is in the "public interest." The courts have already decided that being in the "public interest" would mean that price competition and concern for the antitrust laws would be taken into account.

(Mr. PRESSLER assumed the chair.)

Mr. METZENBAUM. Another major problem with this bill, Mr. President, is that it moves the shipping industry in exactly the opposite direction that the Congress has taken with respect to every other transportation industry. We have moved the airlines into a brave new world of competitive pricing and the result has been $99 coast-to-coast fares in comparison with fares several times that before deregulation. In all fairness, in some instances, that has also meant that some communities have not had adequate air service, so there indeed is a positive and a negative result. But the fact is that the Congress moved in the direction of deregulation. Deregulation has occurred in the trucking and rail industries by reason of the action of Congress and we shall soon see its effects in the bus transportation sector.

For years, we used Government oversight to watch over price levels and the availability of a range of services in the transportation sector. We have now stepped aside to let the invisible hand of the free market do the regulating instead. But for some reason, we are considering exempting ocean shipping from the discipline of the free market and from regulation as well.

Is this not contrary to the stated public policy and philosophy of our current administration? As I have said before, competition is not liberal or conservative doctrine; it is an American doctrine, at the core of our free enterprise system. This bill is the anti-free-enterprise bill of the session to date.

What, then, is so different about this industry that we would simultaneously free the cartels from both the rigors of the marketplace and the safeguards of regulation? One argument I have heard is that competition is somehow destructive in the ocean shipping business. Mr. President, all that has been destructive about competition in this industry is that the cartels have been so successful in eliminating it.

The industry claims that current law must be changed because the industry has caught itself in a vicious circle of wasteful service competition. It is certainly true that ocean carriers have engaged in vigorous service competition. Now they would have us eliminate this aspect of the free market.

What am I talking about, when I say "service competition"? I am talking about the quality of service. I am talking about the number of deliveries. I am talking about something that every Member of the Senate ought to concern himself about if he has a port in his State. That is the allocation of market areas.

There is nothing in this bill that would secure to the small ports continued service on the ocean carriers. It will be possible for ocean carriers to decide to eliminate some of the small ports in Louisiana, in South Carolina, in Florida, in New York, in Pennsylvania, and Ohio and every other State in this country that is visited by the ocean carriers. Why should they waste their time going to some small port? That costs money. So it would be much easier just to cover the big ports and then say, "Well, we are sorry, you will have to send your product by train or truck for the balance of the trip."

One of the things that is pretty interesting in this bill—and I ask my col-

leagues to pay close attention to what I am about to say. That is that this bill does something very, very unusual. It provides an exemption with respect to the antitrust laws being applicable when the carrier arranges for through transportation.

Do you know what that means, Mr. President? I shall tell you what it means. It means that if an ocean carrier were to travel from some small distance, perhaps from some island 90 miles from the United States, and arrange that the products from that island or to that island would then be transported across the United States, maybe from Florida up to Seattle, the entire agreement would be exempt, exempt from the antitrust law.

Think of what I am saying. I am saying that once you are in ocean transportation under this bill, you get an exemption from the antitrust laws being applicable to the entire transit route.

Nobody cares about the consumer in this bill. But what else is new? Nobody ever seems to care about the consumer in the Congress of the United States, with the exception of some few. No; it is more to worry about the special interest lobbyists and less to worry about the consumers of this country. Why worry about them? They are only people. The lobbyists and the pressure groups—and they come from all different segments of the economy—have their political action committees to press and push for legislation of this kind.

It is bad legislation. Why not let consumers decide what mix of low prices and quality of services they want?

The airline industry has not hesitated in letting price competition work side by side with service competition. I am sure the shipping industry would do the same thing, but the shipping industry does not want to do that. What the industry wants is protection against competitive pricing.

Some would argue, "Well, Senator, but you understand that you do not have to be a part of this cartel. You can have your ship operate on its own."

Indeed, that is permitted under this bill. They do not have to be a part of the cartel. But if you operate as an independent, then under this legislation the members of the cartel may pool their revenues, pool their profits, and then they can send one or two ships out to provide competition with the independent operators.

Let us talk about that a little bit. Shipping companies agree to put all of their revenues together or all of their profits together, all of which is permitted. The profit part would be eliminated under the Thurmond amendment, the revenue part would not be eliminated under the Thurmond amendment. And we decide that there is an independent who is cutting rates. So we assign company X to go down and lowball the price, cut the rate below it.

Now, we watch our step a little bit because there is some kind of a prohibition against predatory pricing. But we say, "Well, we are not going to tell you what to do, but, company X, we think you ought to provide a little more service than they are presently getting in Mobile, Ala., or in some other community." So company X understands what they are saying and nobody ever says that you ought to engage in predatory pricing. Nobody ever says that you ought to cut the rates. But the implication is there, and, frankly, even if the independent lines knew there was predatory pricing, he would have one tough time to ever get any relief. He would have to bring an action before the Federal Maritime Commission. And if the owner of that little ship were very wealthy and could hire experts in Federal maritime law and had all the time in the world and did not worry about whether the case would take 6 months, 1 year, 2 years, or 4, he might have a chance to make his point, but he probably would not personally get that chance; his trustee in bankruptcy would probably be the person who was appearing on his behalf.

What a shameful way to protect the free enterprise system. What an unconscionable approach to permitting free enterprise to work.

In addition to the price cutting, this bill would put an end to service competition, not by allowing healthy price competition to replace it but by eliminating service and competition among ocean carriers altogether.

This industry is deathly afraid of price competition, because it knows that in a free enterprise system, only the firms which offer the lowest prices and the best services survive.

Yes, Mr. President, it is possible that some firms might go out of business if we allow ocean carriers to price compete. Is it bad for inefficient and high-priced firms to go out of business? Of course not. This is the nature of our free enterprise system. I had thought that this was one of the prime beliefs of our current administration. We should certainly not encourage further walls against competition in this or any other industry. This is especially true when the administration's economic policies have put so many people out of work and tightened the budgets of all but the richest consumers.

Some proponents of this anticompetitive measure have claimed that this bill does nothing more than clarify the antitrust exemption that has existed for ocean carriers since 1916. Mr. President, whenever we are told that a measure is only intended to clarify existing law, we should immediately take a closer look. Indeed, this bill clarifies existing law by removing virtually all antitrust scrutiny.

Let me point out just how S. 47 would greatly expand—not merely clarify—the current antitrust exemption. First, under the Shipping Act of 1916, as amended over the years and as interpreted by the Supreme Court, the FMC approves individual agreements among ocean carriers if they are in the public interest. Agreements that would violate the antitrust laws are presumed to be against the public interest. Only if some serious transportation need outweighs the competitive harm can the FMC approve the agreement. Thus, as things now stand, antitrust immunity is allowed only if the FMC finds that it is necessary because of the particular features of this industry. Under the pending measure, though, this balancing test would be eliminated. In fact, actions taken to control, regulate, or prevent competition would be activities within the scope of the act, and completely outside the realm of the antitrust laws.

Second, the revised bill does pay lip service to the idea of competition, but leaves virtually no effective remedy for preventing anticompetitive conduct. The measure allows for no private treble damage actions, no civil or criminal actions by the Justice Department, or the Federal Trade Commission, trusting instead in the oversight of the Federal Maritime Commission. Indeed, Mr. President, "oversight" is the proper term for describing the FMC's historic role in watching out for the ocean carrier industry. A comprehensive study of this industry was done by the prestigious Celler committee of the House of Representatives, culminating in a 1962 report. This study showed an astounding 240 violations of law on the face of agreements filed with the FMC which had gone unprosecuted by the agency. More recently, a 1977 Justice Department study showed how the FMC has been completely ineffective in policing the activities of the conferences.

Third, to add insult to injury, this bill would allow the FMC to exempt from any or all requirements of the act any activities, so long as regulation would not be substantially impaired.

Mr. President, it should be obvious that this bill does much more than merely "clarify." This measure would turn conferences into monstrosities that would have virtually unrestrained power to control the price and availability of crucial transportation services with almost no Government oversight.

Mr. President, the GAO report points out that in 1979, we subsidized the U.S.-flag fleet to the tune of $300 million. Indeed, we have been subsidizing the construction and operation of our vessels since 1936. I can understand the political factors that would

lead the administration to want to move this subsidy off budget when the Federal deficit is at record levels. However, we cannot cure our economic ills through magical accounting tricks. This bill would move the subsidy from the taxpayers to the consumers, and leave the carrier cartels totally in control of the amount of this subsidy. Is this what the administration means by "deregulation"?

Mr. President, we have been told that everyone supports this bill, including the so-called consumers. By consumers, the proponents mean the shippers of oceangoing cargo. But what about the ultimate consumers, who bear the burden of passed on monopoly prices? I have a list here of numerous consumer organizations that vehemently oppose this legislation, because they know that it may cost their members billions every year.

In addition, not all of the shippers themselves favor this bill. I can understand why some of them do, though. The measure has been carefully crafted to grant an antitrust exemption to the shippers too, in the form of so-called shippers' councils. These organizations would allow shippers to get together and set the conditions upon which they will deal with the conferences. Many of the bigger shippers like this idea, because, as Adam Smith pointed out long ago, once you put businessmen from the same industry in the same room, they will eventually move the conversation to the subject of restraining trade among themselves. In addition, the councils would present an opportunity for bigger shippers to take positions before the conferences that would put the smaller shippers at a serious competitive disadvantage. Finally, the GAO report points out that, in the limited experience of shippers' councils in Europe, there is little evidence that they have been successful in holding back the cartels' power to set monopoly prices. They would, however, be successful in giving the shippers an opportunity to foster their own anticompetitive activities.

Yet, despite such antitrust immunity for shippers' councils, some individual shippers still recognize the evils that can flow from this bill and have opposed it. We have heard from the American Association of Exporters & Importers, the recycling and beverage importing industries, the National Farmers Union, the National Farmers' Organization, and Dow Chemical Co. The International Harvester Corp. and Olin Corp. have also been quoted in opposition to this measure.

This bill may also seriously disadvantage small and medium-sized ports. This is because a byproduct of the bill's antitrust immunity for carriers is the ability of the carriers to get together and control the frequency and location of sailings in a process known as rationalization. Of course, this polite-sounding euphemism hides what would be a per se illegal, and probably criminal, antitrust violation in any other industry, known by the less polite name of market division.

While there may be some legitimate reasons for discouraging the high costs that result when firms are insulated from price competition, rationalization could have terribly adverse effects on our Nation's small and medium-sized port cities. Under this bill, carriers would be free to choose arbitrarily among the ports they wanted to use, and leave all of the other ports behind. I need not point out to my colleagues from the many States that have small and medium-sized ports how important shipping revenues are to the economic health of those cities.

I urge my colleagues who have ports in their States to examine carefully into the impact that this bill may very well have on those ports, because I think they will find that there is more than a little likelihood that, under those circumstances, those ports will be affected adversely.

Mr. President, I ask unanimous consent that I be permitted to put in a quorum call without losing my right to the floor and that the resumption of my remarks at the conclusion of the quorum call not be considered a second speech.

The PRESIDING OFFICER. Is there objection?

Mr. GORTON. Mr. President, reserving the right to object, may I inquire as to the purpose of the Senator from Ohio in making this request?

Mr. METZENBAUM. If I may walk over to the Senator.

Mr. President, I have made a unanimous-consent request that I be permitted to enter a quorum call without losing my right to the floor and without it being considered a second speech when I resume my remarks at the conclusion of the quorum call.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that I be permitted to yield the floor without losing my right to the floor, that I yield the floor to the Senator from Wisconsin, Senator PROXMIRE, that upon resumption at the conclusion of his remarks I be permitted to resume my remarks, and that my remarks not be considered a second speech.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I rise in support of my good friend, the Senator from Ohio, Senator METZENBAUM.

Senator METZENBAUM is not always right in these crusades he leads, but he is certainly right in this one. I am inclined to feel that he is right about 95 percent of the time.

Mr. President, what Senator METZENBAUM is trying to do in this particular case is to preserve our system of competition, which, of course, as we all know, is unique in the world. I suppose if there is one distinctive element of the American economic system, more than any other nation in the world, we do stress competition as our system of regulation. Absent that system of natural regulation by competition, it would be necessary to have far more Government regulation of wages, prices, and all kinds of other areas. Either that, of course, or the consumer is exploited with the monopolist being able to get whatever price he wishes to get.

S. 47, the Shipping Act of 1983, is a complicated bill. It is a bill that, as I understand it, affects the jurisdiction of at least two committees and, perhaps, others. I cannot understand why this bill, which is so complicated, should be rushed into law before we have an opportunity to make the kind of record which, it seems to me, this sort of far-reaching legislation should command.

Briefly, let me summarize the objections I have to this shipping bill. First and foremost, it is special-interest legislation. Whom does it exempt? It exempts the shipping industry from antitrust legislation. It singles them out. It makes it easier for our Nation's shipowners to agree in concert to charge what they want to charge, to go where they want, reject what they want to reject, and force out of business who they want to force out of business, and not to be worried about court action. It gives special judicial consideration to one industry, the shipping industry, while this country's other industries must abide by the antitrust laws created to preserve one of our country's founding principles, the principle of free enterprise.

Now, Mr. President, the second objection is that this bill proponents say will help the shipping industry which is ailing.

I wonder about that charge that the shipping industry is ailing. The General Accounting Office has made a recent study and they have found that America's fleet is relatively healthy. They say its modest problems arise not from the failure of the conference but from the carriers' failure to adopt modern technology.

Mr. President, if we want to provide assistance for an ailing industry, we ought to take a look at steel. The steel industry is really ailing, far more than the shipping industry. Or machine tools. Or homebuilding—they are flat on their back. Or the construction industry.

Why we should single out the shipping industry as having special treatment with respect to our antitrust laws is very, very hard to understand.

Furthermore, this helps foreign carriers because foreign carriers make up two-thirds of the carriers in the cartel's membership.

The cry has gone out in our country, "Buy American." Americans are sick and tired of watching our industries atrophy while industries of foreign countries flourish because we are buying their products.

Whom do we help here? Help an industry that is helping America like most of our industries are, 90 or 95 percent? This industry is only one-third an industry which provides jobs for Americans.

Americans are sick and tired of other countries crowding our markets while American goods collect dust on store shelves.

The international ocean shipping industry is made up mostly of foreign vessels. For whatever reason, this is a fact of life.

Efforts could be made to change that, to encourage more U.S. shipping, to make it easier for men and women in this country to enter the shipping business. But this bill does not try to solve that problem.

The fact is that almost two-thirds of the ships which transport goods across oceans are owned by other countries. And this bill would help them out. It would help them to continue to flourish. So it is not only special interest for one U.S. industry, it is special-interest legislation which would help the industries of foreign countries.

The American people who support the "Buy American" philosophy may find the Shipping Act ludicrous because of that.

The third objection I have to this bill is that consumers will pay for it. The bill strengthens the power of shipping cartels. It makes them practically immune from court action. This means that the cartels will not hesitate to raise the prices they charge the people who manufacture the goods to be shipped. But the people who are paying to ship the goods will not sit back and pay the increased price. In some cases, as a matter of fact, as we know, there will be a double cartel permitted by this bill. The shipping customers will be able to combine, too. You know who pays the bill then. The ultimate consumer. The little, unorganized consumer in this country. They will pay it all right. They will have to because of this bill.

As I say, the direct customers, most of the customers, of the big ocean shippers will be able to turn around and write it off as an unfortunate business expense or pass it on to the consumer.

Consumer groups oppose this bill. The Consumers Union and the Consumer Federation of America have spoken out against the Shipping Act. During one hearing held on S. 47, consumer groups were not represented or given the opportunity to speak and express their problems with the bill.

That brings me back to my first point, Mr. President. What is the rush? I do not have to remind my colleagues, Mr. President, about the problems facing the men and women of this country. The shipping industry has problems also. I cannot dispute that. What I am disputing is the necessity to rush this bill through when there are many, many other problems needing attention, and when we have 2 years to act on legislation.

This is certainly not emergency legislation in the sense that there is a deadline that absolutely has to be met.

The jobs bill might be considered emergency legislation, if pushed—unemployment, hungry people, bankruptcy businesses, people freezing in the weather, people in need of education, people in need of jobs, people in need of protection by the Senate, people writing us about their problems. But we are grappling with the Shipping Act, which is an act which we can delay.

I do understand that this bill is special-interest legislation. It helps foreign countries. Consumers will pay for it.

The Shipping Act is not easy to understand. It is complicated, lengthy, couched in language few outsiders would understand.

Jay Angoff, of the Public Citizens Congress Watch, testified before the Senate Judiciary Committee last week and explained the bill in terms we can all understand. Mr. Angoff did an excellent job explaining what the bill will and will not do. I would like to read into the RECORD an excerpt from Mr. Angoff's testimony. He said:

> Mr. Chairman, S. 47 expressly allows ocean carriers to (1) "discuss, fix and regulate rates," to (2) "pool . . . net profits," to (3) "restrict . . . the number . . . of sailings between ports," to (4) "limit . . . the volume or character of cargo . . . to be carried," to (5) "engage in exclusive . . . arrangements . . . with one or more marine terminal operators," to (6) "control, regulate, or prevent competition in international ocean transportation," and to (7) "confer with shippers and shippers' councils regarding general rate levels."
>
> In other words, S. 47 is the classic case of allowing shipping company executives to sit down in a smoke-filled room and (1) agree to all charge the same price; (2) agree to divide up their profits according to a pre-determined formula, regardless of the profit (or loss) of any individual shipping company; (3) agree to serve some ports frequently but other ports infrequently or not at all;
>
> Think of that, agree to serve some ports frequently and other ports infrequently or not at all.
>
> They limit competition in that way.
>
> (4) agree to carry certain kinds of cargo frequently but other kinds infrequently or not at all; (5) agree to work exclusively with certain marine terminal operators and not at all with other marine terminal operators; (6) agree to do anything else to prevent competition in international ocean transportation;
>
> With the exception of some enumerated practices that are quite limited.
>
> (7) agree on rates with a group of manufacturers who have already sat down in a smoke-filled room and agreed on rates among themselves.
>
> If people or companies in other industries engaged in any of these practices they would be subject to up to three years in jail or to fines of up to $1 million. This is because these practices all, as the Supreme Court has said, have a "pernicious effect on competition" and "lack any redeeming virtue.
>
> While different economic schools and different administrations might disagree about certain antitrust violations—such as vertical restraints or price discrimination—there is absolutely no disagreement about the kinds of activities that are expressly allowed in S. 47. Because these practices raise prices and restrict output, they are and should be illegal per se.
>
> JUSTIFICATIONS OFFERED FOR EXEMPTING OCEAN CARRIERS FROM THE ANTITRUST LAWS
>
> Those who favor the exemption generally admit that it will raise prices and restrict output, but offer a number of justifications for the exemption. We believe that none of these justifications withstands scrutiny, for the following reasons.
>
> Justification No. 1, "The U.S. merchant marine industry is a declining industry. Unless the government saves it, it will die."
>
> The General Accounting Office has concluded that the condition of the U.S. liner fleet does not justify a major revision of the shipping act. They point out that while the number of U.S. flag general cargo vessels fell from 523 in 1970 to 256 in 1980, and the number of shipping companies fell from 19 to 9 in the same period, the U.S. fleet carried about the same amount of cargo in 1978 as it did in 1970, measured by both value and tonnage. The U.S. merchant marine industry has simply taken advantage of the new containerization technology which enables fewer containerships to transport the same amount of cargo in the same amount of time as conventional vessels.
>
> In comments accompanying the GAO report, the Department of Transportation does not dispute GAO's statistics. DOT does point out, however, that the rate of return on equity for the U.S. flaglines has exceeded 10 percent in only 3 of the last 5 years.
>
> I submit that the industries I mentioned earlier—construction, homebuilding, machine tools, steel—would love to show exceeding 10 percent in 3 of the last 5 years. They are nowhere near that.
>
> DOT also argues that the industry is likely to decline in the future because direct government subsidies to it are being cut.

The consensus seems to be that the industry, while not exactly flourishing, is not dying either. But even if the industry were dying, exempting it from the antitrust laws would be a terribly inefficient way of trying to save it. For an antitrust exemption allows all carriers—both American and foreign—to raise their prices. Since foreign carriers carry more than 70 percent of the ocean going traffic, whether measured by dollar value or tonnage, they can be expected to get more than 70 percent of the antitrust exemption's benefits. If the government determines that the U.S. merchant marine industry must be subsidized, there must certainly be less expensive, more efficient ways of doing it than by giving foreign carriers almost $3 for each $1 the government gives American carriers.

Mr. President, I am going to have to leave the floor and I thank my good friend from Ohio.

Mr. METZENBAUM. Will the Senator yield for a question?

Mr. PROXMIRE. I shall be delighted to yield for a question. I have some material I would like to speak on a little later.

Mr. METZENBAUM. Is it the understanding that in yielding the floor, the Senator anticipates that he would be accorded future privilege of the floor without being charged with a second speech?

Mr. PROXMIRE. That is possible. If they press that second-speech requirement, I shall have to give a second speech. But I certainly want to return and speak on this subject again. Perhaps I must make a motion I could speak on, if that is possible. But I would like to reserve that right if I could.

Mr. METZENBAUM. Would the Senator from Wisconsin want to ask unanimous consent that he be accorded the privilege of the floor later?

Mr. PROXMIRE. Mr. President, I ask unanimous consent that I be allowed to desist at the moment and speak on this subject later without my speech being charged as a second speech.

The PRESIDING OFFICER (Mr. PRESSLER). Without objection, it is so ordered.

The Senator from Ohio.

Mr. METZENBAUM. Mr. President, first, I commend the Senator from Wisconsin for his remarks and for his again taking up the cudgel for the people of this country. I do not think any man or woman in the Senate has been more dedicated or devoted to the concerns of the public weal than has the distinguished senior Senator from Wisconsin. Over a period of years, the people of this country have come to know that when he speaks out, he speaks out against special interests and for people's interests. He has never hesitated to expose some of the weaknesses of government itself, weaknesses of special interest groups, and I commend him on his astuteness, on his ability, and on his longtime dedication to the concerns of the American people. I consider it a privilege to have him as an ally in this effort to defeat S. 47.

Mr. President, I think it is important that Members of this body be made aware of the position of the Federal Trade Commission, as enunciated by Thomas O. Campbell, Director of the Bureau of Competition of the Federal Trade Commission. When Mr. Campbell appeared before our committee, he told us that it was indeed a rare occasion when five members of the Federal Trade Commission could agree upon a statement to be made by the head of the Bureau of Competition or in connection with probably any other matter having to do with legislative policy.

In this instance, all five members agreed, two of those members having been appointed by this administration, three of those members being members of the majority party. They found this legislation to be so objectionable that they authorized Mr. Campbell to speak on behalf of the Bureau of Competition and the Federal Trade Commission before the Senate Judiciary Committee on February 17 of this year. I therefore feel it important that I share with my colleagues Mr. Campbell's comments. I therefore shall now read into the RECORD much of what Mr. Campbell had to say:

Mr. Chairman and members of the Subcommittee: I am most pleased to present today the views which the Federal Trade Commission has authorized me to express concerning the Shipping Act of 1983. At the very first, let me explain that I speak from the point of view of the Bureau of Competition, the antitrust enforcement arm of the Federal Trade Commission. If I have criticisms of the bill, therefore, it is because the mission of the Bureau of Competition is to protect the American consumer from the harms of market power manifest through collusion, monopoly, and other market abuses. I acknowledge, however, that there are other important considerations that must bear analysis in debating this bill; as to those additional concerns unrelated to competition, I am not competent to express any opinion.

One additional introductory comment is necessary. As one familiar with an independent Federal agency engaged in law enforcement, I recognize the difficulty presented to individual citizens, companies, and other organizations from excessive delay and uncertainty. It has been our goal at the Federal Trade Commission to eliminate delay as much as possible and increase the predictability of what we do. From this perspective, I must express my admiration for the job Chairman Alan Green is doing at the Federal Maritime Commission. The proposals in this bill to shorten the time for FMS review, and to set a 180-day maximum for full-scale adjudication of contested issues under this act, represent a model effort at administrative reform. It is typical of Chairman Green that these would be priorities of his administration at the Federal Maritime Commission. And this observation is also useful in demonstrating that there is much in this bill that is beneficial, and which should be supported. The somewhat critical tone that I will adopt in what I say today must be tempered with this realization, as well as by the recognition that my perspective is limited only to preserving or improving competition in this industry.

The Federal Trade Commission has for some time been concerned about competition in the transportation industries. In years past, the Commission and its Bureaus of Competition, Economics, and Consumer Protection have worked with, and appeared before, regulatory agencies such as the CAB and the ICC, as well as with the Congress, in promoting competition in airline, truck, and rail transportation. In the last Congress, the Director of the Bureau of Economics and I presented views on an earlier version of this ocean shipping legislation, H.R. 4374, to the House Judiciary Committee Subcommittee on Monopolies and Commercial Law.

There is a long history of formal efforts to eliminate effective competition in ocean liner shipping. Further reduction or elimination of effective competition in liner shipping would be extremely unfortunate.

The result would be to deny to U.S. exporters and importers, and ultimately U.S. consumers as well, the economic benefits of a competitive marketplace.

This is the Bureau of Competition speaking for the Federal Trade Commission. It is not a special-interest group. It is a Government agency.

Going on with Mr. Campbell's remarks:

The liner conferences may be viewed as classic cartels, attempting to eliminate competition and obtain for themselves the benefits of monopoly power. The economic justifications advanced for the conference-cartel system are not convincing. A more competitive market environment could almost certainly provide shippers and consumers with the benefits of desirable efficiencies at a lower cost than under a cartel system.

Thus, we are very concerned about the bill's proposal to abandon almost completely antitrust enforcement in this industry. The antitrust laws are this country's primary means of preserving the economic and consumer benefits of competition. Without antitrust oversight, will market forces and the remaining regulatory structure be sufficient to assure as many of the benefits of competition as possible in the ocean liner industry? My concern is increased by the bill's proposal to eliminate the "public interest" and "detriment to U.S. commerce" standards, thus reducing the remaining Federal Maritime Commission regulatory authority that has helped to control anticompetitive conduct.

I believe that consumer welfare is best served by a policy of promoting competition in ocean liner shipping.

Parenthetically, I as a Senator from Ohio want to say that I could not agree more strongly with Mr. Campbell's comment that consumer welfare is best served by a policy of promoting competition in ocean liner shipping.

It appears, however, that there may be noneconomic reasons to change the procedures used by the United States to do so. Other nations besides the United States recognize the competition problems in liner shipping conferences. But only the United States applies its general antitrust law, with its criminal penalties and private treble damage suits, to the liner industry. It may

be necessary to "place a new emphasis on harmonizing U.S. policies and practices with those of our trading partners," as Senator GORTON stated on introducing this bill. But in so doing, I think we should guard against abandoning the goal of competition in international or domestic commerce.

In some respects, S. 47 compensates for granting broad antitrust immunity, either by making exceptions to the immunity or by prescribing regulatory procedures and standards to protect competition. But in several important respects, S. 47 fails to provide necessary and feasible protections against cartel abuse. Unless these faults are corrected, the Proposed Shipping Act of 1983 will inflict unnecessary injury on the American economy and the American consumer.

TARIFF FILING AND ENFORCEMENT

If it is necessary to grant antitrust immunity to these shipping cartels, then it would seem highly desirable that the FMC's authority over tariff filing and tariff enforcement be repealed. The only practical result of this authority is that the U.S. Government polices and supports the cartel agreements at no cost to the cartels or their members. Federal tariff enforcement helps maintain an antiquated rate structure with little relationship to true costs, and it fails to protect small shippers from discrimination. Moreover, the United States is now one of only a few nations with mandatory tariff filing and with Government-imposed penalties for failure to adhere to filed tariffs. Eliminating this authority would bring U.S. law into line with that of most other trading nations.

Cartel success is dependent upon mechanisms for detecting and deterring cheating by its members. FMC tariff filing and enforcement provides that mechanism at no cost to the conference cartels. Thus, the FMC, by reducing the costs of administering the cartel, increases the potential gains from collusion. Because the greater the expected gains from cartelization, the more likely a cartel is to succeed, FMC policing and enforcement is probably a major, albeit unintended, force for cartel stability. This is contrary to longstanding policy of the U.S. Government to encourage the forces of competition. Appropriate public policy, to be historically consistent and to represent the interests of the American people, should seek to increase the costs of a cartel, not reduce them.

Tariff filing and enforcement also helps perpetuate an inflexible and complex rate structure. Rate complexity results from the traditional emphasis on demand factors, especially the value of the commodity, rather than on the actual inventory and transportation costs of shipment. Different commodities, facing different demand elasticities, are shipped at different rates—even when the cost of providing shipping services is unchanged. Rate uniformity across all carriers results from the conferences' necessary reliance on averages. Uniformity not only provides no incentive for carriers to compete through lower costs but also gives inaccurate prices for guiding production, location, and consumption decisions. Stringently enforced uniform tariffs encourage nonprice competition and thus perpetuate the problem of excess capacity. Without the support that FMC enforcement supplies to cartel stability, individual carriers might find it worthwhile to act independently to set rates to optimize their individual profits, given their specific competitive and cost conditions. The resulting rate structures are likely to be less uniform, but also less complex.

Finally, tariff filing and enforcement do not protect small shippers. Conferences have developed enormously complex commodity rates to provide competitive rates to shippers with alternative means of transportation, primarily large shippers. Small shippers usually cannot get the benefit of these more competitive rates. Instead, conferences can use the rate structure to insure that all possible rents are extracted from the small shipper without eliminating the traffic altogether. FMC enforcement of the rate structure eases their task.

While there are many beneficial purposes cited for official tariff filing and enforcement, I believe these can be accomplished in other ways. If shippers indeed want published tariffs, then commercial publications will appear, as they have in Europe, to provide tariff information. Indeed, it may be unnecessary, and even undesirable, to require commercial publication. If shippers do not in fact need published tariffs, then publication might only help the carriers check each others' prices.

Government oversight should not be needed to prevent discrimination or "malpractice," either. If failure to adhere to announced rates and services unfairly causes damage, then a private right of action for damages or reparations would be available, under the Shipping Act, and should be sufficient to provide a remedy. If there is no injured party, then the only purpose served by requiring letter-perfect adherence to tariffs would seem to be the prevention of competition.

Government enforcement of the conference-cartel agreements is not a long-established industry condition. Tariff filing and enforcement by the Government were never envisioned or recommended by the Alexander report or the 1916 Shipping Act. The FMC has only had these powers since 1961. Moreover, the FMC does not now have the authority to challenge or suspend international liner rates it finds to be unjust or unreasonable (except with respect to controlled carriers, from Communist countries). S. 47 would remove what little authority the FMC now has to protect shippers and consumers against monopolistic rate levels—namely, its authority to disapprove rates "so unreasonable high or low as to be detrimental to the commerce of the United States." I do not mean to suggest that a public-utility style of rate standard should be bureaucratically imposed on this industry.

Mr. President, I ask unanimous consent that I be permitted to enter a quorum call without losing my right to the floor upon the conclusion of the quorum call and that the resumption of my remarks not be considered a second speech.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MURKOWSKI). Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, when I suggested the absence of a quorum, I was in the midst of reading the remarks of Mr. Thomas Campbell, the head of the Bureau of Competition, speaking on behalf of the Federal Trade Commission before the Judiciary Committee of the Senate.

Said Mr. Campbell to our committee:

A more competitive model would be desirable, and feasible. But the regime of tariff filing and enforcement that S. 47 would perpetuate promotes neither competition nor consumer and shipper welfare. It would not be revolution, but only healthy reform, to eliminate these unmistakably anticompetitive Government intrusions into the marketplace.

The major themes supporting this legislation are ending excessive Government regulation and making U.S. law consistent with the practices of other nations. Continuing the FMC's pervasive regulation of tariff filing and enforcement of cartel agreements would seem to contradict both of these important purposes.

INTERCONFERENCE AGREEMENTS AND CONFERENCE-PRESCRIBED JOINT THROUGH RATES

Intermodal transportation is an important and valuable technological innovation. Reduced regulation of motor carriers and railroads has stimulated competition in the development of efficient and innovative intermodal means of transport. It is important to prevent ocean liner conferences from dampening those competitive incentives and from attempting to extend their monopoly power into competitive domestic markets.

Individual ocean carriers should be free to quote through rates and to negotiate such rates with inland carriers. But S. 47 would also allow joint through rates to be set by conference agreement. Through such agreed-upon uniform rates, the conferences may well be able to extend their monopoly position. Shippers or inland carriers may receive few of the savings from intermodal efficiencies; those savings would pass, as monopoly rents, to the cartel.

Allowing liner conferences, through joint agreements for intermodal transportation, to impose the "dead hand" of monopoly on areas of the trucking and rail industry is at odds with recent bipartisan—and widely applauded—legislation. The Staggers Rail Act, the Motor Carrier Act of 1980 and the airline deregulation legislation constituted major milestones in the effort to encourage lower prices and innovation in industries which, for too long, had remained encrusted with pervasive regulation. It would be ironic indeed if, in the name of "deregulation" of ocean shipping, we were to supplant Government regulation of land transport with monopoly abuse by cartels.

Competitive problems raised by intermodal technologies are recognized, and addressed to some extent, in the bill. In many ways, the bill tries to preserve competitive alternatives in inland transportation. All these means—prohibiting conference bargaining with inland carriers, applying antitrust penalties to agreements with inland carriers, and to agreements between ocean carriers on the division of through rates with inland carriers, and requiring optional port-to-port loyalty contracts—would help to prevent some possible competitive abuses. But they would not eliminate completely the conference cartels' potential monopoly power over inland shippers and carriers.

S. 47 would also permit agreements between conferences and between carriers in different conferences. Agreements that

equalize freight rates between widely disparate ocean and intermodal routes have adverse implications that go beyond their fundamental purpose of eliminating competition among ocean carriers. They also stifle competition among land carriers and, by equalizing rates without regard to differences in costs, discourage further efficiency-creating innovations in intermodal transportation. In addition, they reduce the chances that any savings from cost-reducing innovations will be passed on to shippers. S. 47 attempts to mitigate these anticompetitive threats by requiring a provision for independent action in these interconference or intercarrier agreements; but I fear this may not be enough to overcome the attractions of collusion.

Even with safeguards to protect competition in domestic land transportation, there may still be market situations in which ocean carrier agreements on intermodal transport will unduly strengthen or extend the cartels' monopoly. The effect will vary from market to market, depending upon the degree of competition within the conference and the degree of competition that shippers have available for the inland transport leg. A better solution would be to establish a clear line: Intermodal through rates may be set by individual carriers, but not by ocean conferences, and not by agreements between conferences or between conferences and independents.

Mr. Campbell then, speaking for the Bureau of Competition on behalf of the Federal Trade Commission to the Judiciary Committee, went on to talk about loyalty contracts and procompetitive alternatives:

S. 47 would continue to permit dual-rate loyalty contracts, so long as they follow rigidly prescribed limitations. But dual rate loyalty contracts are substantially similar to the anticompetitive deferred rebate arrangements that are already prohibited by the Shipping Act, and would continue to be prohibited by S. 47. Deferred rebates are simply a more enforceable dual rate system. Both are intended largely to create entry barriers against independent, non-conference competition. Loyalty contracts may also have some efficiency-promoting effects, but these effects could be obtained by alternative methods at less risk to competition.

S. 47 explicitly authorizes two means of achieving planning efficiencies and scale economies without loyalty contracts, namely time-volume rates and service contracts. Both methods would respond directly to marketplace needs for efficient planning; neither would incorporate the explicit anticompetitiveness of the loyalty contract or deferred rebate. Time-volume rates would offer discounts dependent on size and frequency of a shipper's cargo—not on whether the shipper used a competitor. Service contracts would permit even more accurate resource planning than time-volume rates, and would most likely reflect a marketplace balancing of shipper and carrier planning needs. Injured parties would be able to obtain redress before the FMC in cases of unjust discrimination or evasion of common carrier obligations.

Loyalty contracts are currently being challenged in several countries. The member councils of the European Shippers Councils recently initiated a study of loyalty contracts; they felt that the advent of containerization has cast doubts on the contracts' validity and practicability. In Britain and Canada, loyalty contracts are also being seriously challenged by shippers or by the Government.

If loyalty contracts must be retained, despite the availability of superior alternatives, then the possible competitive abuses of loyalty contracts must be constrained. Since S. 47 would include loyalty contract matters in its grant of antitrust immunity, pro-competitive corrections and constraints against abuse must be imposed by the Shipping Act itself. Requiring a right of independent action in a conference with a loyalty contract is a step in the right direction. However, the procedural restrictions, including publicity and delay, imposed on this independent action by S. 47 may tend to be disincentives to competitive pricing initiatives. In addition, it should be noted that "independent action" may also be used anticompetitively. For example, a conference carrier might take independent action to punish or deter an isolated competitive threat, and be compensated for its resulting losses through revenue pooling in the conference. To avoid this possibility, there should be some protection against using revenue pooling to compensate for losses to conference members due to independent action.

Another pro-competitive option would be to prohibit loyalty contracts covering all of a shipper's cargoes. The British Government and the British Shippers' Council have come out in opposition to loyalty contracts that require 100 percent of a shippers' custom be committed to a conference. According to the UK Government, a policy that limited conference commitments to 70 percent would provide a needed stimulus to non-conference competition, and an essential check on conference's monopoly power. In Canada, only 1 percent of shippers surveyed believed that shippers should be required to commit 100 percent of their custom to a conference. Thirty percent thought loyalty contracts should be prohibited altogether. The practical effect of a cap would be that the loyalty contract carrier would be forced to meet independent competition to obtain the remainder of the shipper's cargo. In the long run, it should make it more difficult for the conference to maintain a supracompetitive price for the loyalty-contract portion as well.

SHIPPERS' COUNCILS

Antitrust immunity for shippers' councils, which S. 47 would grant, may well be ill-advised. While I can understand their logic, on the whole, I must doubt whether these councils would have the desired effect. Such conferences are likely to be an ineffective check on the conferences' market power. Moreover, they may be a breeding ground for domestic antitrust problems outside the area of transportation services. The best way to deal with abuses by a monopolistics cartel is to weaken its monopolistic power and strengthen its potential competitors, not to erect a new potentially monopolistic group to bargain with it. S. 47 apparently would permit shippers' councils to act as middlemen, not only negotiating more favorable rates and services, but actually assembling cargoes to take advantage of time-volume rates or service contracts. Although the recent amendment could limit this shippers' council service to "small shippers," it would be preferable for this valuable and essential service to be performed by non-vessel-operating common carriers such as freight forwarders, rather than by competitors in the marketplace for the goods being shipped. If shippers' councils are to be permitted, I suggest they be subject to careful scrutiny or certification procedures by the antitrust enforcement agencies, along the lines included in the House Judiciary Committee's report of H.R. 4374 in the last Congress.

CONCLUSIONS

Congress is considering sweeping antitrust immunity for this industry at a time when other countries are questioning the wisdom of having done so. In Canada, a debate is being joined on whether to renew the Shipping Conferences Exemption Act upon its expiration in March 1984. To assist the Canadian Government in determining its policy, a survey was conducted in mid-1982 of Canadian users of ocean shipping services. The survey revealed that current arrangements for exempting liner conferences were unsatisfactory to almost 85 percent of Canadian shippers. More than half of these considered the marketplace to be the best regulator of the system. Significantly, as many small shippers as large shippers preferred the marketplace as the regulator.

The Supreme Court has said, rightly, that the antitrust laws are the "Magna Carta" of our enterprise system. The near-total withdrawal of antitrust oversight from this industry would be a major step, since the costs to the consumer of the conference cartel system would appear to be quite serious. If that withdrawal is nevertheless necessary, and non-economic considerations are held to justify measures that restrain competition, then those measures must be tailored to achieve their objectives by the least anticompetitive means feasible. In particular, the Government should withdraw from the business of publicizing and enforcing cartel agreements. In addition, even tighter controls must be placed on interconference agreements and other agreements that could permit the cartels to extend their powers further into the competitive domestic economy. These changes and the others discussed in my testimony are recommended to prevent the Shipping Act of 1983 from causing unnecessary deterioration in competitive conditions in this industry.

In closing, let me return to my opening themes. It is because of our agency's antitrust mission that I am prompted to raise some doubts about this bill; other values being pursued are not my area of knowledge or practice. I believe that several improvements can be made in this bill and still achieve its principal goal, without anticompetitive harm. I must again applaud all there is in this bill that increases efficient operation at the Federal Maritime Commission, under its most able leadership.

Mr. President, I ask unanimous consent that I may be permitted to suggest the absence of a quorum without losing my right to the floor at the conclusion of the quorum call and without it being charged to me as a second speech.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that I be permitted at this point to yield to the Senator from Washington, the manager of the bill, with the understanding that at the conclusion of his remarks I will again regain the floor; that it will not be considered as a second speech.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Washington.

Mr. GORTON. Mr. President, I thank my friend and colleague from Ohio and wish, at the beginning of what I hope will be relatively brief remarks, simply to refer back to the remarks with which he began his presentation today. While we are now technically debating the motion to take up S. 47, the shipping bill, we are doing so within the context of certain negotiations, toward the end that we will be able to debate the bill and reach agreement on certain amendments, amendments which I fully understand will not totally satisfy the Senator from Ohio, which will not make him a supporter of the bill, but which will at least allow us to proceed to the next stage: Debate on the most controversial piece of legislation, I think I can say without his contradicting me, which has come before the 98th Congress to this point in its relatively short existence.

I do wish to return to some of the remarks I made yesterday, just as the Senator from Ohio did, to say that the principal focus of S. 47, the goal without which it would not be appropriate legislation, is to enhance and to benefit the international trade of the United States.

If I believed for one moment that the figure of $3 billion, which the Senator from Ohio has thrown before the U.S. Senate as added costs from the passage of this bill, were true, or that any significant plus figure or added figure to the costs of international trade would result from this bill, I would not be here managing it.

The benefits and purposes of S. 47 are to increase efficiency within the field of international commerce by sea and hence lower, rather than raise, trade rates; to provide more flexible shipping services, to serve the needs of American exporters and importers, both in that portion of the carriage of their goods which goes by sea and that which goes by land; to connect the great majority of those exporters and importers who are not immediately on a dock in a port offering international services to operate; and to increase the negotiating clout and thus lower freight rates for companies which ship relatively small volumes in international commerce.

I hope the Senator from Ohio will note the fact that in S. 47, unlike the bill which was before the Senate near the end of the 97th Congress, during the lameduck session, the powers of shippers' conferences to deal with the setting of rates of the collective negotiation of rates is limited to smaller shippers. It is not a right which is granted to the Dow Chemicals and the other major and large shippers in the United States. Because those who have written this act were sensitive to exactly the considerations raised by the Senator from Ohio, they do not wish this to be a proposal which puts small shippers at a disadvantage.

The Senator from Ohio earlier today referred to the fact that there was nothing in this proposal for agricultural producers. In fact, there is a great deal in this proposal for agricultural producers.

In the Commerce Committee hearing over which I presided, a group representing shippers of fruits and vegetables, including those of my own State, testified very strongly in favor of the bill because of the provisions included in the bill for small shippers. These provisions will allow them to negotiate far more closely on a basis of equality than they could under some former versions of this bill and, most especially, than they can at the present time.

The bill is designed to improve trade relations with our international trading partners. But this bill contains benefits for U.S.-flag ships, as against those of foreign flags, simply because it allows them to operate under essentially the same law which de facto affects foreign-flag ships at the present time.

Right now, the present system of dual enforcement of the shipping act by the antitrust laws results in highly discriminatory enforcement of our laws against U.S.-flag vessel operators. The antitrust laws are not enforced against foreign carriers because of the inability of the United States to create extraterritorial jurisdiction over foreign-flag ships which are direct competitors with our own.

If we were starting today to devise a system for the regulation or nonregulation of international shipment of cargo from one nation to another, we might or might not decide on a conference system. But the difficulty of almost all the opposition which has been expressed to this bill on the floor by my colleague from Ohio and the distinguished Senator from Wisconsin is that they have assumed that, somehow or other, the idea of shipping conferences was new; have assumed that, somehow or other, this is an industry which, in the past, has always been subject to domestic antitrust laws; that, somehow or other, it can be modeled on the pure competition model of an Adam Smith or an Economics 101 casebook.

In fact, of course, we are dealing with international trade. We are dealing with a trade in which conferences of steamship operators who have exercised price-setting functions have existed for the better part of a century, in which conferences setting rates are the norm of all our major international competitors, in which only the United States attempts to enforce a different kind of law, and in which the United States is effectively able to enforce a different kind of law only against its own flag lines.

In fact, what we are doing by this bill is increasing competition. In fact, what we are doing by this bill is attempting to provide for more efficient service, better service, and lower prices.

I see that the majority leader has reached the floor. I believe he has something he would like to impart to the Senate, and I will yield the floor back to the Senator from Ohio.

Mr. BAKER. I thank the Senator.

The PRESIDING OFFICER. The Senator from Ohio has the floor.

Mr. BAKER. Mr. President, will the Senator from Ohio yield to me, with the usual conditions—that is to say, he would not lose his right to the floor and that the interruption in his presentation would not count as a second speech?

Mr. METZENBAUM. Under those circumstances, I yield.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I hope that now it may be possible, once again, to explore the possibility of a unanimous-consent agreement to get this bill before the Senate and provide a time for a cloture vote on that measure.

May I suggest that while I ask the majority leader if he wishes to be present as we propound that request, I may ask unanimous consent to suggest the absence of a quorum, on the same terms and conditions—that is to say, without depriving the Senator from Ohio of the opportunity to resume the floor at the end of the quorum call and without the quorum call itself counting as an interruption of his speech for the purpose of the two-speech rule?

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I also ask unanimous consent that the order for the quorum call may be rescinded at the request of the majority leader or the minority leader.

I will withdraw that request.

It is the intention of the leadership to ask the Senate to recess shortly, after we obtain that agreement, if the agreement is granted by the Senate.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. COCHRAN). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senator from Ohio (Mr. METZENBAUM) may be re-recognized at the conclusion of the routine matters that the minority leader and I are going to deal with with dispatch, I hope, and that when he is re-recognized it not be treated as a second speech.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, there are a few items that we can dispose of otherwise which I believe have been cleared, according to the notations on my calendar.

ORDER FOR RECESS UNTIL TOMORROW AT 11:30 A.M.

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 11:30 a.m. tomorrow.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF SENATOR MATSUNAGA ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order, the distinguished Senator from Hawaii (Mr. MATSUNAGA) be recognized on a special order for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER DISCHARGING COMMITTEE ON SMALL BUSINESS FROM FURTHER CONSIDERATION OF H.R. 1043

Mr. BAKER. Mr. President, I believe this has been cleared with the minority leader as well. I will state it now for his consideration and that of other Senators.

Mr. President, I ask unanimous consent that the Committee on Small Business be discharged from further consideration of H.R. 1043, an act to amend section 8(e) of the Small Business Act, and that it be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Chair.

THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, my calendar shows that there are certain nominations on the Executive Calendar that are cleared for action by unanimous consent. Could I inquire of the minority leader if his calendar shows indication or if he is prepared to clear for action for unanimous consent those nominations appearing on page 2 of today's Executive Calendar under the Judiciary, beginning with calendar order No. 11 and extending through calendar order No. 16 under the Department of Justice.

Mr. BYRD. Mr. President, there is no objection on this side to so proceed.

Mr. BAKER. I thank the minority leader.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the nominations just identified.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the nominations so identified be considered and confirmed en bloc.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Without objection, the nominations are considered and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

THE JUDICIARY

Pamela Ann Rymer, of California, to be U.S. District Judge for the Central District of California.

A. Joe Fish, of Texas, to be United States District Judge for the Northern District of Texas.

DEPARTMENT OF JUSTICE

William Thomas Dillard, III, of Tennessee, to be United States Attorney for the Northern District of Florida.

James C. Patterson, of Arkansas, to be United States Marshal for the Western District of Arkansas.

Ronald J. Alles, of Montana, to be United States Marshal for the District of Montana.

Carol McGrew Pavilack, of Arizona, to be a Commissioner of the United States Parole Commission.

STATEMENT ON THE COMFIRMATION OF W. THOMAS DILLARD III, OF TENNESSEE, TO BE U.S. ATTORNEY FOR THE NORTHERN DISTRICT OF FLORIDA

● Mrs. HAWKINS. Mr. President, I am pleased that W. Thomas Dillard has been nominated by President Reagan to fill the position of U.S. attorney for the northern district of Florida. On February 22, the Senate Judiciary Committee approved Mr. Dillard's nomination and today he will be confirmed by the full Senate.

I had the opportunity to recommend Mr. Dillard to our President last summer, and today, I strongly reaffirm my support for his confirmation. I would like to share briefly with you some of this gentleman's background and the reason he has been selected for this important position. Mr. Dillard has the experience, ability, and character necessary to become a great Federal prosecutor. His life has been an example of achievement and success in every endeavor. He received his law degree 1 year after he graduated from the University of Tennessee. He was admitted to the Tennessee State Bar in 1965 and during the following 6 years he served his State and country in the military forces as a member of the U.S. Air Force National Guard.

After 2 years in private practice, Mr. Dillard began his career as Federal prosecutor when he joined the U.S. attorney's office in Knoxville. During the past 15 years, he served successfully as a U.S. magistrate for the eastern district of Tennessee, chief assistant U.S. attorney, and court-appointed acting U.S. attorney for the eastern district of Tennessee.

Last summer he was a member of a task force of senior assistant U.S. attorneys to evaluate Federal prosecutors' offices throughout the country. One of the offices he evaluated as the Florida northern district office.

I am pleased that Mr. Dillard is also a man who respects the family unit, both as an institution and in the practice of his daily life. He married the former Susan Jakubski of Hillside, N.J., and they have 2 children. Mr. Dillard is a ruling elder in the Fountain City Presbyterian Church.

After conducting a nationwide search and carefully considering the background and credentials of a number of candidates, I reached the conclusion that W. Thomas Dillard was the individual to serve in the important post as chief Federal prosecutor in Florida's northern district. I believe that he will bring to this office capable leadership and the ability to service the best interests of the people or northern Florida and the entire State.

Mr. President, I appreciate the expiditious nomination and confirmation of Mr. W. Thomas Dillard for the position of U.S. attorney for the northern district of Florida. I look forward to the commencement of his career as Chief Federal Prosecutor and I am confident that his service will enhance our law enforcement efforts in Florida.●

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominees were confirmed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I am still hopeful that we will get an agreement worked out on the shipping bill. I understand it may require a few more moments for the last details to be worked out.

Mr. President, I ask unanimous consent that it may be in order to suggest the absence of a quorum under the same terms and conditions as previously requested.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE SHIPPING ACT OF 1983

Mr. BAKER. Mr. President, as much from the tone of voices as from the countenance on the faces of Senators, I deem it is not likely that we are going to get a unanimous-consent agreement for us to proceed on the shipping bill tonight. I regret that.

Senators should be on notice that it is the intent of the leadership to proceed on this matter. There is already an order for the Senate to convene at 11:30 a.m. Senators should be on notice that tomorrow may be a very late evening. That means perhaps we shall be in on Friday. I had not planned to ask the Senate to be in on Friday, but that will be my intention if we cannot make other arrangements.

That is not said in the nature of a threat but simply as a matter of information. It is possible we may be in on the weekend, but I hope we will not.

I renew my urging of Senators to work out an agreement on this matter and give us a unanimous-consent agreement that will permit us to dispose of the shipping bill in an orderly way.

RECESS UNTIL TOMORROW AT 11:30 A.M.

Mr. BAKER. Mr. President, I have no further business to ask the Senate to transact. I judge by the minority leader's nod that he does not now have further business. I see no other Senator seeking recognition. I therefore move, in accordance with the previous order, that the Senate stand in recess until 11:30 a.m. tomorrow morning.

The motion was agreed to, and, at 5:31 p.m., the Senate recessed until tomorrow, Thursday, February 24, 1983, at 11:30 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate February 23, 1983:

THE JUDICIARY

Pamela Ann Rymer, of California, to be U.S. district judge for the central district of California.

A. Joe Fish, of Texas, to be U.S. district judge for the northern district of Texas.

DEPARTMENT OF JUSTICE

William Thomas Dillard III, of Tennessee, to be U.S. attorney for the northern district of Florida for the term of 4 years.

James C. Patterson, of Arkansas, to be U.S. marshal for the western district of Arkansas for the term of 4 years.

Ronald J. Alles, of Montana, to be U.S. marshal for the district of Montana for the term of 4 years.

Carol McGrew Pavilack, of Arizona, to be a Commissioner of the U.S. Parole Commission for a term of 6 years.

11-059 O-87-4 (Pt. 3)

HOUSE OF REPRESENTATIVES—*Wednesday, February 23, 1983*

The House met at 3 p.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O gracious God, may Your blessing of peace be upon all who work in this place, whatever their task may be. Gird them with Your grace and give them strength in their responsibilities and wisdom in their decisions, that all may do their work in ways that bring harmony and concord to the affairs of this Nation. Give a sense of community that people will work together as colleagues looking to each other with respect and appreciation. In Your name we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

APPOINTMENT AS MEMBER OF COMMISSION ON WARTIME RELOCATION AND INTERNMENT OF CIVILIANS

The SPEAKER. Pursuant to section 3(b), Public Law 96-317, as amended, the Chair appoints as a member of the Commission on Wartime Relocation and Internment of Civilians the following Member on the part of the House:

Mr. LUNGREN, of California.

APPOINTMENT AS MEMBERS OF NATIONAL COMMISSION ON STUDENT FINANCIAL ASSISTANCE

The SPEAKER. Pursuant to section 451(a) of Public Law 96-374, the Chair appoints as members of the National Commission on Student Financial Assistance the following Members on the part of the House:

Mr. FORD of Michigan, and

Mr. ERLENBORN, of Illinois.

NEIGHBORHOOD DEMONSTRATION ACT

(Ms. KAPTUR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. KAPTUR. Mr. Speaker, I rise today to support and endorse the Neighborhood Demonstration Act which will be introduced tomorrow.

Throughout much of my professional life, I have been involved in neighborhood development. I applaud this legislation because it will serve as a vehicle for self-help efforts of neighborhood residents. It combines the best ingredients of a public-private partnership and entrepreneurship as well as self-help. It requires that neighborhood groups first raise private funds in their neighborhoods from residents, churches, and businesses. These funds in turn will be matched by public funds from the Federal Government.

In this time of austerity, this legislation will demonstrate that nonprofit neighborhood-based organizations are extremely effective in meeting human needs at low cost including job creation, housing rehabilitation, small business revitalization, financial reinvestment, neighborhood conservation, and general community improvement.

The Neighborhood Demonstration Act deserves early consideration by the Congress.

NEED FOR AMERICAN CONSERVATION CORPS

(Mr. CLARKE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CLARKE. Mr. Speaker, I would like to point out that unemployment is a very serious problem for millions of Americans even in areas where there is not a concentration of heavy industry.

In the 16 counties of my district, which is located in the heart of the Appalachian area, unemployment in one county is more than 25 percent, in two counties it is over 20 percent, and in six others it is in double figures. This means suffering, anxiety and worry for hundreds of families. Many others face the future with uncertainty. We realize that the situation is much worse in other parts of the country.

In the face of such a grave unemployment problem Congress and the administration must work together to help provide jobs for those who need them.

The critically high percentage of unemployment among young men and women underscores the need for the program of the American Conservation Corps as proposed in H.R. 999. This program, which would be financed by user fees from the national parks, will take unemployed young people under 26 years of age from areas of high unemployment and put them to work in our national forests, national parks, and other public areas, maintaining, restoring, and improving forests, trails, bridges, roads, strip-mined lands, and other sections of these areas. It is a program similar to the Civilian Conservation Corps of the 1930's many of whose buildings, roads, and trails are still being used and enjoyed by people today.

The American Conservation Corps, as proposed in H.R. 999, will be valuable not only for what it does for our national parks and national forests but also for the training, hope, and restored self-esteem it will give to those who participate.

Mr. Speaker, I think we all agree that programs to provide jobs like this should be a major goal of the 98th Congress.

SOUTHWEST COLLEGIATE INSTITUTE FOR THE DEAF (SWCID)

(Mr. STENHOLM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STENHOLM. Mr. Speaker, a critical need exists and is growing nationwide to extend basic postsecondary educational opportunities to many deaf persons who are presently denied such opportunities. It is in response to this situation that I am introducing legislation to provide for the operation of the South West Collegiate Institute for the Deaf (SWCID).

The postsecondary needs of deaf persons can be expected to intensify in the years ahead. One 1979 study showed that deaf persons in need of, and qualified for, postsecondary training who did not enroll in the only two self-contained college programs actually outnumbered those who did enroll by a ratio of 6 to 1. During the 1980's, the postsecondary deaf population will expand by as much as 2½ times, due to the number of deaf persons who have lost their hearing because of the rubella epidemic in the mid-1960's.

In addition to the rubella bubble in the deaf population, the underlying population of deaf persons in the United States will continue to expand. This is due to several factors, including: First, the expanding national population; second, the development of more and more elementary and secondary educational programs for deaf persons closer to home that is creating a growing feeder system for postsecondary programs; and third, improved early identification systems

that are locating deaf persons at an earlier age and in increasing numbers than was true in the past.

As this serious need expands, what has been our answer as a nation? A hearing student can pursue his or her major at a wide number of more than 3,000 colleges available to hearing students in the United States. After adding SWCID to Gallaudet College in Washington, D.C., and the National Technical Institute for the Deaf (NTID) in Rochester, N.Y., there are three self-contained postsecondary schools for deaf students in the United States—or the world.

During the 1981-88 period, more than 30,000 deaf students will have entered the postsecondary level. Approximately 10 percent of these can be accommodated at Gallaudet and NTID. Because of limited resources, SWCID can currently enroll a total of only about 115 students.

The importance of such a specialized, self-contained college experience for the deaf student is stressed by comparing the academic success rates at such institutions with those of deaf students in integrated programs at other schools. Approximately 65 percent of those entering Gallaudet and 20 percent of those entering NTID achieve bachelors' degrees and 60 percent of the NTID students receive associates' degrees. Among deaf students at regular junior and community colleges, the number achieving associates' degrees is about 5 percent.

There are approximately 115 integrated programs around the country. However, the needs of deaf students that must be met by academic, administrative, social, and career programs are highly specialized. In addition, the number of deaf students, attending integrated programs remains small—usually fewer than 50 to 100 students. Because of these factors, such colleges generally do not have adequate or appropriate student programs and do not have sufficient staff thoroughly trained to communicate with and qualified to work with deaf students.

For a number of reasons, including the fact that SWCID is already an operating entity, Federal support for SWCID can be accomplished with exceptional economy.

SWCID first opened on a very limited, State-supported basis 2½ years ago, on 75 acres of land near Big Spring, Tex. During this time, the institution has maximized the efficiency with which it has used available, and quite limited, resources. SWCID is located on a portion of what was formerly Webb Air Force Base. Some old base facilities are being adapted for use by the school, although a Federal prison camp housed nearby has received the use of superior base facilities. Therefore, a significant portion of the start-up costs normally expected need not be a consideration.

SWCID has a student body drawn from all around the country and, despite limited land and other resources, has begun attracting a distinguished faculty. However, the school does not have the financial wherewithal to expand the small size of its student body and make needed improvements, such as added housing and more complete academic offerings, without Federal assistance. In fact, whether this worthwhile institution can continue to exist at all without Federal funds, is quite questionable. Gallaudet and NTID are both recognized by Federal statute and are federally funded.

The costs for educating deaf persons are approximately 2½ times greater than the costs for educating hearing students. However, when needed special college programs are not provided, the damage and eventual social dependence of deaf persons on society has been estimated to be a least 10 times greater. The deaf college-trained individual will become a self-supporting, taxpaying citizen and a valuable contributor to business, industry, government, and to society in general. The legislation I am introducing, then, is a positive investment in the abilities of talented and motivated students.

These are inarguably budget-conscious times. Within the confines of an austere and reasonable budget, however, we must still set priorities when a great need is recognized. It is my strong feeling that, even given present budget constraints, there is room in a budget approaching $850 billion—estimated fiscal year 1984—for providing badly needed educational opportunities for this largely disadvantaged segment of our society.

POSTPONE THE SOLOMON AMENDMENT

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, today I am introducing legislation that will save the Government the embarrassment of seeing unwieldy regulations applied too abruptly.

My legislation simply delays the date of implementation of the Solomon amendment 1 year, to July 1, 1984.

The Solomon amendment, passed into law last year as part of the Department of Defense authorization, denies Federal financial aid to college students who fail to register for the draft. The law is to take effect July 1, 1983. The proposed Department of Education regulations, though, force schools to police the law much sooner.

Portions of the regulations force school financial aid offices to require students who already received loans and grants for the 1983-84 school year to prove their draft registration status with the school. These offices would also have to notify banks and the Education Department if no proof is received to reclaim money or stop interest payments on loans already in student bank acounts.

Clearly the policing burden for this is on the schools, ill equipped for the job on such short notice. By late spring, when the final regulations are published, schools will be rushing to complete application reviews and money disbursal. In Colorado, approximately 30,000 financial aid applications are processed by less than 150 financial aid counselors. To ask counselors to then go back and verify the registration status of loan and grant recipients asks too much of too few.

Colleges and universities estimate that, to comply with the regulations, between two and four full-time employees will be needed, computer systems reprogramed or redesigned, and administrative practices reshuffled all at a time school budgets are bareboned. Is this the regulatory burden the administration said it wanted lifted? During consideration of the Solomon amendment, Office of Management and Budget Director David Stockman raised a valid red flag:

> The regulatory and enforcement role that would be created . . . is far beyond any of our current activities and would impose considerable burdens on institutions of higher learning and members of the public. We are deeply concerned that the burdens imposed would far outweigh the gains.

Regardless of what you think about the Solomon amendment and draft registration, the simple fact is that this type of retroactive certification process to prove draft registration is simply not fair nor feasible on such a short timetable. A 1 year delay will solve this problem. It will make the 1983-84 school year provision moot and will give schools breathing time to implement the rest next year.

KOREANS DRAGGING THEIR FEET ON PURCHASE OF AMERICAN RICE

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, along with other Members of Congress from rice-producing States, I met today with Secretary of Agriculture John Block in an effort to resolve the impasse that exists between the Government of Korea, our own Government, and American rice farmers.

The issue is a simple one: The Koreans solemnly agreed to purchase American rice of the 1981 crop year, but continue to pursue dilatory tactics beyond the deadlines and extensions of deadlines in a continuing effort to drag their feet and to breach their agreement.

Meanwhile, the American rice farmer is suffering irreparable harm and damages mounting in the millions of dollars. It is high time, Mr. Speaker, for Secretary Block to speak up strongly for the sanctity of contracts in international commerce and the interests of American farmers, and so should the Department of State and the administration as a whole.

This country must have a coherent and forceful bipartisan trade policy if we are to enforce the principles of free and fair trade in international commerce.

BRAZIL OFFERS METALLURGICAL COAL INDUSTRY A MAJOR MARKET AS EXPORTS TO JAPAN DECREASE

(Mr. RAHALL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RAHALL. Mr. Speaker, in West Virginia today, over 25,000 coal industry employees are out of work. This figure represents 33.2 percent of the coal labor force in that State. In some areas, the unemployment rate is even worse. Southern West Virginia, long the backbone of the metallurgical coal industry, is experiencing unprecedented levels of unemployment. One county in southern West Virginia, McDowell, has an unemployment level of more than 35 percent. Up Gary Hollow, in southern West Virginia, you will find 90 percent unemployment and the city of Gary cannot even light its street lamps at night. It should be noted that approximately 75 percent of the personal income in this county is derived from the coal industry. A great part of the counties I represent fall under the United Mine Workers of America District 29. Within district 29, there is a 60-percent unemployment rate among union miners. Other portions of my district lie within district 17 of the UMWA in southern West Virginia.

The predominant coal in this region, as I mentioned, is of the metallurgical type used in steelmaking. A good portion of this coal is exported to foreign steel-producing countries with Japan representing the single largest market for U.S. metallurgical coal. However, Japan has been cutting back on its importation of U.S. coal recently and is now obtaining more than one-half of its requirements from Australia. This is due to Japan's large investment in the Australian coal industry and because of the lower price of Australian coal shipments to Japan.

U.S. coal companies which ship to Japan may experience reductions in their metallurgical coal exports by as much as one-third this year. As such, it is of extreme importance that U.S. metallurgical coal producers find other markets for their product. It is with great pleasure that I may report one such market exists: Brazil.

In 1978, Brazil imported only 1.4 million tons of metallurgical coal from the United States. Through diligent effort, however, this figure rose to 3 million tons in 1982. Because of a great deal of attention given to the Brazilian metallurgical coal market—I visited that country in January 1981 and again this past January and had the opportunity to speak with Brazilian authorities personally—the United States should increase its shipments to Brazil by 1.5 to 2 million tons within the next 7 years.

Mr. Speaker, the principal U.S. exporters in the Brazilian trade are Pittston, Island Creek, Consolidation, and Massey. Other U.S. exporters include Westmoreland, Eastern Associated, and Jno. McCall Coal. With the exception of the latter, all of these firms have operations in southern West Virginia. It should be noted that the 3 million tons of metallurgical coal shipped to Brazil last year provided direct employment in coal mines and support industries for 3,200 persons and sales from this coal contributed over $200 million toward a favorable balance of trade.

With respect to the Japanese coal trade situation, it is my hope that a certain degree of reciprocity may be maintained. The United States is one of the largest markets the Japanese have for their steel products and it only seems fair that they should obtain a majority of their metallurgical coal requirements from this country. I say this with special emphasis on the $19 billion trade imbalance existing between the two nations. Based on this premise, I asked President Reagan to discuss the importance of the coal trade with Prime Minister Nakasone of Japan during their meeting here last January. Recently, I was informed by the State Department that during that meeting the President and the Prime Minister agreed to establish a United States-Japan Energy Working Group. One of the tasks of this working group will be to examine the potential for increases in the coal trade between the two nations. Any such increase would certainly help alleviate the unemployment situation in southern West Virginia and I sincerely hope we will see tangible benefits from this endeavor.

LOGJAM AT BORDER CROSSINGS

(Mr. COLEMAN of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COLEMAN of Texas. Mr. Speaker, during my last trip to my west Texas district, I had the opportunity to visit El Paso's sister city, Ciudad Juarez, Chihuahua, Mexico. I find it incumbent to report on a very serious situation developing along the border. Due to unrealistic budget constraints, U.S. customs and immigration officials have been forced to decrease the number of personnel inspecting and controlling crossings at the international bridges between the United States and Mexico.

This situation has created a logistical nightmare. Cars attempting to enter the United States—a majority with Texas license plates—were backed up for several blocks into the central business district of Cuidad Juarez. This slowdown created major traffic jams for this city of nearly 1 million people and required special action by their city police to resolve the traffic problem.

I am concerned about this logjam for a number of reasons. First, it burdens the generally good relations that exist between our two countries and the trade that we both depend on. Second, time delays in border crossings increase costs for business that depend on commuter crossings between the two cities. Third, I am troubled that the tourist industry, a vital part of the border economy, would be adversely affected by unreasonable time delays at the international bridges. And finally, cars that idle at the border add significantly to the region's air pollution problems.

Exacerbating the problem, the administration has recommended a reduction in customs personnel by approximately 2,000 positions, of which 820 would be inspectors. The Director of Customs in El Paso has been forced to reduce overtime positions on Sundays and holidays, which are traditionally very busy crossing periods. In a similar fashion, immigration personnel has steadily decreased by 13 percent since 1979. Ironically, in the past several years there has been a substantial increase in the volume of passengers and cargo entering the United States. These are budget areas to be scrutinized very carefully because of the unique nature of the border economy in my district.

A TRIBUTE TO ROBERT C. COCHRAN

(Mr. BEVILL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEVILL. Mr. Speaker, on August 1, 1961, Speaker Sam Rayburn appointed Robert Cochran to serve as an official reporter to the committees of the U.S. House of Representatives. At the close of business Monday, February 28—22 years later—Bob will record his last word, pack his stenotype machine, and begin enjoying a much-deserved retirement.

Bob began his reporting career in 1941 as a civilian reporter for the U.S. Army. In 1943 he joined the Army and served in World War II as a chief warrant officer. After the war, Bob worked as a freelance reporter, covering congressional hearings for various firms in the Washington, D.C., area.

Upon his appointment as an official reporter to the House, Bob quickly established a reputation as an innovator and a technologist in the often hidebound world of shorthand reporting. In fact, at the time Bob came to work on the Hill, the reporters' office was so antiquated that they did not even have a duplicating machine. Bob succeeded in having the first duplicating machine installed in the offices of the official reporters.

In 1976, thanks to Bob's far-reaching knowledge of the then relatively new field of word processing, the committee reporters began generating a magnetic computer tape of the verbatim transcripts which greatly expedited the editing process, sped up the printing of the bound volume of the hearing by the Government Printing Office, and resulted in a savings of millions of dollars of the taxpayers' money.

In 1979, Bob became the first stenotype reporter to serve as an official reporter of debates on the floor of the House. In 1981, when the offices of the debate reporters and the committee reporters were merged, Bob started covering committee hearings in the early part of the year—when floor activity is relatively light—and reporting floor debates the latter part of the year, when our activity in the Chamber increases. In the 2 years since the merger of the offices, all reporters working for the House of Representatives have begun to work under this system, leading to a more efficient utilization of their talents.

Bob has always been known for his quick sense of humor, his high degree of shorthand skill, and his unfailing willingness to help new reporters get established in the fast-paced world of congressional reporting.

Bob will be sorely missed by all the Members of the House and by his colleagues in the reporting profession. As he leaves these historic halls of the House of Representatives, which he loves so much, all of us wish Bob and his wife, Christel, many years of future happiness and relaxation.

□ 1515

THE SOLAR ENERGY NATIONAL SECURITY AND EMPLOYMENT ACT OF 1983

(Mr. WIRTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WIRTH. Mr. Speaker the energy crisis is gone from the headlines. Our national preoccupation with gaslines and the billions of dollars annually transferred to OPEC has been replaced with a concern about the effects of rapidly falling oil prices on national and international banking systems. But this reprieve is temporary, and must not weaken our resolve to meet our stated national goals of developing alternative energy sources and reducing our country's dangerous dependence on foreign oil.

The SENSE Act, which we are introducing today, provides a broad and cost-effective framework for accomplishing these goals. It will harness the tremendous potential of renewable energy and conservation programs to increase employment, promote small businesses, enhance our national security, and reduce the need for imported energy.

SENSE is the legislative tool through which the Nation's conservation and solar industries can be more fully developed, commercialized, and integrated into our Nation's energy grid. SENSE is also the political tool that can be used to promote a rational and comprehensive energy policy. It does not propose massive, new regulatory structures, but rather the coordination of existing Federal initiatives so that the current fragmented grab bag of programs can be transformed into a comprehensive national policy.

The need for the SENSE Act in this context is clear. The current administration simply has no energy policy. If one eliminates the amount proposed for nuclear technologies from the administration's fiscal 1984 budget request, one is left with $314 million for all other energy research and development—ranging from coal to solar. This is compared to the $2.4 billion for these efforts in 1981. Nonnuclear energy research and development represented 60 percent of the total energy technologies budget in 1981; the administration wants to drop that to 16 percent in 1984. What would this mean? Another giant step toward destroying the careful balance in energy development which was in place, after years of effort, at the beginning of this decade.

This approach to energy research and development is pound foolish, and that is why I am proud to sponsor the SENSE Act. While a high administration official has been quoted saying solar energy would only amount to a "few windmills," the bipartisan group of Members of Congress from both Houses sponsoring this bill knows otherwise.

Among the most important reasons for promoting the development of renewable energy and conservation technologies is their tremendous potential as major new export industries. They are clearly among the future winners in our rapidly changing economy which can provide jobs at home and contribute in a major way to sustained economic growth. For example, exports of photovoltaics rose 79 percent from 1979 to 1980, and exports of solar heating and cooling products rose 45 percent in that period. This was at a time when these technologies were just becoming commercially viable.

Although U.S. firms pioneered the development of photovoltaic cells—which directly convert sunlight into electricity—and many other new energy technologies, this administration wants to end our very modest commitment to making them competitive in world markets. Such shortsighted action would delight our economic competitors in Europe and Asia.

The SENSE Act also realizes that for American consumers and businesses to reap the benefits of these technologies, we need to extend business and residential tax credits until 1990, reauthorize the Solar Energy and Conservation Bank, encourage small businesses to continue their innovations in this field, adopt a more assertive trade posture, include renewable energy in strategic planning, reaffirm our commitment to low-income weatherization, and take a variety of other steps to realize the potential of these energy sources.

I am optimistic that our colleagues in Congress will realize the eminent sense the SENSE Act makes, and that we will be able to pass it in this Congress.

● Mr. CONTE. Mr. Speaker, this day marks a momentous occasion in the history of renewable energy. The bill we are introducing today is the culmination of years of effort in the renewable energy field. This comprehensive bill presents renewable energy as a viable answer to many of the major issues facing this Nation today—the cost of imported oil, jobs, and national security.

We have made strides over the past several years in conservation and renewable energy development. I am proud of my role in those efforts. In 1977 I introduced an amendment that tripled the appropriations for solar research and development. Also, I have been, and will continue to be a leader in the low-income weatherization program.

The motivation behind these conservation and renewable energy efforts was the stranglehold of OPEC on the United States. That organization has nearly brought us to our knees twice in the last 10 years. The oil shocks of 1973 and 1977 made us realize we had to become energy independent.

Today, partly because of the conservation efforts of our citizens and partly because of the recession, the price of oil is dropping and OPEC is in disarray. But we must not let this disarray cloud our memories of the pain OPEC once inflicted upon us. We must

intensify our resolve to achieve energy independence as soon as possible. Why is time so important? Some oil analysts are predicting another oil crisis between 1984 and 1986. And as if to foretell this crisis, the Department of Energy predicts that oil imports will increase for the first time in 4 years during 1983.

There is no better time than now to focus our attention on the role of renewable energy. By showing how renewable energy can help solve the major issues facing us—jobs, national security and our reliance on imported oil—the SENSE Act can become the starting point for energy independence.●

● Mr. JEFFORDS. Mr. Speaker, it is a pleasure and a privilege to join with my colleagues today in introducing the Solar Energy National Security and Employment Act. It is time to rekindle Federal efforts to promote the development of renewable energy sources and I believe that this bill is an important vehicle for doing so.

In spite of signs that the OPEC cartel is in disarray and the current glut of oil on the international market, it would be foolish of us to believe that the energy crisis is over. We are still far too dependent on other countries for our energy. The reduced demand that has brought prices down is in large part due to the worldwide recession.

We are also facing two other immediate problems in this country that are related to the energy crisis and its impacts. One is an unacceptably high level of unemployment. Another is a growing rate of farm failures. These problems threaten to have lasting adverse impacts on our Nation.

The bill we are introducing today is intended to help address some of these problems. A major obstacle to the development of renewable energy technologies is a shortage of skilled technicians in both construction and installation. Surveys indicate that poor installation of solar devices is often a far greater problem than equipment failure. This problem can impede the development of renewable energy sources by engendering public reluctance to invest in these technologies. For example, similar problems with heat pumps in the 1950's prevented their widespread use for nearly 20 years.

One title of the SENSE Act requires that the Secretary of Labor, within existing job training and placement programs, implement policies to enhance the development of a labor force skilled in energy conservation and renewable energy technologies. According to a 1979 study for the Joint Economic Committee, conservation and solar measures create two and a half times as many jobs as an equivalent investment in oil, natural gas, or electricity.

In the agricultural sector, it is becoming increasingly clear that a healthy farm economy is central to a healthy national economy. We must work to reverse the current trend of farm bankruptcies and growing rural unemployment. Unstable energy prices have contributed to these trends, and many farmers have found that windmills, anaerobic digestors, solar heating, and other renewable energy technologies can be cost-effective additions to their operations. The traditions of innovation and self-reliance are perhaps stronger on our farms than anywhere in our Nation.

One section of the SENSE Act attempts to stimulate the use of renewable energy technologies and energy conservation through existing programs of the Department of Agriculture. It is important that USDA help to educate farmers about the benefits of insulating themselves from the vagaries of the international oil market. This can be accomplished with only minor modifications of existing programs.

I want to reiterate my enthusiasm for this bill, its sponsors, and the approach of working through existing programs to promote a sound national energy policy. I am optimistic about the prospects for this legislation and I look forward to working with this diverse group of sponsors.●

● Mr. BEDELL. Mr. Speaker, I am pleased to join my colleague from Maine, OLYMPIA SNOWE, as a sponsor of title 1 of the Solar Energy National Security and Employment Act (SENSE).

The introduction of the SENSE Act comes at a time when our renewable energy programs are under siege. For the past 2 years, Congress has been able to fight off administration attempts to virtually eliminate entire renewable energy programs by voting to maintain minimum program budgets. In addition, by twice showing strong bipartisan support for the business and residential energy tax credits, Congress was able to convince the President to back off from his proposals to eliminate them in fiscal years 1982 and 1983.

This year the story is much the same. The administration's fiscal year 1984 budget request for the Department of Energy contains drastic cuts for renewable energy programs. On the other hand, nuclear energy programs continue to receive the lion's share of DOE's budget. The chart below looks at selected items from the Department's fiscal year 1984 budget request and compares them to actual funding levels in 1981. Note the staggering increase in the atomic energy defense activities at DOE, both in dollars and as a proportion of the DOE's total mission.

SELECTED ITEMS FROM DOE'S ENERGY BUDGET

[Dollars in millions]

Description	Fiscal year 1981 actual	Fiscal year 1984 Reagan request	Percent of change
General Science & Research	504	645	+28
Conservation activities	712	74	−90
Geothermal R&D	143	13	−91
Solar R&D	500	87	−83
Electrical energy	40	12	−70
Fossil energy activities	994	138	−86
Energy storage	72	14	−80
Hydropower R&D	12		
Total non-nuclear	2,977	983	−67
Atomic energy defense activities	3,668	6,778	+85
Nuclear fission R&D	986	844	−14
Nuclear fusion R&D	376	467	+24
Total nuclear	5,030	8,089	+61

Most troubling to me is the failure to commit the Government to a policy of pursuing least-cost energy options. Such a policy, in the long run, could reduce our dependence on unstable and environmentally unsound sources of energy.

If we are going to adopt the notion of an unencumbered, free market, hands off approach to energy policy, as the administration claims, then we must not play games as they are with fiscal year 1984 budget request, by blatantly favoring certain energy technologies over others. If the administration is really serious about free-market energy policies, then I suggest we join together to root out the billions of dollars of subsidies we now give each year to petroleum, gas, coal, and nuclear industries. But if this administration will not or cannot do this, then they should at least stop trying to kill the emerging new technologies that are arising to compete with those older sources of energy.

But our Government continues to encourage, through tax policy and numerous other subsidies, conventional and capital intensive sources of energy. We are even encouraging the export of nuclear technology and hardware using scarce trade subsidies.

At the same time, this administration makes it extremely difficult for renewable energy industries to gain access to similar subsidies. In the last Congress I chaired the Small Business Energy Subcommittee. We held hearing on marketing opportunities in the photovoltaics industry. You would not believe the trouble the photovoltaics industry has in getting just a little respect from this administration. Foreign competitors, who enjoy strong support from their governments, are rapidly overtaking our domestic solar industry in the race for world markets.

I submit that our present national energy policies, if we can call it that, is taking us in the wrong direction. If we continue on our present course, we will have to pay a tremendous price in the future for the poor choices we are making today. We will lose some of the technological advantages over our

international competitors that we have achieved in recent years; the growth of new energy industries in this country will be stunted; jobs and tax revenue will be forgone, and our national security will be weakened. All this is likely unless we act now to increase our energy independence by investing in the energy sources of the future.

That is why the SENSE Act is so important. This legislation is the rallying point behind which we can gather to affirm our support for a rational, balanced energy policy in America. The time has come for the Congress to write and present to the President its own national energy plan. We must reject the confused and misguided policies that this administration has sent forward.

Mr. Speaker, the following is an outline of title I of the SENSE Act, the Renewable Energy Small Business Development Act of 1983.

OUTLINE OF TITLE I OF THE SOLAR ENERGY NATIONAL SECURITY ACT

Title I: "The Renewable Energy Small Business Development Act of 1983."

To extend the business energy tax credits for all renewable energy applications through 1990; to increase the business tax credits for solar, wind and geothermal energy applications to 25 percent, and the business tax credits for hydroelectric projects to 15 percent.

To reserve at least 12 percent of the Export-Import Bank's loan authority in any fiscal year for businesses with $25 million or less in previous-year sales, with a suggested involvement of renewable energy businesses.

To instruct the U.S. Department of Commerce, in the context of its trade development policy and program activities, to address the renewable energy sector as a separate industry sector and to coordinate trade development activities through its formal industry and export-related organizations.

To clarify Section 210 of the Public Utility Regulatory Policies Act (PURPA) of 1978, re-establishing the right of small power producers to interconnect with utility grids, and to enter into power exchanges with utilities at fair and reasonable rates as intended in the original Act.

To reaffirm the importance of small innovative businesses in federally-supported research, development and demonstration (RD&D) activities as required under P.L. 97-219, and to suggest that a portion of the U.S. Department of Energy programs under this law be reserved for renewable energy small R&D businesses.●

GENERAL LEAVE

Mr. WIRTH. Mr. Speaker, I ask unanimous consent that all Members may be permitted to revise and extend their remarks on the subject of my 1-minute speech today.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

REAGAN BUDGET SLASHES FUNDS FOR CUSTOMS SERVICE

(Mr. GIBBONS asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, I had not planned to say anything about the Customs Service here on the floor, but I am glad the gentleman from Texas (Mr. COLEMAN) brought the subject up.

The Reagan budget really slaughters that service. It not only will produce long lines in Texas, it will produce long lines all over the country at airports, terminals, wharves, and everyplace else. It will cost the country some money.

The Customs Service collects about $9 billion a year, and it is a vital law enforcement agency of this Government.

There is some hope, though, that if some of the Members will not fight so much for their district offices or regional offices that we do not need, we will be able to save some money and some personnel so we can put them out on the firing line where they can be collecting the customs and doing the inspecting. We have too many people at the headquarters and placed in certain very sacrosanct areas that belong to Members, and they do not want to give them up. That is a part of the problem.

THE INSANITY DEFENSE REFORM ACT

(Mr. SENSENBRENNER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SENSENBRENNER. Mr. Speaker, last year's outrageous verdict of not guilty by reason of insanity against John Hinckley, attempted assassin of President Reagan, has proven that the insanity defense is a rich man's defense. It proved any criminal rich enough to bring in batteries of psychiatrists and other experts could confuse a lay jury enough to escape punishment appropriate to his crime.

As a remedy to this inequity, some of my colleagues are suggesting we eliminate insanity as a defense altogether, while others are calling for shifting the burden of providing the insanity of the accused from the prosecution to the defense. Mr. Speaker, I believe there is a better answer: to allow a verdict of guilty but insane.

I have introduced the Insanity Defense Reform Act, which provides that one who has committed the offense charged, but who is also judged to be insane, shall receive a provisional sentence to be served either under hospitalization or, upon recovering his sanity, in a correctional facility, just as any other sane offender would.

Under this system, for example, John Hinckley would be hospitalized until declared sane, then transferred to serve out the rest of his sentence at a prison facility. Such a verdict alternative would discourage rich defendants from waging an insanity defense, for they would know from the start they would be risking a full sentence at one institution or another.

As much as we need to protect the rights of the accused, we also need to protect society from being victimized by rich or clever defendants twisting the law to their own ends. We need a guilty but insane verdict option, or more John Hinckley type outrages will happen again.

TRUTH SQUAD REQUIRED ON 10-PERCENT WITHHOLDING

(Mr. BOEHLERT asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BOEHLERT. Mr. Speaker, one of the promises I made to myself when I started out on this job of being a Representative was to strive always for the facts on issues before Congress.

I knew we would be faced with a wide range of complex issues. I also knew we would be constantly embroiled in controversy because, when all is said and done, there are always at least two sides to every issue. I asked myself an important question and then, after giving it considerable thought, I came up with what I feel is the best answer.

The question? What should guide me in making determinations in my representative capacity. As we all know, there are several choices. My answer? Get the facts and then respond in a manner that demonstrates a sincere determination to be honest and fair in discharging my important responsibilities in the best interests of the people I am privileged to represent. That sounds good, but as we also know, it is not always easy. As a matter of fact, it is seldom easy.

One of the conditions which often makes the going rough is the daily avalanche of mail from people who have the benefit of only one side of an issue. A case in point is the current flood of correspondence seeking—often demanding—repeal of the law calling for withholding of taxes on interest and dividends starting July 1.

If I were to believe the mail on this subject which is bombarding us all, those who preceded us in the last Congress and are responsible for the pending change were totally irresponsible. The action they took will hurt, according to one form mailing I have received, "the poor, the elderly and children." That should be enough to make anyone take notice. I certainly did.

Additionally, we are told, unless this new law is repealed, the American people will stop saving. That is another allegation that caused me great concern, especially at a time when I really want to be identified with efforts to encourage saving.

There are more charges. A new tax when we are attempting to cut taxes. Double taxation which of course is unfair. The list is long.

Being faithful to my personal pledge, I set out to get the facts, resisting the politically popular and more expedient urge to toss a repeal bill in the hopper which would have made life a lot easier for my staff and me. What I am finding suggests to me we should establish a truth squad to address this issue and release its findings.

No, it is not a new tax and it is not double taxation. And no one has yet proven to me that we have facing us a major disincentive to saving. The poor certainly would not be affected and neither will the vast majority—at least 90 percent—of the elderly. They will be exempt.

I am not standing here promoting this new law and I am not about to lead a cheer for those who are responsible for it. Maybe they were wrong, but then again maybe what was done had to be done in the quest to get our financial house in order when we have a national debt in excess of $1 million and annual budget deficits in the $200 million range.

In the final analysis, were we not all sent down here to do what is right for the country? And is it not our obligation to be guided by the facts?

Mr. Speaker, I commend to the attention of my colleagues a Washington Post editorial on the subject. The piece suggests there is more than one side to the issue:

THOSE "UNTOLD BILLIONS"

What's so wrong with asking people to pay their taxes? Senate Finance Committee Chairman Robert Dole posed that question that other day to leaders of the American Bankers Association. It's a question that needs a much better response than the campaign of obfuscation and hysteria launched by the bankers in opposition to the new law requiring partial withholding of taxes on interest and dividends.

The bankers know full well that the new law will put no burden on any honest taxpayer. No one is being asked to pay anything he does not already owe. People who are elderly or have modest incomes are exempt. The interest lost from quarterly withholding of taxes would amount to a maximum of 50 cents a year on a deposit of $1,000. Would that bank service charges were so low.

But protesting bankers also know that it is easy to confuse people about tax law changes. So instead of preparing to put the law into effect, they have bought ads, given speeches alleging that Congress is "looting" savings, and mailed misleading fliers to their depositors with form letters to congressmen enclosed.

Like most such tactics launched upon an uninformed and frequently elderly public, these have had their effect. The form letters have poured into Congress. A substantial number of senators and representatives—who, alas, are frequently no better informed than their constituents—are said to be considering repealing the withholding provision.

What prompts this disingenuous behavior? Surely no real concern for the convenience of depositors. As a matter of fact, bankers opposed the exemption provisions for elderly and low-income people when the law was being drafted. What they really appear to be worried about is their own convenience—and the prospect that withholding might scare off depositors with an inclination to tax evasion.

Banks already send quarterly information forms to the IRS on all dividends and interest. Accompanying them with a 10 percent fund credit would amount to no more than the electronic equivalent of the flicker of an eyelash. The cost would be minuscule compared with the cost of having the IRS track down and collect from each of the distressingly large number of tax evaders. But the banks would still have you believe that this new chore would cost them and their depositors, as it is regularly said, "untold billions."

But the thing about untold billions is that the usual reason they are untold is that telling them would require using numbers with several zeros immediately to the right of the decimal point. Somehow a number like $.001 billion has a lot less impact. But speaking of untold billions, you might want to remember that these bankers who now claim to be so concerned about prudent operation are the same ones who have been recklessly investing overseas and who would now like to have government protection from the consequences of their folly. Here the billions involved are more unspeakable than untold—and certainly uncollectable.

You might also remember, as Sen. Dole has done, that banks now pay notoriously low taxes. If Congress unwisely decides to repeal the withholding provision, one very good way to replace the $22 billion in unpaid taxes that will be lost over the next five years would be to repeal some of the provisions that now favor banks over other taxpayers.

COMPUTER SERVICES CONTRACT AWARDED TO CANADIAN FIRM

(Mr. SCHULZE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHULZE. Mr. Speaker, the Department of Commerce has just entered into a contract with a Canadian firm, Datacrown, to manage the computer data for the export tracking system. Simply put, this means that all of the information dealing with overseas transactions, international trade fairs, and foreign investments for small, medium, and large U.S. companies will be processed in a competing foreign country. If this is not the classic case of allowing "the fox to guard the henhouse," I do not know what is.

I find it unbelievable with the current staggering trade deficits facing our Nation that the Secretary of Commerce could sanction such an outrageous award. I continue to be amazed at the ways we try to undermine our business community.

Last year we were treated to the Department allowing the Canadian Government to subsidize the interest rate on a finance package for subway cars for the metropolitan transit authority of New York. The result of that fiasco was the loss of almost $700 million worth of business to American industry.

I can hardly wait to see what they come up with next.

A PROPOSAL TO REPLACE 10-PERCENT WITHHOLDING WITH OTHER TAX-RAISING PROVISIONS

(Mr. GUNDERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUNDERSON. Mr. Speaker, it is easy to get people to oppose any tax, and it is especially easy to get them to oppose a new tax which has not yet been implemented. Therefore, I do not think any of us have been surprised at the letter-writing campaigns and the mail we have received which indicate to us that the public wants us to repeal the 10-precent withholding provision scheduled to go into effect on July 1.

But the fact is that, as we deliberate toughly over a projected $200 billion deficit, both in 1983 and in fiscal year 1984, and as we begin to look at the 1984 budget, I think we all realize that this Congress is not in the business of cutting taxes, and, therefore, probably we do have a bad law on the books, a law that is going to be an administrative nightmare to many of the financial institutions in this country and does cause some great legitimate concerns to some of our elderly population and others, some of it justified, some of it not.

It seems to me that the only responsible course for us to follow, if we do not like this particular way of collecting taxes in 1983, is to find a different way to raise the same amount of revenue. Therefore, I have today introduced in Congress a bill that will repeal the 10-percent withholding provision, but it will do so by replacing that with three other revenue-raising measures that would provide the U.S. Treasury with the exact amount of money over the next 5 to 6 years.

Mr. Speaker, I would call this to the attention of colleagues as we look at ways of raising that revenue. I think we will find that this will not affect the majority of our constituents, and it will not create the paperwork, the

backlog, and the nightmares we are going to face with the new law.

LAST YEAR'S TAX BILL CALLED A "FIASCO"

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, by even the most conservative estimates, over 2 million pieces of mail have come on to Capitol Hill in the last few weeks on one subject, the 10-percent withholding tax. The people are saying clearly in those communications that last year's tax bill was a mistake, a bad mistake.

We all remember how big a mistake it was, a mistake so obvious that the bill had to be shoved through here in a hurry-up fashion and in an unconstitutional manner. The American people are now saying that we should not have passed that bill and it should now be repealed.

What is the reaction to this outpouring of public opinion here on Capitol Hill. Our leadership chooses to ignore the people. The arrogance of power shows up as those responsible for last year's tax fiasco now protect it with threats of intransigence.

Mr. Speaker, the people of this country are speaking out against taxes, and it is high time that Congress listens. Up until now Congress has refused to listen.

THE EMERGENCY FOOD ASSISTANCE AND COMMODITY DISTRIBUTION ACT OF 1983

(Mr. PANETTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PANETTA. Mr. Speaker, today I am introducing H.R. 1590, the Emergency Food Assistance and Commodity Distribution Act of 1983, which I hope will make an important contribution toward addressing the increasing problem of hunger in the United States. I view the early passage of this bill, or a modified version of it, as a top priority in my capacity as chairman of the Agriculture Committee's Subcommittee on Domestic Marketing, Consumer Relations, and Nutrition. I am very pleased that Mr. EMERSON, the ranking minority member of the subcommittee, is among the original cosponsors of the bill and I would like to thank him for his assistance in designing it.

PURPOSE

The most immediate and important purpose of this bill is to establish an effective program to move surplus commodities owned by the Federal Government to those in need. Currently, Federal efforts to move so-called bonus commodities have been limited to dairy products—primarily cheese and butter—and have been hampered by insufficient funding to cover the costs of transporting, storing, and distributing the commodities. This bill would give emergency feeding centers first crack at whatever surplus commodities are held by the Commodity Credit Corporation and would provide the administrative funding needed to move those commodities to areas of acute demand.

In addition to serving emergency needs, this bill would allow other public and private nonprofit agencies to receive surplus commodities and would provide administrative funding to get them there. Many of these recipients, such as schools, child care centers, and elderly feeding programs, have incurred significant budget cutbacks in recent years and the availability of bonus commodities will ease some of their budgetary strains. In fact, the majority of commodities provided under this bill will end up in these nonemergency programs. I think it is just good sense to use commodities that are truly in surplus to feed people in these programs rather than let them sit indefinitely in storage.

The other obvious advantage of making these surplus commodities available to a wide range of worthy institutions is that agricultural markets will be strengthened. Like the payment in kind (PIK) program, this bill should help counteract the dampening effect that large surpluses have on commodity prices.

I would like to state at the outset that I am not wedded to every last provision in this bill. This is a proposal that I hope will be refined and perfected by hearing testimony and expert opinion in the coming weeks. We are trying to design a new program to meet the needs of various constitutencies and inevitably new facts will come to light and cause us to revise our initial judgments. However, we have consulted a wide range of public and private officials, food bank operators, and others in preparing this bill and I am confident that it provides an excellent starting point for effective legislation.

I would, however, like to raise one additional caution about this bill. I do not believe that this bill, or any other bill that expands commodity distribution in the United States, will solve the issue of hunger in America. I am introducing this bill because I sincerely believe it will be constructive and helpful. But if there is one thing that all the experts I have consulted have agreed upon, it is that this bill will make a relatively modest contribution toward meeting the growing problem of hunger across the United States. This is true for a variety of reasons, but primarily because the program, like other commodity programs before it, will provide limited quantities of a limited variety of commodities to a limited population.

I do not wish to sell this program short. It will certainly help and in some areas it will help a great deal. But it should be seen in its proper light. It will be a relatively small and probably temporary supplement to the country's most basic and efficient feeding program, the food stamp program. It will partially fill some of the significant gaps left by the food stamp program, including those in need who either do not qualify for food stamps and those whose benefits run out before the end of the month.

This bill should not be seen in any way as a substitute for the food stamp program. Any additional cutbacks in food stamp benefits would undermine the effectiveness of this bill in serving emergency needs.

HOW IT WOULD WORK

The Emergency Food Assistance Act of 1983 would operate as follows:

First. The Secretary would be required to make all varieties of commodities acquired by the Commodity Credit Corporation (CCC) available without charge to recipients such as food banks, emergency feeding centers, schools, elderly feeding centers, child care centers, and charitable institutions. With the exception of emergency recipients, these CCC commodities would be made available only after certain domestic and foreign commitments are met.

Second. The Secretary would be required to pay the costs of initial processing and packaging to put the commodities into forms suitable for individual home and/or institutional use.

Third. The Secretary would be required to pay, up to a maximum rate established in the law, for actual costs incurred by States for storing, transporting, handling, and distributing commodities to eligible recipients. Additional administrative money would be available to food banks and other emergency programs for their costs in handling and distributing the surplus commodities at the local level.

Fourth. The Secretary would be required to set up a system to allow commodities to be moved directly from the Federal Government to food processors. These food processors would convert the commodities into end food products for eligible recipients, with the cost of processing ordinarily borne by the recipients.

The bill attempts to quickly provide as much USDA surplus commodities as possible to food banks and other emergency programs serving low income and unemployed persons. These programs would receive special help in the following ways:

First. Any Commodity Credit Corporation (CCC) stocks acquired under the price support programs would be available to the emergency programs.

Unlike other recipients like school lunch and elderly feeding programs, emergency programs would not have to wait for what is left after the operation of the payment in kind (PIK) program or after CCC makes any sales, or satisfies international commitments. Our research indicates that the total potential demand of emergency programs appears to be sufficiently small that it should not adversely affect the success of programs like PIK or interfere with other food aid commitments.

Second. If there is a shortage of available commodities, emergency programs would in all instances receive priority over the requests of other eligible agencies in a State.

Third. Emergency programs would not only receive commodities free of charge, but could also receive reimbursement for the costs of distributing them at the local level.

Fourth. To address the immediate need, the bill would require the Secretary to immediately inform the States and emergency programs of the availability of administrative funding and implement the program within 30 days. Apparently many States and emergency programs have scaled back their requests for urgently needed and currently available dairy commodities for lack of administrative funding. This notice should give the current surplus commodity distribution program an immediate shot in the arm.

Fifth. The Secretary would be required to provide up to $10 million toward the costs of processing commodities into end food products for emergency feeding programs.

COSTS

There are two primary costs that the Federal Government would incur under this bill. The first is the cost of processing and packaging commodities into a form that is usable by eligible agencies. The second is the administrative cost of storing, handling, and transporting commodities at the State, and in some cases, local levels. According to preliminary estimates, the combined costs for these two functions should be less than $100 million. Small additional costs would also be incurred in transporting commodities from the Federal to the State level and in providing up to $10 million for processing commodities for emergency feeding centers.

The costs of this program are determined primarily by the quantity of surplus commodities available and the demand for them. If either farm surpluses should diminish or high rates of unemployment abate, the costs of this program should decline.

Initial estimates indicate that this bill might result in an additional $400 million in surplus commodities moving from the Federal Government to States and localities in the first year of operation. This would bring the total amount of domestic surplus commodity distribution to about $1 billion a year. Unless there is a supply far in excess of what is now available and demand also greatly expands, there seems to be little potential for a significant growth in this program's costs.

To safeguard against a large growth in costs, the bill places a cap of $65 million on the total funding available to reimburse State and local administrative expenses. The bill also includes a ceiling on the rate at which administrative expenses can be reimbursed, but the $65 million cap has been included just in case the program begins to move far more commodities than anyone now anticipates. The cap on State and local administrative expenses will effectively limit the potential overall costs of the program. And the authorization for this program is limited to 3 years, which would assure that Congress must shortly reexamine it, whether or not cost should become an issue.

Setting the appropriate reimbursement rate for State and local administrative costs was one of the most difficult aspects of writing this bill. It was my hope to provide enough administrative funding to assure that commodities would move to State and local programs. I have been repeatedly informed that current State and local demand for cheese and other dairy products would be much higher but for the lack of funding to store, transport, and distribute these products.

On the other hand, I did not want to provide more funding than is needed to move commodities nor unnecessarily have the Federal Government pick up costs that can be borne at the State and local level. By setting a reimbursement rate of actual costs up to 5 percent of value, I believe we will adequately cover the incremental costs most States and localities will incur in handling these commodities. Most States and many eligible recipients already have systems in place to handle commodities received from other sources. This program is intended to pick up only the marginal cost increases that will be incurred from handling surplus commodities.

The issue of administrative cost reimbursements is one of the most significant in the bill. Is is an area that I suspect will generate much public comment that will assist our future deliberations.

CONCLUSION

I am aware that others in Congress and elsewhere are developing different approaches to moving surplus commodities from Federal warehouses to those who need them or can use them. From what I have seen so far, I do not think it should be difficult to reach agreement on a workable program. For many needy poeple, time is of the essence. I would hope that we can quickly take the best ideas from the various bills and proposals and have a program in place in the very near future.

If an emergency antirecessionary package moves through Congress in the next few weeks, I hope that parts of this bill will provide a useful approach toward addressing the hunger crisis. I applaud such efforts and will assist them in any way possible. However, passage of emergency legislation, even if it includes funding to distribute surplus commodities during the remainder of fiscal year 1983, will not obviate the need for this bill. The availability of surplus commodities and the demand for them will exist well beyond this fiscal year. The Emergency Food Assistance Act of 1983 would establish a more permanent mechanism to facilitate distribution. By all accounts, unemployment will remain high for some time to come, and it will be particularly important to have a program in place for next winter, and as needed in the future.

The following is a section-by-section analysis of the bill plus the text of the bill itself:

SECTION-BY-SECTION ANALYSIS

Section 1 provides that the Act may be referred to as the "Emergency Food Assistance and Commodity Distribution Act of 1983".

Section 2 amends subsection (a) of section 1114 of the Agriculture and Food Act of 1981. Notwithstanding any other provision of law—

Paragraph (1) requires the Commodity Credit Corporation (CCC) to make any of its stocks of commodities acquired under the price support program available, free of charge and without credit against any entitlements to commodities, to food banks, hunger centers, soup kitchens and like organizations that on an emergency basis relieve distress by furnishing food to low-income and unemployed persons. It also provides that CCC stocks of such commodities which exceed certain enumerated quantities shall be made available, likewise without charge or credit, to a range of recipients. They include charitable institutions, public or private nonprofit schools and school food authorities, State agencies designated by the Governor or other appropriate State officials for distribution of such commodities, nonprofit child care institutions, Federal, State and local penal institutions, disaster relief organizations, public or nonprofit summer camps, the commodity supplemental food program, the Summer Feeding Program, the Needy Family Program on Indian Reservations, and similar organizations and programs designated by the Secretary of Agriculture in consultation with State agencies. Available for distribution to such organizations or agencies are quantities of CCC commodities which exceed the total of (1) those which are to be committed by sales contracts entered into by CCC within the first six months of the fiscal year following the publication by the Secretary of amounts of commodities estimated to be available for distribution during that year, (2) those provided to food banks and the like, and (3) those needed to maintain the Food Security Wheat Reserve and to carry out the pay-

ment-in-kind land diversion program for farmers. The first criteria is to ensure that, while distribution may be made throughout the year, the stocks of CCC are protected to the extent sales are to be made during the first half of each fiscal year. In regard to item (3), consideration is to be given to stocks of commodities held by producers and pledged to secure CCC price support loans. Distributions are to include bulk distribution to congregate nutrition sites and providers of home-delivered meals under the Older Americans Act. The Secretary is required to publish by October 1, 1983, and each October 1 thereafter his estimate of the quantities of commodities to become available for distribution in each of the next two fiscal years.

Paragraph (2) provides that ordinarily the commodities are to be made available to State agencies which will administer the distribution program within the States. CCC would make commodities available directly to recipient organizations only if State agencies are not permitted by law to make distribution to those organizations. And CCC would also make commodities available directly to private companies under certain circumstances later described.

Paragraph (3) requires State agencies receiving CCC commodities to distribute them only to recipient organizations which the State agencies (or the Secretary with respect to direct distributions by him) determine are organizations of the type specified in paragraph (1) and will effectively distribute the commodities to those whom they serve. If for any reason a State agency does not have sufficient quantities of commodities to meet the requests from all eligible organizations, preference is to be given to requests from emergency feeding operations such as food banks.

Paragraph (4) directs CCC to pay the costs of initial processing and packaging of the commodities to be distributed into forms and in quantities suitable for use in individual households and for institutional use, as applicable.

Paragraph (5) directs the Corporation to make available funds not to exceed $65 million in the aggregate in any fiscal year for certain expenses associated with distribution of commodities. These include covering of the actual costs of State agencies (but not to exceed five percent of the fair market value of the commodities provided to them by CCC) in storing, transporting, handling and distributing the commodities, and paying or making advance payments to emergency feeding organizations such as food banks and the like to cover their actual costs in storing, transporting, handling and distributing commodities that they receive from the State agencies and in completing paperwork which is necessary only because of their receiving and distributing the commodities. However, if funds made available by CCC are not sufficient to cover all of such costs, preference shall be given to covering the costs of the emergency feeding organizations. CCC is also directed under the $65 million ceiling to make payments to emergency feeding organizations to cover storing and other distribution costs and completing necessary paperwork incurred by them with respect to commodities made available directly to them by CCC. State agencies are prohibited from charging recipient organizations for any costs incurred by the State agencies in carrying out the distribution program.

Paragraph (6) requires the Secretary to obtain such assurances as he deems necessary that recipient organizations will not diminish their normal expenditures for food by reason of their receiving commodities under these provisions. Eligible recipients are directed to request and distribute commodities only in quantities which can be consumed without waste.

Paragraph (7) directs the Corporation to encourage consumption of initially processed commodities made by making them available directly to private companies for further processing into end food products for use by recipient organizations. Such organizations are required to bear the expense of the further processing, except that CCC is directed to bear this expense, up to $10 million in any fiscal year, in connection with further processing of commodities requested by emergency feeding organizations. The Secretary is directed to administer the distribution program under this paragraph, including determination of the companies and recipient organizations who may participate.

Paragraph (8) prescribes a schedule for certain actions of the Secretary to implement the distribution program under the amendment. The Secretary is to inform State agencies of the provisions of the amendment not later than 15 calendar days after enactment, to begin distribution of commodities for use by emergency feeding organizations and issue related regulations not later than 30 calendar days after enactment, and to commence distribution of commodities for use by other recipient organizations and issue related regulations not later than 90 calendar days after enactment.

Paragraph (9) provides that section 4(b) of the Food Stamp Act of 1977, which generally prohibits distribution of food in areas where the food stamp program is in operation, shall not apply with respect to the distribution of commodities under the amendment.

Section 3 provides that the amended section 1114(a) of the Agriculture and Food Act of 1981 shall expire on September 30, 1986.

H.R. 1590

A bill to provide emergency food assistance to low-income and unemployed persons and to improve the commodity distribution program

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Emergency Food Assistance and Commodity Distribution Act of 1983".

SEC. 2. Section 1114(a) of the Agriculture and Food Act of 1981 (7 U.S.C. 1431e) is amended to read as follows:

"SEC. 1114. (a) Notwithstanding any other provision of law—

"(1)(A) Stocks of commodities acquired under the price support programs by the Commodity Credit Corporation (hereinafter referred to as 'the Corporation') shall be made available without charge or credit for distribution to food banks, hunger centers, soup kitchens, and similar public and private nonprofit organizations that relieve situations of emergency and distress by providing food to low-income and unemployed persons (which organizations are hereinafter referred to as 'emergency recipients').

"(B) Stocks of commodities acquired under the price support programs by the Corporation which exceed quantities thereof (i) to be committed under contracts of sale entered into by the Corporation before April 1 of the fiscal year following the date on which the Secretary of Agriculture (hereinafter referred to as 'the Secretary') publishes the estimate required under subparagraph (C), (ii) otherwise made available for distribution under subparagraph (A), (iii) necessary to maintain the reserve established under the Food Security Wheat Reserve Act of 1980 (7 U.S.C. 1736f-1), and (iv) necessary to carry out the payment-in-kind land diversion program for producers (taking into consideration stocks of commodities held by producers which are pledged to the Corporation as security for price support loans) shall be made available without charge or credit for distribution to charitable institutions; public or private nonprofit schools and school food authorities; State agencies designated by the Governor or other appropriate State official to distribute such commodities; nonprofit child care institutions; Federal, State and local penal institutions; disaster relief organizations; public or nonprofit summer camps; the commodity supplemental food program; the Summer Feeding Program; the Needy Family Program on Indian Reservations; and similar organizations and programs designated by the Secretary of Agriculture in consultation with State agencies. Such distribution shall include bulk distribution to congregate nutrition sites and to providers of home-delivered meals under the Older Americans Act of 1965.

"(C) The Secretary shall, before October 1, 1983, and each October 1 thereafter, publish in the Federal Register an estimate of the quantities of commodities to become available for distribution under this paragraph during each of the next two fiscal years.

"(2) The Corporation shall provide the commodities made available under paragraph (1) to State agencies designated by the Governor which shall administer the distribution program under this subsection within the States, except that the Corporation shall provide such commodities directly to eligible recipients to which State agencies are not permitted by law to make distribution, and to private companies as provided in paragraph (7). The Secretary shall, in consultation with State agencies, administer such direct distribution program.

"(3) State agencies to which commodities are provided by the Corporation under this subsection shall distribute them only to recipient organizations which, as determined by State agencies or the Secretary, as the case may be, meet the criteria specified in paragraph (1) and will effectively distribute such commodities to those whom they serve (which recipient organizations are hereinafter referred to as 'eligible recipients'). If the quantity of commodities provided to State agencies for distribution under this subsection is not adequate to meet all requests therefor by eligible recipients, preference shall be given to requests from eligible emergency recipients.

"(4) The Corporation shall use its funds to pay costs of initial processing and packaging of commodities to be distributed under this subsection into forms and in quantities suitable for use in individual households when such commodities are to be consumed by such households and for institutional use, as applicable.

"(5) The Corporation shall, from its funds, but not to exceed $65,000,000 in the aggregate in any fiscal year, (A) pay or make advance payments, upon request, to State agencies, but not in excess of five per centum of the fair market value of the commodities provided to them by the Corpora-

tion under this subsection, for use by them (i) to cover actual costs incurred by State agencies in storing, transporting, handling, and distributing such commodities, and (ii) to pay or make advance payments, upon request, to eligible emergency recipients to cover actual costs incurred by them in storing, transporting, handling, and distributing commodities distributed to them by State agencies under this subsection and in completing paperwork which is necessary only because of their receiving and distributing such commodities: *Provided*, That if the amounts made available to State agencies by the Corporation under clause (A) are not adequate to cover all costs described therein, preference shall be given to covering such costs incurred by eligible emergency recipients, and (B) pay to eligible emergency recipients amounts to cover costs described in the preceding clause (A)(ii) incurred by them with respect to commodities made available directly to them by the Corporation as provided in paragraph (2). State agencies may not charge eligible recipients for any costs incurred by State agencies in carrying out the distribution program under this subsection.

"(6) The Secretary shall obtain such assurances as the Secretary deems necessary that eligible recipients of commodities provided under this subsection will not diminish their normal expenditures for food by reason of receiving such commodities. Eligible recipients shall request and distribute commodities under this subsection only in quantities which can be consumed without waste.

"(7) The Corporation shall also encourage consumption of initially processed commodities made available under this subsection by distributing them directly to private companies for further processing into end food products for use by eligible recipients. Eligible recipients shall bear the expense of such further processing, except that the Corporation shall bear such expense, but not in excess of $10,000,000 in the aggregate in any fiscal year, in connection with the further processing of commodities ordered by eligible emergency recipients. The Secretary shall administer the distribution program under this paragraph, including making determinations, in consultation with State agencies, of the companies and eligible recipients whose participation will effectively result in consumption of the end food products.

"(8) The Secretary shall (A) inform State agencies of the provisions of this amendment not later than 15 calendar days after its enactment, (B) commence distribution of commodities for use by eligible emergency recipients and issue regulations governing such distribution not later than 30 calendar days after the date of enactment of this amendment, and (C) commence distribution of commodities for use by other eligible recipients and issue regulations governing such distribution not later than 90 calendar days after the date of enactment of this amendment.

"(9) The provisions of section 4(b) of the Food Stamp Act of 1977 (7 U.S.C. 2013(b)) shall not apply with respect to distribution of commodities under this subsection.".

SEC. 3. Section 1114(a) of the Agriculture and Food Act of 1981, as amended by this Act, shall expire on September 30, 1986.

THE EMERGENCY FOOD ASSISTANCE AND COMMODITY DISTRIBUTION ACT OF 1983

(Mr. EMERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EMERSON. Mr. Speaker, today I am joining with the gentleman from California, the chairman of the Subcommittee on Domestic Marketing, Consumer Relations and Nutrition, in introducing a bill to provide surplus food to people who are in need. This bill will require the Secretary of Agriculture to distribute commodities to organizations, such as food banks, churches, and community organizations, who in turn provide food to needy people. In addition schools, VA hospitals, providers of home-delivered meals, and other similar organizations designated by the Secretary will be able to receive surplus commodities for the needy people they serve.

As you know the Department of Agriculture is currently distributing surplus dairy products. The Department reports that 366 million pounds of cheese and butter have been ordered by the States. This bill expands on the kinds of commodities distributed and provides administrative money to assist in the distribution of commodities. Money that has been spent to store commodities can now be redirected to aid in the distribution of commodities to people in need.

I commend the Department for their actions to distribute the surplus dairy products and I believe that this bill will enable more of the surplus commodities to be distributed to people in need. This bill serves a sound and humanitarian purpose—it provides food for needy people from the surpluses now held by the Federal Government.

There have been other proposals offered to provide distribution of the surplus commodities. I am looking forward to the subcommittee hearings and the testimony we will receive on the bill and on ways to perfect this bill. I am confident that we will be able to agree on an efficient and effective means to distribute surplus commodities to people in need.

I urge my colleagues to join with the gentleman from California and me and support this bill.

COMMUNICATION FROM THE HONORABLE RON PAUL, MEMBER OF CONGRESS

The SPEAKER pro tempore (Mr. SPRATT) laid before the House the following communication from the Honorable RON PAUL, Member of Congress:

WASHINGTON, D.C.,
February 18, 1983.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives, U.S. Capitol, Washington, D.C.

DEAR MR. SPEAKER: In compliance with Rule L (50) of the Rules of the House of Representatives, I am informing you that John W. Robbins of my Washington, D.C. office has been served with a subpoena addressed to me to appear before the Criminal Division, Felony Branch, the Superior Court of the District of Columbia regarding United States District of Columbia v. James W. von Brunn.

I will consult with the General Counsel to the Clerk of the House and make the necessary determinations required under paragraph three (3) of the Rule.

Sincerely,

RON PAUL,
Member of Congress.

COMMUNICATION FROM THE HONORABLE HENRY B. GONZALEZ, MEMBER OF CONGRESS

The SPEAKER pro tempore laid before the House the following communication from the Honorable HENRY B. GONZALEZ, Member of Congress:

WASHINGTON, D.C.,
February 22, 1983.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives, The Capitol, Washington, D.C.

DEAR MR. SPEAKER: This is to advise you that I was served with a subpoena on February 18, 1983, to appear as a witness for Mr. James W. von Brunn on February 23, 1983 at the Superior Court of the District of Columbia.

If you require additional information, please let me know.

Sincerely,

HENRY B. GONZALEZ,
Member of Congress.

□ 1530

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. RATCHFORD) is recognized for 10 minutes.

[Mr. RATCHFORD addressed the House. His remarks will appear hereafter in the Extensions of Remarks.]

DEFENSE SPENDING—A QUESTION OF WHY, NOT HOW MUCH

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. LOEFFLER) is recognized for 10 minutes.

● Mr. LOEFFLER. Mr. Speaker, among the highest honors anyone in public life can receive is one that comes from those who have defended our country. Our distinguished House Republican leader, BOB MICHEL, received such an honor February 22, 1983, when the American Legion presented him with its Public Service Award.

In inspiring and informative remarks before the American Legion's Washington Convention, the Republican leader performed a public service by reminding us that before we debate the question of how much we should spend on defense, we should ask an even more fundamental question: Why?

To aid in our own upcoming debate on this vitally important issue, I would like to share the perceptive comments of the gentleman from Illinois with the Members of the House:

National Commander Al Keller, my fellow Legionnaires and members of the Auxiliary.

It's been a long time since Al Keller was flying his missions over Europe and I was "grubbing it out" down below as a combat infantry man in that same theatre of operations during World War II.

What an extra-ordinary coincidence that nearly 40 years later, two boys born in Peoria should be on this same platform together in our respective leadership roles.

This is so far removed from what I ever could have imagined eventually happening to me as one of those seemingly numberless, insignificant "doughboys" that I find myself groping for an appropriate way to respond to the great honor you do me here this morning.

Receiving the American Legion's most prestigious Public Service Award brings to mind those high standards set by several previous recipients who I've known and served with in the Congress.

Carl Vinson of Georgia, "Tiger" Teague and George Mahon of Texas, Speakers John McCormack and "Tip" O'Neill from Massachusetts.

And then, of course, from my home state, my dear friends, Les Arends and the late great Senator Everett McKinley Dirksen.

Believe me, I'm deeply touched that you should consider me in the class with these truly great legislators.

I know there are many here today who know what General Douglas McArthur meant when he referred to "the mournful mutter of musketry" on the battle field.

I certainly share that knowledge. And so today I'd like to take advantage of the opportunity you have given me to say some things that have to be said about our national defense.

We are currently engaged in a fierce debate over national defense in our country. In some cases, the debate has focused on a single weapons system like the MX missile or a single component of our defense force such as our Navy.

But for the most part we are arguing about two little words: How much?

I believe we have been arguing about the wrong question. There is even a more important question which can be summed up in one little word: Why?

Why do we need a defense apparatus that costs so many billions of dollars per year?

The answer to this question is obvious to this audience. But, apparently some have forgotten. It is time for all of us to reflect on why before we resolve how much.

And there could be no better time than the day we traditionally set aside to honor the father of our country, George Washington.

Another great American who was both a soldier and a President, Dwight Eisenhower reminded us in his famous 1960 farewell speech why we need a strong national defense.

He first spoke of what he called our "Basic Purposes" as a nation: ". . . to keep the peace; to foster progress in human achievement, and to enhance liberty, dignity and integrity among people and among nations."

And then he said:

"We face a hostile ideology—global in scope, atheistic in character, ruthless in purpose, and insidious in method. Unhappily the danger it poses promises to be of indefinite duration. To meet it successfully, there is called for, not so much the emotional and transitory sacrifices of crisis, but rather those which enable us to carry forward steadily, surely, and without complaint the burdens of a prolonged and complex struggle—with liberty the stake."

It's amazing that those who remember Ike's warning about the "military industrial complex" in that speech conveniently forget his vivid description of the threat we face.

Just consider for a few moments our world-wide obligations and responsibilities either through treaties or because of our own vital national interests:

We are committed by solemn treaty obligation to the defense of western Europe through the North Atlantic Treaty Organization. Well, over a quarter of million of our armed forces stand only miles from the forces of the Warsaw Pact nations.

In East Asia and the Pacific we have bilateral treaties with Japan and Korea and the Philippines. We have solemnly sworn to help Taiwan defend itself against aggression. The Manila Pact adds Thailand to the list of treaty partners.

We have land and air forces deployed in Japan and Korea. We have the Seventh Fleet in the western Pacific.

We are members of the ANZUS Treaty with Australia and New Zealand.

Our Sixth Fleet is in the Mediterranean to protect our access to the valuable energy sources of the Mid-East and committed to aiding the Israelis to retain their freedom.

In the Western Hemisphere we are members of the Treaty of Rio which embraces all of Latin America.

The Caribbean Basin and Central America are right in our backyard. We cannot let them fall to Castroite totalitarian revolutions.

Around the world's seven seas there are various "chokepoint" straits and strategic sea passages that must remain free since we depend on freedom of the sea for vital resources.

Those are some of America's obligations.

President Reagan didn't invent them.

Cap Winberger didn't pull them out of a hat.

They come with the responsibilities of being a world power.

And remember—nowhere—nowhere in the world are our forces geared for the offensive. We have now and have had for years a defensive strategy, and that seeks to deter and, if we can't deter, then at least to contain.

If we debate the cost of our national defense without considering these facts, we are engaged in an exercise in futility.

There is a legitimate place for debate over the cost of defending freedom and maintaining peace. But there is no place for arguments that ignore the fact that we *are* still faced with a world-wide threat from the Soviet Union and that we have world-wide obligations to fulfill.

There are currently three "schools" of thought among those who call for deep cuts in defense spending.

The first is the "military reform" group. They believe our armed forces depend too much on high-technology. They want fewer and less sophisticated weapons systems. They call for strategic and tactical changes in the way our armed forces fight.

The second school has no strategic or tactical alternative to offer to current defense plans. It simply calls for cuts in defense because such cuts are needed to "balance" cuts made in domestic spending.

The third group is made up of those who vote against defense appropriations as a matter of principle. They just don't like to spend any amount on defense.

While I am not personally convinced by the arguments against high technology, the military reform group is at least raising some serious questions that have to be addressed.

As for those who say we should make defense cuts to balance cuts being made in domestic programs, my view is somewhat different.

As a member of the Appropriations Committee for 25 years, I never saw a defense budget that couldn't be cut. But defense cuts must be made on the merits of the case.

As far as the third group is concerned—those who vote against defense spending as reflex action—all I can say is that thank God they are a minority in the Congress and that they represent very few Americans.

Every time I hear one of them criticize what they call "the Pentagon" I want to say:

"Look, the Pentagon doesn't fight. The Pentagon doesn't die. The Pentagon is a big building across the river from Washington, D.C. It is American young men and women who fight and die for this country. Our sons and daughters. They are the ones we are trying to train and equip and arm."

When I hear the term "military-industrial complex" used as a term of abuse to criticize our defense industry itself, I think it might be time to resurrect the term used by Franklin Roosevelt.

He called our industrial base the "arsenal of Democracy" and that's what I think we should begin calling it again.

The time has also come to ask ourselves the basic questions before we start arguing about spending levels.

As a wise man once said: in the most important matters, we need to be reminded more than we need to be instructed.

Is there, right now, an immediate and realistic military and political threat to the basic purposes of our nation?

I am convinced, on the basis of irrefutable, persistent and abundant evidence that such a threat exists.

Afghanistan. Yellow rain. Cubans still in Africa. Marxist-Leninist guerrillas in El Salvador. Terrorism Poland. SS-20's. SS-18's.

The Joint Chiefs of Staff recently reminded us that the Soviet Union spends some 15 per cent of its Gross National Product on military spending—about twice what we do. The Soviet spending in research and development surpasses ours. They have relatively low labor costs.

Those in my age barcket have the memory of Hitler's strike against Poland and the Japanese attack on Pearl Harbor seared into our memories.

We're usually inclined to think of the classic sneak attack as the way a war starts.

But suppose we are wrong? Suppose we won't have a Pearl Harbor attack to awaken us the next time?

Suppose, instead, over a period of years we slowly but inexorably lose the ability to have access to strategic minerals and resources.

Suppose slowly but inexorably nations of the world get the idea we are not willing to defend ourselves and turn to the Soviet Union to make the best deal they can.

Suppose Soviet propaganda wins the battle of ideas in western Europe. Suppose Cuban mercenaries and Communist guerrillas win great victories in Latin America.

We won't need a Pearl Harbor. We will have already sustained mortal damage to our national security. That's the kind of battle we are in.

When the Soviets invaded Afghanistan, they suddenly awakened most Americans—if not the Congress itself—from the slumber of the Seventies.

But we hear little about Afghanistan today. That country and its people are victims of one of the sad truths of our electronic age: if you don't appear on television every evening you cease to exist as far as national attention is concerned. So the crisis mentality has disappeared.

It was no surprise for me a few weeks ago to pick up the New York Times and read that the latest polls show that "Americans no longer fear that the United States is lagging behind the Soviet Union in military progress." It is no surprise to see that a majority believe the United States is spending too much on weapons systems.

We are a people of crisis. We respond to crisis. We seem incapable of sustained, steady, slow-but-sure growth.

So I'm not surprised that after a year of a steady drum-beat of anti-defense propaganda, of neglect in telling the truth about the Soviet build-up, we have lost the consensus for a strong defense that existed only two years ago.

I'm not surprised that the leaders of the nuclear freeze movement recently announced a new strategy.

They will seek to get Congress to, in effect, unilaterally stop funding new American nuclear weapons systems and then "call upon" the Soviet Union to match our cuts.

Can you imagine "calling upon" Yuri Andropov to stop building if Congress has effectively frozen our strategic systems?

I wish the American Legion would undertake the task of refuting this dangerous view, at the grass-roots level.

The United States refused to take President Eisenhower's advice during the 1970's. If we had been willing to make relatively small, steady sacrifices for defense, we would not now be facing the problems of higher and higher defense costs.

I said we talk too much about cost. But since that seems to be a major topic, let's examine it for a moment.

No matter how you measure it—as a percentage of the Gross National Product, or as a percentage of the total budget—defense spending dwindled during the 1970's.

In fiscal year 1962, when John F. Kennedy was President, we spent 45.9 percent of the budget on defense. In fiscal year 1984, that figure will be 31.4 percent, much below what we were spending 20 years ago.

In fiscal year 1962, defense was roughly 9 percent of the GNP.

In fiscal year 1983, defense is projected as 6.5 percent of the GNP.

We need a renewed commitment to the steady, sure, non-dramatic, long-run approach Ike called for. But in order to get to the point where such a strategy can be regained, we have to first make up for lost time.

Let us hope that time is all that we lost during our long national sleep.

Allow me to offer one more illustration to illustrate my point about the need to go beyond budget figures in talking about defense.

A few weks ago I had a discussion with the British Ambassador to the United States.

The talk turned to last year's Falkland Islands war. I asked the Ambassador what lessons had been learned by his country. I assumed that the major lesson was the need for high-technology weaponry.

"Yes" said Ambassador Wright, "high-technology weapons are important. But we found two things were even more important to our military success. The first is clear, firm, confident political leadership. The second is well-trained, well-led, well-motivated fighting men who believe in their cause and are eager to fight for it."

Ambassador Wright was correct in his assessment. Even in the age of nuclear and high-technology weapons, it is the human factor that is crucial in defense.

The unconquerable human heart, the ingenious human brain, raw courage, high morale, personal discipline, firm leadership, willingness to sacrifice—no high technology in the world can replace those qualities.

The United States of America will remain strong and free only so long as the American people have the will, the courage, the skills and the love of country to defend our values.

I began with a quotation of President Eisenhower. Let me conclude by quoting another President. His firm stand for a strong defense of our country shows that a strong defense is not a partisan matter. It is a matter of principle.

Shortly after President Eisenhower made his farewell speech, President Kennedy said in his Inaugural Address:

"Let every nation know whether it wishes us well or ill, that we shall pay any price, bear any burden, meet any hardship, support any friend, oppose any foe, in order to assure the survival and the success of liberty."

If Americans ever lose the spirit that is embodied in those words, no amount of money, no amount of new strategies, can keep us free.

The American Legion knows that and has always known it. For this, and for so many other patriotic attitudes, the Legion represents the kind of spirit Dwight Eisenhower and John F. Kennedy spoke of.

I want you all to know that over and above what great personal honor you do me today, your very handsome award will serve as a reminder that we have to keep that spirit alive in the Congress. And I pledge to you that I will do all in my power to continue to do that for you and for our country.

From the bottom of my heart, thank you.●

ANTIJUNKETING LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN) is recognized for 5 minutes.

● Mr. CORCORAN. Mr. Speaker, I am introducing legislation today that would curb unnecessary travel to foreign countries by Members of the House of Representatives. Travel by those Members who are retiring or who have been defeated in their primary elections would be eliminated. This is a loophole which further tarnishes the image of Congress by allowing Members of the House who are not returning to Government service to globetrot at taxpayers' expense.

In addition, my bill contains a provision that would require any planned foreign travel by Members or staff to be authorized by a public rollcall vote of the full committee after formal consideration of a travel proposal. Any travel proposal would have to include the projected cost of that travel and the legislative objectives of the trip.

Although oversight responsibilities are an important function of Congress, an examination of travel relative to its cost and purpose would certainly turn up foreign travel which cannot be justified. I recognize the necessity of some foreign travel, and legitimate foreign travel would not be affected by my proposal. We can only look to our constituencies, however, and note their displeasure at the Congress irresponsibility with regard to foreign travel. I urge my colleagues to support continuing reform of our system of travel authorization.●

HEARINGS ON IMMIGRATION REFORM BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky (Mr. MAZZOLI) is recognized for 5 minutes.

● Mr. MAZZOLI. Mr. Speaker, I wish to announce that my Subcommittee on Immigration, Refugees, and International Law has scheduled 7 days of public hearings to consider legislation (H.R. 1510) which I introduced last Thursday, February 17, to revise and reform our immigration law.

This comprehensive legislation is identical to that which was approved by the Committee on the Judiciary during the 97th Congress and which was considered by this body for several days last December. Regrettably, that legislation was not approved and signed into law.

The hearing dates for the legislation are March 1, 2, 8, 9, 10, 15, and 16. On Tuesday, March 1, we will hear from Members of Congress and the Attorney General. Because of the subcommittee's desire to accommodate any Member of Congress wishing to testify on this important legislation, I would suggest that all such requests be made by noon Friday, February 25, to the Subcommittee on Immigration, room 2137, Rayburn Building, U.S. House of Representatives, Washington, D.C. 20515. The subcommittee staff can be contacted on (202) 225-5727.

On March 2, we will hear from the Immigration and Naturalization Service (INS), which will testify on their role in implementing this proposed legislation.

On Tuesday, March 8, we will have one day of oversight hearings to receive testimony from the Commissioner of INS, the Chairman of the Board of Immigration Appeals (BIA) and the Chief Immigration Judge concerning their respective portions of the fiscal year 1984 Department of Justice budget submission.

On March 9, we will receive testimony from the following Federal departments and agencies concerning their particular positions on this legislation and their role in administering the various provisions: Department of Labor, Agriculture, Health and Human Services, and State.

During the final 3 days, we will receive testimony from a variety of witnesses representing: organized labor, the business community, agricultural organizations, religious and ethnic organizations, State and local governments, and the legal community.

I am hopeful that at the conclusion of these hearings the subcommittee will proceed to mark up of this legislation as soon as possible.●

FULL ACCESS TO EPA DOCUMENTS IS OBTAINED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia, Mr. LEVITAS is recognized for 5 minutes.

● Mr. LEVITAS. Mr. Speaker, pursuant to a week of discussions between representatives of the administration and myself, on Friday evening, February 18, 1983, a memorandum of understanding was signed which gives the Public Works and Transportation Subcommittee on Investigations and Oversight full access to Environmental Protection Agency documents on the Superfund law. Edward Schmults, Deputy Attorney General, Fred Fielding, Counsel to the President, and Carol Dinkins, Assistant Attorney General for Land and Natural Resources represented the administration in these discussions. Throughout the discussions, I consulted with Chairman JIM HOWARD of the Public Works and Transportation Committee and other House leaders. Accompanying me in the discussions were Stanley Brand, General Counsel to the Clerk, of the House of Representatives, John P. O'Hara, Counsel and Staff Director of the Subcommittee on Investigations and Oversight, and Bob Prolman, professional staff member of the Subcommittee on Investigations and Oversight.

At this point, I would like to place in the RECORD a copy of the memorandum of understanding, for the information of the Members of the House:

MEMORANDUM OF UNDERSTANDING BETWEEN THE COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION AND THE DEPARTMENT OF JUSTICE CONCERNING DOCUMENTS SUBPOENAED FROM ENVIRONMENTAL PROTECTION AGENCY

1. The Subcommittee on Investigations and Oversight ("Subcommittee") of the House Committee on Public Works and Transportation ("Committee") will obtain access to all documents in Environmental Protection Agency ("EPA") files relating to Superfund sites selected by the Subcommittee for review, except those documents designated by EPA or the Department of Justice ("DOJ") to be "enforcement sensitive," as defined herein. The Executive Branch will not shield from Subcommittee review any document that evidences any criminal or unethical conduct by any executive department official or employee.

The Subcommittee, or the Subcommittee through its investigators, will initially designate a reasonable number of National Priority List sites which are the subject of its official inquiries undertaken pursuant to its investigation and oversight responsibilities. Additional sites may be designated from time to time by the Subcommittee, or the Subcommittee through its investigators. Reasonable advance notice will be provided to the Associate Administrator for Legal and Enforcement Counsel to permit the Agency to review and segregate its files.

During review, the Subcommittee investigators may request executive branch staff to be present to assist the investigators in their review of the documents and to insure that documents designated as "enforcement sensitive" are properly set aside for stage two (2) review described below. The Subcommittee investigators will be free to obtain copies of the remainder of the files and to otherwise conduct investigations in an appropriate and customary manner. The investigators shall provide EPA with a record of all documents copied pursuant to this Memorandum Of Understanding.

The Administrator, or a formally designated Assistant Administrator, or appropriate Regional Administrator will certify to the Subcommittee that the access provided and the documents produced represent a diligent good faith effort to fully comply with the Subcommittee's request for access and the requirements of this Memorandum Of Understanding, and that the files made available for review by the Subcommittee staff during this phase resulted from a thorough search of EPA offices and that to the best knowledge of the certifying officials, documents have not been purged from these files except in accordance with this Memorandum Of Understanding.

"Enforcement sensitive" documents include sensitive memoranda or notes by government attorneys, investigators, and expert witnesses or other individuals involved in the CERCLA enforcement process that reflect enforcement strategy, legal analysis, lists of potential witnesses, settlement considerations, and similar materials the disclosure of which might adversely affect a pending enforcement action, overall enforcement policy, or the rights of individuals.

2. "Enforcement sensitive" documents will be set aside for a second stage process. During this stage, in executive session, the Subcommittee and staff will be given redacted copies of the enforcement sensitive documents. The Subcommittee and its staff will be briefed in executive session by attorneys familiar with the documents concerning the material which has been redacted.

3. After executive session briefing, the Subcommittee members will be given an opportunity to review in executive session any redacted document in its complete unredacted form which it finds necessary to review for purposes of its investigation. If upon review of any unredacted document the Subcommittee or the Chairman, in consultation with the Ranking Republican Member, determines that staff expertise is required to fulfill the Subcommittee's responsibilities, the Chairman will specify his concerns setting forth the specific need for Subcommittee staff to review the unredacted document or describe said concerns to a Justice Department official in a discussion with such official. Personnel of the EPA and the Department of Justice will then discuss with the Chairman and explain the meaning of those portions of the documents which the Chairman determines require further clarification. If the Chairman then concludes that staff review is necessary, the Subcommittee, through the Chairman or Ranking Republican Member shall have the right to permit staff participation in executive session review of the unredacted documents, such participation shall be limited to two (2) designated staff persons.

4. If the Subcommittee thereafter determines that it needs to have copies of any of the "enforcement sensitive" documents, it would then have the right to pursue all lawful efforts to obtain the documents in question.

Nothing in this memorandum shall constitute a waiver of Executive Privilege with regard to any document. The Subcommittee does not acknowledge the applicability of Executive Privilege to any document subpoenaed.

5. The redacted copies, and the information disclosed by the documents may be used by the Subcommittee and its staff in questioning EPA-related witnesses. Such witnesses will not be asked to reveal the redacted portions.

The Subcommittee will maintain the confidentiality of specific information obtained from the "enforcement sensitive" documents except that the Executive recognizes Congress' need to draw conclusions, identify problems or issues and address generally other matters as part of its oversight function.

6. This memorandum is intended to solely resolve the issues relative to the subpoena issued by the Subcommittee on Investigations and Oversight of the House vote on December 16, 1982, finding EPA Administrator Anne M. Gorsuch in contempt of Congress and does not bind, or otherwise affect the rights of any other subcommittee of the House with respect to any subpoena which has been or may be authorized.

7. Following satisfactory implementation of the procedures set forth herein, the Chairman of the Subcommittee represents that he will undertake and use his best efforts to introduce an appropriate resolution, for consideration by the Committee and the House of Representatives. An essential and nonseparable condition of this agreement is that the House of Representatives will adopt a resolution containing recitals that implementation of the procedures established herein constitutes a purging of the aforesaid resolution of the House of Representatives of December 16, 1982, certifying that compliance with the Subcommittee's subpoena has been effected; that the House finds no reason for further proceedings; and providing for the Speaker to certify all of

the foregoing to the United States Attorney.

Signatures:

Elliott H. Levitas, Chairman, Subcommittee on Investigations and Oversight, Committee on Public Works and Transportation.

Fred Fielding, Counsel to the President.

Edward Schmults, Deputy Attorney General.

Date: February 18, 1983.●

RURAL TELEPHONE SERVICE AND THE RURAL ELECTRIFICATION ADMINISTRATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. ENGLISH) is recognized for 5 minutes.

● Mr. ENGLISH. Mr. Speaker, today I am introducing a resolution expressing the sense of the House of Representatives that Federal agencies should pay special attention to the needs of rural America when taking any action affecting the development and financing of rural telephone service. The resolution is identical to one I introduced in the last Congress. Once again, Congressman ED JONES joins with me in sponsoring the resolution.

In the Communications Act of 1934, this Nation established a policy of universal telephone service. The goal was to make telephone service available to every household in the United States at rates within the reach of every citizen. This goal was not self-enforcing, and, despite the law, the number of telephones in rural America actually declined after enactment of the 1934 act.

In the Rural Electrification Act Amendments of 1949, Congress reaffirmed the policy of universal telephone service by authorizing Federal financing of rural telecommunications. This new financing helped to overcome the high cost of providing telephone service to rural areas and started to end the isolation of rural citizens from the rest of the Nation. As a result, universal telephone service is no longer a distant goal but approaching reality, and the reality is that all of America, not just the rural areas, has benefited from the availability of telephone service everywhere in this country.

Today, nearly 50 years after the establishment of universal telephone service as this Nation's basic communication policy, a new threat to the policy has arisen. Increasing competition in the telephone industry threatens to undercut or end universal telephone service. Competition in the telephone industry has the potential to provide new services for all and to lower costs for some. However, we need to balance the benefits of competition in the telecommunications industry with the need to avoid adverse changes in the availability of telephone service in rural areas. This is a major challenge facing the industry and the Government policymakers.

Last Congress, the Committee on Government Operations issued a report entitled "Maintaining the Network: Rural Telephone Service and FCC Actions" (H. Rept. No. 97-922). The report found that actions taken by the Federal Communications Commission will increase the cost of basic local telephone service. This is one of the unfortunate consequences of competition in the telephone industry. The report also found that the cost of providing basic telephone service to rural areas is already higher than the cost of providing the same service to urban and suburban areas by a range of 30 to 100 percent.

Putting these two findings together, it appears that the effect of rising telephone rates nationwide will be accentuated in rural areas where the cost of providing service is already higher. There will be growing differences in the costs of telephone service between urban and rural areas. If the cost of rural service grows at a disproportionately higher rate, then more rural consumers may be priced out of the telephone market entirely.

It is not easy to provide telephone service to rural areas. We all recognize this. Nevertheless, that fact does not make it any less important that we continue rural telephone service. The needs of rural customers cannot be ignored. Rural America must share equally in the benefits and bounties of new technologies and in new developments in American society. Every effort must be made to assure that the communications needs of every citizen are met.

It is obvious that the role of the Rural Electrification Administration in providing financing and leadership has been critical in the development and expansion of rural telephone service to the benefit of this entire Nation. The Rural Electrification Administration must continue that work and, in this time of change, insure that other agencies preserve universal telephone service by guaranteeing the continuation of equal telephone service to rural customers. This resolution will send this clear message to the REA and other agencies. I urge my colleagues in the House to join with Mr. JONES and me in securing passage of this resolution.

The text of the resolution follows:

H. Res. 102

Resolution expressing the sense of the House of Representatives that the role of the Rural Electrification Administration should be enhanced to assure that Federal agencies consider the needs of rural America in establishing policies which affect telephone service in rural America

Whereas the Congress, in enacting the rural telephone loan program in the Rural Electrification Act of 1936, established a policy of special concern and attention for the needs of rural America regarding telephone service;

Whereas there are unique capitalization and service requirements applicable to the provision of rural telephone service which are reflected in the provisions of the Rural Electrification Act of 1936 and the policies and programs of the Rural Electrification Administration; and

Whereas there is a continuing need for the Federal Government to give special attention to the capitalization and financing needs of telephone service in rural areas and provide the greatest practicable support to the rural telephone financing programs administered by the Rural Electrification Administration: Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that—

(1) the Administrator of the Rural Electrification Administration should establish policies and guidelines which will assure that Federal agencies consider the needs of rural America in connection with granting loans, prescribing rules, and establishing policies which affect the capitalization and other financial requirements of telephone service in rural America as established under the Rural Electrification Act of 1936; and

(2) such Federal agencies should act consistent with all policies and guidelines established pursuant to paragraph (1) and should consult on a routine basis with the Administrator of the Rural Electrification Administration and with State agencies which administer rural development and rural telephone service programs when granting loans, prescribing rules, and establishing policies which affect the capitalization and other financial requirements of telephone service in rural America.●

SUPERFUND MUST BE EXTENDED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 15 minutes.

● Mr. LAFALCE. Mr. Speaker, amid charges of political wrongdoings surrounding the Environmental Protection Agency, I am introducing legislation to extend the Federal Superfund program for 5 years, through 1990.

Passage of this legislation will let the administration and the American public know, in no uncertain terms, that the Congress fully supports the Superfund cleanup program.

The firing of Ms. Lavelle, EPA's unwillingness to provide needed documents to congressional investigators culminating in a contempt citation being filed against the Administrator, and allegations of perjury and misconduct at the highest levels of the Agency, cast a dark cloud over the administration's implementation of the Superfund program.

However, unsettling as these actions may be they are only symptoms of a deep rooted hostility toward the Superfund program.

At the same time that EPA Administrator Anne M. Burford announced the 418 Superfund priority sites, she was preparing to pull the plug on the

Superfund program. Despite the fact that EPA estimates that there are at least 14,000 hazardous waste dump sites throughout the Nation and other estimates put the figure at 50,000, the Administrator stood up and said that she is not certain if there will be a need for the Superfund after 1985.

The Administrator's uncertainty was clarified several weeks later by Ms. Lavelle who, when speaking before the National Conference of State Legislatures, insisted that she planned to go to Congress in 1985 with the news that Superfund's job has been done and there was no need to extend the tax which supports the program. I just wish that EPA was as eager to clean up the toxic time bombs that dot the American landscape as they are to relieve industry of the tax that is needed to do the job.

EPA knows that the $1.6 billion Superfund will not resolve the entire abandoned site problem, falling far short of public expections and the EPA's own rhetoric. The Superfund shortfall is so severe that EPA may not be able to complete clean up actions at several sites. They may be forced to take only remedial action on a site's most serious problem and then move on to other sites, eliminating immediate threats to public health and the environment without guaranteeing that those threats will not reappear 1, 2, or 10 years later.

The Agency has not yet guaranteed that there will be sufficient funds to complete even the Love Canal remedial action program. The $8 million remedial action program being implemented at the Nation's superstar hazardous waste site does not include the cleanup of area creeks and sewer lines that are contaminated with the deadly chemical dioxin. EPA knows that this will have to be done, but has not yet committed the resources for doing it. Yet, the Administrator is unsure that there will be a need for the Superfund program beyond 1985.

The bill I am introducing today will make additional funds available for Love Canal, the S-Site, and literally hundreds of sites in my congressional district where hazardous wastes are known to have been buried, as well as Times Beach, Wooburn, Mass., Seymour, Ind., and thousands of other sites across the country.

My bill extends the Superfund program for an additional 5 years, and increses the fund by 5 percent each year, for a total of just over $2.5 billion.

Although my bill raises the Superfund to $4.1 billion, I am not going to boast that a $4.1 billion Superfund will clean up all the abandoned hazardous waste sites throughout the Nation, for it will not. Neither will I predict the demise of the Superfund after 1990, for I believe that the need will still exist, that new sites will be discovered and new emergencies will be reported.

The 418 priority sites announced by EPA are the worst sites nationwide. I am convinced that had Congress ordered the Agency to compile a list of 1,000 sites for inclusion in the national contingency plan the additional 600 sites would deserve the same descriptor.

The bill I am introducing today is the second step toward making sure that all of the 1,000 or 2,000 or 10,000 hazardous waste sites that pose a threat to human health and the environment are cleaned up with Federal Superfund dollars. Many believe that the spirit, if not the letter, of the Superfund Act is being violated at EPA by their overreliance on negotiated cleanups. By extending and enlarging the Superfund we will remove one excuse that the agency has offered, namely the paucity of available Superfund dollars.

It is imperative that EPA seek to recover the costs of remedial action from responsible parties. But, it is the first priority of Superfund to protect human health and the environment—a priority that has taken a back seat to allowing the Superfund program to expire in 1985.

Congress must reject this strategy. The bill I am introducing today says "no" to an EPA policy that puts the interests of corporate polluters above the interests of the American public.

The bill follows:

H.R. 1615

A bill to extend the Superfund legislation for five additional years and to provide for annual 5 percent increases in the funding levels after September 30, 1985, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 221(b)(2) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 is amended by adding the following at the end thereof: "There is authorized to be appropriated for each of the 5 fiscal years after fiscal year 1985, an amount equal to $44,000,000 plus, for each such fiscal year, an additional 5 percent of the total amount authorized to be appropriated during the preceding fiscal year.".

(b) Section 223(b) of such Act is amended by striking out "next 5 fiscal years" and substituting "10 fiscal years after the date of the enactment of this Act".

(c) Section 303 of such Act is amended by striking out "1985" and substituting "1990".

SEC. 2. (a) Section 4611(d) of the Internal Revenue Code of 1954 is amended by—

(1) striking out "1985" and substituting "1990";

(2) striking out "1983" and substituting "1988"; and

(3) striking out "1984" and substituting "1989".

(b) Section 4611 of such Code is amended by adding the following new subsection at the end thereof:

"(e) RATE INCREASE AFTER 1985.—The rate at which the tax is imposed under subsections (a) and (b) of this section shall be increased—

"(1) during the fiscal year beginning October 1, 1985, by 5 percent of the rate at which such tax was imposed prior to such date, and

"(2) for each fiscal year after September 30, 1986, by an additional 5 percent of the rate applicable during the immediately preceding fiscal year.

(c) Section 4661 of such Code is amended by adding the following new subsection at the end thereof:

"(d) RATE INCREASE AFTER 1985.—The rate at which the tax is imposed under subsection (b) of this section shall be increased—

"(1) during the fiscal year beginning October 1, 1985, by 5 percent of the rate at which such tax was imposed prior to such date, and

"(2) for each fiscal year after September 30, 1986, by an additional 5 percent of the rate applicable during the immediately preceding fiscal year.

(d)(1) Section 4681 of such Code is amended by adding the following new subsection at the end thereof:

"(c) RATE INCREASE AFTER 1985.—The rate at which the tax is imposed under subsection (b) of this section shall be increased—

"(1) during the fiscal year beginning October 1, 1985, by 5 percent of the rate at which such tax was imposed prior to such date, and

"(2) for each fiscal year after September 30, 1986, by an additional 5 percent of the rate applicable during the immediately preceding fiscal year.

(2) Section 4682(d) of such Code is amended by striking out "1983" and substituting "1988".●

WSAR HELPS FIGHT UNEMPLOYMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. FRANK) is recognized for 5 minutes.

● Mr. FRANK. Mr. Speaker, there has been a lot of discussion about the ways in which private businesses can help with an extra effort to fight the serious unemployment that plagues us. Obviously, unemployment will only be substantially reduced when the Government adopts the proper policies to stimulate the economy and deal with the problems of structural unemployment. But there is also an important role for private businesses to play, and I am very pleased to point out to the membership the example of radio station WSAR in Somerset, Mass.

WSAR has gone beyond simply advocating that others do the right thing and is offering a substantial incentive to businesses which hire new people in this time of unemployment. WSAR has been offering $5,000 in free advertising to any existing business in southeastern New England which hires 25 new people, and it has been offering the same incentive to new businesses which hire 10 people. WSAR requires that companies seeking to qualify for this incentive be hiring new, full-time employees who receive more than the minimum wage. Simply rehiring laid-off employees is

not sufficient to qualify for this incentive.

I want to express my admiration to WSAR for this specific and concrete effort to help reduce the serious unemployment which we now suffer. This is an important public-spirited effort by a radio station which recognizes its obligation to work with the community to improve conditions for all of us. I hope others will be willing to emulate WSAR's commitment to its community and its willingness to put its money where its microphones are in the effort to fight unemployment.●

PENSACOLA SPECIAL STEPPERS HONORED

(Mr. HUTTO asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HUTTO. Mr. Speaker, the Pensacola Special Steppers, a group of mentally retarded citizens from Pensacola, Fla., were honored by having January 31, 1983, proclaimed as "Pensacola Special Steppers' Day." By his proclamation, Mayor Vince Whibbs urged all citizens to join in giving special recognition and support to these mentally retarded citizens who have brought great honor and credit to themselves and to their community.

The Special Steppers were organized in January 1979 to provide an opportunity for mentally retarded citizens of the Pensacola communty to participate in and enjoy square dancing, our national folk dance. This outstanding group of dancers performed before the President's Committee on Employment of the Handicapped during their visit to Washington, D.C. last summer. They also performed on the West Terrace of the Capitol, and received an enthusiastic standing ovation following their performance at a reception sponsored by the National Folk Dance Committee in support of legislation that designated the square dance as the national folk dance of the United States.

These wonderfully talented young adults provide a great service by bringing to the public an awareness that mentally retarded citizens can function in the mainstream of the community and be useful, productive citizens.

I consider it a high honor and privilege to bring this to the attention of the House of Representatives, and to submit the mayor's proclamation for entry into the CONGRESSIONAL RECORD:

PROCLAMATION

Whereas, the Pensacola Special Steppers were organized in January, 1979, to provide opportunity for the mentally retarded citizens of our community to participate in and enjoy square dancing, our national folk dance; and

Whereas, the Pensacola Special Steppers have entertained and inspired audiences in the Southeastern United States and in our nation's capital; and

Whereas, through square dance, mentally retarded citizens have developed a fellowship with other square dance groups by their skill and enthusiasm; and

Whereas, by the mastery of different square dance routines, the Pensacola Special Steppers have demonstrated that retarded citizens can learn and perform tasks requiring dexterity and intelligence and have once again proven that no challenge is too great if you have the desire to see it through; and

Whereas, 1983 begins a new year of continued growth and development of mentally retarded citizens as the Pensacola Special Steppers continue to bring to the public an awareness that mentally retarded citizens can be helped and function in the mainstream of the community as well as be useful, productive citizens.

Now, therefore, I, Vince Whibbs, Mayor of the City of Pensacola, do hereby proclaim January 31, 1983, as "Pensacola Special Steppers' Day" in the City of Pensacola and urge all citizens to join with me in giving special recognition and support to those mentally retarded citizens who have brought honor and credit to themselves and to our community.

REPEALING POWER OF DEPARTMENT OF AGRICULTURE TO LEVY ASSESSMENTS ON COMMERCIALLY MARKETED MILK

(Mr. SPRATT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SPRATT. Mr. Speaker, I am joining with Congressman FOWLER in sponsoring legislation for repeal of the power of the Department of Agriculture to levy assessments on commercially marketed milk.

Under provisions of the Omnibus Budget Reconciliation Act of 1982, the Secretary of Agriculture is empowered to levy an assessment of up to $1 on all milk produced in this country.

Obviously there is overproduction of milk in this Nation. The assessment was originally intended to help reduce the amount of surplus milk bought each year by the Government, and thus reduce the cost of the dairy price support program.

It is clear this assessment will not accomplish that purpose. Moreover, it will penalize milk producers who do not contribute to the excess production.

Milk producers in just three States account for 61 percent of the surplus. In 14 States, including my State of South Carolina, more milk is consumed than is produced within the State, making these deficit production States. Yet, the dairy farmers in these deficit States, who do not receive dairy price support payments and who do not contribute to the Nation's milk surplus, will be forced to pay a $1 assessment under existing law.

The obvious answer to reducing the milk surplus is to revise the price support system. The bill we propose cuts price support by $1—from $13.10 per hundredweight to $12.10.

This ill-conceived assessment should be repealed and a fairer, more effective alternative enacted. If not, its effects on dairy farmers in my State and elsewhere could be financially devastating.

LEGISLATION TO RELIEVE INTERNATIONAL DOUBLE TAXATION OF U.S. CONSTRUCTION CONTRACTORS

(Mr. GIBBONS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. GIBBONS. Mr. Speaker, an increasing number of foreign countries now tax gross payments for services performed outside of that country, if the services relate to a construction project located within that same country. Such countries include Algeria, Argentina, Brazil, Chile, Colombia, Ecuador, Indonesia, Korea, Malaysia, Mexico, South Africa, Spain, Tanzania, Thailand, and Venezuela. These foreign taxes are usually imposed by requiring the owner of the project to withhold the tax on all payments for services performed outside the country.

When a U.S. construction contractor undertakes a foreign construction project, a significant amount of the work is performed in its U.S. office and not at the construction site. If the foreign country taxes these U.S. office services as described above, a classic case of international double taxation may result. The United States will also tax the same services, but usually without relief by way of either credit or deduction for the foreign taxes paid. If the U.S. firm were to increase its contract price to cover the double tax burden, its bid would become noncompetitive and it would lose the contract. As a result, U.S. firms are now effectively prevented from competing for foreign projects in many instances. This is an inequitable and unintended result of current law.

Here is an illustration of the way this situation may arise. A U.S. company wishes to bid on a contract to construct a project in a foreign country for a foreign client. In addition to in-country construction services, the U.S. company would agree to perform substantial design, engineering, architectural, purchasing, construction mobilization, planning, and other related technical services in the United States. The foreign country imposes a "technical assistance tax" on these U.S. services, on the grounds that the income from these services is "sourced" in the foreign country because the work is ultimately used there and paid for there. However, the United States also taxes these services

because the contractor is a U.S.-based company. Moreover, U.S. tax law considers the source of the income derived from this work to be the United States, where the work is performed.

In general, under U.S. rules international double taxation on income from foreign activities is avoided by permitting a credit against U.S. taxes for the foreign taxes paid. The credit, however, may generally only be used to offset the U.S. tax payable on foreign-source income. Because technical assistance taxes are imposed on what the United States considers to be U.S.-source income, the payment of the technical assistance tax cannot practically be used as a credit against the U.S. tax due on that income.

Moreover, the tax may not be claimed as a deductible cost of doing business, since the taxpayer must elect to either credit or deduct all foreign taxes. Except in rare and extraordinary circumstances, economics compel U.S. taxpayers to elect to credit foreign income taxes. If the contractor elected to deduct foreign technical assistance taxes, all foreign income taxes including even normal foreign income taxes on net income from construction site services within the foreign country, would have to be deducted.

Thus, even though technical assistance taxes are considered foreign "income taxes" under U.S. law,[1] U.S. construction firms have no practical relief from international double taxation in many instances.

The tax systems of many of our major trading competitors, for example, Canada, Netherlands, United Kingdom, also relieve double taxation through a credit system, which like the U.S. rules, limits the credit to foreign source income. These countries, however, avoid the double taxation problem described above by permitting a deduction for a foreign income tax, such as technical assistance tax, on domestic source income. As the following example shows, this difference of treatment creates critical competitive inequities.

If the normal price for U.S. technical services on a project is $1,000,000 and the U.S. contractor's costs are $900,000, the profit subject to U.S. tax is $100,000. If the foreign country imposes a technical assistance tax of 30 percent on the services,[2] the contractor from a country that allows a deduction would have to increase his price to only $1,430,000 to cover the technical assistance tax—$1,430,000 less 30 percent of $1,430,000 less $900,000 equals $100,000. The deduction for taxes paid of $430,000 exactly offsets the increase in revenues and the same net profit of $100,000 remains subject to home country tax.

In contrast, since the United States generally allows neither a deduction nor a credit for the technical assistance tax, an American company must charge $2,250,000 to realize the same $100,000 profit—$2,250,000 less 46 percent of $1,250,000 less 30 percent of $2,250,000 less $900,000 equals $100,000. It is clear under U.S. tax law that regardless of whether the contractor bills the foreign client for the withholding tax or whether the foreign client pays the tax on behalf of the U.S. contractor, the amount of the billing or payment is included in the income of the contractor and subject to U.S. tax.

Obviously, an American contractor cannot effectively compete under these circumstances. The American firm needs to charge $820,000, or 57 percent, more than its competitors. The only way to avoid double taxation is for the U.S. firm to undertake the work in a foreign subsidiary incorporated in a country which allows a deduction for these taxes. Then, of course, the foreign country of incorporation would have additional tax revenues simply because of an unintended aberration in U.S. tax law.

It is vital that American firms remain competitive for foreign construction projects. The importance to the United States of foreign operations in service-intensive industries has substantially increased in recent years. The work done in the United States not only supplies jobs and income for the domestic economy, but leads to the exporting of goods, which improves the balance of payments and the soundness of the U.S. dollar. As critical to this industry is to America's economic stability, however, there has been a substantial erosion of its market share of foreign projects in recent years.

Congress specifically addressed one aspect of this problem in the Economic Recovery Tax Act of 1981 when it provided badly needed changes in the method of taxing the earned income of Americans working abroad. These changes made U.S. taxation of employees abroad comparable to that of competing countries, which generally levy no tax on their nationals when outside the country. In making these changes, Congress recognized that "American business faces increasing competitive pressures abroad" and that an excessive tax burden on individual workers "leads to higher, and thus often noncompetitive bids for work by American firms." The Congress determined that "a broad range of activities by Americans abroad benefits the U.S. economy and should be encouraged." [3]

The proposed legislation solves the double taxation problem of U.S. contractors by permitting a deduction for foreign technical assistance taxes. The foreign tax is treated as an additional cost of the job and can be incorporated in the contractor's price for the job. As a result, the profit subject to U.S. tax would be exactly the same as if no technical assistance tax was involved.

The proposed change will not reduce Federal tax revenues, and should increase them if American companies are able to expand their business overseas. Under current law, a U.S. company cannot bid effectively for a contract involving U.S. services for a project in a country that imposes a technical assistance tax. The United States loses the tax it would otherwise receive on the net profit earned on the contract. Consequently, the proposed legislation will benefit the U.S. Treasury by enabling U.S. construction contractors to compete effectively for overseas projects, while maintaining U.S. jurisdiction to tax the income earned from those projects.●

[1] The foreign statutes imposing these taxes usually refer to taxes on payments for royalties but royalties are defined to include payments for know-how, technical and scientific information, etc., and other technical assistance. Such statutes are often interpreted broadly to include standard construction engineering services.

[2] Most of these taxes are computed either on gross payments or on a percentage of gross payments, with no deduction for actual costs.

[3] S. Rep. No. 97-144, 97th Cong. 1st sess. 228 (1981).

INTRODUCTION OF A BILL TO AMEND THE INTERNAL REVENUE CODE OF 1954 TO MAKE IT CLEAR THAT CERTAIN MOTOR VEHICLE OPERATING LEASES ARE LEASES

(Mr. GIBBONS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. GIBBONS. Mr. Speaker, today I am introducing legislation to amend the Internal Revenue Code of 1954 to make it clear that certain motor vehicle operating agreements are treated as leases where it is relevant for Federal income tax purposes to determine whether the agreement shall be respected as a lease. By adding a definitional provision that would be codified in and applicable for all purposes of the Internal Revenue Code, the bill provides a permanent solution to a problem addressed on an interim basis by an uncodified provision, section 210, of the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA).

NEED FOR LEGISLATIVE ACTION

The problem addressed by section 210 of TEFRA arose from a recent change in audit position by the IRS regarding the tax treatment of motor vehicle operating lease agreements. Under that new audit position, the IRS attempted, both retroactively and prospectively, to deny lease treatment for Federal income tax purposes to motor vehicle operating leases containing terminal rental adjustments.

The enactment of section 210 prevents implementation of the IRS position, either retroactively or prospectively, but has a clause permitting a new position of general application to be prescribed prospectively by regulation under "extraordinary circumstances," if requisite policy level studies of tax and economic issues raised by such a change had been completed and submitted to the Congress. Without having made such studies and without there being present the extraordinary circumstances contemplated by the Congress, the IRS, just 81 days after enactment of section 210, published a notice of proposed rulemaking under which it stated its intention to reverse the rule of section 210 and deny lease treatment to motor vehicle operating lease agreements of the kind covered by section 210. This action by the IRS in contravention of the intention of Congress gives rise to the need for action by Congress to provide a permanent legislative solution to this problem.

EXPLANATION OF THE BILL

The bill provides such a solution to the problem by adding a new provision to the code making it clear that the presence of a terminal rental adjustment clause—defined exactly as in section 210—in a motor vehicle operating agreement shall not be taken into account for any Federal tax purpose in determining whether such agreement is a lease. The term "motor vehicle operating lease" also is defined exactly as it is by section 210, except for removal of: First, the clause permitting change of the rule by regulation; and second, the limitation of section 210 which made it inapplicable to property not leased for use in a trade or business or for the production of income.

The bill removes the limitation concerning leases for personal use in order to carry out the congressional view expressed during consideration of section 210 (see CONGRESSIONAL RECORD of August 12, 1982, daily edition, pp. E3867-E3869, at p. E3868) that it would be "both bad law and bad tax policy" to draw a negative inference from the limitation that lessors under consumer leases should be subject to different substantive tax rules than lessors under commercial leases. As was stated there:

Any requirement that a lessor substantiate his entitlement to the tax attributes associated with the leased property on the basis of how a lessee actually uses the property would create such hopelessly complex and costly administrative problems for both the IRS and lessor taxpayers as to defy resolution.

The permanent definitional provision added to the code by the bill, like section 210, applies to a lease agreement entered into either before or after enactment of the provision.

I wish to point out that the problem which has given rise to the need for the bill I am introducing today would not have arisen had the legislation enacted last year followed the substance of a bill, H.R. 3857, 97th Congress, on this subject that I introduced early in 1981.

The bill I am introducing today is a reasonable response to the question of how certain motor vehicle operating leases should be treated for Federal tax purposes. I urge its prompt enactment.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. JONES of Tennessee (at the request of Mr. WRIGHT) for February 14 through 25 on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. DENNY SMITH) to revise and extend their remarks and include extraneous material:)

Mr. LOEFFLER, for 10 minutes, today.

Mr. CORCORAN, for 5 minutes, today.

(The following Members (at the request of Mr. DE LUGO) to revise and extend their remarks and include extraneous material:)

CLAUDE PEPPER, Chairman, Feb. 8, 1983.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

403. A letter from the Secretary of Education, transmitting a copy of final regulations for the eligibility of foreign medical schools under the guaranteed student loan program, scheduled for publication in the Federal Register, pursuant to section 431(d) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

404. A letter from the Secretary of Energy, transmitting the annual report for calendar year 1980 on the Department's industrial energy efficiency improvement program, pursuant to section 375 of Public Law 94-163; to the Committee on Energy and Commerce.

405. A letter from the Secretary of State, transmitting three drafts of proposed legislation: A bill to authorize supplemental assistance to aid Lebanon in rebuilding its economy and armed forces, and for other purposes; a bill to authorize supplemental international security assistance for urgent purposes for the fiscal year 1983, and for other purposes; and a bill to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize security and development assistance programs for the fiscal years 1984 and 1985, and for other purposes; to the Committee on Foreign Affairs.

406. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Department of the Air Force's proposed lease of defense articles to the Netherlands, pursuant to section 62(a) of the Arms Export Control Act; to the Committee on Foreign Affairs.

407. A letter from the Assistant Secretary of State for Congressional Relations, transmitting copies of the agreement on trade in cotton, wool and manmade fiber textiles and textile products between the American Institute in Taiwan and the Coordination Council for North American Affairs, pursuant to section 12(a) of Public Law 96-8; to the Committee on Foreign Affairs.

408. A letter from the Chairman, Depository Institutions Deregulation Committee, transmitting a report on the Committee's activities under the Freedom of Information Act during calendar year 1982, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

409. A letter from the Director, Minerals Management Service, Department of Interior, transmitting notice of the proposed refund of $379,966.24 in excess royalty payments to Amoco Production Co., Shell Oil Co., ARCO Oil and Gas Co., and Texaco Inc., pursuant to section 10(b) of the Outer Continental Shelf Lands Act of 1953, as amended; to the Committee on Interior and Insular Affairs.

410. A letter from the Director, Office of Management and Budget, transmitting a watershed plan and environmental impact statement for the Elk Creek Watershed, Kans., pursuant to section 5 of Public Law 83-566, as amended; to the Committee on Public Works and Transportation.

411. A letter from the Administrator, Veterans' Administration, transmitting a draft of proposed legislation to amend title 38, United States Code, to authorize the Veterans' Administration to administer a community residential care program; to the Committee on Veterans' Affairs.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. APPLEGATE:

H.R. 1589. A bill to direct the Federal Communications Commission to conduct an experiment to test the feasibility of extended broadcasting hours of operation for amplitude modulated broadcast stations which currently are licensed for daytime operation only; to the Committee on Energy and Commerce.

By Mr. PANETTA (for himself, Mr. DE LA GARZA, Mr. EMERSON, Mr. FOLEY, Mr. ECKART, Mr. HUCKABY, Mrs. SNOWE, Mr. GLICKMAN, Ms. KAPTUR, Mrs. KENNELLY, Mr. COLEMAN OF MISSOURI, Mr. HALL of Ohio, and Ms. OAKAR):

H.R. 1590. A bill to provide emergency food assistance to low-income and unemployed persons and to improve the commodity distribution program; to the Committee on Agriculture.

By Mr. ALEXANDER:

H.R. 1591. A bill to amend the Internal Revenue Code of 1954 to allow any taxpayer to elect to treat for income tax purposes any crop received under a Federal program for removing land from agricultural production as produced by the taxpayer, to allow any taxpayer to elect to defer income on any cancellation under such a program of any price support loan, and to provide that participation in such a program shall not disqualify the taxpayer for the special use valuation of farm real property under section 2032A of such Code; to the Committee on Ways and Means.

H.R. 1592. A bill to amend the Agricultural Act of 1949 to provide that the price of the 1984 and 1985 crops of soybeans shall be supported at not less than 250 percent of the level at which the price of such crops of corn are supported, to amend the Agriculture and Food Act of 1981 to terminate program payment limitations for such crops of commodities, and for other purposes; to the Committee on Agriculture.

By Mr. BATES:

H.R. 1593. A bill to amend the Small Business Act to provide assistance to areas of economic dislocation in the United States that is the result of drastic fluctuation in the value of the currency in a country contiguous to the United States; to the Committee on Small Business.

By Mr. CONYERS:

H.R. 1594. A bill to amend the Public Utility Regulatory Policies Act of 1978 to provide for uniform nationwide standards governing involuntary terminations by electric and natural gas utilities of service for residential heating purposes; to the Committee on Energy and Commerce.

By Mr. WIRTH (for himself, Mr. CONTE, Mr. DORGAN, Mr. MINETA, Mr. BOSCO, Mr. FEIGHAN, Mr. D'AMOURS, Mr. GLICKMAN, Mr. MINISH, Ms. KAPTUR, Mr. MCNULTY, Mr. LEHMAN of Florida, Mr. LELAND, Mr. MCKINNEY, Mr. NEAL, and Mrs. BOXER):

H.R. 1595. A bill to amend, extend, and enhance the renewable energy and conservation programs of the United States in order to increase employment, promote renewable energy small business, enhance our national security, and displace imported energy sources; jointly, to the Committees on Ways and Means, Banking, Finance and Urban Affairs, Energy and Commerce, Small Business, Armed Services, Agriculture, Education and Labor, and Science and Technology.

By Mr. BEDELL (for himself, Mrs. SNOWE, Mr. WIRTH, and Mr. CONTE):

H.R. 1596. A bill to promote the use of solar and other renewable forms of energy developed by the private sector; jointly, to the Committees on Ways and Means, Banking, Finance and Urban Affairs, Energy and Commerce, and Small Business.

By Mr. DICKINSON (for himself, Mr. MCCURDY, Mr. CONTE, and Mr. WIRTH):

H.R. 1597. A bill to promote the use of energy-conserving equipment and biofuels by the Department of Defense, and for other purposes; jointly, to the Committees, on Armed Services, Agriculture, and Energy and Commerce.

By Mr. JEFFORDS (for himself, Mr. EDGAR, Mr. WIRTH, and Mr. CONTE):

H.R. 1598. A bill to revise certain Federal training and economic development programs to create jobs and develop skills in renewable energy and energy conservation industries, and for other purposes; jointly, to the Committees on Education and Labor, Banking, Finance and Urban Affairs, Energy and Commerce, and Agriculture.

By Mr. NEAL (for himself, Mr. MCKINNEY, Mr. WIRTH, and Mr. CONTE):

H.R. 1599. A bill to reauthorize, extend, and enhance existing Federal programs to encourage conservation and the use of renewable energy by this Nation's consumers; jointly to the Committees on Banking, Finance and Urban Affairs, Ways and Means, Energy and Commerce, Science and Technology, and Small Business.

By Mr. SCHULZE (for himself, Mrs. BOUQUARD, Mr. HOWARD, Mr. HUBBARD, Mr. LIVINGSTON, Mr. OBERSTAR, Mr. ROBINSON, Mr. ROTH, MR. STANGELAND, Mr. STUMP, Mr. YOUNG of Alaska, Mr. WHITEHURST, Mr. WILSON, Mr. COUGHLIN, and Mr. KOGOVSEK):

H.R. 1600. A bill to aid in the creation and expansion of American small business enterprise through the enactment of tax reform and relief amendments to the Internal Revenue Code of 1954; to the Committee on Ways and Means.

By Mr. ENGLISH:

H.R. 1601. A bill to repeal the provisions of the Tax Equity and Fiscal Responsibility Act of 1982 which require employer reporting with respect to tips; to the Committee on Ways and Means.

By. Mr. FAUNTROY:

H.R. 1602. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act to allow the acts of the Council of the District of Columbia to take effect when transmitted by the chairman of the Council of the District of Columbia and to change the procedure for resolutions of approval or disapproval of such acts; jointly, to the Committees on the District of Columbia and Rules.

By Ms. FERRARO (for herself, and Mr. MILLER of California):

H.R. 1603. A bill to provide an efficient and cost-effective program for children in the areas of child welfare, child care, health care, education, family income and social service supports, youth employment, nutrition, runaway youth, and juvenile justice; jointly, to the Committees on Education and Labor, Ways and Means, Energy and Commerce, and Agriculture.

By Mr. FOWLER (for himself, Mr. DOWDY of Mississippi, Mr. SPRATT, and Mr. MOORE):

H.R. 1604. A bill to amend the dairy price support program; to the Committee on Agriculture.

By Mr. FRANK:

H.R. 1605. A bill to amend chapter 67 of title 31, United States Code, relating to general revenue sharing, with respect to the determination of tax effort; to the Committee on Government Operations.

H.R. 1606. A bill to amend the Internal Revenue Code of 1954 to provide that an unmarried individual who maintains a household shall be considered a head of household, without regard to whether the individual has a dependent who is a member of the household; to the Committee on Ways and Means.

By Mr. GIBBONS:

H.R. 1607. A bill to amend the Internal Revenue Code of 1954 to make it clear that certain motor vehicle operating leases are leases; to the Committee on Ways and Means.

H.R. 1608. A bill to recapture overall foreign losses in termination cases; to the Committee on Ways and Means.

By Mr. GIBBONS (for himself and Mr. FRENZEL):

H.R. 1609. A bill to amend the Internal Revenue Code of 1954 to relieve international double taxation of overseas construction projects of U.S. contractors; to the Committee on Ways and Means.

By Mr. GINGRICH:

H.R. 1610. A bill to prohibit permanently the issuance of regulations on the taxation of fringe benefits; to the Committee on Ways and Means.

By Mr. GUNDERSON:

H.R. 1611. A bill to amend the Military Selective Service Act to provide that registrants for selective service may indicate at the time of registration their desire to be classified as conscientious objectors; to the Committee on Armed Services.

H.R. 1612. A bill to amend the Internal Revenue Code of 1954 to repeal withholding on interest and dividends and, in order to compensate for revenue reductions resulting from such repeal, to repeal certain changes in the windfall profit tax on domestic crude oil enacted by the Economic Recovery Tax Act of 1981, to increase to 55 percent the maximum rate of income tax on individuals, and to repeal the exclusion for net savings; to the Committee on Ways and Means.

By Mr. HAMILTON:

H.R. 1613. A bill to amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (Superfund) to clarify certain provisions relating to remedial actions at facilities owned and operated by a State or political subdivision thereof; to the Committee on Energy and Commerce.

By Mr. HUGHES (for himself and Mr. HYDE):

H.R. 1614. A bill to amend the Congressional Budget Act to limit the growth of Federal spending and to achieve balanced budgets, and for other purposes; jointly, to the Committees on Rules and Government Operations.

By Mr. LAFALCE:

H.R. 1615. A bill to extend the Superfund legislation for 5 additional years and to provide for annual 5-percent increases in the funding levels after September 30, 1985, and for other purposes; jointly, to the Committees on Energy and Commerce and Ways and Means.

By Mr. McDONALD (for himself and Mr. DANIEL B. CRANE):

H.R. 1616. A bill to amend title 18, chapter 44, United States Code, to provide clarification of limitations on controls of the interstate movement of firearms, and to prohibit the use of Federal funds to political subdivisions which implement certain gun control ordinances; to the Committee on the Judiciary.

By Mr. McGRATH (for himself, Mr. ADDABBO, Mr. BEREUTER, Mr. BILIRAKIS, Mr. CLAY, Mr. COATS, Mr. CONABLE, Mr. D'AMOURS, Mr. DANNEMEYER, Mr. DAUB, Mr. DERRICK, Mr. DUNCAN, Mr. DYSON, Mr. EDWARDS of Oklahoma, Mr. EMERSON, Mr. ENGLISH, Mr. EVANS of Iowa, Mr. FASCELL, Mr. FORD of Tennessee, Mr. FORD of Michigan, Mr. FRANK, Mr. FROST, Mr. GRADISON, Mr. GUNDERSON, Mr. HALL of Ohio, Mr. HATCHER, Mr. HILER, Mr. HORTON, Mr. HUGHES,

Mr. JONES of North Carolina, Mr. KEMP, Mr. KILDEE, Mr. KINDNESS, Mr. LAFALCE, Mr. LAGOMARSINO, Mr. LEHMAN of Florida, Mr. LENT, Mr. LIVINGSTON, Mr. LOWRY of Washington, Mr. LUNGREN, Mr. MCCOLLUM, Mr. MCKINNEY, Mr. MARRIOTT, Mr. MARTIN of New York, Mrs. MARTIN of Illinois, Mr. MOLINARI, Mr. O'BRIEN, Mr. PARRIS, Mr. PATMAN, Mr. PORTER, Mr. RATCHFORD, Mr. ROBERTS, Mr. ROE, Mr. ROGERS, Mr. SAWYER, Mr. SHARP, Mr. SHELBY, Mr. SKEEN, Mr. SMITH of New Jersey, Mrs. SNOWE, Mr. STOKES, Mr. STUMP, Mr. TAUKE, Mr. TAUZIN, Mr. VANDER JAGT, Mr. VENTO, Mr. WEAVER, Mr. WEBER, Mr. WHITTAKER, Mr. WOLF, Mr. WON PAT, Mr. BROYHILL, Mr. FISH, Mr. SENSENBRENNER, Mr. WILLIAMS of Ohio, Mr. HUCKABY, and Mr. CLARKE):

H.R. 1617. A bill to make certain changes in the membership and operations of the Advisory Commission on Intergovernmental Relations; to the Committee on Government Operations.

By Mr. MOORHEAD:

H.R. 1618. A bill to amend the Federal Power Act to encourage conduit hydroelectric facilities; to the Committee on Energy and Commerce.

By Mr. OTTINGER:

H.R. 1619. A bill to amend the War Powers Resolution to require specific authorization before the introduction of any U.S. Armed Forces into hostilities in El Salvador, and for other purposes; to the Committee on Foreign Affairs.

By Mr. PEASE:

H.R. 1620. A bill to extend until the close of June 20, 1988, the existing suspension of duties on flat knitting machines; to the Committee on Ways and Means.

By Mr. RAHALL:

H.R. 1621. A bill to amend the Surface Mining Control and Reclamation Act of 1977 to provide that 50 percent of the funds deposited in the abandoned mine reclamation fund shall be paid to the States quarterly to be used by the States pursuant to approved abandoned mine reclamation programs; to the Committee on Interior and Insular Affairs.

By Mrs. SCHROEDER (for herself, Mr. SABO, Mr. YATES, Mr. FRANK, Mr. ORTIZ, Mr. FOGLIETTA, Mr. GARCIA, and Mr. EDWARDS of California):

H.R. 1622. A bill to delay the effective date for the denial of Federal educational assistance to students who have failed to comply with registration requirements under the Military Selective Service Act from July 1, 1983, to July 1, 1984; jointly, to the Committees on Armed Services and Education and Labor.

By Mr. SENSENBRENNER (for himself, Mr. PETRI, Mr. RUDD, Mr. GUNDERSON, Mr. ROTH, Mr. MAZZOLI, Mr. CORCORAN, Mr. JACOBS, Mr. DREIER of California, Mr. BLILEY, Mr. FORSYTHE, Mr. SHELBY, Mr. PAUL, Mr. GINGRICH, Mr. MCDONALD, and Mr. CRAIG):

H.R. 1623. A bill entitled the "Insanity Defense Limitations Act,"; to the Committee on the Judiciary.

By Mr. STARK:

H.R. 1624. A bill to amend the Tariff Schedules of the United States to establish equal and equitable classification and duty rates for various cordage products of virtually identical characteristics; to the Committee on Ways and Means.

By Mr. STENHOLM:

H.R. 1625. A bill to provide for the operation of a SouthWest Collegiate Institute for the Deaf; to the Committee on Education and Labor.

By Mrs. VUCANOVICH:

H.R. 1626. A bill to authorize the recreational use of Ruby Lake National Wildlife Refuge in the State of Nevada; to the Committee on Merchant Marine and Fisheries.

By Mr. WYDEN:

H.R. 1627. A bill entitled: The Armed Career Criminal Act of 1983; to the Committee on the Judiciary.

By Mr. ANDREWS of North Carolina (for himself, Mr. DAUB, Mr. BEREUTER, Mr. SCHUMER, Mr. JONES of Tennessee, Mr. ANDERSON, Mr. HORTON, Mr. MATSUI, Mr. MCGRATH, Mr. COYNE, Mr. FRANK, Mr. BIAGGI, Mr. SMITH of Florida, Ms. OAKAR, Mr. EDGAR, Mr. ALBOSTA, Mr. MADIGAN, Mr. FUQUA, Mr. DWYER of New Jersey, Mr. STOKES, Mr. MCCURDY, Mr. HIGHTOWER, Mr. KOGOVSEK, Mr. RITTER, Mr. SABO, Mr. O'BRIEN, Mr. TOWNS, Mr. DONNELLY, Mr. LAGOMARSINO, Mr. FORSYTHE, Mr. YOUNG of Alaska, Mr. RAHALL, Mrs. BOUQUARD, Mr. EVANS of Iowa, Mr. CORRADA, Mr. EDWARDS of Oklahoma, Mr. CLAY, Mr. DYMALLY, Ms. KAPTUR, Mr. GRAY, Mr. FAUNTROY, Mr. MILLER of Ohio, Mr. TALLON, Mr. BEVILL, Mr. JEFFORDS, Mr. YOUNG of Missouri, Mr. GEKAS, Mr. OWENS, Mrs. HOLT, Mr. SCHEUER, Mr. WIRTH, Mr. CARPER, Mr. ROE, Mr. PASHAYAN, Mr. GREEN, Mr. MOAKLEY, Ms. MIKULSKI, Mr. LONG of Maryland, Mr. STANGELAND, Mr. HERTEL of Michigan, Mr. GUARINI, Mr. BROYHILL, Mr. EVANS of Illinois, Mr. FRENZEL, Mr. HUGHES, Mrs. BOXER, Mr. WEISS, Mr. DAVIS, Mr. LELAND, Mr. TORRICELLI, and Mr. BOUCHER):

H.J. Res. 156. Joint resolution to recognize Senior Center Week during Senior Citizen Month as proclaimed by the President; to the Committee on Post Office and Civil Service.

By Mr. OTTINGER:

H.J. Res. 157. Joint resolution posthumously proclaiming Christopher Columbus to be an honorary citizen of the United States; to the Committee on the Judiciary.

By Mr. UDALL:

H.J. Res. 158. Joint resolution to make technical corrections in the act of January 25, 1983 (Public Law 97-459); to the Committee on Interior and Insular Affairs.

By Mr. ZABLOCKI (for himself and Mr. LAGOMARSINO):

H. Con. Res. 65. Concurrent resolution welcoming Her Majesty Queen Elizabeth II and His Royal Highness the Prince Philip, Duke of Edinburgh, on their official visit to the United States; to the Committee on Foreign Affairs.

By Mr. OTTINGER:

H. Con. Res. 66. Concurrent resolution expressing the sense of the Congress that the United States should recognize Jerusalem as the capital of Israel, and that the U.S. Embassy in Israel should be relocated to Jerusalem; to the Committee on Foreign Affairs.

H. Con. Res. 67. Concurrent resolution declaring that the President's decision to commit U.S. military personnel to El Salvador requires that he comply with section 4(a) of the War Powers Resolution; to the Committee on Foreign Affairs.

By Mrs. ROUKEMA:

H. Con. Res. 68. Concurrent resolution expressing the sense of the Congress that no limitation should be placed on the Federal income tax deduction for interest paid on a residential mortgage; to the Committee on Ways and Means.

By Mr. DE LA GARZA (for himself and Mr. MADIGAN):

H. Res. 101. Resolution providing amounts from the contingent fund of the House for expenses of investigations and studies by the Committee on Agriculture in the first session of the 98th Congress; to the Committee on House Administration.

By Mr. ENGLISH (for himself and Mr. JONES of Tennessee):

H. Res. 102. Resolution expressing the sense of the House of Representatives that the role of the Rural Electrification Administration should be enhanced to assure that Federal agencies consider the needs of rural America in establishing policies which affect telephone service in rural America; to the Committee on Agriculture.

By Mr. BROOMFIELD (for himself and Mr. PRITCHARD):

H. Res. 103. Resolution commending the Government of Zimbabwe; to the Committee on Foreign Affairs.

By Mr. CORCORAN:

H. Res. 104. Resolution amending the Rules of the House of Representatives with respect to use of committee funds for travel; to the Committee on Rules.

By Mr. RODINO:

H. Res. 105. Resolution providing amounts from the contingent fund of the House for expenses of investigations and studies by the Committee on the Judiciary in the 1st session of the 98th Congress; to the Committee on House Administration.

MEMORIALS

Under clause 4 of rule XXII,

14. The SPEAKER presented a memorial of the Senate of the State of Minnesota, relative to persons missing in action in Southeast Asia; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mrs. SCHNEIDER:

H.R. 1628. A bill for the relief of Dr. Mario J. Wexu; to the Committee on the Judiciary.

H.R. 1629. A bill to permit Charles E. Day, Senior, and Mary Day, husband and wife, to file an action against the United States District Court, for the District of Rhode Island, and for other purposes; to the Committee on the Judiciary

By Mr. WAXMAN:

H.R. 1630. A bill for the relief of Arturo, Maria, Luisa, and Rosa Posadas de Flores; to the Committee on the Judiciary.

By Mr. WRIGHT:

H.R. 1631. A bill for the relief of Calvin L. Graham; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 86: Mr. MCCOLLUM and Mr. SKEEN.

H.R. 87: Mr. MCCOLLUM.

H.R. 429: Mr. HILLIS.

H.R. 461: Mr. MCCOLLUM.

H.R. 671: Mr. WAXMAN.

H.R. 706: Mr. BROWN of Colorado, Mr. KASICH, Mr. JACOBS, Mr. REID, Mr. GINGRICH, Mrs. SNOWE, Mr. RATCHFORD, Mr. BEREUTER, Mr. DANNEMEYER, Mr. MCKINNEY, Mr. DAUB, Mr. STANGELAND, Mr. NIELSON of Utah, Mr. MAZZOLI, Mr. RITTER, Mr. O'BRIEN, Mr. GEJDENSON, Mr. DURBIN, Mrs. SCHNEIDER, AND Mrs. MARTIN of Illinois.

H.R. 1418: Mr. SENSENBRENNER, Mr. DASCHLE, Mr. QUILLEN, Mr. ALEXANDER, Mr. PRITCHARD, Mr. FRANK, Mr. DWYER of New Jersey, Mr. UDALL, Mr. OXLEY, Mr. PORTER, Mr. MCCURDY, Mr. MARRIOTT, Mr. SHARP, Mr. WHITEHURST, Mr. HUGHES, Mr. FORSYTHE, Mr. KINDNESS, Mr. BENNETT, Mr. MAVROULES, Mr. PAUL, Mr. ARCHER, Mr. WINN, Mr. LELAND, Ms. OAKAR, Mr. LOWRY of Washington, Mr. ECKART, Mr. SHELBY, Mr. D'AMOURS, Mr. LAGOMARSINO, Mr. SIMON, Mr. CROCKETT, Mr. DICKS, Mr. DYSON, Mr. PATMAN, Mr. FAZIO, Mr. RATCHFORD, Mr. LAFALCE, Mr. BARNES, and Mr. GUNDERSON.

H.R. 1436: Mr. ROE, Mr. JONES of North Carolina, and Mr. SUNIA.

H.R. 1441: Mr. BEREUTER, Mr. BROOMFIELD, Mr. CLAY, Mr. DUNCAN, Mr. ECKART, Mr. FIELDS, Mr. KINDNESS, Mr. MADIGAN, Mr. MARRIOTT, and Mr. REGULA.

H.R. 1543: Mr. FOGLIETTA, Mr. WASHINGTON, Mr. FAUNTROY, Mr. LEHMAN of Florida, and Mr. GARCIA.

H. J. Res. 1: Mr. ZSCHAU.

H.J. Res. 22: Mr. WOLPE, Mr. LONG of Louisiana, Mr. DYSON, and Mr. BRITT.

H.J. Res. 62: Mr. ADDABBO, Mr. AKAKA, Mr. ARCHER, Mr. BLILEY, Mr. BORSKI, Mrs. BOXER, Mr. CHANDLER, Mr. CHAPPIE, Mrs. COLLINS, Mr. CONYERS, Mr. CORRADA, Mr. DAUB, Mr. DE LA GARZA, Mr. DIXON, Mr. DOWNEY of New York, Mr. DWYER of New Jersey, Mr. DYMALLY, Mr. EDGAR, Mr. FAUNTROY, Mr. FAZIO, Mr. FLIPPO, Mr. FLORIO, Mr. FORSYTHE, Mr. FRENZEL, Mr. FROST, Mr. GILMAN, Mr. GRADISON, Mr. GREEN, Mr. HANCE, Mr. HANSEN of Utah, Mr. HOPKINS, Mr. HOWARD, Mr. HUBBARD, Mr. HUGHES, Mr. HUTTO, Mr. HYDE, Mr. JEFFORDS, Mr. KASICH, Mr. KAZEN, Mr. KEMP, Mrs. KENNELLY, Mr. KOSTMAYER, Mr. LAGOMARSINO, Mr. LANTOS, Mr. LEHMAN of Florida, Mr. LELAND, Mr. LENT, Mr. LEVIN of Michigan, Mr. LEVINE of California, Mr. MADIGAN, Mr. MARKEY, Mr. MARRIOTT, Mr. MATSUI, Mr. MAZZOLI, Mr. MCDADE, Mr. MCDONALD, Mr. MCEWEN, Mr. MCGRATH, Mr. MCNULTY, Ms. MIKULSKI, Mr. MINISH, Mr. MRAZEK, Mr. MURPHY, Mr. NATCHER, Mr. NICHOLS, Mr. O'BRIEN, Mr. ORTIZ, Mr. OWENS, Mr. PATTERSON, Mr. PEPPER, Mr. RANGEL, Mr. RAY, Mr. RINALDO, Mr. RODINO, Mr. ROE, Mrs. ROUKEMA, Mr. SCHEUER, Mr. SHELBY, Mr. SIMON, Mr. SMITH of New Jersey, Mr. SNYDER, Mr. SOLARZ, Mr. STAGGERS, Mr. STOKES, Mr. SUNIA, Mr. TALLON, Mr. TAUKE, Mr. TORRICELLI, Mr. TOWNS, Mr. VANDERGRIFF, Mr. VENTO, Mr. WALGREN, Mr. WAXMAN, Mr. WEISS, Mr. WILSON, Mr. WINN, Mr. WOLF, Mr. WORTLEY, Mr. WYLIE, Mr. ALEXANDER, Mr. BEVILL, Mr. COURTER, Mr. DANIEL, Mr. DONNELLY, Mr. DOWDY of Mississippi, Mr. MORRISON of Washington, Mr. NOWAK, Mr. ROGERS, Mr. SUNDQUIST, Mr. UDALL, and Mr. WHITTAKER.

H.J. Res. 70: Mr. AKAKA, Mr. ALEXANDER, Mr. ANDERSON, Mr. BARNARD, Mr. BERMAN, Mr. BEVILL, Mr. BONER of Tennessee, Mr. BONIOR of Michigan, Mr. BROOKS, Mr. BRYANT, Mrs. BYRON, Mr. CAMPBELL, Mr. CARPER, Mr. CARR, Mrs. COLLINS, Mr. DONNELLY, Mr. DURBIN, Mr. GREGG, Mr. HAMILTON, Mr. HARKIN, Mr. HAWKINS, Mr. HILER, Mr. HOPKINS, Mr. HUTTO, Mrs. JOHNSON, Mr. KEMP, Mr. KILDEE, Mr. KOLTER, Mr. LEVINE of California, Mr. LUKEN, Mr. MCHUGH, Mrs. MARTIN of Illinois, Mr. MILLER of California, Mr. MINETA, Mr. MOLINARI, Mr. MURTHA, Mr. PARRIS, Mr. PEPPER, Mr. PERKINS, Mr. PICKLE, Mr. RINALDO, Mr. ROYBAL, Mrs. SCHROEDER, Mr. SIMON, Mr. SPENCE, Mr. TORRES, Mr. TORRICELLI, Mr. WASHINGTON, Mr. WHITEHURST, Mr. WISE, Mr. YOUNG of Alaska, and Mrs. BOGGS.

H.J. Res. 96: Mr. BRITT, Mr. LEVINE of California, Mr. STAGGERS, Mrs. COLLINS, Mr. HOYER, Mrs. HOLT, Mr. EVANS of Illinois, Mr. BARNARD, and Mr. TORRICELLI.

H.J. Res. 101: Mr. GUARINI, Mr. OBERSTAR, Mr. WIRTH, Mr. TAUZIN, Mrs. MARTIN of Illinois, Mr. SIMON, Mr. HORTON, Mr. WINN, Mr. DAUB, Mr. VANDERGRIFF, Mr. CORRADA, Mr. MCGRATH, Mr. SMITH of Florida, Mr. STANGELAND, Mr. STOKES, Mr. BEVILL, Mr. DWYER of New Jersey, Mr. BOUCHER, Mr. LEACH of Iowa, Mr. EDGAR, Ms. OAKAR, Mr. RATCHFORD, Mr. MADIGAN, Mr. MAZZOLI, Mr. WEAVER, Mr. LAGOMARSINO, Mr. LEWIS of California, Mr. HATCHER, Mr. MAVROULES, Mr. TALLON, Mr. FORD of Tennessee, Mr. BROOKS, Mr. VENTO, Mr. OWENS, Mr. FRENZEL, Mr. FLORIO, Mr. KASICH, Mr. MCCAIN, Mr. KRAMER, Mr. MCNULTY, Mr. FISH, Mr. SPRATT, and Mr. HUCKABY.

H.J. Res. 103: Mr. TALLON and Mr. YOUNG of Alaska.

H.J. Res. 104: Mr. KASICH.

H.J. Res. 120: Mr. MOODY and Mr. LEVINE of California.

H.J. Res. 121: Mr. ANDREWS of North Carolina, Mr. ASPIN, Mr. BARNARD, Mr. BARNES, Mr. BATES, Mr. BERMAN, Mr. BEVILL, Mr. BONER of Tennessee, Mr. BOUCHER, Mrs. BOXER, Mr. CHAPPELL, Mr. COOPER, Mr. CROCKETT, Mr. EDGAR, Mr. ENGLISH, Mr. FRENZEL, Mr. FUQUA, Mr. GINGRICH, Mr. GREEN, Mr. HARRISON, Mr. HATCHER, Mr. HORTON, Mr. HUGHES, Mr. HYDE, Mr. JONES of Tennessee, Mr. KASICH, Mr. KEMP, Mr. LAFALCE, Mr. LAGOMARSINO, Mr. LANTOS, Mr. LELAND, Mr. LEVINE of California, Mr. LEWIS of California, Mr. MCGRATH, Mr. MADIGAN, Mr. MARTINEZ, Mr. MATSUI, Mr. MOAKLEY, Mr. MOLLOHAN, Mr. NEAL, Ms. OAKER, Mr. O'BRIEN, Mr. PASHAYAN, Mr. PORTER, Mr. PRITCHARD, Mr. RAHALL, Mr. RATCHFORD, Mr. RICHARDSON, Mr. ROE, Mr. ROEMER, Mr. SMITH of Florida, Mr. SPENCE, Mr. TALLON, Mr. THOMAS of California, Mr. VANDERGRIFF, Mr. WAXMAN, Mr. WILSON, Mr. WHEAT, Mr. WHITEHURST and Mr. WORTLEY.

H.J. Res. 139: Mr. FAUNTROY, Mr. YOUNG of Alaska, Mr. ANDERSON, Mr. PEPPER, Mr. AKAKA, Mr. D'AMOURS, Mr. SMITH of Florida, Mr. SIMON, Mr. HATCHER, Mr. ST GERMAIN, Mr. WYLIE, Mr. BEREUTER, Mr. HOYER, Mr. WOLF, Mr. DAUB, Mr. ROE, Mr. VENTO, Mr. VANDERGRIFF, Mr. FRANK, Mr. MCCOLLUM, Mr. LAFALCE, Mr. BATES, Mr. BARNARD, Mr. RAHALL, Mr. STOKES, Mr. LELAND, Mr. MCGRATH, Mr. SCHEUER, Mr. DASCHLE, Mr. ANNUNZIO, Mrs. HOLT, Mr. HUBBARD, Mr. DREIER of California; Mr. LUJAN, Mr. RATCHFORD, Mr. CARPER, Mr. BARNES, Mr. EDGAR, Mr. WHITEHURST, Mr. OBERSTAR, Mr. PATMAN, and Mr. MCNULTY.

H.J. Res. 140: Mr. ALEXANDER, Mr. BEVILL, Mr. BOLAND, Mrs. BOUQUARD, Mr. BROWN of California, Mr. CAMPBELL, Mr. DASCHLE, Mr. DAUB, Mr. DIXON, Mr. DONNELLY, Mr. EDGAR, Mr. EDWARDS of California, Mr. FAUNTROY, Mr. FAZIO, Mr. FISH, Mr. FOGLIETTA, Mr. FOLEY, Mr. HANSEN of Idaho, Mr. HOYER, Mr. HYDE, Mr. LAGOMARSINO, Mr. LANTOS, Mr. LIVINGSTON, Mr. MARKEY, Mr. MARRIOTT, Mr. MATSUI, Mr. MAVROULES, Mr. MAZZOLI, Mr. MOORE, Mr. MURPHY, Mr. ROEMER, Mr. SHUMWAY, Mr. STENHOLM, Mr. STANGELAND, Mr. STUMP, Mr. TAUZIN, Mr. WALGREN, Mr. WEAVER, Mr. WHITTAKER, Mr. HUTTO, Mr. WHITLEY, Mr. MOORHEAD, Mr. SIMON, Mr. DYMALLY, Mr. LELAND, Mr. RATCHFORD, Mr. FIELDS, Mr. SCHEUER, Mr. KASICH, Mr. VANDERGRIFF, Mr. PATMAN, Mr. WINN, Mr. STOKES, Mr. BARNES, Mr. OWENS, Ms. MIKULSKI, Mr. RAHALL, Mr. MCGRATH, Mr. PASHAYAN, Mr. BONIOR of Michigan, Mr. JONES of Tennessee, Mr. GEKAS, Mr. YATRON, Mr. HUCKABY, Mr. MOLLOHAN, Mrs. BOXER, Mr. RITTER, Mr. ROBINSON, Mr. RICHARDSON, Mrs. HALL of Indiana, Mr. HERTEL of Michigan, Mr. LEVINE of California, Mr. FRENZEL, Mr. WAXMAN, Mr. SMITH of Florida, Mr. GREEN, Mr. EVANS of Illinois, and Mr. COATS.

H. Res. 37: Mr. WON PAT, Mr. MCNULTY, Mr. HYDE, Mr. BURTON of California, Mr. FAZIO, Mr. PORTER, Mr. KILDEE, Mrs. BOXER, Mr. MITCHELL, Mr. MCCOLLUM, Mr. FRENZEL, Mr. GUNDERSON, and Mr. HOYER.

H. Res. 41: Mr. BERMAN, Mr. RICHARDSON, and Mrs. HALL of Indiana.

H. Res. 67: Mr. FASCELL, Mr. MICA, Mr. BERMAN, Mr. CROCKETT, Mr. WYDEN, Mr. LEVINE of California, Mr. AUCOIN, Mr.

FAZIO, Mr. BILIRAKIS, Mr. SILJANDER, Mr. JONES of Oklahoma, Mr. KEMP, Mrs. ROUKEMA, Mr. FLORIO, Mr. FOWLER, Mr. HOYER, Mr. CARNEY, Mr. BONKER, Mr. MINISH, Mr. GIBBONS, Mr. RANGEL, and Mr. KILDEE.

H. Res. 78: Mr. DERRICK, Mr. MITCHELL, Mr. NOWAK, Mr. FRANK, Mr. MOLLOHAN, Mr. HAMMERSCHMIDT, Mr. ECKART, Mr. DYMALLY, Mr. EDGAR, Mrs. SCHNEIDER, Mr. D'AMOURS, Mr. FISH, and Mr. MARTINEZ.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

33. By the SPEAKER: Petition of the Board of Supervisors, Wyoming County, N.Y., relative to the escalation of natural gas prices; to the Committee on Energy and Commerce.

34. Also, petition of the Seventh Day Baptists of U.S.A. and Canada, Janesville, Wis., relative to a nuclear weapons freeze; to the Committee on Foreign Affairs.

35. Also, petition of the City Council of New York, N.Y., relative to social security benefits; to the Committee on Ways and Means.

11-059 O-87-5 (Pt. 3)

EXTENSIONS OF REMARKS

FRINGE BENEFIT TAXATION

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 22, 1983

● Mr. PHILIP M. CRANE. Mr. Speaker, I recently introduced H.R. 532, which amends the Internal Revenue Code of 1954 to exclude fringe benefits from the definition of gross income. Passage of this bill would end over 20 years of debate on the merits of fringe benefit taxation and reaffirm Congress as the appropriate arm of the Government to establish tax law.

At present, the Internal Revenue Service (IRS) maintains that it is responsible for collecting taxes on all gross income. I submit that fringe benefits are not properly included within the definition of gross income. Not only are they a segment of a job contract and a vehicle of the free market, but they are also incentives which are often of no cost to the employer. In addition, they are not transferable which implies that they should not be taxed as an asset since they cannot be resold.

Furthermore, fringe benefits are not limited to one special interest group. Virtually everyone receives some type of fringe benefits—be it discounts for store clerks, free meals for waitresses, free parking for plant employees, or tuition benefits for a university custodian.

Taxation of these employee options would disrupt beneficial personnel relations, increase taxes, and raise the cost of living for all citizens—thereby doubling the burden on each working American.

The IRS claims that revenue is needed to balance the budget. Nevertheless, this type of taxation clearly would be inflationary to bureaucracy. Additional staff would be required at the IRS to handle the resulting paperwork. Industry would suffer from having to implement new accounting programs as well as increase salaries to rectify broken contracts. While we can conclude that ultimately the consumer will bear the brunt of these increased costs, the IRS cannot assure Congress that the extra revenue will outweigh increased bureaucracy.

Taxation of fringe benefits assumes that the monetary value of fringe benefits can be easily ascertained. This is not true in many cases. For example, the value of a parking space in downtown Washington, D.C., differs from one in suburban Chicago. The same is true of free and reduced rate airfares for airline employees. First, travel privileges are granted on a nondiscriminatory basis and usually are available as standby passes only. Second, they are virtually of no cost to the employer since a seat must leave with the aircraft regardless of whether it is occupied.

Fringe benefits create for the employee a sense of belonging to an enterprise which employers consider an asset. The value of this arrangement to each party cannot be determined.

Equally as difficult to establish is foolproof enforcement. It would not be uncommon for a business to hide fringe benefits under the guise of business expenses or simply leave many benefits unaccounted.

Moreover, were this matter left to administrative regulation, an individual's tax may differ depending on his State residence. It can be expected that the status of some fringe benefits would change with each new administration.

Critics of fringe benefits have expressed a fear that Americans will desire lower salaries in exchange for more services if fringe benefits are not taxed. This would occur only if the administration does not stand by its pledge to get Government off the backs of the people. In order to lower the demand for benefits already excluded from taxation such as some health programs, legal services, and cafeteria plans, we must dispel the image of a money hungry IRS and restore America's faith in an equitable system by restraining taxes, not encouraging them.

Since the IRS is not the legislative body with jurisdiction to formulate law and since fair and enforceable regulations are beyond conceivability, I urge your support of H.R. 532, which will give Congress its rightful power to tax and/or refrain from taxing.●

NORTHEAST LOUISIANA UNIVERSITY

HON. JERRY HUCKABY

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. HUCKABY. Mr. Speaker, I have in my congressional district one of the finest institutions of higher education in Louisiana—Northeast Louisiana University, in Monroe, La. Over the years, Northeast has been a leader in the educational development of Louisiana's citizens.

Recently Northeast Louisiana University took a major step into the computer age with the opening of its Computer Assisted Learning Laboratory, in the university's Sandel Library. On Thursday, January 21, 1983, a ceremony was held initiating the laboratory, which contains 18 computer terminals. This new laboratory will be used to assist students learning grammar, mathematics, and reading, as well as computer literacy. It is encouraging to see this positive development.

During this important event, Northeast Louisiana University was visited by Dr. Donald J. Senese, Assistant Secretary for Educational Research and Improvement, of the Department of Education. Assistant Secretary Senese paid tribute to the accomplishments of Northeast, as well as recognizing the heroic spirit of the people of Monroe, La., during the recent flood there. He also discussed some of the developments in the field of educational technology. I would like to commend Dr. Senese's speech to the Members of the House:

OVERVIEW OF CURRENT INITIATIVES AND PROGRAMS OF THE U.S. DEPARTMENT OF EDUCATION'S OFFICE OF EDUCATIONAL RESEARCH AND IMPROVEMENT

Good morning, it is a pleasure to be speaking before faculty members of Northeastern Louisiana University. Since assuming the position of Assistant Secretary for Educational Research and Improvement, this is my third visit to the great state of Louisiana but my first visit to Monroe, Louisiana.

The heroic spirit of your people during the recent floods impressed Americans throughout our country.

I am pleased to have this invitation to visit the campus of one of the growing and dynamic institutions of higher education in this state.

It is especially pleasing to visit with a former colleague of mine from my days as a college teacher, Dr. Richard Chardkoff. From my years of working with Dr. Chardkoff, I can assure you that your school is fortunate in having a person of his academic credentials, intellectual skill, and dedication to education as a member of your faculty.

It is no secret that a "technology revolution" is here and has important consequences for education. It was especially pleasing to participate in the opening of your Computer Assisted Learning Laboratory in Sandel Library. You have established a center where your students can enhance their learning through the computer.

I am always pleased to have the opportunity to speak to and exchange ideas with members of the educational community.

I would like to take this opportunity to talk with you about some of the current

programs and initiatives in the U.S. Department of Education, particularly those of the Office of Educational Research and Improvement.

Currently, a primary focus in the Department is that of promoting excellence in education. Every student should be receiving a quality education that prepares him or her to successfully pursue higher education or enables him or her to be a trainable member of the workforce.

Why the concern about excellence? Schools in America have long had a reputation for their outstanding ability to educate large numbers of individuals in a superior manner.

We are excelling in numbers of students being educated. The equality and availability of educational opportunity for all the members of our society is beyond compare. During the 1980's enrollment in institutions of higher learning has reached an all-time high of over twelve million. Such a statistic supports the notion that we still have faith in the ability of education to offer us the background and abilities necessary to achieve a lifestyle consistent with the American dream.

Unfortunately, there has been a let down in quality during the past one or two decades. We have witnessed a steady decline in the Scholastic Aptitude Test (SAT) scores of students. Although last year's scores showed a slight increase for the first time in many years, it is too soon to tell whether or not that upturn indicates a reversal in trend or a fluke.

Further, we have a growing number of students, completing not only elementary and secondary school but college as well, who cannot properly read and write.

We find students taking easy courses—sometimes referred to as lifestyle courses—in place of rigorous academic studies. These courses neither challenge them intellectually nor prepare them for an increasingly complex, technological world.

We even find that many of our brighter people in the teaching profession are leaving. Their replacements are, in many cases, those who lack the goal of excellence in education.

You are all educators. You know that some things are right with American education and some things need improving.

However, the complex, technological, and information-based society which will be the adult world of students now in school demands that we offer them nothing less than the best.

Defining what is meant by "excellence in education" is not an easy job. In recognition of the difficulty of this task but appreciating the necessity for doing so, on August 26, 1981, U.S. Secretary of Education, Terrel H. Bell, named the members of the U.S. Commission on Excellence.

Secretary Bell charged the members with the following responsibilities:

To review and synthesize data on the quality of learning in the nation's schools, both public and private;

To examine, compare, and contrast the curricula, standards, and expectations of the educational systems of several advanced countries with those of the United States;

To study a representative sampling of university and college admission standards;

To hold hearings, receive testimony and expert advice on efforts that could and should be taken to foster high levels of academic excellence in the nation's schools, colleges and universities; and,

Review and describe those school programs that are recognized as preparing students who consistently attain higher than average scores on college entrance examinations.

The panel is looking at education in America in order to see what has gone wrong and to consider how things can be improved. The report of the Commission is due to be completed by the end of March of this year.

It is not the purpose of the Commission to set national standards, nor will it attempt to do so. The Reagan Administration very strongly supports each state's authority to operate and administer its own school system.

In naming the Commission, Secretary Bell said that the Commission could make "practical recommendations for action" to public officials, educators, parents and others who set school policies.

The work of the Commission is exciting. Perhaps more than any one individual program or project it is stimulating positive activity in the educational arena. It is causing parents, students, business leaders, as well as educators to focus attention on education.

The Commission has held hearings throughout the country on the various topics that they have been investigating. In the various communities they also held dinners with business leaders, prominent citizens and educators so they could communicate with these individuals, on a one to one basis, getting their ideas and feelings regarding education within their local community as well as in general.

All of the research and information gathering by the members has been completed. They are now in the process of preparing their report. The interest that it generates both within the educational community and the nation-at-large will be very exciting.

As another facet in the program to identify and acknowledge excellence in education, Secretary Bell has just announced a program which will give recognition to outstanding public schools at the secondary level, schools which can be described as turning out students who are "well-prepared".

The chief state school officer within each state will be able to submit nominations for the award from within his or her state.

A panel of 15 individuals, none of whom is an employee of the Federal government, will review the schools which have been nominated and will select those which show that they have the attributes of an "effective school" for public recognition by the Secretary of the Department of Education.

Secretary Bell would like to see this program develop some interest in the question of what makes a school successful. In describing his new program he said:

". . . if we also spark a little debate or controversy over the qualities that make a school stand out above the others, so much the better. Perhaps one means for improving education is the proper utilization of the technological advances of the past decade. The integration of technology into the learning experience, in the proper way, can lead to improvements which can upgrade the quality of education for students everywhere."

At a National Teleconference on Educational Technology held on June 22, 1982, in Washington, D.C., Secretary Bell announced that technology would be one of his major initiatives in education. There were over forty-five state sites, including the one in D.C., that participated in two days of activities highlighting technology in education.

The computer is, without a doubt, one of the most dynamic forces in the world today. Indicative of what this bodes for our society is the naming by Time magazine of the computer as "Man of the Year"; or as they titled it, "Machine of the Year". It is important to consider that the editors of Time felt that the impact upon our way of life by the computer was far greater than that of any individual or group.

The Office of Educational Research and Improvement was selected by the Secretary to take the lead in implementing his initiative on technology. In that regard, we have become involved with a number of interesting and exciting educational programs.

Our Office of Libraries and Learning Technologies is monitoring several contracts which utilize technology to improve the teaching of the basic skills. One of these is a communication program known as Project Quill. It uses a set of microcomputer-based programs around which several instructional activities have been developed. The activities are geared to young writers in grades 3 to 6. Quill utilizes the micorcomputer's technological capabilities to help teachers teach writing. The youngster's natural enthusiasm for anything connected with the computer strongly motivates them to write and to perform the various tasks which are a part of the program. It has helped to eliminate the drudgery of rewriting compositions by hand. Corrections and rewrites can be made quickly on the word processor and a print-out secured.

The National Diffusion Network operates under the auspices of the Office of Educational Research and Improvement. Through the N.D.N. model educational programs are disseminated to local school districts which desire to use them.

The N.D.N. is able to help local school districts avoid reinventing the wheel. For example, an excellent program might exist in a school district in Pennsylvania. It might be ideal for helping to solve an existing educational problem in Massachusetts, Oregon, or Texas or Louisiana but how are teachers and administrators in those states going to be made aware of the program?

It is the purpose of the N.D.N. to disseminate such programs. The Joint Dissemination Review Panel assesses program applicants; programs which meet the established criteria are eligible for disseminaton.

Outstanding program which contribute to academic excellence are selected to receive funding for purposes of dissemination of information to other school districts throughout the country. The option of whether or not to adopt a program is, of course, at the discretion of the school officials within that district.

As a result of the current emphasis on technology, the National Diffusion Network awarded grants to four Lighthouse Projects in Technology. The Lighthouse Projects are designated as such because they are using technology to enhance education in an outstanding way. The Federal grants will enable those schools to host visitors from all over the country and to provide material on their adaptations of technology to school use.

The programs are:

Project C.O.F.F.E.E. or the Cooperative Federation for Educational Experiences located in Oxford, Massachusetts which offers a regional alternative occupational education program in high technology to secondary school age youth, some of whom were previously school dropouts. C.O.F.F.E.E. is noteworthy for the exempla-

ry school/business partnership which it has formed with the Digital Equipment Corporation of Bedford, Massachusetts and for which it received a Presidential Commendation. Digital has been extremely supportive of school efforts to learn about and use computers.

The Merrimack Education Center in Chelmsford, Massachusetts. It is a computer assisted instruction program developed to assist in the improvement of basic skills instruction for compensatory education populations. The program staff includes professional educators who are available to provide technical assistance in introducing successful computer applications to the schools. The Project consists of four main components: (1) Computer Assisted Instruction, (2) School System Computer Support, (3) Computer Training and (4) Computer Software Exchange Library.

In Asbury Park, New Jersey, the Board of Education offers a course which utilizes computer assisted instruction for secondary mathematics courses in grades 9-12. Educational software designed for the purpose of integrating computer-assisted instruction with traditional techniques utilized in teaching algebra I, Algebra II, Geometry, Trigonometry, Calculus, and Applied Mathematics has been developed and field tested for purposes of the program.

The Evaluation Center, Hopkins Public Schools, Hopkins, Minnesota is involved in the implementation and utilization of data processing systems in the administrative, management, and instructional functions of schools. Most recently, it is concentrating on the utilization of microcomputers. The staff is attempting to achieve the proper blending of the new microcomputer technology with valid and acceptable educational practices in the development of new instructional and management programs.

As you can see, we are involved in some important projects in the area of technology. However, it is important to note that the role of the federal government is a limited one. There are no plans to return to the type of programs offered in the 1960s in which large sums of federal monies were spent on a wide range of educational projects.

Instead, the Reagan Administration, under the New Federalism, is trying to stimulate an atmosphere which encourages schools to get involved with instructional technology, to share information on technology, and to get the private sector more involved in instructional technology.

We are not only entering a new age in technology but a new age in educational responsibility and decision-making. The Reagan Administration, particularly through the Education Consolidation and Improvement Act (ECIA) or block grant approach, has been turning decision-making authority and finances back to the States and local school authorities. The purpose has been to reduce federal control while enhancing the decision-making process at the State and local levels.

Therefore, there will be more responsibility on State and local school officials to become aware of the advantages of instructional technology and how it can best be adjusted to local needs.

In planning for the educational needs of both those still in high school, as well as those at the college level, the National Center for Education Statistics is currently conducting a large-scale, longitudinal survey, "High School and Beyond" which contains data about high school seniors and sophomores starting with the year 1980.

There was a group-administered survey in the spring of 1980 with planned follow-ups on the same national sample for 1982 and 1984. The sample for the study included 1,000 high schools. Thirty-six seniors and thirty-six sophomores per school were surveyed, or all of the senior and sophomore class if the class did not contain 36 members.

Response was high with 91 percent fo the schools contacted participating. In all, 1,015 schools responded with 30,000 sophomores (out of 3,800,000) and 28,000 seniors (out of 3,000,000 participating.

Questionnaires and cognitive tests were administered to each student in the High School and Beyond sample. The first phase survey included information about such items as: high school experiences of the student; activities outside of school; attitudes about school, themselves, their aspirations; and plans for after high school.

The study is similar to one which was conducted in 1972 but more comprehensive and broader in scope. For example, the 1980 survey includes information about parents' aspirations for their children as well as teachers assessment of their students' futures. These factors were not included in the first study.

The National Institute of Education has a new director. NIE is going forward with plans to continue research on quality education, effective schools, and uses of technology in education.

I have attempted to give you a brief overview of some of the initiatives and programs of the Office of Educational Research and Improvement and I have tried to emphasize information which I believed would be of interest and benefit to you.

It is a pleasure to be here at this outstanding institution of higher education. I wish you well in your efforts.●

LITHUANIAN INDEPENDENCE DAY

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1983

● Mr. McGRATH. Mr. Speaker, I wish to add my comments in observance of the 65th anniversary of the reestablishment of the independent Lithuanian state. I hope our observance will encourage all those who look to the day when we can celebrate the regained freedom of Lithuania from the strains of Soviet oppression.

Despite the deprivation of human rights by the Soviet Union, the spirit of freedom is alive in Lithuania. The struggle for true Lithuanian independence should be granted renewed support by all. Even though the policy of russification has threatened to destroy Lithuanian language, religions, and culture, the Soviets have not been successful in their brutal campaign to eradicate Lithuanian individuality. Those who fight for self-determination of Lithuania, and the dignity and human rights sovereignty will afford, do so in the face of relentless persecution.

Those who resist the oppressive rule of the Soviet Government have relied on our support in continuing to protest the Soviet act of infamy, their aggressive takeover of Lithuania on June 15, 1940. With our help, these courageous libertarians can forge a richer concept of peace emphasizing basic human rights and providing a foundation for true peace and an end to the arms race and other confrontations, which have characterized international affairs in this century.

I urge the Members of this body and the administration to strengthen their commitment to freedom and to make every effort to insure the Lithuanian people that they will soon enjoy the fundamental rights denied by their Soviet oppressors.●

LYNN MARTIN: A LOOK AT GOVERNMENT

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. MICHEL. Mr. Speaker, our colleague LYNN MARTIN of the 16th District of Illinois recently offered her views on the subject of "Congressional efficiency." I found those views to be very useful and I want to share them with the rest of our colleagues.

At this point I wish to insert into the RECORD "Congress' Lynn Martin: A Veteran Member Grades Congressional Efficiency" from Government Executive magazine, January 1983.

CONGRESS' LYNN MARTIN: A VETERAN MEMBER GRADES CONGRESSIONAL EFFICIENCY

In 1980, when Lynn Martin, then 40, first ran for Congress as a Republican in Illinois' 16th District (Rockford and surrounding rural areas as far south as President Reagan's hometown, Dixon), she campaigned on a theme of "Competence and Common Sense in Congress." After two years experience on Capitol Hill, and re-election last November, how does she feel about "competence" in Congress?

"The House," she told Government Executive, "could use a management consultant—no, we could use a whole team of management consultants. And that's not a Party line. I saw Leon Panetta (D-Calif.) at seven a.m. the other Monday, coming into the (Longworth House Office) building and both of us looked terrible."

Still, she says, "Wanting a chance to do something to help your country makes this the place you want to be;" and, "I recommend the job—although you better have a strong constitution, not get sick too often, learn to detest receptions, and learn to read airline schedules like an expert."

A Phi Beta Kappa graduate from the University of Illinois; former high school teacher of government, economics and English; elected to the Winnebago (Rockford) County Board; elected to the Illinois State General Assembly in 1976 and to the Illinois Senate in 1978, she was no novice on the workings of Government when she was elected to the U.S. Congress in 1980. Still, as

a freshman Member in 1981, "one incredibly nice thing" she discovered on Capitol Hill in her first year was "veterans taking time they didn't have to take to give you help and advice."

Another "plus" about the job: "Most Members don't spend their lives up here trying to 'get back at somebody' or foul up a program—contrary to popular opinion." Another "plus:" also "contrary to the popular view, the average IQ up here is very high and most of us are willing to work very hard." (Martin, herself, is a member of the House Budget Committee, an impressive appointment for a Congressional newcomer, as well as serving on the House Administration committee and being a member of the Northeast-Midwest Coalition, the Congressional Rural Caucus and the Congresswomen's Caucus.)

Trouble is, "We're now at infinity in terms of what we have to look at and make judgments on. Any Executive branch worth its salt can manipulate the hell out of Congress because they have the staffs." By contrast, she says, "Nobody on Capitol Hill ever ran for office on the basis of how well you can manage a staff," and she knows a couple of Members "who browbeat their people" in spite of the fact that staff gathering and sifting of information on any given issue is so important to making wise judgments.

Even she admits, "There are times I'd like to strangle my staff and I'm sure there have been times when they'd like to strangle me, too." That problem of being a Member probably has no perfect, clinically correct solution. But, she believes, much about how the House functions today begs for change. Among them:

Time—"Years ago, people didn't expect you to be back in your home district every weekend. Now they do." At the same time, in part because the expansion of Government has now dragged a vastly greater number of relatively narrow issues up to the Congressional level and in part because organizational "reforms" during the era of Watergate scandals bred a plethora of Congressional subcommittees, Members are pressured to be in Washington all the time, too.

"We could schedule (time) just so much better. Being here three or four days and in the district three or four and then back here and then back there is the worst of all worlds. Why can't we be scheduled to be here two weeks and back home a week? And the new schedule (for 1983) has us here (in Washington) until August 17. Why? Many of us have children at home. (Her own daughter will be going back to college shortly after Congress is scheduled to adjourn in the Fall, meaning they'll have very little time together before they are separated again.) The schedule matches neither the suitability of when legislation should be passed nor the emotional needs of the Members."

Further, "even allowing for the time-honored ways politicians can use to try delaying legislation," she knows of no good reason why time constraints can't be placed on how long a proposed piece of legislation can be allowed to gestate through the system before it must be brought to a vote. "Time is the most precious resource we have. To waste it is almost criminal."

Budgeting—"Why do we have to pass two budget resolutions? Isn't once enough?" Cleaning up that duplicated effort, she points out, will take more, however, than merely scheduling time more efficiently. Both in passage of a final budget resolution or, failing that, Government being run on a "continuing resolution," i.e. telling the Executive branch to "operate on the basis of last year's budget until we can make up our minds on this one," something more than tardiness is at work.

Sums up Martin, "What the collective Congress is saying (by passing the first budget resolution but delaying on the second one) is that it has put its toe in the water but it's not willing to swim the creek." Martin can recite several reasons. Among them:

The veritable massed army of comparatively narrow-scope special-interest groups, both within and on the fringes of Government pressuring their pet Congressional subcommittees for appropriations which, when collected and presented to the total House, bust through an earlier, approved budget ceiling. "If you want to look at interest groups," says Martin, "try (the Department of) Health and Human Services. They're much tougher than any company or union lobbyist ever thought of being."

When Government was expanding, there was no need for a continuing resolution because no choices had to be made over what should be funded and what not. There was plenty for nearly everybody except, largely, Defense which was perceived to have the weakest constituency among the Public. The cap now being put on Government growth is, in effect, now forcing that a lot of those choices must be made.

"The worst thing about the expansion of Government," claims Martin, "is there is now no way (given the workload) Members can make decisions wisely or that committees can conduct any effective oversight investigations." One reason is the spinning off of a host of subcommittees, done during the Wategate-scandal era in the name of "Reform;" but, in the process, splintering and diffusing authority over issues.

"A lot of these reforms," she notes, "have given the word 'Reform' a very bad name. In the old days, when a handful of 'Barons' really ran things and they weren't all trying to run for President, the old seniority system (which determined who got the key committee slots) may have had its faults but at least the railroad ran on time." Today, she says, "We move like a centipede, not a racehorse."

And partly, at least as far as Public perception is concerned, the problem is one Members tend to bring on themselves when campaigning for office. "In their ads, their speeches, Members campaigning tell voters, 'I'm the Lone Ranger, going to Washington to protect you.' They never mention that you're really going to be only one out of 435 and that what you're really going to have to do in Washington is not be the Lone Ranger but organize a posse. I didn't know how important I was (in the 1982 campaign) until I listened to my opponent."

In sum, her prescription for the House improving much of its act: "Get rid of the plethora of subcommittees." Another, related suggestion, at least as far as the budgeting activity is concerned: even allowing for the political motivations that prompt some of the contentions, start out with an agreement on what data base will be assumed relative to income/outlays, inflation rate, unemployment—factors that form the skeleton around which the budget is built.

Currently, she says, "The world's stupidest argument is this grand debate we have every year over assumptions" about what's going to happen in the economy. "We ought to agree at the outset on the data basis on which we will make decisions."

In short, the "Reforms" of a decade ago need reforming. Otherwise, in spite of the fact that the majority of Members individually are bright and highly motivated, the collective output of the Congress will continue to be legislative decisions that help a few to the detriment of the majority or are simply bad decisions—or, as in budget resolves now, are simply no decisions at all.●

HEALTH CARE

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. PEASE. Mr. Speaker, which activity of the Federal Government will get the largest budget increase over the next 3 years if President Reagan's budget proposals are adopted by Congress?

Surprisingly, the fastest growth in any area of the Federal Government is health care. That is the topic of my most recent weekly newspaper column. It follows.

WASHINGTON REPORT

(By Don J. Pease, U.S. Congressman, 13th District)

Quick, guess which activity of the federal government will get the largest budget increase over the next three years if President Reagan's budget proposals are adopted by Congress?

Hint—the planned increase in spending over the next three years is a whopping 65 percent.

Hint—many Americans feel that spending for this activity is out of control.

Defense? Did you answer defense spending.

Well, as the carnival barkers used to say, "That's close, but no see-gar."

The fastest growth in any area of the federal government is for health care.

Chiefly, that means Medicare, which helps pay medical bills for 30 million elderly and disabled Americans, and Medicaid, which does the same for 22.5 million low-income persons.

Budget authority for Medicare, Medicaid and miscellaneous health programs is projected to rise from $67 billion this year to $112 billion three years from now in fiscal year 1986.

Does President Reagan love health care so much as to lavish huge increases upon it?

Will government-paid health benefits improve in quality and quantity due to the large increases in spending?

The answer is "no" to both questions.

President Reagan, like other presidents before him, is stuck with the reality that medical prices have been rising far faster than other prices—some 15 percent recently compared with less than 5 percent for the overall inflation rate.

Actually, the President is proposing that federal spending be cut by a half billion dollars (5 percent) for health programs other than Medicare and Medicaid.

The President is proposing to require Medicare patients to pay between 5 and 8 percent of their hospital charges for the first 60 days of hospitalization; to delay eligibility for Medicare for up to one month; to require an annual increase in the premium for Part B of Medicare; to freeze Medi-

care reimbursements to physicians and allow them to pass the additional charges on to patients.

In Medicaid, President Reagan proposes that patients be required to pay part of the bill for all medical services received except nursing home care.

In other words, President Reagan is proposing substantial cuts in service and increased costs to patients as a way of holding federal health spending to a 65 percent increase over the next three years.

If Congress—as seems likely—refuses to approve all of Reagan's proposed "reforms," the increase in costs over the next three years could be 70 percent instead of 65 percent.

Skyrocketing medical costs are a problem faced by every president and every Congress. President Jimmy Carter's response was a hospital costs containment bill which Congress—thanks to heavy lobbying from medical interests—torpedoed.

One mystifying response by President Reagan was elimination of the federal review process, which sought to prevent hospitals from duplicating facilities. The theory was that absence of review and regulation would promote competition and somehow bring down prices. But the main competition among hospitals is for new facilities and machines which drive hospital costs up.

Another Reagan response over the past two years has been cut marginal people off of Medicare/Medicaid and to make medical consumers pay a higher share of the physician and hospital charges.

A third response by both Reagan and Congress is a proposal—to be debated in the House Ways and Means Committee this spring—for prospective payments, which means the federal government would pay a hospital a set amount of a given medical problem (appendectomy, heart attack, amputation, etc.) no matter how many or how few days the patient stays in the hosptial.

As medical costs go up, the quest for a solution goes on.●

STATE COLLEGES AND UNIVERSITIES TAKE NATIONAL STAND

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. FORD of Michigan. Mr. Speaker, the board of directors of the American Association of State Colleges and Universities (AASCU) has taken a position of leadership within the higher education community by viewing the problems of higher education in the broad context of national policy. The AASCU board of directors called for a delay in the 10 percent tax reduction scheduled for this July and for no further reductions in Federal aid to States. AASCU represents 354 State colleges and universities which enroll more than 2 million students. The text of the resolution follows, and I call it to the attention of my colleagues.

RESOLUTION ADOPTED BY THE BOARD OF DIRECTORS OF THE AMERICAN ASSOCIATION OF STATE COLLEGES AND UNIVERSITIES, FEBRUARY 8, 1983

Whereas, The recession has resulted in substantial losses of state revenues, including more than $8 billion lost since revenue estimates were made last spring; and

Whereas, The federal government will have cut over $57 billion in aid to the states by the end of FY 83; and

Whereas, State expenditures already have been cut substantially in the last two years and are estimated to have fallen by $5 billion since last spring; and

Whereas, Cuts in expenditures by state governments have had a significant and damaging impact on public higher education institutions; therefore be it

Resolved, That the Board of Directors of the American Association of State Colleges and Universities, representing 354 public colleges and universities, urges that no further cuts be made in aid to state governments; and be it further

Resolved, That the Board of Directors of AASCU urges that programs which are currently the responsibility of the federal government not become the responsibility of the states, unless the federal government provides the necessary funding.●

LITHUANIAN INDEPENDENCE

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1983

● Mr. YATRON. Mr. Speaker, I join with my good friend and colleague, Congressman ANNUNZIO, in commemorating the 65th anniversary of the independence of Lithuania. In 1918, a council of 20 Lithuanians proclaimed their nation's independence at the conclusion of World War I, a war in which the brave people of Lithuania suffered tremendously in their efforts to realize their rights to self-determination and human dignity. In 1940, Stalin's Red Army invaded Lithuania and illegally, by force, incorporated this Baltic nation into the 14th republic of the Union of Soviet Socialist Republics. While the Soviet Union continues to implement its repressive totalitarian policies in Lithuania, the Kremlin has failed to control the minds or thwart the desires of the Lithuanian people to once again realize their dreams of self-determination and human liberty. Moreover, the Lithuanian people have never recognized the Soviet Union as a legitimate government which is further evidence of their strong desire to break the totalitarian grip of their Soviet captors.

As the chairman of the Subcommittee on Human Rights and International Organizations, I believe the Congress should continue to focus on the plight of the Lithuanian people in hopes of bringing this ongoing abuse of human rights perpertrated by the Soviets to the attention of the American public. To this end, the Lithuanian Americans throughout the United States, and especially in my home State of Pennsylvania, have long been a beacon of hope and strength to the people of this oppressed Baltic nation.

U.S. policy should continue to reflect a deep and abiding commitment to the people of Lithuania as well as all people throughout the world who are subjected to policies of repression by governments insensitive to human rights and liberty. To this end, I will continue to promote the goals of the Lithuanian people and an overall, effective human rights policy.●

CONGRESSIONAL VIGIL FOR SOVIET JEWRY

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. McGRATH. Mr. Speaker, I am privileged once again to participate in the Congressional Vigil for Soviet Jewry. I wish to express my continued concern for Yuri Fiodorov and Alexsei Murzhenko, who have been imprisoned in the Soviet Union for over a decade following an escape attempt which failed. Both men are in poor health as a result of the inhumane and brutal treatment in the Soviet camps. Authorities in the U.S.S.R. have consistently refused to provide any information on their well being in spite of my repeated requests and those of many others.

Fiodorov and Murzhenko are special cases. Neither man is Jewish, although they joined with a group of Jewish refusniks in the effort to leave the Soviet Union. When the plan to escape was discovered, police placed great pressure on Fiodorov and Murzhenko to testify against their friends, some of whom faced the death penalty. Their resistance to the harassment was an outstanding example of courage in the face of imprisonment and retaliation.

In their statements to the Soviet Court at the infamous Leningrad trials, Fiodorov and Murzhenko made a plea, not for leniency in their cases, but for the others who faced more serious penalties. This spirit of loyalty and perseverance in the struggle against oppression is a force which binds thousands of people who live under the scourge of the Soviet police state. Nobel laureates, factory workers, and people from every walk of life and every nation within the U.S.S.R. continue to press for the freedom and dignity denied them by their government.

Fiodorov and Murzhenko were well aware of the fate that awaited them in Soviet prison camps. They became friends in another camp for Soviet dissidents during the 1960's. Yet they did not yield to the requests of their cap-

tors. The struggle against the domination of peoples of the U.S.S.R. and their individual lives goes on with only our voices to bring it to the attention of the free world.

I hope as the 98th Congress moves forward on the multitude of concerns we face, that my coleagues in this House will make their decisions on matters of foreign policy with the situation of Fiodorov and Murzhenko in mind. I also ask that every Member of this body support the cause of freedom for these men and countless others who share their fate.●

THE FREEZE MOVEMENT

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. MICHEL. Mr. Speaker, during a recent meeting of leaders of the nuclear freeze movement, Ms. Randall Forsberg, founder of the movement and chairman of its national advisory board, stated that in her opinion, President Reagan "is not smart enough" to "stop the nuclear arms race."

I would hope that responsible freeze leaders in Congress would immediately condemn Ms. Forsberg's personal political attacks which are so starkly in contrast with the avowed humanitarian goals of the freeze movement.

At this point, I wish to insert in the RECORD, "Nuclear Freeze Group Adopts Complex Plan," by Robert Ruby, in the Baltimore Sun, February 7, 1983:

[From the Baltimore Sun, Feb. 7, 1983]

NUCLEAR FREEZE GROUP ADOPTS COMPLEX PLAN

(By Robert Ruby)

ST. LOUIS.—They came, more than 600 people in all, to ponder what for two years has been promoted as an elegantly simple idea: establishing a nuclear freeze in the Soviet Union and the United States.

By the end of their three-day meeting, delegates to the national convention of the Nuclear Weapons Freeze Campaign chose a strategy of working for a freeze in a series of complicated steps. They plan to lobby in Congress against specific weapons systems and are contemplating work in support of specific political candidates in 1984.

Agonizing over how to use their political power, the leaders of the freeze proponents agreed yesterday to oppose American plans to deploy new medium-range missiles in Europe and to lobby Congress to prohibit the testing of new nuclear weapons systems, on the condition that the Soviet Union refrain from similar tests.

The leaders also outlined a strategy for finding new allies, plans some delegates said could involve the freeze movement with issues that would weaken it.

The leadership pledged to support civil rights when they march in Washington in August over the issue of jobs. They also agreed to coordinate demonstrations in October against U.S. and Soviet medium-range missiles with similar protests scheduled by anti-nuclear groups in Western Europe.

Above all else, the delegates set their sights on lobbying Congress to endorse a nuclear freeze resolution in 1983, and on outlining by June a strategy for supporting presidential and congressional candidates in 1984.

Randall Kehler, coordinator of the National Freeze Organization, told the delegates, "I think this campaign is capable of making clear that any candidate for office, at the national level at least, has absolutely no choice but to support the freeze or to face certain defeat."

For the national organizers, the meeting at the University of St. Louis was the first opportunity to test the sentiments of local organizers from 47 states about their plans to "professionalize" the freeze campaign, at the risk of alienating some of its original supporters.

The convention marked the second anniversary of the campaign, a lobbying effort that seeks to change the nation's policies on nuclear arms control. Its goal is to persuade the U.S. government to negotiate a freeze in both the Soviet Union and the United States on the testing, production and development of nuclear weapons.

When such a mutual freeze can be verified by intelligence agencies, the freeze campaign says, negotiations should then begin to reduce existing arsenals.

Delegates met in small groups to debate how to use their influence: whether to hire professional fundraisers, how to lobby Congress and what to lobby for. They seemed torn, however, between their movement's old simplicity and the need for detailed plans to maintain themselves as a meaningful political force.

"The brillance of our concept is its simplicity, and it's also our problem," said Robert Bland, a delegate from little Rock, Ark. "You can only get so far with the original idea."

Last August, the House came within 2 votes of passing a resolution calling for a freeze, defeating it 204-202.

Members of Congress have reintroduced similar resolutions in both houses, and committee hearings are scheduled to begin later this month. A major lobbying effort has been planned by the freeze campaign for March 7-8, when several thousand supporters of a freeze are expected to travel to Capitol Hill.

At their convention, the campaign's national leaders were searching for ways to define a nuclear freeze more explicitly and for ways to safeguard the campaign's public image.

"Having achieved so much in such a short period of time may have raised people's expectations unrealistically," a strategy paper concluded. "If our momentum slows down or we actually suffer political setbacks, freeze supporters may become discouraged and political leaders indifferent."

President Reagan's opposition to a freeze was treated as a way to mobilize extra support. "We cannot stop the nuclear arms race under President Reagan," said Randall Forsberg, the founder of the movement and chairman of its national advisory board. "He is not smart enough to do it."

As proposed by Ms. Forsberg, the freeze campaign will try to circumvent the president's authority to negotiate arms control treaties by lobbying Congress to legislate new arms control policies that could have much the same effect. The campaign agreed to try to obtain from Congress a test ban on new nuclear weapons by amending military appropriation bills.

Congress will be pushed to legislate the testing bans for the next generation of strategic nuclear weapons—the land-based MX missile, the submarine-launched Trident II, long-range cruise missiles and the B-1 bomber.

The freeze campaign says it will ask Congress to make the testing bans conditional on the Soviet Union's refraining from testing comparable new systems.

Of all the issues, the most controversial was the campaign's new position on the deployment of Pershing 2 and cruise missiles in Europe, scheduled to begin in late 1983.

These missiles are the subject of negotiations in Geneva between the United States and the Soviet Union. The Reagan administration has proposed canceling installation of the American missiles in exchange for the Soviet Union's dismantling a comparable number of medium-range missiles already aimed at Western Europe.

Delegates at first complained that the campaign's policy statement did not take into account the threat of Soviet arms, and organizers added language saying the campaign "favors the greatest possible reduction of Soviet intermediate-range missiles targeted on Europe."

Instead of seeking the "greatest possible reduction" in Soviet missiles, the delegates finally settled on asking for "substantial" reductions.

In organizing protests for October, the freeze campaign is aiming more at helping the European anti-nuclear movement than at drumming up support at home.

"The idea is that in October we will give legitmacy to the European movements and hopefully prevent them from being called anti-American," said Dan Jerrems, head of the Maryland Committee for a Nuclear Freeze and a member of the national organization's governing committee.●

THE REAL INCREASES IN DEFENSE SPENDING

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. PEASE. Mr. Speaker, President Reagan, who believes so strongly in defense spending, seems by his policies to be presiding over an erosion of long-standing public consensus favorable to defense spending.

Yet he is once again asking for record increases in defense expenditures. A close look at the real numbers bears this out.

This is the topic I addressed in my most recent weekly newspaper column. It follows.

WASHINGTON REPORT

(By Don J. Pease)

If there is one consistent message I get from my constituents regarding the federal budget, it is this: "Cut the growth of defense spending."

Some constituents have long questioned defense build-ups, but only in the past year has the opposition become a chorus from every quarter—factory workers, profession-

als, farmers, housewives, businessmen, students.

I don't have to ask—they volunteer their opinions that defense spending has gotten out of hand. And they express themselves with varying degrees of intensity.

It is ironic that President Reagan, who believes so strongly in defense spending, seems by his policies to be presiding over an erosion of a long-standing public consensus favorable to defense expenditures.

Yet, believing stongly as he does, the President is undeterred. Again this year, he has asked Congress for a record increase in defense spending.

The increase in actual cash outlays requested by the President is $30 billion, a hike of more than 14 percent from this year's $209 billion to $238.6 billion next year. Further increases are projected to $278 billion in fiscal year 1985, $315 billion in 1986, $346 billion in 1987, and $377 billion in 1988.

That's an 80 percent increase between the current fiscal year and 1988.

Of course, inflation plays a part in those increases, so it is useful to look at increases in constant dollars (after removing the inflationary effect). That increase over the six-year 1983-88 period is 42 percent.

Most congressional and public attention this year will be focussed on defense cash outlays for fiscal year 1984, for it is that figure which directly affects the federal deficit and will either crowd out or accommodate spending for health, education, welfare and other domestic spending.

Indeed, the 9.5 percent proposed defense spending increase in constant dollars (excluding inflation) for 1984 has led President Reagan to propose an actual cut (in constant dollars) of 3 percent for domestic spending as a whole. The real cut for many federal agencies will greatly exceed 3 percent, if the President's proposals are accepted.

But a wary eye must also be kept on what is called obligational authority for the defense department. That comes up in the annual defense authorization bill, which is different from the appropriations bill.

Over the next three years alone, President Reagan is recommending a 49 percent increase (31 percent in constant dollars) in authority to obligate the government to lay out cash in the future.

That's comparable to a citizen signing a contract today to pay 49 percent more in three years for a given category of supplies.

Thus, if Congress hopes to deal with the $180 billion federal deficits forecast every year for the rest of this decade, action must come this year to limit or eliminate expensive new weapons systems like the MX missile and B-1 bomber.●

THE CONDUIT HYDROELECTRIC ACT OF 1983

HON. CARLOS J. MOORHEAD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. MOORHEAD. Mr. Speaker, today I am pleased to introduce the Conduit Hydroelectric Act of 1983. The purpose of this bill is to encourage the production of conduit hydropower, and thereby reduce the reliance of our public utilities on high-priced fossil fuels, such as natural gas and oil, for the generation of electricity.

We are just beginning to recognize the hydroelectric potential available in the water conduits of our water utilities. Many of our Nation's water agencies have extensive distribution systems where energy is currently wasted through pressure reducing structures or other devices. Small hydroelectric generators in water conduits were not financially feasible when many of these conduits were installed, because the price of oil and other fossil fuels was low. Now, of course, the market has shifted in favor of these facilities.

The potential of these small plants particularly interested me after surveying the extensive water distribution systems in southern California and going on to review those in many other regions of the country. Metropolitan Water District of southern California installed its first generator in one of its water supply conduits in 1980. For a capital cost of $400,000, this 1-megawatt plant will produce enough energy to save 7,750 barrels of oil each year. Combined with additional Metropolitan Water District facilities, approximately 743,800 barrels of oil per year can be displaced. If we can multiply these projects in every water system where there is energy wasted, we will make an important contribution to energy self-sufficiency.

Preliminary data show that the nationwide potential for conduit hydroelectric facilities is approximately 800 megawatts. If we were to develop this potential, 6 million barrels of foreign oil could be displaced annually and about $180 million would not annually flow out of the country to OPEC.

Through an amendment to PURPA, we added a new section 30 to the Federal Power Act (known as the Moorhead Exemption) which gave FERC discretionary authority to exempt 15-megawatt or less conduit hydroelectric facilities from licensing requirements.

The type of facilities we are talking about here are those which would be installed in manmade conduits as a part of an operating water system, the primary purpose of which is the distribution of water for municipal, industrial, or agricultural purposes. If the facility is located on Federal lands, such as at a dam or other impoundment, then the exemption would not apply.

After observing the operation of the discretionary exemption procedure for 3 years, I have not been able to determine that a nonmandatory exemption with a 15-megawatt ceiling satisfies any Federal objectives or meets any public purpose. On the contrary, these restrictions hinder an important national objective for the production of energy by imposing a new and frequently unfamiliar regulatory process on public and private water utilities which are generally subject to extensive government regulation.

Consequently, the bill I am introducing today, the Conduit Hydroelectric Act, would amend section 30 of the Federal Power Act to automatically exempt from licensing requirements all conduit hydroelectric facilities not located on Federal lands that meet the existing primary purpose test.

This would accomplish a number of objectives:

One, a water agency proposing to build a hydroelectric plant in one of its water conduits would not have to prepare the sometimes burdensome, costly, and detailed application currently required if its project meets the requirements of the exemption.

Two, no size limit is imposed. This megawatt size restriction limits full development of this resource for no apparent reason.

Three, time delays in installing projects and potentially threatening terms and conditions involving water operations are removed.

The Conduit Hydro Act will furnish a real incentive for water agencies to use their water conduits to produce energy.

Substantial increases in fossil fuel prices, especially in my region of southern California, have brought intensified interest in developing more fully cheaper and cleaner domestic sources of energy. Certainly hydropower is a key domestic source of energy. In 1979, the capacity of 1,251 hydroelectric facilities was approximately 64,000 megawatts of electrical energy. This was approximately 13 percent of the Nation's total generating capacity. by 1990, it has been calculated that development of hydroelectric potential at sites with existing generating capacities could increase very significantly. Obviously, clean hydroelectric power can reduce our dependence upon foreign oil.

As a result of useful talks I have had with Commissioner Sheldon of FERC, I believe that FERC is very serious about fully developing this country's hydroelectric potential. As a recent GAO report to the Congress indicated, FERC knows that licensing reform among other reforms is crucial if we are going to achieve the worthwhile goal of displacing foreign oil and expensive natural gas with clean hydropower.

The Conduit Hydro Act of 1983 is exactly the kind of regulatory reform bill our electric ratepayers in California and across the country want to see—a bill which encourages the local development of a clean, renewable source of energy, conduit hydroelectricity, which has the real, near-term potential to reduce our dependence on high-priced fossil fuels.

I ask my colleagues to join with me in supporting the Conduit Hydroelec-

tric Act of 1983, and ask unanimous consent a copy of the bill be inserted in the RECORD following my statement.

H.R. 1618

A bill to amend the Federal Power Act to encourage conduit hydroelectric facilities

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Congress finds that conduit hydroelectric power is a clean, economical energy source with the clear potential of conserving significant amounts of energy.

(b) The purposes of this Act are—

(1) to conserve energy;

(2) to enhance environmental quality; and

(3) to benefit consumers of electrical power and water by restraining the costs of providing such services.

SEC. 2. Section 30 of the Federal Power Act (16 U.S.C. 823a) is amended to read as follows—

"MANMADE CONDUITS

"SEC. 30. (a) This part shall not apply to any facility (excluding any Federal dam or impoundment and any facility located on Federal lands) constructed, operated, or maintained for the generation of electric power if such facility—

"(1) utilizes for such generation only the hydroelectric potential of a manmdate conduit operated primarily for the distribution of water for agricultural, municipal, or industrial consumption and not primarily for the generation of electricity; and

"(2) is operated by—

"(A) the operator of such conduit, or

"(B) a person who operates such generation facility with the express consent of the operator of such conduit.

"(b) Any person referred to in paragraph (2) of subsection (a) may, in his discretion, apply for a license pursuant to this part for a facility which is exempt from this part under subsection (a). In the case of any such application a license shall be issued or denied for such facility in accordance with this part, and other applicable law, notwithstanding subsection (a) of this section. No person other than a person described in paragraph (2) of subsection (a) may apply for a license pursuant to this part for a facility described in subsection (a).".●

LITHUANIAN INDEPENDENCE DAY

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1983

● Mr. FLORIO. Mr. Speaker, February 16, 1983, marks the 65th anniversary of the reestablishment of an independent Lithuania, and the 705th anniversary of the founding of the Lithuanian State. As our Nation approaches its own 207th year of national independence, I believe that we should pause to recognize the courageous people of Lithuania who have been denied both freedom and self-determination by the Soviet Union.

On June 15, 1941, over 34,000 Lithuanians were packed off in cattle cars to their certain death or brutalizing labor at undisclosed points in the Soviet Union. After World War II, the mass deportations of Lithuanians resumed and continued until 1953.

Today the people of Lithuania remain under Soviet occupation. This has resulted in the unrelenting oppression of human rights in Lithuania.

Following the peace treaty that Russia signed in 1920 with Lithuania, the economy of this Baltic nation flourished. Land reform programs allowed a vast number of Lithuanians to own and farm the countryside. Industrial enterprises increased a thousandfold and educational opportunities were expanded. Since World War II the economy of Lithuania has been dependent upon raw materials and markets controlled by government authorities in Moscow.

Sadly the world has witnessed the standard of living in Lithuania reduced by government dictate to the level imposed throughout the Soviet Union.

Soviet annexation has denied the Lithuanian people the right to practice religious beliefs, to have their children educated in their native tongue, and to enjoy all basic rights common to free nations. The United States has never recognized the illegal Soviet annexation of Lithuania. I will work to insure that this policy remains unchanged.

The Soviet Union continues to strip from each Lithuanian his pride in his culture and national heritage. However, Lithuanian fortitude remains stronger today than ever before. While Lithuania does not exist today as a politically sovereign nation, the freedom-loving traditions of its people continue. We, who have freedom, have the responsibility to assist those whose human, political, and national rights are oppressed. Our Nation must morally commit its strength to assist the Lithuanian people in this struggle.●

IDEOLOGY AND THE NUCLEAR FREEZE

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. MICHEL. Mr. Speaker, anyone who doubts the leadership of the nuclear freeze movement has something more in mind than a bilateral nuclear freeze should read the New York Times.

The Times recently reported a meeting of 600 leaders of the freeze movement in St. Louis. These leaders seek to have Congress "cut off funds for American testing, production and deployment of nuclear weapons." But what of the Soviet Union's part in all this? The freeze leaders are "calling upon" the Soviet leaders to halt their tests as well.

"Calling upon?" Anyone who seriously thinks you can "call upon" Mr. Andropov to freeze at the same time you are legislatively forcing the United States to freeze, is dangerously unaware or unconcerned with the nature of the Soviet Union's Communist leadership.

I suppose I don't have to add that the freeze leadership vigorously denounced the deployment of American Pershing 2 missiles while at the same time only "favoring substantial reductions" in the already existing Soviet SS-20's in Europe.

In other words, if we don't put our Pershing missiles in Europe the Soviet Union's leadership will face the wrath of the leadership of the freeze movement if it doesn't "substantially" reduce its missiles.

Mr. Andropov must be shaking in his boots—from laughter.

At this point I wish to insert in the RECORD "Nuclear Freeze Group Plots a More Political Approach" by Judith Miller in the New York Times, February 7, 1983.

[From the New York Times, Feb. 7, 1983]

NUCLEAR FREEZE GROUP PLOTS A MORE POLITICAL APPROACH

(By Judith Miller)

ST. LOUIS, FEBRUARY 6.—Leaders of the nuclear freeze movement today endorsed an ambitious political agenda that includes seeking to elect legislators and a President in 1984 who are committed to the movement's proposals for ending the nuclear arms race.

At the end of a three-day meeting here of more than 650 people from 47 states, the delegates also voted to exert pressure on Congress to cut off funds for American testing, production and deployment of nuclear weapons, while "calling upon" the Soviet Union to halt its tests as well.

This action was immediately criticized by opponents of the freeze movement. One group, the National Peace Through Strength Campaign, accused the freeze delegates of favoring unilateral action by Washington that would allow the Soviet Union to continue to expand its nuclear weapons.

The new agenda portends a major shift in substance and strategy for the movement, which advocates a mutual and verifiable halt in Soviet and American testing, production and deployment of nuclear weapons.

HAD SHUNNED ELECTORAL POLITICS

Politically, the shift of focus means that many who have shunned partisan electoral politics will find themselves deeply enmeshed not only in lobbying Congress for legislation to carry out a freeze, but also in the next Congressional and Presidential campaigns.

It is not clear that the freeze campaign's effort to advance its cause through electoral politics will be effective. Many political analysts argue that the movement has peaked. In the few instances in which it attempted to influence the outcome of political races last November, it had a marginal impact at best, the analysts said.

The delegates here acknowledged that a lull in their activity had followed the election, but many contended that interest in and enthusiasm for the freeze were now building. "People in my area are still very scared" about nuclear war, said Deloris Easdale of Kirksville, Mo.

Before this meeting, most proponents of a nuclear weapons freeze had concentrated their efforts on ballot initiatives to demonstrate public support. Such resolutions have been approved by voters in 9 of 10 states, 28 of 30 counties, and 24 of 25 cities where it has appeared on the ballot. In addition, freeze resolutions were adopted at scores of New England town meetings in 1981 and '82.

COULD NOT SWAY REAGAN

Leaders of the freeze movement decided to shift their approach when it became clear that gaining voter approval of these resolutions was not enough to sway President Reagan and Congress. Mr. Reagan remains adamantly opposed to the idea, and the House of Representative rejected a freeze, narrowly, last August.

Next month, the House is scheduled to act on another such resolution, and the delegates here voted today to rally support for that vote and a Senate vote later in the spring. The fate of those proposals is considered a major test of the movement's political strength.

The delegates also endorsed several proposals that were far more specific than previous resolutions.

For example, delegates voted overwhelmingly to "oppose the deployment of Cruise and Pershing 2 missiles in Europe, which will introduce a new, qualitatively different and greater danger of nuclear war in the European theater."

SCHEDULED FOR DECEMBER

The Reagan Administration argues that deployment of these missiles, scheduled to begin in December, is necessary to counter the threat of Soviet SS-20 intermediate-range missiles already there. The delegates' resolution favored substantial reductions in those Soviet arms as well, but one critic, Richard D. Sellers of the Peace Through Strength group, assailed the freeze proponents for paying too much attention to the United States' deployment and not enough to the Soviet Union's.

Freeze leaders denied that they were shifting from a bilateral to a unilateral approach. G. Randall Kehler, who heads the Nuclear Weapons Freeze Campaign, the group's St. Louis-based coordinating committee, said the delegates' endorsement of a cutoff of funds for testing new warheads was "only a statement of principle."

"This doesn't lock us into any legislative strategy or proposal," Mr. Kehler said, adding that that the freeze movement might ultimately back a legislative proposal that made a fund cutoff contingent upon positive Soviet action.

The meeting here, which drew twice the number of people who attended last year's convention in Denver, included a wide array of activities ranging from "meditations for peace" to esoteric debates about the strategic and economic implications of new weapons development.

COMPETING OBJECTIVES

Delegates struggled to balance often competing objectives. They wanted their resolutions to be as simple as their freeze proposal, but they also wanted to draft fairly specific proposals that Congress could act upon.

Delegates wanted to broaden the largely white, middle-class base of their movement. But they were afraid of becoming entangled in causes that might divert attention from the freeze.

Finally, a deep dilemma was reflected in the protracted debate about what to say about the impending deployment of Pershing and cruise missiles.

"People here were torn," Mr. Kehler said, "between their desire to offer truly bilateral proposals and their desire to stop the deployment of the Pershings, weapons they think will make nuclear holocaust more likely."●

THE NEIGHBORHOOD DEVELOPMENT DEMONSTRATION ACT

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Ms. KAPTUR. Mr. Speaker, the Neighborhood Development Demonstration Act is a very creative piece of new legislation which will help address the needs of neighborhoods in Toledo and in other communities across the country. This legislation will establish a small Federal matching grant program for neighborhood-based organizations undertaking one or more of the following activities:

One, creating permanent jobs in the neighborhood;

Two, establishing or expanding new businesses within the neighborhood;

Three, developing or rehabilitating neighborhood housing stock;

Four, delivering essential services to the neighborhood; or

Five, planning, promoting, or financing voluntary neighborhood improvement efforts.

To qualify, neighborhood groups must be organized as a private, not-for-profit corporation; have a governing board not less than 51 percent of the members of which are residents of the areas served; have a track record of at least 3 years; operate in a UDAG eligible area; and benefit primarily low- and moderate-income people. Since it is a demonstration program, its proposed funding is limited to $5 million for fiscal year 1985.

Participating neighborhood groups will first have to be certified by the Secretary of the Department of Housing and Urban Development (HUD). A neighborhood development advisory council, made up of 15 representatives of eligible neighborhood organizations, will make recommendations to the HUD Secretary. Upon selection, the neighborhood group would be required to raise private contributions from neighborhood residents, businesses, and institutions. HUD would then match these contributions on a 3-to-1 to 10-to-1 ratio. The maximum amount that a group can receive in any given year is $50,000.

The genesis of this legislation was a 1979 report by the National Commission on Neighborhoods suggesting the establishment of a neighborhood voucher. In early 1983, Congressman JOEL PRITCHARD, who was a member of that Commission put together the first draft of this bill. At PRITCHARD's request, the National Neighborhood Coalition suggested major changes in order to target the legislation to low- and moderate-income neighborhoods. The National Neighborhood Coalition, a federation of over 50 national or regional organizations which have networks of neighborhood-based groups in various parts of the country, has a strong record of concern for neighborhood interests.

The case for neighborhoods and neighborhood groups is quite simple. People live in neighborhoods. Neighborhoods are geographically defined, but usually are not political units. Neighborhood groups are part of the independent or third sector; they are made up of thousands of residents who are also volunteers, and encompass the American spirit of self-help and self-reliance. They are also a contemporary, grassroots example of helping networks which are a special part of the American tradition, as observed by Alexis de Toqueville in the 1700's: neighbor helping neighbor. However, most legislation gives no authority or attention to neighborhoods; resources and programs are developed based on Federal, State, city, or country considerations only. Groups which are not political/geographic jurisdictions seldom are a part of the official structure for service delivery or even citizen participation. As a result, neighborhoods too often are forgotten when program and policy decisions are being made, even though neighborhood groups are the entity closest to the people.

Neighborhood efforts are carried out in various forms: through block clubs, neighborhood groups, civil associations, neighborhood development corporations, job training agencies, crime watches, citywide or statewide federations, senior citizen coalitions, tenant groups, community organizations, and ethnic associations.

These self-help and self-reliant groups deal with a wide variety of efforts and issues: anticrime programs, education betterment, commercial revitalization, job training, arson prevention, neighborhood enterprise development, housing rehabilitation, resident-managed or owned housing, community economic development, neighborhood reinvestment, neighborhood health centers, community organizing, neighborhood arts programs, and social services.

The Neighborhood Development Demonstration Act is a much needed step in the right direction.●

EDUCATION AND LABOR COMMITTEE COMMENTS ON PROPOSED JOB TRAINING PARTNERSHIP ACT (JTPA) REGULATIONS

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. HAWKINS. Mr. Speaker, last October, the Congress passed and the President signed into law the Job Training Partnership Act (Public Law 97-300) to replace the expiring CETA program. This new act establishes programs to train economically disadvantaged youth and adults for permanent, private sector employment.

Title I of the act sets forth the State and local service delivery system and planning requirements. Title II authorizes adult and youth training programs for the disadvantaged, and title III provides for a State-administered training and placement assistance program for dislocated workers.

On January 18, 1983, the Department of Labor promulgated, for a 30-day comment period, proposed regulations for implementation of programs under titles I, II, and III of the act. Final regulations governing these titles are to be published by March 15, 1983, so that States and service delivery areas can begin planning and preparing for implementation of the new act by October 1, 1983.

The Department of Labor is to be commended for meeting the tight timeframe established in the JTPA on the promulgation of these regulations and for its efforts to maintain communication with the Congress throughout the drafting process. Moreover, these proposed regulations reflect changes that were suggested by the sponsors of the legislation and, consequently, we believe that they represent a vast improvement over earlier proposals. However, there remain several major areas of concern in the proposed regulations which we, on the authorizing committee, feel deserve comment and require, at a minimum, further consideration by the Department of Labor. We are certain that the Department shares our objective of achieving final regulations which are consistent with the law and with congressional intent.

Mr. Speaker, for the benefit of my colleagues, I would like to enter the text of the letter which Representatives PERKINS, ERLENBORN, JEFFORDS, and I sent to the Assistant Secretary of Labor for Employment and Training on the proposed regulations.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON EDUCATION AND LABOR,
Washington, D.C., February 16, 1983.

Mr. ALBERT ANGRISANI,
Assistant Secretary for Employment and Training, Department of Labor, Washington, D.C.

DEAR MR. ANGRISANI: The purpose of this letter is to comment on the proposed regulations for the implementation of programs under Titles I, II and III, of the Job Training Partnership Act, (JTPA), P.L. 97-300, published in the January 18, 1983 Federal Register. All of us who were involved in the development of the Act have a responsibility to review the regulations and to provide comment so that they will reflect the intent of the law.

Again, we want to take this opportunity to commend the Department of Labor for meeting the tight time frame established in the JTPA for the promulgation of these regulations. Additionally, we believe that there has been an effort to communicate openly with the Congress throughout the drafting of these regulations. They contain changes that have been suggested informally based on draft regulations and are an improvement from those original drafts.

However, there are several broad areas of concern that we have with the proposed regulations which deserve comment.

1. *The role of the Governor.* There continues to be a role for the Federal government in the implementation of the Job Training Partnership Act. The regulations should not ignore the balance that the conferees established among the "partners", that is the Federal, state and local governments and the public and private sectors, in the administration and delivery of services. The supplementary information published with the regulations sets forth clearly the flow of funds and commensurate responsibilities and liabilities. It is also critical that the regulations reflect the same understanding.

Definition of recipient as the Governor (Section 626.4). If the regulations undertake to define the term "recipient", then it would be preferable to define "recipient" as, "an entity which receives funding on a formula basis as prescribed in Sections 201, 202(a) or 301(b) of the Act." In defining the word "recipient" as the Governor, confusion results especially regarding liability, accountability, appeals and the four factor relief language as contained in Section 164 of the Act. Several provisions of the Act are designed to apply both to the state and Service Delivery Areas. To use the definition of "recipient" as it appears in the proposed regulations places in question the application of these provisions to service delivery areas.

While we recognize that the definition is for the purpose of the regulations, the word "recipient" has various connotations within the Act. Instead of defining the word "recipient", as the proposed regulations now do, it would be most consistent with the Act to delete it. Deleting the definition may require the rewording of a few sections of the proposed regulations, but we believe that on-the-whole, the regulations would reflect more clearly the provisions of the law and not raise questions regarding such issues as liability, accountability and the four factor relief provisions. The definition as it stands is misleading and incorrect.

Retention of program income. With respect to program income, the proposed regulations state in Section 629.32 that income generated under any program may be retained by the state and that program income may be used to satisfy matching requirements of Sections 123(b) and 304 of the Act. These provisions do not reflect the intent of the law which is that the programs generating the income (rather than the State) should retain the income for program purposes. We recommend deleting the words "by the State" in the first sentence and deleting the second sentence of this section of the proposed regulations.

Provision that the Governonr define "family", "family income" and "matching funds" (Sections 626.4 and 629.40). Within the Act, the definition of disadvantaged clearly assumes that the Secretary will define family and family income. We are concerned that there will be no standard by which individuals will be eligible for participation in the programs. The Congress targeted the programs authorized under the Act and expects that there will be standard definitions across programs and states with respect to income eligibility. If definitions for family and family income must be generated for standard audit procedures, we recommend that the Secretary define these terms. Such definitions were included in the December 3rd draft regulations and should be reinstated in the final regulations.

Regarding matching funds, the concern is not with who defines the term but rather the use of the word non-Federal in section 629.40 of the regulations. The law differentiates between the allowable matching funds in sections 123(b) and 304. Section 123(b) allows matching funds to be drawn from resources other than those available under this Act, specifically so that funds such as vocational education funds can be used as part of the required match. Under Section 301 of the Act, non-Federal funds are specified indicating that the match must be generated from either state or local resources. Therefore, our recommendation is that the word "non-Federal" be deleted in the regulations under Section 629.40.

Needs-based payment documentation. In Section 629.21(b) of the proposed regulations, the formula for needs-based payments is to be documented in accordance with instructions from the Governor. It is our understanding that the word "documented" means that the factors used in the formula itself must be furnished. The formula is developed at the services delivery area level, not at the state level. This section of the regulations must not be viewed as authority for the Governor to prescribe or to approve a specific formula.

Service delivery area grievance and hearing procedures for non-criminal complaints and delegation of Federal responsibility for review of such procedures to the Governors. Section 629.52 of the proposed regulations departs from Congressional intent in two clear areas. First the regulation cited places all responsibility and authority for establishing local SDA grievance procedures in the Governor's discretion, rather than requiring such procedures to be established in each Service Delivery Area, as the law envisions. We presume that this is the result of the definition of "recipient of funds" contained in the regulations, already discussed herein, and that proper resolution of that issue will correct this problem.

Second, subsection 629.52(d) of the regulations provides for a complainant to "request from the Secretary a determination whether reasonable cause exists to believe that the Act or its regulations have been violated" only in the instance where the Governor (recipient) has failed to make a determination on a grievance within an express period of time. Although subsection 144(c)

of JTPA does not provide for an automatic appeal to the Secretary for any complainant who has received an adverse determination through the grievance procedure, it does require the Secretary to investigate and make a determination in two cases: where the grievance procedure is exhausted without final determination or where the Secretary has reason to believe a violation of the Act or training plan exists. The latter responsibility of the Secretary under subsection 144(c) is not contingent upon a failure of the grievance procedure to produce a final determination.

2. *Allowing the Governor to provide for alternative methodologies to meet percentage requirements in the expenditure of funds under sections 627.22(b) and 630.1 (b)(1) and (b)(2) in the regulations.* The intent of the Congress is that not less than 40 percent of the funds available to service delivery areas under the programs for the disadvantaged be expended for services to youth. To allow an alternative methodology, such as counting participants, may result in less than 40 percent of the funds being spent on youth which would be a clear contradiction of the law. Similarly, to allow an alternative methodology for accounting in the use of funds under the education coordination/incentive grants may result in the diversion of funds from the provision of services to the disadvantaged.

We recognize that it is difficult to expect that at any time certain exactly 40 percent (75 percent) of the funds will be spent on youth (disadvantaged). Overall though, the expectation is that the approved plan (incentive grant) will demonstrate that at least 40 percent of the funds will be spent on services for youth. It is also expected that the percentage allocations can be verified through audits.

A related youth issue occurs under Section 629.38(2)(iii) of the proposed regulations. The Law, in Section 106(b)(2), includes factors other than placement in unsubsidized employment as indicators of successful performance in youth programs. Predicating the classification of a single unit charge as a training cost upon the "completion of training by a participant and placement of the participant into unsubsidized employment", ignores the additional factors designated in the law which shall be used to evaluate the performance of youth programs. As such, those youth programs which do not stress placement in unsubsidized employment as an outcome and are billed as a single unit charge cannot be classified as training costs. We suggest that an additional sentence be added to the regulations that includes the additional youth factors as an acceptable outcome of training provided under a single unit charge billing.

3. *Costs designated as training costs.* The conferees agreed that those costs common to both the Senate and House bills as training costs would be considered as such. The December 3rd draft of the proposed regulations included outreach, intake, employability assessment and development plans, job search assistance and labor market orientation as training costs under Section 629.39(e)(1). We encourage strongly that these activities be redesignated as training costs in the final regulations. The conference report also indicates that the conferees intended to include counseling and preparation for work activities as training costs. We urge that the regulations include these activities as training costs as well. To do otherwise in either case could be contrary to law and Congressional intent as reinforced in the conference report.

Additionally, there is a distinction made in legislative history between the allocation of costs associated with the supervision of a training program and those associated with the supervision of the overall, general management of the program. The former costs were classified as training costs and the latter as administrative costs. We recommend that this distinction be clarified in Section 629.38(3) of the proposed regulations.

4. *Application of the 70/30 cost limitation to training programs for older workers.* The intent of the law is that the cost limitation provisions under section 108 of the Act apply to funds available to service delivery areas for programs under part A of Title II. The older workers program is a program authorized under Section 124 of the Act with funds available for use by the Governor. Therefore, applying the 70/30 cost limitation to the program is outside the scope of the law.

The Congress recognizes that it is prudent to assure that not all of the funds available to this program be spent for administrative or support service costs. It is also clear that older workers may have a greater need for support services such as health care and transportation costs. Considering both factors, if it is necessary to apply cost limitations to this program, a 15 percent limitation on administrative costs is reasonable. Any further restriction would not only be contrary to the law, but would discourage the provision of training programs for older workers.

5. *Performance Standards/Management Information Systems.* One feature of the Job Training Partnership Act is that it is performance driven rather than process driven. Performance standards and the information received from their application are used by the Governor to determine allocation of the 6 percent performance incentive funds and for redesignation of service delivery areas if performance standards are not met for two consecutive years. The consequences which result from the application of performance standards are serious enough to cause us to recommend that anything issued regarding performance standards, particularly policy issues, be subject to Section 169(a) of the Act. The specifics regarding performance standards are critical to the success of these programs to warrant that they be issued as regulations, subject to an open comment period, rather than as a field memorandum or handbook.

It is also critical that information/data acquired under this Act be consistent, standard, and accessible. This requirement is necessary especially as it affects information related to performance standards. The law also requires the Secretary to determine the form and kind of information to be maintained by recipients of funds under the Act (Section 165(a)(1)). There is a strong interrelationship between the type of information reported and performance standards, thus we recommend that at a minmum, the policy issues regarding management information systems/data collection under the Act, be promulgated as regulations and subject to Section 169(a) under the Act also.

We appreciate the opportunity to provide these comments. The proposed regulations represent a significant devotion of time and effort in the careful review of the law. Our intention is to be constructive so that the final regulations do not misinterpret the law, but reflect its intent as we all understand it to be.

Sincerely,

CARL D. PERKINS,
Chairman, Education and Labor Committee.
JOHN N. ERLENBORN,
Ranking Republican, Education and Labor Committee.
AUGUSTUS F. HAWKINS,
Chairman, Employment Opportunities Subcommittee.
JAMES M. JEFFORDS,
Ranking Republican, Employment Opportunities Subcommittee.●

LEWIS LEHRMAN'S CASE FOR REAL MONEY

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. KEMP. Mr. Speaker, Lewis Lehrman has had outstanding careers as an academic, successful entrepreneur, and now a dynamic political leader.

As candidate for Governor of New York recently, he proved by an extraordinarily narrow margin of defeat under adverse circumstances that the people of New York are receptive to the kind of new ideas and fundamental reforms he favors.

Lewis Lehrman is also one of the most articulate advocates of restoring the gold standard, to bring about long-term price stability, low interest rates and full employment.

In last Sunday's Washington Post, Mr. Lehrman made the clear and succinct case for restoring a dollar that is stable, dependable and honest—a dollar as good as gold. As he points out, such a return to our traditional monetary standard is essential if we are to permanently solve the economic crisis which has dragged on now for over a decade. If we want real reform, we must have "real" money.

I commend this tremendous article to my colleagues.

The article follows:

[From the Washington Post, Feb. 20, 1983]

IF WE HAD "REAL" MONEY WE COULD STILL SALVAGE THE REAGAN REVOLUTION

(By Lewis Lehrman)

Those of us who believe in the goals of the Reagan revolution had better face up to the consequences of the last two years. We called for boom and got something very close to bust. We called for a balanced budget and got record-shattering deficits. We called for a restoration of capital markets so business could borrow money for long periods at reasonable interest rates, and we got a devastating credit crunch.

Why? There are many possible explanations, but in my view the missing link is a policy we called for nearly three years ago but quickly forgot. Let me quote the 1980 Republican platform:

"One of the most urgent tasks . . . will be the restoration of a dependable monetary standard." The restoration of the true

American monetary standard—a *gold* standard, the symbol of the classical monetary policy—was held up as an alternative to the conventional economics that has shattered the great American prosperity.

I know that a gold standard is unfashionable among the political, bureaucratic and academic elites. But so, until 1980, was President Reagan—and he won without them, because he was right. The gold standard will win out, too, because its efficacy is based upon its ineffable simplicity and practicality. It is an honest standard, a form of discipline that will guarantee that our money has real value. When we have real money people will again make long-term investments—because they will be confident that their investments will pay off in real money.

Ironically, this very simplicity is a prime reason why sophisticates ridicule the idea. To them, a currency convertible to gold is too straightforward a solution to economic stagnation and inflation. Mathematicians and economists are taught in graduate school that economics and economic statistics are very complex subjects. To them, therefore, economic policies must be equally complex.

But given the dismal failure of the experts' manipulative economic policies, isn't it time we chose a monetary standard they cannot manipulate?

All the 1980 campaign speeches and the rhetoric of President Reagan had repudiated 30 years of failed attempts to manipulate money and credit. But in two years, we have again fallen victim to the manipulators, to the conservatives of the austerity school at the Federal Reserve Board who thought they had a new magic potion to control "the money supply" that would save the economy.

Instead these wizards gave us double-digit real interest rates that ended the recovery from the 1980 recession, overwhelmed the 1981 tax cut, and sent the economy reeling for the second recession in as many years. This back-to-back double recession in two consecutive calendar years is unique in the recorded history of American business cycles.

This record was so bad that even Chairman Paul Volcker and his colleagues at the Fed got the message. In July they abandoned their three-year experiment with "targeting" the supply of money by trying to control the size of bank reserves. Last July 1, by an 8-to-4 vote, the Fed's Open Market Committee abandoned the experiment. Eleven percent unemployment and a world banking crisis produced pressures from Congress and the international financial community that forced Volcker to give up on austerity.

The underlying truth is the Federal Reserve cannot fix the quantity of money in circulation. Nor, over the long run, can it fix interest rates, the monetary base, or the level of bank reserves. Nor should it try. The Fed effort to do these things has wrecked America's long-term capital markets.

The Fed could help us out of this mess we are in. By finally announcing a market-related discount interest rate and lending money to banks at that rate, by forswearing any Fed purchase of Treasury bills and notes (an inflationary transaction that expands the money supply with printing press dollars), and by reestablishing a real gold standard, we can have reasonable price stability and sustained economic growth.

A marvel of the gold standard is that, in the absence of world war and trade war, it worked reasonably well in the past.

It is also true that no free economic institution can long survive global war and protectionism.

Most important, gold money can be understood and trusted by working people. They alone can control its quantity. A gold-based currency is democratic money. It is a populist institution beyond the reach of a guardian elite.

If we adopt the gold standard, there is, of course, a price to pay. The central government and the Federal Reserve will no longer be able to manipulate the value and supply of the American dollar. Alone, free people will determine its quantity.

Curiously for a conservative administration, the Fed has been pressed by neo-Keynesians in the White House not to reform our diseased money, but once again to expand central bank credit as quickly as possible. The new Fed credit policy is to accommodate not only U.S. government borrowing requirements, but also the reckless big city banks and the insolvent Third World countries—not to mention the legitimate needs of private industry.

What we will get in the future, under present economic policies, may be something quite different from what we expect. The Fed's policy now is to "reflate" the economy. In the short run, this will boost output, reduce unemployment and reinvigorate commodity markets. Economic growth will exceed the administration's forecasts for 1983. But another speculative bubble lurks on the horizon. It will burst, bringing foreign exchange crises, commodity booms, precious metal hysteria, more budget crises and world monetary disorder.

True, the Fed will have bailed out the big banks and the bankrupt Third World; monetarism will be a thing of the past; the immediate unemployment crisis will have passed; nominal interest rates will have fallen under the weight of Fed credit policy. All these things are certainly better than the austerity of 1982-83. But all we really have at the moment is one more postwar cyclical recovery, engineered by a Fed reflation and guaranteed to end as all other recent "recoveries" have ended.

And this time engineering the recovery will be more difficult than ever. The Fed is trying to launch a worldwide credit reflation under budgetary conditions unique in our history. This policy on top of historically unprecedented deficits could, if sustained for several years, cause a complete collapse of U.S. financial institutions.

It does not have to be this way. The Reagan Revolution is not necessarily at an end. It is at a way station. Here and now, the president can decide the direction of the world economy for a generation. Will it be more of the same stop-go misery? Or will it be true monetary reform and an enduring legacy of rapid non-inflationary growth?

Once the wonder of the Western world, American long-term capital markets have already ceased to exist as our forefathers knew them. Whether they have a future at all—whether we shall ever inaugurate a period of sustained noninflationary growth—will be determined by the Reagan administration's monetary policy.

The political stakes are great. That is because a true reform of monetary policy can change the present cyclical upswing into a long term boom.

To do so, the administration must establish a convertible currency, end floating exchange rates, and create a new international monetary order based on a common world currency, the gold standard.

The world needs a unified currency because we now have a unified, integrated world economy. There can be no such thing as an independent, national monetary policy, the effects of which are contained within the national economy. We live in one monetary world now.

History shows that the optimum monetary institution of international financial order must be an impartial, global coordinating mechanism, outside the control of any soverign state. Such a coordinating mechanism is a multilateral, fixed exchange rate regime based on unrestricted convertibility of national currencies to gold. The true international gold standard operated effectively between 1879-1914, amidst a sophisticated banking system that was at least as integrated as ours is today. The true gold standard was successful because, as an efficient world currency regime requiring prompt gold settlements to adjust balance-of-payments deficits, it operated in the manner of a global gyroscope to maintain long-run price stability and an efficient allocation of scarce capital the world over.

This arrangement was not perfect. But no world monetary system has worked as well as a gold based exchange rate regime.

Even huge gold discoveries never resulted in sustained, high inflation. The vast expansion of gold money in Europe during the 16th and 19th centuries never caused the price level to rise more than an average of 3 percent a year over a long period. Compared to the past 10 years of central bank-managed paper money and floating exchange rates, 3 percent inflation is the essence of stability.

Gold is the optimum monetary standard because it exhibits, better than any commodity, a necessary virtue of money: total new gold production in any single year is only a minor fraction of the total supply of gold in existence—about 2 percent. This is one reason why a common criticism of the gold standard—that it would benefit South Africa and the Soviet Union—is wrong.

In fact, the average rate of increase of new gold production is equal to the average rate of gain of overall productivity since the onset of the industrial revolution. That is why gold money is stable money.

Moreover, annual South African production, about 21 million ounces, and Soviet production, 8-10 million ounces, is a drop in the bucket compared to total world stocks, about 2.5 billion ounces. Withholding or selling new production of such small quantities could not disturb the stability of the gold standard.

Over the long run, production statistics show that in the market the values of the supply and demand for gold are stable. Stable production in a gold-standard world would mean stable growth of the money supply—something my monetarist friends rightly say we need. The alleged price volatility of gold is a curious inversion of the truth. It is not gold which is unstable, but the paper currencies in which it is priced.

A study of the supply conditions of gold production over centuries shows that it takes a relatively constant rate of application on a certain quantity of capital and labor to produce a constant quantity of gold. Gold production is thus like a metering device, a yardstick by which to gauge equitably the relative productivity, over time, of all capital and labor in an integrated world market economy. The unique charac-

teristics of the conditions of gold production can be established with respect to no other commodity, product, or man-made banking device. These conditions explain why gold has been world money from time immemorial.

The gold standard, finally, may be seen as the way to end the mindless speculation and fluctuation of inconvertible national currencies. In particular, a real gold standard will end unproductive speculation in gold, eliminating the inflationary premium that now benefits only the South Africans and Russians.

The history of this country and of the West bear witness to the efficacy of a gold standard. After the hyperinflation of the American Revolutionary War and the corresponding economic decline (1775–89), the new constitutional republic was established on the bedrock of a new monetary order. It was Alexander Hamilton who brought about the Mint Act of of 1792. By this act, the U.S. dollar was fixed to a gold and silver basis. Economic historians and scholars of the period all note the extraordinary 10-year boom which followed. Low long-term interest rates, rapid growth in the work force, and a stable price level were the hallmarks of a return to convertibility at the birth of the American nation.

Napolean ended financial catastrophe in France, after the paper money debacle of the French Revolution, by establishing the gold franc. Prosperity followed.

The restoration of the gold standard in England in 1819–21 ended a 24-year financial nightmare of alternating wartime inflation and peacetime austerity and deflation. English economic historians all report that one of England's greatest investment booms followed the restoration of currency convertibility in 1821.

America in 1879 ended 17 years of floating exchange rates and paper money, brought on in 1862 by the outbreak of the Civil War. This period of war and reconstruction had also been characterized by a doubling of the price level, then a peacetime deflation. The gold standard and currency convertibility were restored in January 1879. Real growth of national income averaged 8.4 percent annually for the next four years.

These are but a few examples, drawn from the only reliable laboratory for economic experiments, the real history of nations and peoples.

The gold standard is an actuarial guarantee to working people that the purchasing power of money will be approximately the same in the future as it is on the first day of convertibility. Prof. Roy Jastram has shown that the purchasing power of gold was constant for four centuries, from 1540 to 1940. Permanent inflation and high interest rates are ruled out by the gold dollar. Thus are expectations stabilized and the inflation premium in interest rates eradicated.

Our grandparents lent their long-term savings to American railroads for 50 to 100 years at 3 percent under the international gold standard. They did so, and we shall do so again, because only the gold monetary standard will restore our faith that the savings we lend to business today will yield us and our grandchildren future rewards paid in honest dollars of similar purchasing power.

When I forecast 4 to 5 percent mortgage interest rates under a modernized gold standard today, some of my younger friends are incredulous. But it was only 14 years ago, in 1968, when I was 30, that I obtained my first home mortgage at 5½ percent. Even then, in the waning days of the Bretton Woods gold-linked exchange rate system, long-term interest rates were low and reasonably stable compared to today.

Faith in the integrity of money will be restored with a gold standard. Savings now held at short term will pour into new, long-term debt and equity investments. At first, the rush of a great new supply of long-term savings will exceed the demand, and long-term interest rates will fall. The demand for low-cost financial capital will rise—to build businesses and homes. As the investment boom in technology, plant and equipment gets underway, the demand for labor will rise rapidly. Unemployment will fall.

After the monetary reform, economic growth will approach 7 percent a year and will last for at least four years. A decade of growth averaging at least 5 percent will be under way. Tax revenues will pour into the Treasury. For each 1 percent the unemployment rate falls, the federal budget deficit will fall $30 to $40 billion. Long-term interest rates on high quality private debt would fall to 6–7 percent within 12 months of the monetary reform. For each 1 percent fall in the rate of interest, the Treasury could save $10 billion in service costs. The government debt could be refinanced at about half current interest rates, saving the Treasury $60 to $70 billion annually. At 5 percent unemployment, the Treasury would save at least $200 billion. The budget would be balanced.

Until 1934, the integrity of the dollar rested upon the right of every American to bring precious metal to the mint to have it freely coined into standard money. Free coinage gave rise to the right to convert all paper and bank deposit claims, such as Federal Reserve notes and checking accounts, into the monetary standard. Thus was the dollar referred to as a convertible currency.

But in 1933 Franklin D. Roosevelt repudiated the government's covenant to convert Federal Reserve notes into standard gold coin held in reserve for those who trusted the guarantees of the Constitution. Moreover, in 1933, lawful gold money held by American citizens was forcibly confiscated by the government without due process.

As the integrity of our domestic currency was destroyed in the 1930s, its international substance was eviscerated in 1971 when Richard Nixon unilaterally repudiated the contractual right of foreigners, enshrined in the Bretton Woods Agreement of 1944, to claim gold dollars for undesired paper and deposit dollars. The present era of financial disorder, marked by alternating cycles of inflation and unemployment, originated in these monetary repudiations of 1933 and 1971.

Now is the time for America to launch a new gold standard era of open world trade, peace and prosperity. Only the United States has the power to do so. For the United States is the natural leader of the free world economy.

Of course, the experts complain about the difficulty of establishing the gold standard.

We have to ask ourselves and our monetarist and Keynesian friends, as well as the socialists and our foreign allies one practical question: Are the problems of establishing the gold standard and a new international monetary order greater than living with the high real interest rates, inflation, and unemployment characteristic of our catastrophic paper and credit money system?

A reasonable person might answer that establishing the gold standard is not easy. But it is simpler, safer and entails fewer unpredictable consequences than the continuing disasters of the past 10 years of government-managed money.

Therefore, the president should now announce that in January 1985 the United States will establish, by law, a fixed value for the dollar measured as a specific weight of gold.

During the next two years, the stabilization period, the president should also propose a specific balanced-budget amendment to the Constitution, to become effective in 1989. He should propose a statutory reform of the Federal Reserve System prohibiting the Fed from manipulating the monetary standard, its value or its quantity.

During the stabilization period market participants would gradually cease to hedge againt inflation or to speculate for a deflation. Gold would begin to settle at a more stable, paper-dollar price as the Jan. 1, 1985, convertibility date drew closer.

Ninety days before the end of the stabilization period, October 1, 1984, the president, after consultations with the appropriate legislative and executive officers, should propose the statutory gold weight of the dollar, or the "price of gold." Congress would set the price, or gold weight of the dollar, in The Gold Standard Act of 1985.

Setting the price would require great care. It should be related to the free market price of gold at that time, but must be set high enough so that the average wages paid to workers do not fall because of the reform. When Britain returned to a gold standard in 1925, the price was set too low, resulting in high unemployment.

In January 1985, after Congress acted, we would be on the true gold standard. All who wanted coined gold dollars could bring their bullion, paper money or checks to the mint for conversion at the established rate.

Most important, the president should now call for an international monetary conference under the leadership of the United States, to begin in January 1984. Here, the terms of the new international gold standard agreement would be established by treaty, just as at Bretton Woods in 1944. The free world would once again have a common currency free of sovereign manipulation. If the other capitalist nations decline to join us at the outset, our success with the gold standard will soon compel them to emulate us.

A gold-based international exchange rate regime would rule out the protectionist anarchy and competitive depreciations caused by floating rates. And it would end the privileges and burdens of the reserve currency status of the paper dollar.

Yes, even without the restoration of sound money, we shall still survive as a country. It is the lot of working people and businessmen to survive especially in America. But to what end? To subsidize a cartel of high-rolling, big city bankers and undisciplined Third World elites? In an armed camp? Amidst conditions of permanently high unemployment, inflation, and 10 percent interest rates? Increasing bankruptcies? Wage and price controls? Is this the stuff of the American dream?

We can attain the goals of financial order and full employment, and thereby restore the American Dream. But only with real leadership and real money. In President Reagan we have the potential leadership to end inflation, rebuild our economy and balance the budget.

Now, for real money.●

EXPANDING THE MEMBERSHIP OF THE ACIR

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. McGRATH. Mr. Speaker, today I am introducing legislation which will expand and improve the membership structure of the Advisory Commission on Intergovernmental Relations (ACIR). More than 70 of my colleagues are joining me in the introduction of this legislation, which is identical to H.R. 7173 in the 97th Congress and which was approved by the House on December 16, 1982.

The ACIR was established in 1959 to bring together representatives of the Federal, State, and local governments to consider common problems. Among other things, Congress mandated the ACIR to: provide a forum for discussing the administration and coordination of Federal grants and other programs which require intergovernmental cooperation; to make technical assistance available to the executive and legislative branches of the Federal Government to determine the impact of legislation on the Federal system; to recommend the most desirable allocation of Government functions, responsibilities and revenues among units of Government; and recommend methods of coordinating and simplifying tax laws and administrative practices to achieve a more orderly and less competitive fiscal relationship among the several levels of government.

Over the years, ACIR has done its job well. It has issued more than 50 major reports, and its recommendations have led to the enactment of more than 700 different State laws. At the Federal Government level, the ACIR developed the general revenue sharing law.

Today the membership structure of the ACIR is the same as it was in 1959: three private citizens, three executive branch officials, four Governors, three State legislators, four mayors, three elected county officials, three Senators and three Members of the House of Representatives.

The legislation I am introducing would add four new members to the ACIR bringing its total membership to 30. My bill would add representatives of governmental bodies who are statutorily excluded from ACIR membership but whose importance in the Federal system is nonetheless undeniable.

First, the legislation would add an elected local school board member to the Commission. One of the most noticeable trends to emerge in government in the past two decades has been the growth in importance and influence of local school district government. The facts speak for themselves. School district governments collect and spend more than $100 billion annually, or about 7 percent of the GNP. According to the 1977 census of government, local school districts accounted for more than 36 percent of all local direct general expenditures, compared to 32.3 percent for municipalities and 22.7 percent for counties. School districts account for 45 percent of the total government payroll at the local level, about 3.5 million people.

Local school district government in this country is nearly universal, existing in 49 States; 94 percent of all local school district governments are elected and hence directly accountable to the people they represent. Nearly 90 percent of local school districts are fiscally independent. A recent report by the ACIR made the following statement about the significance of local school district governments:

> School districts can exert significant indirect influence on budgetary decisions at the local level, because they rely heavily on the same source of revenue, the property tax, as general purpose units. Intergovernmental cooperation for these resources may be critical indecisions on whether a function should be assumed, expanded, contracted or dropped.

Second, my bill would add a representative of town and township government. It would, in short, allow the National Association of Towns & Townships to recommend a member representing towns, townships, or other municipal governments with a population of less than 10,000 as defined in the General Revenue Sharing Act. For those who may be concerned, the National League of Cities, in conjunction with the National Conference of Mayors, would continue to make recommendations for four of the seats on the ACIR.

Today the town system of government serves some 60 million Americans living in 17,000 communities. Town government is, indeed, the oldest form of local government in America. Most towns today provide a variety of vital, general purpose services, just as other units of local government do. While town government is stronger in some States than in others, where it does exist it is vital. They provide public safety, public works and a host of other critical services. Town government is, for millions, the unit of government closest to the people. Inclusion of town and township representation on the ACIR has been supported by the ACIR itself and by the Reagan administration.

The third and fourth additions to the ACIR deserve a little explanation. My legislation would add a judge of a U.S. court of appeals or district court, appointed by the Chief Justice of the United States; and it would add a judge, appointed by the Chief Justice, from a panel of chief justices or judges of a State court of last resort submitted by the Conference of Chief Justices.

The inclusion of judges on the ACIR recognizes the increasingly important role played by the judicial branch in our Federal system of Government. Whether intentionally or unintentionally, the courts have shaped in many ways the functions and responsibilities and taxing powers of the several levels of government.

Mr. Speaker, the Advisory Commission on Intergovernmental Relations has been recognized as the single most important body studying the complex relationships between the Federal, State, and local governments. As such, its membership should reflect all of the bona fide interests which play important roles in the Federal system. The legislation I am introducing will correct the shortcomings in the ACIR's current membership structure, and, I believe, better enable it to perform the functions envisioned for it by the Congress more than two decades ago.●

WHY DISARM UNILATERALLY

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. MICHEL. Mr. Speaker, newspaper reports state that a recent convention of nuclear freeze leaders adopted positions which are attempts to unilaterally halt the testing, production, and deployment of our new nuclear weapons while only "calling upon" the Soviet Union to do the same.

Since we now know this is the real goal of the nuclear freeze movement, it would seem clear that any of our colleagues who have been attracted to that movement should realize the dangers involved in unilaterally halting of new weapons systems by the United States.

In a recent article in the Wall Street Journal, economist Herbert Stein gives a cogent and convincing argument against unilateral disarmament, particularly the kind of disarmament that comes about through well-intended budget cuts.

At this point, I wish to insert in the RECORD, "Why Disarm Unilaterally?" by Herbert Stein, from the Wall Street Journal, February 11, 1983.

[From the Wall Street Journal, Feb. 11, 1983]

WHY DISARM UNILATERALLY?

(By Herbert Stein)

I cannot understand the mad rush for unilateral disarmament on the part of usually sensible, cautions and responsible people. I refer, if you didn't immediately recognize the description, to a large number of Members of the Congress—probably a majority.

Two years ago the President, on the advice of the Secretary of Defense and the

Joint Chiefs, recommended an increase of defense expenditures for the succeeding five years. Congress approved this. According to polls, it had overwhelming support in the country. The authorized defense expansion was a response to a common observation that a decade of very low defense expenditures in the U.S. and very high outlays in the U.S.S.R. had left the U.S. in a seriously weakened relative position. Moreover, Soviet behavior, notably in Afghanistan, and the behavior of Soviet accomplices in many part of the world, left little doubt that Soviet military power was intended to be used whenever it would be effective. The increase in U.S. defense spending was an answer to the threat posed by the relative strength and the intentions of the Soviet Union.

Now there seems to be wide demand for a substantial cut in this program. Polls show that a majority of the public thinks the defense program is too large. Businessmen editorialists and other leaders call for cuts. And there is hardly any Congressman or Senator too conscious of his own ignorance to assert that the program should be cut.

What is going on here? I suppose that there is very wide support for agreed reductions or limitations of arms on both sides. But that isn't what we are talking about. We are talking about unilateral disarmament by us. We are talking about actions which would make the U.S. defense forces in 1986 and 1987 or in any other year weaker than they would otherwise be, and we are talking about doing that without asking or expecting any reciprocal reductions from the Soviets. Why are we in effect telling Mr. Andropov that the reason he doesn't have to negotiate mutual arms reduction in Geneva is that Congress will reduce U.S. arms for him?

FOUR PROPOSITIONS

Congressmen and others who assert the need for cutting the defense program hardly make any argument about the Soviet threat. The assertion is almost always based on one or more of the four following propositions, which must surely constitute as flimsy a basis as has ever been offered for a major national decision.

1. *There is waste in the defense program.* By some ideal standard that is certainly true, but it is also irrelevant. The relevant question is whether, if the defense program is cut, the cut will come entirely or almost entirely out of the waste. The cuts will be made by the same people whose decisions led to the waste. It is pitiful to hear congressmen plead with defense officials to tell them where the waste is.

There is and always will be waste in the Defense Department, just as there is in General Motors and in my household and yours. If we cut the defense program there will be some cut in waste and some cut in muscle. The notion of the defense spending cut that doesn't impair security is simply another illustration of the free-lunch fallacy.

The waste argument often casts doubt on specific weapons. MX in dense pack is the leading example. I do not myself find the dense-pack idea reassuring. But the conclusion that dense pack doesn't work wouldn't mean that the defense budget could be cut. We would still need a survivable land-based missile, and the superior alternative might be more expensive. There isn't any reason to think that correcting the mistakes of the Pentagon will save money.

2. *Increasing defense expenditures while non-defense expenditures are being cut is "unfair."* This is the typical reaction of a congressman who regards the whole function of government as the passing out of goodies among special interest groups in accordance with the principle of greasing the wheel that squeaks loudest. They think of the defense program as a handout to a special class—like our handouts to peanut farmers. But defense is a program for the benefit of the nation and for everyone now in it and yet to be born into it. To cut defense isn't "fair" to anyone.

There is a fairness issue about defense. That is the issue of how to pay for it. That is certainly debatable, but is isn't an issue about the size of the program.

3. *The survival of the free democratic system depends not only on military defense against foreign aggressors but also on internal support for the system.* That is probably true but surely irrelevant to our present situation. It implies that we are on the verge of great general disaffection with the system because of government's failure to provide some social benefits. The picture conjured up is of mobs rioting in the streets of Moscow on the eve of the Russian Revolution because there wasn't enough to eat. The whole idea is absurd. To suggest that the danger to our system comes not from Soviet missiles but from internal disaffection—in a country which in its last four presidential elections chose Richard Nixon twice, Jimmy Carter and Ronald Reagan, where the whole active political spectrum runs from Alan Cranston to Jesse Helms, where poverty even by generous American standards afflicts less than 10 percent of the population, where real per capita consumption is at an all-time high—is sheer fantasy. We may need to spend more on school lunches, food stamps or fixing potholes. But they are not alternatives to defense.

4. *The increase in the defense program will weaken the economy upon which our security ultimately depends.* This is the favorite argument of "hard-headed" people—businessmen, budget-conscious congressmen and such. It sounds like an argument which should be expressible in numbers. How much will the increase of defense spending reduce real output, investment, consumption or whatever else is supposed to be the content of the weakening of the economy? I have never heard any critic of the defense program attempt an answer to such questions. All we get is adjectives—"disastrous." "horrendous," "frightening," etc.

I would like to make a stab at quantifying the economic consequences of cutting or not cutting the defense program. The program included in the president's budget would raise defense spending from about 6.2 percent of GNP in fiscal 1982 to about 7.9 percent in fiscal 1988? What would be the effect on real GNP if the defense program were cut by 1 percent of GNP—meaning a cut of about $30 billion this year rising to about $50 billion in 1988? The answer depends on how much of the cut in defense goes into increased investment and how much goes into increased consumption. I will assume that all of the cut in defense goes into increased investment, because that is the assumption which makes the effect on real GNP greatest.

DEFENSE PROGRAM IS IMPORTANT

So the question is how much difference it would make if investment were 1 percent higher as a fraction of GNP than it would otherwise have been. This is a question on which economists are divided, but from the standpoint of the defense issue the division isn't very great. One of our leading students of the sources of economic growth is Edward F. Denison. The conclusion of his work, as I simplify it, is that if net investment were increased permanently by 1 percent of GNP, the annual rate of increase of real output would be raised by one-tenth of one percentage point. That is, if the growth rate would otherwise have been 4 percent, it would be raised to 4.1 percent. Many economists think that is too low an estimate. But at the other extreme, if all economic growth that doesn't result from an increase of hours of work is attributed to capital investment—which means that none is attributed to research, education, increases of scale, etc.—increasing net investment by 1 percent of GNP might raise the growth rate from 4 percent to 4.33 percent.

The Council of Economic Advisers estimates that real output will rise by 4 percent a year from 1983 to 1988, reaching a total of $1.819 trillion in 1972 dollars in 1988. By my estimates in the preceding paragraph, cutting the defense program by 1 percent of GNP and devoting the savings to private investment, starting right now, would raise 1988 real GNP by between 0.5 percent and 2 percent. That is, it would give us between $9 billion and $36 billion of real output in 1972 dollars in 1988. I can hardly believe that is what people mean when they say that cutting the defense program is needed to keep the economy strong.

I do not claim any great precision for these estimates, though I would be extremely surprised if the truth were different enough to alter the conclusion that spending 1 percent, 2 percent, or 3 percent more or less of GNP on defense would have little effect on the economy. But the main point is that those who see disastrous effects have an obligation to spell out the size and nature of these effects. The size of the defense program is too important to be decided by frightening but fuzzy adjectives.●

MORE BAHA'IS SENTENCED TO DEATH

HON. JIM LEACH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. LEACH of Iowa. Mr. Speaker, alarming reports have appeared in the press over the past week indicating that the Iranian courts have once again sentenced to death 20 leaders of the Baha'i religious faith.

As my colleagues may recall, last year the House and Senate passed—without a single dissenting vote—Senate Concurrent Resolution 73, a resolution stating that the "Congress of the United States condemns persecution of the Baha'is, holds the Government of Iran responsible for upholding the rights of all its citizens, including the Baha'is, and expressed the hope that the discrimination and brutal executions within the Baha'i community cease immediately." Further, the resolution urges the Iranian Government to "take whatever means are necessary to end this extermination of law abiding citizens who only wish to worship in freedom."

Hearings we held on May 25, 1982, documented the tragedy which the Baha'is face in Iran. The recently released State Department document, entitled "Country Reports on Human Rights Practices for 1982," likewise documents this ongoing tragedy. The following is an excerpt from that report:

The Baha'is in Iran suffered most among the religious minorities. Because the Baha'is' faith is regarded as a heresy by Muslims, it does not enjoy the traditional or constitutional protection granted the other principal religious minorities. A number of government leaders belong to a society specifically directed at the extirpation of the Baha'i faith. Baha'i leaders have been systematically arrested by the regime, charged with "corruption on earth" or "crimes against God" and executed. Baha'is may not hold government jobs, and other extensive nationalization of the economy, this prohibition severely limits employment opportunities. Employment in private industry is also discouraged by the Government. There have been a few incidents of mob attacks on Baha'i families and on their homes and businesses in various parts of Iran, often resulting in the destruction of buildings and sometimes in deaths. Baha'i businesses have been seized, cemeteries desecrated, and places of worship and principal shrines destroyed. Such mob actions, which in some cases have involved torture of Baha'i victims, are not restrained by local authorities but rather seen in most cases to be encouraged by them. There are no known cases of punishments for such acts of violence. Since Baha'i marriages are not recognized by the regime, women have been arrested and charged with prostitution. A total of at least 131 Baha'is, mostly leaders of the community, have been executed or killed since the revolution began, and several hundred were reportedly in prison as of late 1982.

Mr. Speaker, as the ranking minority member of the Subcommittee on Human Rights and International Organizations, I strongly urge the Iranian authorities to exercise compassion. Unless the death sentences are commuted, the Iranian Government will be considered an international outlaw. Its obligations under international human rights law, particularly the International Covenant on Civil and Political Rights, are clear. Every individual is entitled to freedom of religion and association. This possible bloodshed implies the triumph of human prejudice over reason and justice. It must be stopped.●

NUCLEAR WAR BECOMES EVEN MORE LIKELY

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Ms. KAPTUR. Mr. Speaker, I would like to bring to the attention of my colleagues an article from the Washington Post on February 20, which marks the beginning of an era in which nuclear war becomes even more likely. India, the article explains, has become the first developing country to begin accumulating sizable stockpiles of separated plutionium, and doing so at a rate that would enable it to build about 20 atomic bombs a year! The significance of this much dreaded event must not escape us.

I hope that my colleagues will give some thought to this development and to the horrors which could ensue. We must realize that now the importance of making substantial progress in the arms reduction talks with the Soviet Union increases greatly. For only if we show our commitment in this arena can we be respected and serve as an example when we push other nations in the same direction. I urge my colleagues to take the time to read the article which follows.

INDIA STORING ARMS-GRADE PLUTONIUM

(By Milton R. Benjamin)

India has become the first developing country to begin stockpiling separated plutonium at a rate that would enable it to build about 20 atomic bombs a year if it decides to pursue a nuclear weapons program, according to U.S. and international sources.

The process of separating the plutonium from burned-up fuel produced by Indian atomic power plants is taking place at the Tarapur reprocessing facility near Bombay, which went into large-scale operation last November, according to the International Atomic Energy Agency (IAEA).

Previously, the plant only had been used to reprocess small amounts of spent fuel from research reactors.

According to IAEA officials, the separated plutonium is being kept in a storage room there where it will be held until Indian officials decide its use. Indian atomic energy officials said yesterday that the plutonium might fuel an experimental fast-breeder reactor, which itself would produce additional plutonium.

The significance of large-scale reprocessing in India, however, is that it marks the beginning of the era that has long worried nuclear nonproliferation experts—the time when nations without nuclear arsenals start accumulating sizable stockpiles of separated plutonium.

"There simply is no reason connected to their civilian power programs why any of these countries need to begin stockpiling separated plutonium in this decade," a U.S. government official said. "It makes no sense in an atomic power context at all." Until now, virtually all of the plutonium produced in atomic power plants in developing countries has remained part of the highly radioactive spent fuel.

The plutonium stored in this way in spent-fuel pools in several dozen countries is not easily accessible.

If a nation decided to use such plutonium to build nuclear weapons, it first would have to construct a reprocessing plant, which would take at least two years.

But is a country has a stockpile of separated plutonium, the temptation to build nuclear weapons in a time of crisis might increase greatly. A country that already had done weapons-design work might be able to fabricate separated plutonium into bombs in a matter of weeks, or perhaps days.

The fact that India is beginning to stockpile large amounts of separated plutonium is certain to increase apprehension in neighboring Pakistan, where U.S. analysts believe the government is attempting to develop a nuclear weapons capability.

India has stated that it does not plan to build nuclear weapons.

But the atomic device exploded by India in 1974 was made from plutonium. So if New Delhi decided in response to developments in Pakistan or for other reasons that it needed a nuclear arsenal, it presumably could turn a stockpile of separated plutonium into weapons in a relatively short time.

The spent fuel being run through the Tarapur reprocessing plant, located about half a mile from the U.S.-built Tarapur atomic power station, is from the Canadian-designed Rajasthan Atomic Power Plant 1, according to IAEA officials.

At the moment, two agency inspectors with a mandate to keep track of the plutonium and sound a warning if any is diverted for military use are observing the entire Tarapur reprocessing operation.

But agency inspectors will not be permitted to observe all of Tarapur's reprocessing runs in the months ahead, since India refuses to place the plant under full international safeguards. Only plutonium subject international control because of specific agreements between India and foreign governments will be monitored.

The IAEA also has not decided whether to keep the separated plutonium for which it is responsible under "continuous inspection," or simply to check on it "perhaps every second week," officials said.

The Tarapur facility is designed to reprocess 100 tons of spent fuel annually, so if it operated at full capacity—highly unlikely since commercial reprocessing plants frequently encounter problems—it would be able to separate 135 to 150 kilograms of plutonium per year. (A kilogram equals 2.2 pounds.) Six to 8 kilograms of plutonium are needed for a nuclear weapon.

The ability to separate plutonium on this large a scale puts India far ahead of Pakistan, which has built but not yet begun to operate a much smaller reprocessing plant next to the Pakistan Institute for Nuclear Science and Technology on the outskirts of Islamabad.

It also puts India well ahead of countries such as Argentina and Brazil, which have laboratory-scale reprocessing facilities where years might be required to separate enough plutonium for a single nuclear weapon.

But Pakistan is trying to complete a reprocessing plant even larger than Tarapur from a French design; Argentina is building a reprocessing facility that could produce significant quantities of plutonium, and West Germany is helping Brazil design a plant.

The only non-nuclear weapons country other than India operating a commercial-size reprocessing plant and stockpiling large quantities of separated plutonium is Japan, which has a larger and far more advanced civilian atomic energy program than India.

It is estimated that Japan has 500 kilograms of separated plutonium stored at its Tokai reprocessing plant, according to U.S. sources. But Japan is operating a breeder that requires 180 kilograms of plutonium a year and has an atomic power research program that requires 145 more kilograms of plutonium per year.

India, by comparison, has said it ultimately will need 50 kilograms of plutonium to fuel a small experimental breeder reactor being built at Kalpakkam near Madras. Yet its reprocessing plant is capable of turning

out much larger quantities of separated plutonium.

India has accumulated 260 to 270 tons of spent fuel at its two Rajasthan atomic reactors, according to U.S. sources. If it reprocesses all of this fuel, which would take at least three years, India would have 350 to 400 kilograms of separated plutonium, they said.

Beyond that, the General Electric-built atomic power plant at Tarapur has produced spent fuel estimated to contain 700 to 750 additional kilograms of plutonium, according to U.S. sources.

India legally is barred from reprocessing the fuel from the Tarapur atomic power station until at least 1993 under its original agreement with the United States and a followup agreement with France, which began supplying fuel for the Tarapur reactors last November.

The Tarapur reprocessing plant, however, originally was built to handle spent fuel of the type produced by the Tarapur power reactors as well as from the Rajasthan reactors, which use different technologies, and Indian officials continue to hint that they may reprocess the U.S. fuel at some point.

U.S. analysts say Indian technicians probably could convert the reprocessing plant from handling Rajasthan fuel to handling the different type of fuel from the Tarapur reactors in about two months.

Dr. Hans Gruemm, IAEA's deputy director general for safeguards, said in a telephone interview from Vienna that plutonium being separated at Tarapur is "under continuous inspection" by the IAEA. He said the agency was determining how to keep track of the stored plutonium after the current run.

He said that even when the Tarapur plan reprocesses spent fuel not subject to inspection, which would let India close the plant to agency inspectors, the agency will be entitled to monitor the plutonium under its supervision in the plant's storage room.

"Whether it will be continuous inspection is another question," Gruemm said. "Perhaps it will be every second week, though that is an example. It has not been decided."

He also said he saw no reason why India could not commingle plutonium under international controls and plutonium not subject to inspection in the same storage room. "In principle, it would be possible," he said.●

REDUCED WORKWEEK LEGISLATION

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. CONYERS. Mr. Speaker, next week I will introduce the Fair Labor Standards Amendments of 1983 (H.R. 1784), which seek to reduce the standard workweek over an 8-year period in six steps from 40 to 32 hours, raise the overtime compensation requirements from one and one-half times to two times the regular rate, and require the consent of employees in the scheduling of overtime work.

Reduced worktime as a means of curbing unemployment, spreading work and creating a significant number of new jobs has been a long-standing practice in European nations. The standard workweek in the United States, however, has remained frozen for over 40 years, despite the fact that in the 40-year period prior to the enactment of the 40-hour week in 1938, the continuous reduction in worktime spurred productivity, boosted income standards, and facilitated an expanding labor force.

Today the Nation faces a long-term unemployment problem that transcends cyclical changes in the economy. The use of fiscal and monetary policies to ease recessions cannot effectively solve the problem. The gap between economic recovery and employment recovery continues to widen with each subsequent recession. During recoveries employers, typically, increase the hours of their current workers rather than hire new employees. This practice is pursued for increasingly longer periods during recovery. Unemployment rates at the peak of most economic cycles in the last 12 years have risen dramatically: from a 5-percent rate following the recovery in the early 1970's, 9 percent in 1975, and close to 11 percent in the current cycle.

Overshadowing the movements of particular business cycles is a long developing structural change in the nature of production and work itself. For much of our history technology served labor in creating an unprecedented expansion in employment, growth, and prosperity. Today we stand on the threshold of a new technological economy in both manufacturing and services that can substantially reduce the labor input in production.

Dr. Wassily Leontieff, the Nobel Prize winning economist for the work on input-output methods of economic analysis, has recently observed:

> With the advent of solid-state electronics, machines that have been displacing human muscle from the production of goods are being succeeded by machines that take over the functions of the human nervous system not only in production but in the service industries as well. The relation between man and machine is being radically transformed.

Thirty years ago, several thousand telephone operators handled a million long-distance calls. Ten years later, several hundred operators could do the same work. Today only a few dozen, working with automated equipment, are needed. A similar pattern of labor displacement, or technological unemployment, is occurring at an accelerating pace in other major industries as a result of computers, robots, the downsizing of products, and the general scaling down of all the elements of production.

Persistent high unemployment has degraded human skills and capabilities and damaged the fabric of society. It has robbed the Nation of the purchasing power and national income that is necessary to achieve a genuine economic recovery and other urgent national goals. And it has resulted in growing inequities in the distribution of income and benefits. Firms resort to excessive overtime, as a cost-saving measure, at the expense of the unemployed. With so much of the economy based on seniority, recurrent recessions have produced a new class of vulnerable workers, consisting mainly of women, minorities, and young people. Being the last hired and the first to be laid off, these workers are forced to move about from one job to another, repeatedly losing income and never being able to accumulate the training, skills, and economic rewards that in the past were associated with stable employment. These long-term victims of our modern labor market have now been joined by more experienced higher paid workers, who are being displaced by the structural changes in the economy.

The legislation that I am proposing aims to spread work among the largest number of workers rather than permit unrelieved unemployment among a substantial number. It seeks to stabilize jobs in key industries that are being transformed by labor-displacing technologies. It also aims to spur productivity growth by curbing excessive worktime, eliminating forced overtime, and creating the conditions of both work and leisure that render working life more satisfying. The bill will assist in developing an adequate income stream among more workers who will be better able to consume the increased output of our new technologies.

The reduction in worktime, historically, has been accompanied by productivity gains, which made possible advances in real income along with the reduced hours. The evidence of industries that have adopted a reduced workweek, including the electrical, rubber, clothing, and telecommunications industries, confirms this. It is expected that income standards will be maintained under this legislation, or even improve as the economy expands.

The legislation would reduce the standard workweek gradually over a period of 8 years, allowing adequate time for adjustment both by employees, labor unions, and employers. Any additional movement toward a 4-day workweek, which is gaining in support, can be better facilitated under this bill.

The Fair Labor Standards Act of 1938 established a premium rate for overtime work in order to discourage the scheduling of excessive overtime and encourage new hiring. That rate is simply not functioning as it was intended: today it costs employers less to pay overtime than it does to recruit and hire new employees and pay their wages and benefits. The bill proposes to raise the overtime rate within 90

days of enactment to twice the regular rate. This adjustment also will overcome the employment lag that normally occurs when recoveries are underway.

The legislation calls for the abolition of compulsory overtime. Employers in many instances schedule overtime work without regard for the needs of their employees. As increasing numbers of women and female heads of households have joined the work force, and the number of multiple-earner families has increased, leisure time has acquired a greater value while forced overtime has become increasingly burdensome. This bill seeks to encourage contractual agreements and employee-employer understandings that would render overtime work by consent more efficient and productive.

Over 21 million employees—1 in every 4 workers—worked overtime hours in May 1980, the last month for which data are available. More than 2 million additional full-time jobs, it is estimated, can be generated through the transfer of overtime hours to the hiring of new employees. Reducing the workweek eventually to 32 hours would generate another several million new jobs.

The reduced workweek bill that I am introducing can be a significant step in the direction of building a genuine, lasting full-employment economy, one that combines growth in both technology and human work, and one that includes workers in the sharing of the dividends certain to be granted in our future high-technology economy.●

BETTER ENVIRONMENT AND MORE JOBS IN THE NATION'S COALFIELDS

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. RAHALL. Mr. Speaker, today I am introducing the "Abandoned Mine Reclamation Improvements Act"; legislation which seeks to improve the environment and create badly needed jobs in the Nation's coalfields.

Great levels of unemployment in the coalfields are causing severe economic disruption in regions dependent on the coal industry. In Appalachia, over 35 percent of the United Mine Workers' union membership are on the unemployment rolls and this figure becomes much higher when nonunion coal miners are included.

There is a way to create some employment for these workers; employment in an area in which they already possess the skills needed to undertake the job. While the coal industry is experiencing soft markets, idle coal miners can be put to work reclaiming abandoned coal mine lands. If these miners cannot be mining coal, they can at least be employed through reclamation projects.

The Surface Mining Control and Reclamation Act of 1977 created the abandoned mine reclamation fund which is supported by a reclamation fee assessed on every ton of mined coal. The objective of this fund is to support programs aimed at reclaiming orphaned coal mine lands. However, in spite of the fact that a vast inventory of abandoned mine lands exist in coal-producing States a large unappropriated balance remains in the fund. By the end of fiscal year 1982, $904.4 million had been collected by the reclamation fee and the unappropriated balance was $315.5 million. The SMCRA designates 50 percent of the fund as the State share, and as such, half of the $904.4 million collected—$452.2 million—is for State reclamation programs. Of this amount, only $92.2 million had been distributed to the States with the State share unappropriated balance being $360 million. The following chart shows how the $92.2 million was obligated:

[In millions]

States/tribes	Amount collected for State share through Sept. 30, 1982	State share fund obligated through Sept. 30, 1982
Alabama	$14.1	$4.0
Alaska	.6	
Arizona		
Arkansas	.2	
California		
Colorado	11.8	1.2
Georgia	.013	
Illinois	31.6	4.9
Indiana	22.3	6.8
Iowa	.5	
Kansas	.9	
Kentucky	79.7	15.9
Louisiana		
Maryland	2.2	.6
Michigan		
Mississippi		
Missouri	4.5	3.5
Montana	21.6	7.0
New Mexico	7.9	.8
North Dakota	3.7	
Ohio	26.3	12.5
Oklahoma	4.3	1.6
Pennsylvania	51.2	11.2
Rhode Island		
South Dakota		
Tennessee	5.3	1.2
Texas	6.4	
Utah	4.3	
Virginia	15.6	7.7
Washington	3.8	
West Virginia	47.9	13.3
Wyoming	68.0	
Crow Tribes	3.1	
Hopi Tribes	1.1	
Navajo Tribes	15.0	
Total	452.2	92.2

The $360 million in unappropriated State share reclamation funds would support 18,000 full-time jobs in the coalfields. Yet, it is expected the abandoned mine reclamation fund's unappropriated balance will continue to grow. Because the majority of coal-producing States now have federally approved reclamation plans and due to the inherent problems of the current grants system of distributing these funds, I am introducing the Abandoned Mine Reclamation Improvements Act which will provide for a more expeditious distribution of State share funds. My bill will enable the Secretary of the Interior to automatically pay to the States their share of the fund on a quarterly, or at the election of the State, an annual basis.

This legislation retains Federal oversight on the use of these funds and makes provision for the proper use of these funds by providing for an enforcement mechanism.

In addition, my bill would allow interest to accrue to the fund. At present, the abandoned mine reclamation fund—defined by SMCRA as a trust fund—is the only Federal trust fund in which interest does not accrue. The hazardous waste and toxic spill superfund, the highway trust fund, the airports and airways trust fund, and the inland waterways trust fund all allow interest. These trust funds are supported by specific user fees or taxes not unlike the reclamation fee assessed on every ton of mined coal which supports the abandoned mine reclamation fund.

Mr. Speaker, this legislation offers us the opportunity to not only provide for a better environment in coal regions, but to also create jobs.●

I HOPE THEIR TRUTH-IN-LENDING IS BETTER THAN THEIR TRUTH-IN-LOBBYING

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. STARK. Mr. Speaker, before my election to the Congress in 1972, I was the founder and developer of a bank in the east bay area of California. After the election, I sold my interests in the bank, but I like to think I still know something about the banking business.

One thing I do know for certain is that many of my former colleagues are badly misrepresenting the law passed last summer concerning withholding on dividends and interest. I know as a former banker that it is not nearly as hard to do as they are claiming. And I know as a legislator that the new law provides exceptions for most elderly; those with small accounts; and those with little tax liability.

I would guess that one-third of the many letters and postcards I am receiving on this issue would not have been sent if the bankers had bothered to explain the exemptions. For example, in this morning's mail I received

three letters from constituents which read in part:

I am 77 years old and cannot live on my Social Security totally. I depend on my interest earnings to supplement SS.

The second read:

I will be 18 in May 1983; my deceased mother's Social Security will be terminated and I want to go to college—cannot without full interest savings.

And a third which read that the new law—

Will withhold interest and dividends from those who can least afford it: the senior citizens and the low income people.

I would bet that all three of these letter writers qualify for an exemption. They should demand 20 cents in postage back from their banker.

The following article from the February 21 Washington Post helps explain why some bankers may be lobbying against this provision. I hope that their truth-in-lending statements to their customers are more honest than the postcards they are giving people to mail to their Congressmen.

The article follows:

[From the Washington Post, Feb. 21, 1983]

BANKS RISKING PYRRHIC VICTORY

(By Jerry Knight)

Bankers and savings and loan executives are starting to savor success on Capitol Hill. They are on the verge of winning a classic confrontation between government and business by forcing Congress to repeal the law to withhold income taxes from dividends and interest payments starting July 1.

Enough senators and representatives have signed on as cosponsors of the bankers' withholding repeal bill to virtually assure that if there is ever a floor vote on the measure, withholding is dead. Before the bankers call in their chits, they ought to take a look at the car bumpers on some 1983 cars and ponder the price of victory.

If Congress backs down on withholding taxes on dividends and interest it will be the biggest business victory in Washington since the auto industry killed the requirement that car bumpers survive a 5 mph crash.

The automakers' clamour for weaker bumpers and the bankers' outraged response to withholding show what happens when business unleashes its clout without regard to the consequences. Using doomsday weapons against dubious threats could produce fallout that's more dangerous than the enemy.

The 5 mph bumper standard bit the dust last June. But the awesome cost to consumers of the auto industry's victory is only now becoming evident. Consider these figures put out last week by the Insurance Institute for Highway Safety, an organization of car insurance companies:

A driver whose 1982 Honda Accord ran into a barrier at 5 miles an hour could drive away with unblemished bumpers, but the flimsier front bumper on a 1983 Accord would cost $299 to fix after the same accident, Insurance Institute researchers said.

Back into a pole at 5 mph while driving a Plymouth Horizon with bumpers that met the old standards and you could drive away unscathed. Make the same mistake in a new Horizon and it'll cost you $193 for repairs. Car owners "will pay higher insurance premiums to reflect the poorer bumper performance," the insurance companies warn.

Cutting the bumper crash standard from 5 mph to 2½ mph was supposed to save consumers money by eliminating the costly crash-control devices and to provide better gas mileage by making cars lighter in weight, the automakers promised.

But not one car manufacturer has cut prices after switching to weaker bumpers, the Insurance Institute says. The weighty savings turns out to mean a gas savings of about 25 cents a year (0.2 gallons of gas) for the Plymouth Horizon and a whopping 1.8 gallons of gas a year for an Accord owner. For $2 worth of gas a year, Honda buyers run the risk of a $299 bumper repair bill, thanks to the car companies' "victory."

The auto makers not only socked it to their own customers by weakening their bumpers, they also burned some of their best friends in the process. Sen. John Danforth (R-Mo.) calls the weakened bumper standard "faudulent" and he is not exactly an enemy of big business.

It is another moderate Midwestern Republican, Bob Dole of Kansas, who is bristling from the bankers' heat on the dividend and interest withholding bill. Dole is no tax-the-rich reformer; he wants to cut the holding period on capital gains from a year to six months and wants to do away with double taxation of corporate dividends.

Dole told the bankers to their faces last Thursday that they are using dishonest, deliberately misleading arguments against the withholding plan.

"The tactics used by many banks, savings and loans and credit unions have reached an historic low," he told an American Bankers Association group. It's one thing to argue against a measure you don't like and quite another to twist the truth, Dole complained.

Any group that wants to influence public policy—especially bankers—"should do so accurately and responsibly, precisely because of the trust so many Americans place in their banks and bankers. Unfortunately the campaign to repeal withholding has hardly lived up to that standard."

In advertisements and statement-stuffers included with returned checks, the banks have been warning customers they stand to lose interest income because of the law requiring that 10 percent of interest payments be withheld for federal taxes. Withholding taxes will reduce the compound interest income customers earn, the banks warn.

By Dole's calculations, the compounding loss due to withholding turns out to be about as significant as the gas savings from weaker bumpers. On a $1,000 savings account, earning 9 percent interest a year, the difference is less than 50 cents.

There will be no compounding loss at all, Dole points out, if the banks chose to withhold taxes only at the end of the year, as the law permits. Banks are likely to withhold quarterly or monthly, however, because that will enable them to earn interest on money taken out of savers' accounts. In other words, says Dole, if you lose compound interest because of withholding, don't blame me, blame your banker.

Dole's remarks make clear that, like the automakers, the banking industry has already alienated its natural allies by pushing imprudently for self-interest legislation. And now, like the automakers, the banks run the risk of infuriating their customers.

It is the banks, not their depositers, who will benefit from killing interest withholding, just as it was the automakers, not drivers who benefit from flimsy bumpers. The banks will be in as embarrassing a position as the auto industry once the customers figure that out.●

A CONGRESSIONAL SALUTE TO ALBERT B. BERGESEN

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. ANDERSON. Mr. Speaker, on February 26, the many friends of Albert G. Bergesen will fill the Hollywood Palladium to honor him on his retirement as a regional commissioner of the U.S. Customs Service.

Born in Brooklyn, N.Y., Al graduated from Ohio University and received a master's degree from Syracuse University. Also, he is the recipient of an honorary Ph. D. degree from California's Pepperdine University.

For the past several years he has been commissioner of region 7 of the U.S. Customs Service, whose job it is to manage all customs activities within the States of California, Hawaii, Washington, Oregon, Alaska, and Nevada. As you know, the regional commissioner bears the full and final responsibility of all customs operations in his region. These responsibilities include enforcement, investigations, inspection and control, classification and value, and patrol. His mission involves the protection of the revenues of the United States, the enforcement of the Tariff Act, and prevention of smuggling of narcotics, merchandise, and other contraband into this country.

Prior to his current duties, he was chosen as assistant regional commissioner—administration—for the San Francisco region of the Customs Service. He previously worked in our Nation's Capital where he served as the Associate Director of the Post Office's Employment and Placement Division. Other positions he has held in his 43 years of dedicated public service include: Regional personnel manager, Post Office Department; district civilian personnel director, 12th Naval District; industrial relations officer, U.S. Naval Station, Treasure Island; and, area training director, War Manpower Commission, New York.

His distinguished service, exemplified by his willingness to accept positions of great responsibility and added work, have prompted a grateful government, as well as semiofficial agencies, to recognize his contributions by the following awards: Distinguished Civilian Service Award from the Navy Department (highest civilian award); U.S. Treasury Awards (medal and two certificates); Staff Man of the Year from the Federal Business Association of San Francisco; American Legion Award; Navy commendation for work in industrial relations; three awards from the National Health Agencies; three awards from the United Bay Area Crusade; and the Meritorious

Service Award from the Treasury Department. This last award, received in 1974, is the second highest award given by the Secretary of the Treasury "for initiative and leadership which have inspired and motivated employees in all functions throughout the region and which have been invaluable in establishing effective working relationships throughout private industry and the Federal Government."

In concert with his professional career, Al has made the time to donate his services to a tremendous range of organizations and activities in both the public and private sector. These include, and there are many more: Northern California chairman and coordinator, Radio Free Europe; chairman, Federal Personnel Council, San Francisco (two terms); president, Federal Business Association of San Francisco (two terms); member, American Society for Public Administration; chairman, Public Employees Division, United Bay Area Crusade (2 years); State coordinator, Inter-Departmental Savings Bond Committee, Treasury Department (15 years); member, Industrial Relations Committee of the San Francisco Urban League; member, Naval Reserve Association; commissioner, San Mateo County School Systems; board member, International Narcotics Enforcement Officers Association; first vice president, International Club, Los Angeles; chairman, Federal Executive Board, Los Angeles (1979); president, Federal College Council, Los Angeles; member, Governor's Task Force on Law Enforcement; and member, Conejo Arts Council.

Mr. Speaker, it has been dedicated individuals such as Al Bergensen who have made this country great. He is a man who is admired and respected by all who have had the pleasure of working with him. Al's career in Government service has been unblemished and his tireless efforts on behalf of the community should be an example for all to emulate. He has done an excellent job at the Customs Service and I shall miss his outstanding work in my district.

My wife, Lee, joins me in congratulating Albert Bergensen on his retirement. His contributions to the betterment of the community and the country are many and are deeply appreciated. We wish him and his wife, Dorothy, and their four children, Albert, Todd, Doreen, and Jill success in all their future endeavors.●

A DEPARTMENT OF HOUSING?

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. BONIOR of Michigan. Mr. Speaker, the recent decline in interest rates has breathed some life back into America's declining housing market, but it is faint life at best. Clearly the crisis is not over.

Housing policy will be a priority concern during the present Congress. The Congress must encourage a strong recovery in the housing market through low interest rates and economic growth, but we must also do more.

We need to marshal the resources of the Federal Government in direct support of a strong housing sector by addressing the foreclosure problems created by the recession, by understanding how we can promote housing rehabilitation, by finding ways to sustain and support the neighborhoods that are one of the keys to our Nation's special character.

In this effort, we must be open to every option. A writer from my district who has given special attention to housing issues, recently suggested that the United States could profit from bringing housing programs together in a separate and integrated department. I commend his article to my colleagues' attention.

[From the Macomb Daily, Jan. 17, 1983]

A FEDERAL CENTRAL AGENCY WOULD HELP HOUSING INDUSTRY

(By Robert Selwa)

With housing in southeast Michigan and in the nation at a crisis state today, Congress needs to organize our federal government in such a fashion as to clearly address itself to the longstanding national goal of a decent home for every American.

Currently there is a United States Department of Housing and Urban Development. It should be made into a clearcut Department of Housing, with urban development placed elsewhere in the organizational scheme.

Other countries of the world have departments of housing, as do units of government within the United States. The purpose is to carry out the commitment of establishing decent housing for everyone.

That is a commitment not being carried out today in any adequate fashion, particularly with the actual net losses in housing that many cities in the United States are experiencing and that southeast Michigan as a region is experiencing today.

One Department of Housing of the United States government would consolidate all housing programs and activities of the government and bring together the diverse housing interests.

Even more importantly, a department established to protect, expand and enhance the housing stock would serve to prevent harm from conflicting policies and programs.

"Urban development" often works contrary to housing, particularly with the Urban Development Action Grants and Community Development Block Grants administered by municipalities receiving millions of federal tax dollars every year.

Many officials and administrators in HUD are anxious to carry out the commitment to housing this nation has made—but cannot because the funds are too loosely regulated under Congressional law from 1981 and because those funds have become giant slush fund accounts for the cities. As a result the money is used for economic development under the guise of urban development and to the destruction of housing.

"Urban Development" belongs more properly with Commerce, anyway, since our cities are our commercial hubs.

When economic development threatens housing, a separate Department of Housing will be ready to defend the commitment to provide shelter to our people and prevent the programs from being undermined.

Block grants clearly earmarked for housing development would then be administered by the Department of Housing, and if the government wishes to give block grants for economic development, its impact on housing will have to be measured because the housing constituency will have its own department in Washington as established protection.

The U.S. has a Department of Education to safeguard the interests of education. There is a Department of Energy for that category. Is housing of any less importance?

Furthermore, tying housing to urban development, as is done at present, passes over the needs of rural America. It is in the countryside where even a greater percentage of the housing is inadequate.

We are in the midst of a housing depression in the United States the likes of which we have not seen since the Great Depression. New homes are not being built, and older homes are being destroyed, often with federal funds that were intended by Congress for the rehabilitation of homes. The justification given is "blight removal" when in actuality the best way of removing blight is to improve a home. An attractive dwelling is far better for a block than an empty lot with litter.

It is time to call a halt to demolition and the waste of funds, particularly with the huge deficits the federal government and other governments are encountering and the scarcity of jobs for working America. It is time to put people to work improving our housing stock once again.

It is time to remedy the situation with better programs and a single U.S. Department of Housing which addresses the housing needs of both urban and rural America.●

FOREIGN AID TO GREECE AND TURKEY FOR FISCAL YEAR 1984

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. DYSON. Mr. Speaker, again a situation of potentially grave political and military concern dawns over the southeastern flank of the North Atlantic Alliance. Turmoil and instability are no novelty to this area of the globe, and unfortunately the current administration's latest proposals for military assistance to the Eastern Mediterranean can only exasperate an already present state of tension, which we, all too well, are aware exists in this historically and strategically important region.

As is well known, the Reagan administration has recently proposed a policy of foreign military assistance upsetting the existing levels of mili-

tary aid balance to the nations of Greece and Turkey. These regrettable proposals drastically depart from existing policy in both form and content. Such a drastic departure, as these proposals are testimony to, constitutes a real sham for a just American foreign aid policy, and creates a situation of increased tension in an already strained region of the world, with unpredictable consequences, as Greek Prime Minister Andreas Papandreou recently asserted.

Foreign aid proposals submitted to Congress February 4, by the Reagan administration for fiscal year 1984 indicate an exceedingly large increase in Turkey's foreign military sales (FMS) guaranteed loans to a level of $525 million from its fiscal 1983 level of $290 million; a hike in military assistance program (MAP) grants from $110 million to $230 million; and a total of $175 million in economic support fund (ESF) loans and grants. Thus, for fiscal year 1984, the administration is requesting a total of $755 million in military aid and $175 million in economic aid for Turkey, which, in effect, represents the administration's largest single increase of proposed U.S. aid to any foreign nation.

For Greece, the administration's proposals are ostensibly more austere, providing her with zero economic aid, and with a no-increase military assistance package from the currently existing level of $280 million in foreign military sales (FMS) guaranteed loans.

What this startling discrepancy signifies, is that a congressionally established 7-to-10 ratio of military aid to the nations of Greece and Turkey respectively is being undermined, and noticeably rebuked. A State Department official on February 4, in no uncertain terms, commented that: "We do not recognize the 7-to-10 ratio. That is a congressionally imposed ratio. It is not something that the administration has ever acquiesced in." Indeed they have not.

If these proposals were adopted, this 7-to-10 ratio would effectively be depleted to a 3.5-to-10 ratio. This, according to a spokesman from the Greek Embassy, is considered by the Government and peoples of Greece to be totally unacceptable.

The repercussions raised in the wake of these controversial proposals, should they be adopted, would unambiguously be counterproductive to America's interests and to the overalll security of the Western Alliance. They promote a deterioration of the already fragile stability in this vital region of NATO, and creates a "climate which is not helpful to (U.S. and Greek) negotiations for the conclusion of a new Defense and Economic Cooperation Agreement" between the Governments of the United States and Greece.

It is my fervent hope, Mr. Speaker, that my colleagues in this Congress will pay scrupulous attention and consideration to the provisions engendered in the proposals of this administration, and seriously consider their subsequent consequences for American foreign policy. I trust my colleagues will demonstrate their commonsense and foresight in concluding that these aid proposals should not be adopted. To do otherwise, Mr. Speaker, would be to establish an unsightly blemish on the face of American foreign policy, and could only result in furthering instability in the eastern Mediterranean rather than enhancing security in this region, which, ironically, is what the administration wishes to address by submitting these proposals.●

TO HONOR MR. WILLIAM H. CLINTON UPON HIS RETIREMENT AS THE REGISTRAR OF VOTERS

HON. JERRY LEWIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. LEWIS of California. Mr. Speaker, on March 9, 1983, the San Bernardino County Registrar of Voters will honor Mr. William H. Clinton upon his retirement. Bill has served as both the assistant registrar of voters and since February 1970 the registrar of voters in San Bernardino County. Upon his retirement on March 11, 1983, Bill will have completed 35 years of service in county government. During these years Bill has been actively involved in the betterment of San Bernardino County. He has served as the director of the board of directors of the County Clerks Association of California and was a member of both the Elks Lodge No. 836 and the Kiwanis Club.

William Clinton was born in Redlands, Calif., on April 19, 1924. He attended grade school there and graduated from Redlands High School in June 1942. The following month Bill began working for the San Bernardino County Free Library Department.

In November 1942, Bill began his military career in the Army Air Corps and received an honorable discharge on October 31, 1945. After furthering his education at Riverside College, the University of Redlands, and the University of California, Bill went into business in Indio, Calif.

In May 1948, Bill returned to San Bernardino to work in the county purchasing department. In September 1950 he went to work in the county clerk's office as the superior court clerk and later became the chief deputy in charge of passports, naturalization and marriage licenses.

It was in March 1958 that Bill was appointed assistant registrar of voters and later appointed by the board of supervisors to the position of registrar of voters.

As a result of his high standards of performance and vast knowledge of election laws established by State and Federal Government, and his demonstrated ability, Bill soon attained an enviable reputation throughout the State not only for his accuracy, since his certifications have never been challenged, but also for the fact that San Bernardino County has often been first in the State with election results. This expertise of Bill's has been utilized in many workshops by the County Clerks' Association which values his opinions. Through his efforts, Bill has made the registrar of voters' office one of the most modern, efficient, and effective in the State of California.

Mr. Speaker, I take great pride in commending to my colleagues William H. Clinton for this tireless devotion not only to the office of registrar of voters, but also to the citizens of the county of San Bernardino.●

BAY AREA'S "MR. TRANSIT" TO RETIRE

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. STARK. Mr. Speaker, after nearly 27 years of dedicated service, Robert E. Nisbet has decided to step down as general manager of the Alameda-Contra Costa Transit District effective this fall.

During his long years of committed and effective service, Mr. Nisbet grew to become one of the Nation's most respected transit managers who, through his competent efforts, is credited with guiding the AC Transit District through a trying period of financial crisis.

"We have had some hard times and we have also achieved some substantial successes," Mr. Nisbet said in announcing his retirement. "We are surviving a financial crisis, we have modernized the bus fleet, and we have embarked on a facilities improvement program that bodes well for the district in the years to come," he added.

It should be noted that Mr. Nisbet's success with AC Transit extends far beyond this most recent crisis. Indeed, Mr. Nisbet and AC Transit are nearly synonymous. It was Mr. Nisbet, an attorney educated at the University of California at Berkeley and the Hastings Law School in San Francisco, who drew up the legislation that created the AC Transit District in 1957.

Mr. Nisbet told the San Francisco Chronicle:

In those days, AC Transit was little more than an idea which enabled the east bay's voters to create the public transit system we have today.

In 1960, the AC Transit District took over operation of the old Key System, which at the time provided bus service to the residents who lined the bay east of San Francisco. Now, AC Transit carries roughly 250,000 passengers a day through the east bay and into San Francisco.

Mr. Nisbet first served as attorney for the district and in the capacity of legislative liaison before taking over as general manager in 1978. Although he will retire from his permanent position in the fall, Mr. Nisbet, who will turn 65 years old in September, plans to continue to serve the district he helped create by performing consulting duties.

I want to wish Mr. Nisbet the best of luck in the future and to commend him for his admirable commitment to public service.●

THE POSTAL SERVICE AS WHIPPING BOY

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. CORCORAN. Mr. Speaker, the U.S. Postal Service and the Congress have had their differences in the past. As a Member of Congress, and as a member of the Post Office and Civil Service Committee, I have disagreed with Postal Service policy on occasion. However, I recently read an article written by H. K. Petschel, an inspector for the U.S. Postal Service, in the January 17 Chicago Tribune which communicates in a most effective way that the Postal Service is continually improving and striving to deliver the mail in the most efficient way possible. I would like to submit this article for the RECORD to remind each of us of the debt we owe those individuals who work behind the scenes at the Postal Service to insure our mail delivery.

THE POSTAL SERVICE AS WHIPPING BOY

(By H. K. Petschel)

Over the last few years, the United States Postal Service has been subjected to continual attack, much of it unwarranted. There are failings in the system, but by and large, the postal service has served the public much better than it has been given credit for.

The creation of a national postal service was one of the first acts of the founding fathers, part of their deeply held belief that a free nation was to be built on a bedrock of secure and uncensored communications. A national mail system was viewed as a necessity to help educate and unite a diverse and far-flung population. We should think twice before we take apart their handiwork.

Transporting the mails helped to build this country as well as link it by communcation. The national rail network, for example, was first subsidized by the government during construction. Once in operation, the railroads were subsidized in the form of lucrative mail contracts. The same procedure would later be used with the airlines.

Almost since the creation of the post office, it has been argued whether it was a business or a public service. No other segment of the government was expected to pay its own way, but for some reason the mails were considered different. The idea that the post office was a service organization prevailed. Because of this, the cost of mailing a letter remained artificially low for a century.

When you consider that for 200 years the American postal system was a political plaything, the service it historically provided is amazing. Until the passage of the civil service law, every postal employee was a political appointee. With the election of each new administration, there was a massive turnover in employment from the postmaster general down to the ranks of mail clerks and carriers.

From the 1940s to the 1960s, the old post office department suffered from benign neglect. The reorganization into the U.S. Postal Service occurred when the system was on the verge of collapse. No efforts had been made towards automation since the invention of the steam locomotive. The entire mail distribution system was designed around the railway timetable, which in the 1960s was dissolving. Little postal construction had occurred since the Depression and facilities were in grave disrepair. To bail out this monster of its making, Congress had the unenviable task of raiding the treasury or radically increasing the cost of mailing a letter.

Our representatives in Washington squarely addressed the issue. They washed their hands of the whole thing and created the "independent" U.S. Postal Service in 1971. This independence was severely limited. Congress had created the best of all possible worlds. The postal service was kept under almost continual government overview and direction. Any innovative action postal administrators propose can be endlessly debated, stalled or misdirected. At the same time, they can point the finger of blame at the postal service for escalating costs and service problems.

The argument is being made that the postal service should be open to competition. The welfare of the public will not be served by allowing the economically profitable areas of mail delivery to be stripped from it. Those who make it want the postal service to compete blindfolded by government regulation and with one foot in a cement barrel of national delivery requirements. If anybody wants to assume the job, they should be subjected to the same regulations and requirements. Any takers?●

A TRIBUTE TO TAMAQUA LIONS CLUB

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. YATRON. Mr. Speaker, it is a great honor and privilege for me to bring to the attention of my colleagues in the U.S. Congress, an outstanding achievement by the members of the Tamaqua Lions Club of Tamaqua, Pa.

I just learned of the Tamaqua Lions Club's efforts through the kindness of Ms. Evangelia Knepper. This excellent organization recently raised $5,350.75 and donated this sum to the Pennsylvania Department of Public Welfare to underwrite the total cost of the installation of a heliport at the Coaldale State General Hospital.

I know that my colleagues will join me in saluting the members of the Tamaqua Lions Club for their commitment and spirit of voluntarism. Their dedication to improving the health care of their community is most impressive. The people of Tamaqua can certainly look with pride at the accomplishments of their neighbors who are part of the Lions Club. The efforts of groups like the Tamaqua Lions Club will improve the quality of life in communities throughout this country. They have done an outstanding job, Mr. Speaker, and I know that we all commend them for their success.●

DR. MARTIN LUTHER KING, JR., HOLIDAY

HON. ROBIN TALLON

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. TALLON. Mr. Speaker, today I rise in support of H.R. 800, legislation to make January 15, the birthday of Dr. Martin Luther King, Jr., a national holiday.

The 1960's were volatile times that could have erupted in harsh, widespread violence at any time. Racial hostility and social injustice were to the point of irreparably tearing our country apart, and we were a nation divided.

Lives were lost in this battle for principles that are founded in our Constitution. Yet, even more would have been lost had the man leading the movement for social justice and equal opportunity not been a man of nonviolence. A man who understood, like Ghandi, that long-lasting change could best be accomplished through peaceful means.

This man was Dr. Martin Luther King, Jr.

Historically since his untimely death, his birthday has been a day to reflect on and rededicate the Nation to the purposes that he devoted and gave his life for—achieving the American dream of freedom, equality, reconciliation, and justice at home, as well as peace in the world.

Usually, as time goes by, the memory of our national leaders fades or tarnishes. Yet this is not the case with Dr. King. He stands among the small number of great leaders who gave their lives and for whom respect,

honor, and admiration have grown with each passing year.

But most importantly, a national holiday in Dr. King's name would not be just a celebration of one man's life. It would be a time to memorialize the ideals he stood for and fought for—ideals that many in our Nation now take for granted.

We are fortunate to have lived in the same generation as this man. We remember his struggle. It is only fitting to make his birthday a national holiday for future generations to learn from as well.●

CONDEMNING THE RECENT MASSACRE IN INDIA

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. RAHALL. Mr. Speaker, it is with a sense of deja vu that I learned of the tragic massacre of hundreds of immigrants by tribesmen in the Indian state of Assam this past weekend. For the second time within a year bitter prejudice has resulted in a horrible and senseless massacre of stunning proportions. Once again, the world is forced to view the devastating result of a massacre perpetrated by a cold, deep hatred of one faction of citizens toward another. India strives to be a democratic country and these immigrants were massacred because they were allowed to vote in the recent elections held in India.

The United States as a whole must stand up and condemn these ruthless acts of violence which stain the conscience of mankind. We must strive to set an example for the rest of the world to follow, guaranteeing the rights of people to live in a democracy. I condemn this horrible and tragic massacre and urge my colleagues to do the same.●

ENGLISH SPONSORS LEGISLATION TO REPEAL 8 PERCENT TIP TAX

HON. GLENN ENGLISH

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. ENGLISH. Mr. Speaker, today I am introducing legislation to repeal section 314 of the Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97-248).

The current law as included in President Reagan's 1982 tax package requires employers operating large food and beverage establishments to allocate a stipulated percentage of gross receipts among tipped employees. Even though reported tip income might total less than the 8-percent figure, an employer must allocate the difference among employees who had reported-tip shortfall. In other words, an employee may now be taxed upon income which he did not actually earn.

A coffeeshop waitress recently received her paycheck for a week's work. After applying the 8-percent tip withholding tax, her paycheck was blank and marked void. Withholding taxes on her wages equaled her weekly pay for 30 hours of work. Such taxation will encourage workers to move off the payrolls and onto the welfare rolls. I do not believe we can tax people on income they might not have earned.

I feel that this provision of the President's tax package imposes an unwarranted burden upon employees and employers. I feel it is unfair to tax a citizen based upon assumed income instead of actual income. It is neither good tax policy nor good law. Consequently, I urge Congress to repeal this law through legislation which I am introducing today.

The text of the bill follows:

A bill to repeal the provisions of the Tax Equity and Fiscal Responsibility Act of 1982 which require employer reporting with respect to tips.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 314 of the Tax Equity and Fiscal Responsibility Act of 1982 is hereby repealed, and the Internal Revenue Code of 1954 shall be applied as if such section (and the amendments made by such section) had not been enacted.●

CLEMENT B. SMAR, "ELK OF THE YEAR"

HON. FRANK HARRISON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. HARRISON. Mr. Speaker, on Saturday evening, February 26, 1983, the Hazleton Lodge of Elks is honoring one of its members, Clement B. Smar, as "Elk of the Year" for 1982-83.

Mr. Smar is an outstanding member of the Hazleton Community. He comes to civilian life with an impressive military record. In the Hazleton area, he has served on numerous committees including the youth committee and the fund raising committee.

Mr. Smar is employed as a customer service representative for Pennsylvania Power & Light Co. He and his wife Mary reside in Hazleton with their two children.

It is a pleasure for me, Mr. Speaker, to join with over 150 members of the Hazleton Lodge of Elks, and their ladies, in saluting Clement B. Smar as "Elk of the Year" and wishing for him and his family many more years of happiness and success in all that they undertake.●

VOLUNTARY AUTOMOBILE QUOTAS MUST BE EXTENDED

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. FORD of Michigan. Mr. Speaker, on Wednesday, February 9, the Christian Science Monitor published an editorial supporting an extension of the Japanese automakers' voluntary export agreement. I am totally supportive of this concept and agree that a 2-year extension is reasonable.

I recently wrote President Reagan and our Special Trade Representative William E. Brock urging their support. I urged them to heed the advice of the auto industry and labor in seeking a 2-year extension of the voluntary agreement. In addition I asked for a reduction in the current 1.68 million export limit.

I urge my colleagues to read this editorial and express support for this crucial extension.

JAPAN'S VOLUNTARY CAR QUOTAS

It may have been a mere statement of trade policy by Japan. But looked at in purely political terms it set off sharp criticism in Congress. We are referring to the remark of an official of Japan's Ministry of International Trade and Industry (MITI) that Japan will not extend its voluntary quotas on auto exports to the U.S. beyond 1984. Japan would seem best served by rethinking its position.

The issue is not one of imposing excessive trade restrictions on Japanese products, in this case automobiles. It is just the opposite—avoiding actual restraints on trade, such as embodied in domestic content legislation now before Congress. Such legislation would require that Japanese cars have a high percentage of U.S.-made parts before they could be sold in the U.S. A domestic content law passed the House late last year and proponents have cited Japan's decision to end voluntary curbs on car exports as proof that such a measure should be enacted into law.

Is Japan's stance on ending the curbs merely a bargaining position? That could well be the case. But Japan must realize that with the U.S. now gearing up for an election campaign, and several Democratic presidential contenders already supporting domestic content bills, this would not seem the most propitious moment for taking a tough line toward the U.S. regarding car sales.

After a particularly difficult period for Detroit the past year domestic sales are at last starting to perk up. U.S. factories are being reopened. Auto workers are being called back. Thus it seems indelicate for Japan to announce suddenly that it is going to return to business-as-usual with its exports to the U.S., especially since it has accepted restraints on various products sent to a number of European nations.

Japan currently enjoys a trade surplus of roughly $20 billion with the U.S. It seems only fair that there be some bending in the case of autos. Sen. Gary Hart, who is himself a Democratic presidential aspirant (though not supporting the domestic con-

tent bills), last week introduced a reasonable joint resolution that would urge the administration to negotiate an extension of the quotas for two years to give Detroit a breathing period following the recession. Senator Hart would also link future exports to the U.S. economy so that, if the economy became constricted, Japan would have to reduce its exports.

Is Japan listening?●

O JORNAL HONORS JOE RAPOSA

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. FRANK. Mr. Speaker, I am pleased to note that O Jornal of Fall River will present its annual Portuguese-American of the Year Award to composer Joe Raposa. O Jornal is a Portuguese language newspaper whose publishers, Ray and Cathy Castro have labored tirelessly to provide the people in southeastern Massachusetts and surrounding areas with news, sports, and entertainment information in Portuguese. In addition to their work on O Jornal, Mr. and Mrs. Castro have worked to assist the Portuguese immigrant community in and around Fall River to become a full part of American society while retaining their Portuguese heritage and culture.

It is in this spirit that the Castros established the Portuguese American of the Year Award. This year's recipient, Joe Raposa, represents the pride that Portuguese-Americans have in both elements of their nationality. Mr. Raposa, whose parents were born in the Azores, has achieved in America the highest honors bestowed by the music industry, including four Grammy Awards. His compositions include "Being Green," a soliloquy of self-realization that has been incorporated into the Presbyterian Hymnal and is the International Anthem of the Girl Scouts, and "Sing" an immensely popular song that has been recorded in every major language. In addition to his composing skills, Joe Raposa has also made his mark in the academic aspect of his art. He is a member of the Visiting Committee of the Board of Overseers of Harvard College and vice chairman of the board of the Nelson A. Rockfeller Empire State Institute for the Performing Arts. In short, Joe Raposa is an artist of genuine skill and creativity.

I congratulate Joe Raposa on his award and I commend Ray and Cathy Castro on their devotion and sensitivity to the Portuguese-American community.●

AN AMENDMENT TO THE COMPREHENSIVE ENVIRONMENTAL RESPONSE, COMPENSATION, AND LIABILITY ACT

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. HAMILTON. Mr. Speaker, I bring to the attention of the House the bill which I am introducing today to amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (the superfund law) to clarify certain provisions relating to remedial actions at facilities owned and operated by a State or municipality.

Current law requires that States pay 50 percent of the cleanup costs of hazardous waste sites owned by it or its political subdivisions, even when those sites were leased to private industries who were responsible for toxic waste contamination.

This bill provides that a site would have to be both owned and operated by a State or its subdivision before the State became liable for 50 percent of the cleanup costs. If a hazardous waste site is owned by a State or municipality, but not operated by it, the State would be liable for only 10 percent of the cleanup costs under this bill.

The House approved this same measure last year on September 8.

My support for this bill is prompted by the problems that we have had in trying to clean up a hazardous waste site in Seymour, Ind., in my district. In the late 1970's, it was discovered that the Seymour Recycling Corp., a privately owned company operating on land owned by the city of Seymour, was improperly disposing of chemical wastes, and had created a hazardous waste dump with 60,000 rusting barrels of toxic material and 500,000 gallons in bulk storage. The chemical wastes were polluting the surface water, and noxious gases were being released into the air. Mysterious clouds were reported over the site. At one point, several barrels spontaneously exploded.

In 1980, the Chem-Dyne Corp., which owned Seymour recycling, was put into receivership. As a result, there were no private funds available to clean up the Seymour recycling facility.

The cost of total cleanup of the site has been estimated at $30 million. An agreement negotiated by the EPA in October of last year with 24 of the generators of the waste provides $7.7 million for surface cleanup, with a $15 million performance bond posted to cover cost overruns.

Subsurface cleanup of the soil and ground water remains to be dealt with. Agreements reached so far will not cover the cost of subsurface cleanup and containment. Without complete subsurface cleanup, toxic wastes will likely contaminate the local water supply and the soil of surrounding farmlands, further endangering the health of area residents.

Neither the city, the county, nor the State of Indiana have sufficient funds to pay the 50-percent share required to secure assistance from the superfund for this necessary subsurface cleanup. Without the passage of this bill, the superfund is simply out of reach for not only the Seymour recycling facility but also a number of other hazardous waste sites in the same circumstances.

Mr. Speaker, I urge the speedy consideration of this bill.●

A TRIBUTE TO BISHOP JULIJANS VAIVODS

HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. DONNELLY. Mr. Speaker, this month at the Vatican, Bishop Julijans Vaivods of Latvia received the red hat of a cardinal from Pope John Paul II. His elevation at this time is an important symbol that deserves our notice.

Julijans Vaivods was ordained a Catholic priest in 1918. He has spent his entire adult life ministering to the Catholic minority of that nation, undeterred by the illegal Soviet annexation in 1944. He has worked quietly, serving his people and his faith while avoiding political confrontation. Still, in the 1950's, he was exiled to Moravia for 2 years because he dared to write five volumes of theological works. In 1964, while attending the Second Vatican Council, his consecration as a bishop had to be kept secret for fear of reprisal by Soviet authorities. Fortunately this month, Bishop Vaivods was permitted to travel openly to Rome for his elevation to cardinal.

Cardinal Vaivods is the first person named to the sacred college while working in territory claimed by the Soviet Union, although the Vatican like the United States refuses to recognize Soviet sovereignty.

The elevation of Cardinal Vaivods stands as a rallying point for all of us who admire the independent will of the Latvian people and who look forward to the end of the Soviet occupation and the restoration of an independent Latvian state.●

A TRIBUTE TO THOMAS P. KENNY

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. MATSUI. Mr. Speaker, it is with great pride that I rise to address my colleagues in this chamber today regarding the achievements and talents of Mr. Thomas P. Kenny. This tribute marks only the beginning of the Sacramento community's salute to Mr. Kenny, as many community leaders will gather tomorrow at the Spirit of Life award dinner honoring this remarkable public servant.

The City of Hope, which serves as a national pilot medical center dedicated to providing free health care to all Americans in need, uses this event as a forum by which to present its highest award to outstanding Americans who have made a career of helping others. Tom Kenny richly deserves this recognition, as his years of service with organizations ranging from the American Federation of Musicians to the United Way and the Sacramento Symphony Association unquestionably demonstrate.

Given his proven record of compassion and assistance on behalf of his fellow man, it is only fitting that we join together and work to establish the Thomas P. Kenny research fund at the City of Hope Medical Center in Duarte, Calif. Tom's selfless service to furthering the lives of all Americans, whether in Sacramento or elsewhere in our Nation, reflects the dominant theme of the City of Hope's philosophy—that of helping others. Without doubt, Tom's continued adherence to this principle has enhanced the lives of Sacramento's citizens beyond measure.

At this time, I am certain that all Members of this House, and particularly our California delegation, will join me in extending best wishes to Tom Kenny. As the Representative of the Third District of California in the Congress of the United States, it is my great honor to recognize Tom Kenny's tremendous gift of self to the Sacramento area, to the entire State of California, and to this Nation.●

DECA—A SUCCESS STORY

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. SMITH of New Jersey. Mr. Speaker, I want to call your attention to an outstanding student organization whose work has exemplified the democratic philosophy of free enterprise and community service since 1946. DECA—the Distributive Education Clubs of America—is the only national student organization operating through the Nation's schools to attract students to careers in marketing, merchandising, and management.

The young men and women of DECA, 250,000 strong, have a unique mission. Their focus—always—is to develop a greater understanding and appreciation of marketing, merchandising, and distribution while at the same time increasing civic consciousness, building social intelligence, and leadership training.

In my opinion, Mr. Speaker, the symbol of the DECA success story is seen through the enthusiasm and motivation of its student membership. Through involvement in vocational education and exposure to the business community, the DECA advantage should not be surprising. After graduation, 96 percent of all student members are either employed or begin their pursuit of higher education.

At this time, I want to call the attention of my colleagues to a particular project which has been sponsored by DECA members in my congressional district. As part of the national shoplifting prevention campaign, the students of the Cinnaminson High School Chapter of DECA have undertaken an extensive research and education project to alert parents, students, and faculty members of the seriousness of this crime.

Through direct involvement with students and faculty, including a student shoplifting survey, the DECA members have worked to increase awareness of the crime and consequences of shoplifting. Activities have included contact with area business establishments, newspaper, radio, and television exposure, a poster contest, and even a meeting with Governor Kean who proclaimed "Anti-Shoplifting Week" in New Jersey.

In a February 9 letter to my office, President Reagan mentioned the observance of "Anti-Shoplifting Week" as "an excellent opportunity for all of us to reflect on the seriousness of the crime of shoplifting." He joined me in "commending the students and staff of Cinnaminson High School and Suzanne H. Smith of the Distributive Education Clubs of America for their leadership in this project."

Mr. Speaker, this project is only one example of public service programs sponsored by DECA chapters across the Nation. The thousands of DECA chapters serve as showcases for student achievement and progress. They are a natural outlet for the expression of individual talent.

DECA members believe that the success of our Nation rests upon the American philosophy of free enterprise. I agree with their position, Mr. Speaker. I believe that our system is working, and will remain stronger than ever as long as concerned citizens continue to care. I am certain my colleagues will agree that we owe a debt of thanks to the Distributive Education Clubs of America, and all American citizens who work to keep our Nation strong and free. Keep up the good work, DECA, and best wishes for all of your future endeavors.●

DR. VICTOR F. GRECO, JR., HAZLETON AREA JAYCEES DISTINGUISHED SERVICE AWARD RECIPIENT

HON. FRANK HARRISON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. HARRISON. Mr. Speaker, on Saturday, February 26, the Hazleton area Jaycees is honoring Dr. Victor F. Greco, Jr., with their Distinguished Service Award. This award is presented annually to that man or woman under 36 years of age, who best embodies the Jaycees' ideals of service to the community.

This is the Jaycees' "Man of the Year Award" and no one could deserve it more than Victor Greco, Jr.

Dr. Greco is involved with numerous organizations and community groups including the American Heart Association, of which he is president of the northern Pennsylvania region; the Association for the Blind; Easter Seals; Multiple Sclerosis; Red Cross; Boy Scouts of America; the Chamber of Commerce and, of course, the Hazleton Jaycees.

Dr. Greco and his wife Maria reside in the city of Hazleton where he is an optometrist specializing in cases of subnormal vision.

Mr. Speaker, it is a genuine pleasure for me to join with all of the members of the Hazleton Jaycees and, indeed, with the greater Hazleton community in saluting Dr. Victor F. Greco in his many accomplishments and wishing him and his lovely wife many more years of success and happiness in all that they undertake.●

THE ARMED CAREER CRIMINAL ACT OF 1983

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. WYDEN. Mr. Speaker, today I am reintroducing the armed career criminal bill. This bill is identical to a bill recently introduced in the Senate by Senator ARLEN SPECTER and is very similar to legislation Senator SPECTER and I sponsored in the last Congress.

This bill would permit Federal prosecution of an individual who, after two

or more felony robbery or burglary convictions, is charged with a subsequent armed robbery or burglary. Conviction would trigger a minimum 15-year sentence in a Federal penitentiary.

The career criminal bill passed the Senate by a vote of 93-1 last September and, as part of a comprehensive seven-part crime package, passed the House of Representatives 271-27 on December 20. Unfortunately, President Reagan vetoed this legislation—the most important crime bill passed by the Congress in a decade—after the 97th Congress adjourned, thus avoiding a certain veto override.

Nearly 25 million American households—3 out of every 10—were effected by crimes involving theft or violence in 1981. An amazingly large percentage of these crimes were committed by career criminals. A now-classic 1972 University of Pennsylvania study showed that one-half of all crimes—and full two-thirds of all violent crimes—were committed by only 6 percent of the criminal population.

Mr. Speaker, because of the havoc wreaked by career criminals on the lives and property of millions of innocent victims each year—and because the Federal Government in recent years has failed to play an effective role in helping local law enforcement officials fight crime—I think this legislation is again worthy of serious consideration by the Congress.

The President's opposition to the crime bill passed by the last Congress focused on a portion of the package that would have created a Cabinet-level drug czar to oversee Federal anti-narcotics efforts. He also expressed some concern about an amendment to the career criminal bill that requires the acquiesence of the local prosecutor before Federal prosecution could commence. However, no specific constitutional defect was cited and, in the real world of law enforcement, it is highly unlikely that a U.S. attorney would ever seek to prosecute a career criminal over the objections of a local prosecutor.

The President's veto was a major disappointment to those of us in Congress who are convinced that the Federal Government needs to do more in the fight against crime. Crime is on the rise at a time when local criminal justice resources are stretched to the limit—and beyond. Prosecutors and investigators are overworked, a huge backlog of cases is pending in our courts and State prisons and local jails are severely overcrowded. The result: Excessive plea bargaining, too many probationary sentences and too early parole for many serious offenders.

There are those who would say that the career criminal bill is an unwarranted extension of Federal criminal jurisdiction. I disagree. It is wholly consistent with the Constitution and existing case law. And, it contemplates only a narrow expansion of the Federal Criminal Code—in a manner that targets the worst habitual offenders and thus can effectively provide our beleaguered local law enforcement officials with a real helping hand.

Even if only a few hundred career criminals are subject to Federal prosecution, this in itself would prevent thousands of future crimes. And this tough, no-nonsense new Federal statute would have a substantial deterrent effect.

Awareness of this new law would quickly filter down to the street. Twice-convicted career criminals would think long and hard about the consequences of a third conviction. Getting caught again would no longer mean another trip through the revolving door of an overloaded local criminal justice system. They would no longer be able to count on a return to the streets in a matter of a few hours, weeks, or months. Instead, they would be faced with the very real possibility of spending the next 15 years in a Federal prison.

Some argue that Federal resources are equally strapped and Federal prisons equally crowded. However, the Federal prison population grew less than half as fast as the State prison population last year and the President's new budget calls for the Federal prison system to be expanded by almost 2,000 beds.

Even without a major increase in prison capacity, selective prosecution and incarceration of the worst career criminals can significantly reduce the overall crime rate without straining prison resources. A widely cited recent Rand Corp. study showed that, by focusing on the worst offenders, the robbery rate could be cut by 15 percent at the same time the total number of robbers incarcerated is actually reduced by 5 percent.

Of course, selective incarceration flies in the face of the traditional liberal theory of rehabilitation. I will match my record on civil liberties with any Member of Congress, but we are talking here about those who have made a career of crime. We must keep the fate of hundreds of future innocent victims in mind and must recognize that the career criminal has forfeited the right to be treated with kid gloves.

Commonsense should tell us that—during a time of reduced resources at every level of government—we should focus our crime fighting efforts on habitual offenders. Career criminals belong in prison, not on the streets. This effort can and should be undertaken at every level of the criminal justice system—including the Federal level. I happen to believe that when violent crimes are committed by career criminals, the Federal Government has a legitimate role to play in protecting the American people. The Armed Career Criminal Act is a solid step in the right direction. I urge my colleagues support.●

THE SHAME OF THE GULAG: FORCED LABOR IN THE SOVIET UNION

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. BROOMFIELD. Mr. Speaker, I want to call your attention to a recently released Department of State study concerning forced labor in the Soviet Union. I commend the Department for its fine efforts and strongly recommend that all of us in Congress read this document and seriously consider the implications of its findings. It very clearly points out that labor camps do, in fact, exist and that wholesale violations of human rights are occurring every day in the Soviet Union. The study also reemphasizes the fact that there is a real discrepancy between the official Soviet line and what is really happening in the U.S.S.R.

As all of you know, the Senate and House instructed the Department of State to undertake this official study. The inquiry revealed that the Soviet forced labor camp system is the largest in the world comprising an elaborate network of some 1,100 forced labor camps located in all regions of the Soviet Union. Imprisoned in these camps are over 4 million forced laborers. At least 10,000 of these laborers are classified as political and religious prisoners.

In order to serve the economic and political purposes of the state, the Kremlin has chosen to maintain an extensive forced labor system. Workers in these camps are used to execute various developmental projects and produce large amounts of primary and manufactured products for both domestic use and Western export markets. Forced labor has been used on pipeline projects in the past and it is now being used in domestic pipeline construction. Much of the work performed by these forced laborers is heavy labor—both difficult and dangerous. These innocent Soviet citizens are victims of the Soviet system. They were shipped away from their families to remote work areas and are forced to work in brutal climatic conditions under the watchful eyes of KGB guards.

Many of these laborers are being punished because they asked only that their country obey its own laws. Some are imprisoned in those harsh and lonely camps because they distributed leaflets, or tried to legally emigrate from the Soviet Union. Many prisoners were speaking out about violations

of human rights, or merely trying to practice their religion in a country which claims to respect human rights.

The existing forced labor program in the U.S.S.R. is in obvious contravention of the United Nations Charter as well as international law agreements, including the Helsinki accords. Although the International Labor Organization investigated allegations concerning these Soviet practices, Soviet authorities refused to provide satisfactory responses.

I believe that the brutal forced labor camp system is but another example of what is wrong and dangerous in the Soviet Union. A country which claims strict adherence to international accords is, in fact, violating them on a large scale. A nation which supposedly respects human rights is treating its own citizens in this savage and insensitive way. A country which claims to want peace, and often publicly rejects the concept of using force, brutalizes its own religious and political dissidents and justifies it all by saying that Soviet law requires that crimes against the state be punished that way.

It is sad, but true, that the rulers of the Kremlin have devised a simple formula for staying in power: Systematically destroy human rights in the Soviet Union. I, for one, place little trust in a regime which maintains such an inhuman and cruel political system. If those suffering souls languishing in Soviet camps could speak to us today, I am certain that they would advise this Nation to proceed with utmost caution in its dealings with Andropov and company lest we become a captive nation in the future.

During this critical period in our Nation's history, when all of us in this Chamber are making major decisions which will affect the security of future generations, we should study this document carefully and remember that when we negotiate with the Soviet Union we are dealing with the creators of the Gulag.●

A FISCAL ALTERNATIVE TO WITHHOLDING

HON. STEVE GUNDERSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. GUNDERSON. Mr. Speaker, we have all had thousands of requests from our constituents to repeal the section of the Tax Equity and Fiscal Responsibility Act of 1982 that created 10 percent withholding on interest and dividend income.

At the same time, we recognize that a simple repeal of this compliance measure would cost an estimated $26 billion in Federal revenues through 1988—that is between $4 billion and $5 billion annually. In a time when the estimated annual Federal deficit is approaching $200 billion, a simple repeal is, therefore, unlikely.

Accordingly, I am today introducing legislation to repeal withholding on interest and dividend income and replace its lost revenue with revenue from other sources. In short, Mr. Speaker, I am creating a bona fide fiscal alternative to withholding.

My replacement revenue sources are threefold. First, the legislation would increase the maximum marginal individual income tax rate from 50 percent to 55 percent. This would mean that single individuals with adjusted gross incomes in excess of $55,300 and married individuals filing jointly with adjusted gross incomes in excess of $109,400 would be taxed at 55 percent, rather than at 50 percent, on that portion of their adjusted gross incomes that exceed those amounts.

Second, the bill would repeal recent changes that liberalized the windfall profits tax on oil.

Finally, the net interest exclusion scheduled for implementation on January 1, 1985, would be repealed. This exclusion would have permitted those few individuals who have more interest income than interest payments to exclude a portion of the difference from their income.

Mr. Speaker, it is estimated that these three changes in tax law should bring in $25.4 billion in Federal revenues through 1988—thereby offsetting all but 2.3 percent of the anticipated lost revenue resulting from a repeal of withholding on interest and dividend income.

I, therefore, encourage my colleagues to join me in cosponsoring this most reasonable method of repealing withholding.●

ON THE 50TH ANNIVERSARY OF HITLER'S RISE TO POWER

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. HOYER. Mr. Speaker, 50 years ago, Adolf Hitler assumed the Chancellorship of the Third Reich within the framework prescribed by the German Constitution. The origins of his rise to power were many: The Treaty of Versailles; mass unemployment and an inflation rate that left the mark virtually worthless; a generation embittered and disillusioned who wanted at all cost to avoid a repetition of World War I; a nation raised from its knees by the mesmerizing oratorical skills of a political genius. Regardless of the reasons for Hitler's rise to power, the results were cataclysmic.

Why do we commemorate one of the greatest injustices committed by man upon man? There are those who cry out that enough is enough—enough has been said, and enough guilt has been shouldered; others lament that never must it be forgotten. To paraphrase Count Leo Tolstoi, the object of history is self-knowledge, that of nations and of humanity.

One of the characters brought to life by Pulitzer Prize-winning author William Styron, said that someday he would understand Auschwitz, but immediately recanted and said that Auschwitz would always remain inexplicable. By further explanation, he stated that, "the most profound statement yet made about Auschwitz was not a statement at all, but a response. The query: 'At Auschwitz, tell me, where was God?' And the answer: 'Where was man?' "

In Nazi Germany, ordinary, unremarkable men and women from all walks of life converged at a fortuitous, crucial moment in history and, under the hypnotic, messianic leadership of Adolf Hitler, assaulted humanity. A young man of sharp intellect with a doctorate in romantic drama, unable to break into the theater, turned to politics. Joseph Goebbels, as chief of the Nazi Party propaganda from 1929, and German Minister for Propaganda and Public Enlightenment from March 1933 to the end of the war, was the progenitor of the elaborate machine built to permeate the whole of German civilian life with Nazi ideology. Another young man with a conventional Catholic upbringing, son of a tutor to the Bavarian royal household, entered the military service as an officer cadet. Two years later, at the age of 19, he entered the University of Munich to study agriculture. This man, Heinrich Himmler, later founded Dachau as a model concentration camp and his control included the Gestapo and the entire concentration camp system.

There were many others: Eichman and his "Final Solution"; Muller leading the Gestapo; Hoess in charge of genocide at Auschwitz. The list is endless. It is comprised of artists, lawyers, bankers, doctors, nurses, teachers, engineers, architects, and clerks.

It is because of this extraordinary turning of ordinary people away from their fellow man that we find it so absolutely necessary to remember what happened 50 years ago. It is why we must expose and examine these chains of events, why we must not and will not forget.

Fifty years ago, just after Hitler came to power, the Oxford University Student Union voted more than two to one in support of a resolution that said, "this house will in no circumstances fight for king or country." It is thought that this vote gave a signal to Hitler that the young men of Britain were not inclined to do battle for their country.

Just last week students from this same debating society took up the subject again, in a similar context. During the debate, one voice rang out over all the rest. Lord Beloff, one of those men who voted for the original motion in 1933, took the floor and told the members he had "a duty to make atonement (for that action), and to warn against the kind of foolish arrogance" which prompted the students to take such a stand. He concluded, "I beseech this house not to make this mistake again." The fellows at the Oxford Union, perhaps taken by his hindsight, voted overwhelmingly to oppose the resolution.

This is why we must make this fundamental exercise in reviewing the events of history—even such infamy as was the reign of Hitler. We must be vigilant, as is Lord Beloff, and we must remember.●

MODIFIED DAIRY PRICE SUPPORT PROGRAM

HON. WYCHE FOWLER, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. FOWLER. Mr. Speaker, I am pleased to introduce today, for myself, and Mr. DOWDY of Mississippi, Mr. SPRATT, and Mr. MOORE, the modified dairy price support program. This legislation would correct serious problems facing the dairy industry, the taxpayers, and America's milk consumers.

The dairy price support program was first enacted in 1949. It is intended to provide a reasonable return to dairy farmers and an efficient supply of milk to the consumer. In recent years, however, the dairy program has become quite costly due to a tremendous surplus of dairy products.

During the 1981-82 marketing year, the Commodity Credit Corporation purchased some 13.8 billion pounds of milk products—over 10 percent of all milk produced by farmers—at a staggering cost too the taxpayer. In an effort to curtial overproduction, last year the Congress enacted, as part of the Omnibus Budget Reconciliation Act, a tax on production of milk. Specifically, it allowed the Secretary of Agriculture to deduct as of October 1, 1982, 50 cents per hundredweight from the proceeds of the sale of all milk marketed commercially and remit the proceeds to the Commodity Credit Corporation as an offset against the cost of the program.

This provision, however, has been enjoined by the Federal district court for the State of South Carolina and opposed by many dairy farmers as inequitable. The Secretary of Agriculture recently announced his intention to try to collect both the original 50 cents and an additional 50 cents, for a total of $1, on all milk marketed as of April 1 of this year. I would expect this proposal to result in additional litigation and a protracted court battle.

The bill we are introducing today would repeal the dairy tax enacted in the Omnibus Budget Reconciliation Act and substitute a decrease in the price support for milk. The price support will be lowered $1 from $13.10 per hundredweight to $12.10 per hundredweight for the period beginning April 1, 1983, and ending September 30, 1984. If during that time the Secretary determines that the CCC will purchase less than expected quantities of dairy products, he would have the authority to raise the support price up to a maximum of $1.

Effective October 1, 1984, we would revert to a price support based on the concept of parity. The exact price support level would depend upon the quantity of dairy products that the Secretary expects the CCC to purchase during the forthcoming fiscal year.

We are not, of course, members of the Committee on Agriculture. However, it seems to us that the current situation requires immediate and decisive action. The current tax on dairy production has been rendered unenforceable by court action. Overproduction of milk continues unabated. The cost of the dairy price support program is unacceptable to the taxpayers and unnecessary to meet the longstanding objectives of the price support program. We therefore urge our colleagues on the Agriculture Committee to give serious thought to the modified dairy price support program. We defer to their expertise and are more than willing to modify the bill according to their suggestions. But this is a serious and costly situation that demands effective and expeditious action. Thank you.●

THE ECONOMIC REPORT

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for Wednesday, February 23, 1983 into the CONGRESSIONAL RECORD:

The report follows:

THE ECONOMIC REPORT

Each year the President lays out his program in three important messages to Congress: the State of the Union address, the federal budget, and the economic report. The news media usually concentrate their attention on the first two documents. They only incidentally allude to the economic report.

That habit is an unfortunate one, and it should be changed. From the pages of the economic report, I learn as much about the President's economic philosophy, his plans, and his hopes as I do from any other document. This year's 287-page volume reviews the condition of the economy in depth and discusses international debt, world trade, deregulation, and capital investment. The treatment of these issues is comprehensive.

The following are a few of my general observations on the economic report:

Although the economic report describes unemployment as "the most serious economic problem facing the United States" and then predicts very slow progress against it, the report rejects programs to create jobs, recommends cutting back spending for training, and states that a program of public works will waste money. The President is correct in his view that the best way to create jobs is to allow a substantial economic recovery to take place, but he apparently believes that no steps can be taken to help the millions of American workers who have been idled by our longest and deepest recession. He favors more limited efforts aimed at specific groups that face high unemployment even when times are good. Thus, he wants tax credits for firms that hire the long-term unemployed and a subminimum wage to encourage firms to hire young people.

I am sympathetic to countercyclical policies which provide jobs through public works and public service, and I am pleased to see Congress, with the support of both political parties, moving toward such policies. The jobs that are created can help ease the hardships brought on by the highest unemployment in 30 years. Also, I believe that some additional measures of support are necessary to alleviate these gravest hardships. An extension of unemployment benefits and a better "safety net" for the jobless and poor are in order.

In the economic report, the President praises the Federal Reserve's policy of gradually slowing the growth of the money supply. He urges that the agency not change the policy. Strong support of the Federal Reserve's effort is surprising, at least to me, because that agency's tight-money, high-interest program has been the chief cause of the recession. I have argued that the Federal Reserve should follow a more accommodative policy whose near-term goal would be a lowering of interest rates.

Stressing that reduced deficits are critical to economic recovery, the economic report argues for increased taxes in future years so that deficits will not continue to mount. The Chairman of the Council of Economic Advisors has noted that it would "be better to have a good tax increase than a bad budget deficit." I agree with his statement. However, the President flatly rejects adjusting taxes by cancelling tax indexing—a provision of law, due to become effective in 1985, which will keep inflation from pushing taxpayers into higher tax brackets. While tax indexing may be a good idea, the plain fact is that we simply cannot afford it in the short term.

While the President applauds the 1981 cut in business taxes and supports cutting them further, the economic report does not repeat his recent, celebrated remark that the corporate income tax should be repealed. I agree with the President's emphasis on the importance of having an adequate rate of capital formation. It is a crucial challenge for economic policy in the 1980's.

In some respects, the most surprising part of the economic report is the President's ringing defense of free trade. In the Presi-

dent's judgment, the nation's trade problems are not the result of unfair trade practices by other countries. He blames our trade deficit—which exceeds $42 billion this year—on the high exchange rate of the dollar. He says that "the main sources of the U.S. deficit are to be found not in Paris or in Tokyo, but in Washington." The economic report will tolerate some governmental intervention in the trade sector if it is carefully focused to convince other countries to reduce barriers to trade, but the report goes on to contend that Japan has gained no advantage from its restrictive trade policies. This is a point to which exception will be, and has been, made.

The economic report carries a blunt warning for America's hard-pressed basic industries. It says that the main problem of America's basic industries (automobile and steel manufacture, in particular) may have been brought on by foreign competition, but it notes that the competition has helped boost efficiency and has aided consumers. The tendency of the basic industries has been to blame foreign countries and to seek protection against imports. The report says, however, that "prices and wages in some U.S. heavy industries are probably too high to be sustainable in an integrated world economy."

The President believes that the trade deficit does not show America's inability to compete. Citing the importance of international trade to our economy, he says that protectionist measures would invite retaliation, damage workers, hurt businesses, and harm farmers. A major goal of American trade policy will be to limit protection for the basic industries. Even so, the President says that he will not ignore the "trade distortion practices" of foreign governments, and he acknowledges that there are highly protective barriers in place in Japan and Europe in agriculture, technology, services, and investment.

At a time when demands for protection against imports and calls for subsidies of exports have been so strong, I find the President's support for an open trading system refreshing. I also share his confidence in the long-term competitiveness of the United States.●

A TRIBUTE TO REV. KONSTANTINE TSIGAS

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. COURTER. Mr. Speaker, on February 26, Rev. Konstantine Tsigas will be honored by his friends for his many years of service at St. Andrew's Greek Orthodox Church in Randolph, N.J. He has been an inspiration to all who know him and has worked tirelessly to bring his congregation the message of God.

Reverend Tsigas grew up in the village of Sitarlona in Greece, and it is there that he was inspired to preach the Gospel. In 1953, he went to the University of Athens Theological School and, in November 1962, was ordained a priest in the Greek Orthodox Church. Just 1 month later, he, his lovely wife, Spiridoula, and his children sailed on an ocean liner to this country in order to spread the faith to Greek immigrants in America. The people of St. Andrew's wisely knew a good man when they saw one, and asked the Reverend to be the priest for their church.

The church serves all of Morris, Sussex, Warren, and parts of Somerset Counties and has grown from 75 families to nearly 400, a testimony both to the ability of Reverend Tsigas and the love and concern which exudes from the congregation. The church was originally located in Dover, but the amazing growth of the congregation led to a new, larger home in Randolph, built in 1975.

Since Reverend Tsigas is the only Greek Orthodox priest in the area, he drives more than 3,000 miles a week to care for the needs of those people under his attentive watch. His devotion to the service of God and the Greek community is reflected in his commitment to his daily work and responsibilities.

As an American, Reverend Tsigas can testify to the value of our constitutional right to religious freedom. He bravely fought the advance of Hilter as an officer in the Greek Army during the Nazi occupation in World War II, and during the attempted Communist seizure of power during the Greek civil war.

I am pleased to share with my colleagues the valuable contributions this Greek immigrant and his family have made to the people of northern New Jersey. I join St. Andrew's Church in honoring this man revered for his wisdom and compassion for his fellow man. My best wishes to Reverend Tsigas, his wife, Spiridoula, and their three children, Demetrios, Vasiliki, and Kathryn, so that he might continue his life's work with all God's blessings.●

ILLINOIS VALLEY: HUSTLING FOR JOBS

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 23, 1983

● Mr. CORCORAN. Mr. Speaker, the people of my home county of La Salle in north central Illinois have been suffering since 1979 from rates of unemployment substantially above the national average. Back home, the importance of assisting small businesses to the creation of new jobs is well-recognized, as is discussed in a report on several meritorious efforts there by the Chicago Tribune's veteran columnist, Bob Wiedrich. One of Mr. Wiedrich's continuing themes, in addition to the shortcomings of congressional operations, is the low return in expenditures of tax dollars Illinoisans send to Washington. Though he does not mention Illinois Valley citizens' efforts to improve that situation, it was my pleasure to recently participate in the announcement of Federal discretionary bridge funding for the La Salle-Peru Bridge—the result of another combined effort by valley residents.

My colleagues may well find this account of local cooperation in pursuit of employment opportunities and a better life to include ideas which can be applied in their districts, and I therefore insert it in the RECORD.

[From the Chicago Tribune, Feb. 22, 1983]

WE ARE HUNGARY FOR JOBS

LA SALLE, ILL.—"We're hungry for jobs," the Downstate chamber of commerce official declared. "And when you're hungry, you get out and hustle."

"You don't really have to go out of state to find people who care about small business," wrote Leonard J. Corti, the chamber of commerce executive director from Downstate La Salle. "One can find a very healthy attitude in the Illinois Valley."

I accepted Corti's invitation to visit that region of north central Illinois, about a hundred miles southwest of Chicago along Hwy. 80, and what I found was an amalgam of business, labor and elected leaders working to overcome the ravages of 16.8 percent unemployment brought on by recession and the successful recruiting efforts of Sun Belt states.

"The community decided that it wasn't going to get big employers like Ford or General Motors to come in and solve our unemployment problems," said Mayor Don Baker of Peru, La Salle's sister city along the Illinois River. "So we decided to settle for many small companies with as few as six or eight employees on which to build a firm industrial tax base."

Judging by the growth statistics, the game plan is working. In the last five years, the Illinois Valley, with 140,000 residents, has become home to 15 new light manufacturing ventures, some with as few as 6 to 10 employees, for a total of 1,000 jobs. Their combined payrolls represent $18 million a year.

And complementing those are the relocations of five major trucking lines to the valley that employ 700 people, for a total annual payroll of $22.5 million. The new ventures have helped boost sagging real estate and sales tax revenues. They have provided jobs.

More important, they have offered hope to people whose economy was devastated when the valley's single largest employer started closing its doors five years ago for a move to Alabama.

Westclox, a company that had been in the La Salle-Peru area for almost a hundred years, finally closed its doors in 1980. At its peak, the firm employed 5,000.

Worse, as the recession has deepened, the valley has been losing an increasing number of its most talented young people. About 80 percent of those who go to college do not return. And what makes that figure even more staggering is the fact that more than 50 percent of all high school graduates go to college.

Community leaders are moving to minimize traditional dependence on a handful of major employers by seeking greater diversity of smaller industries.

In keeping with that philosophy, about 20 small businesses—ranging from advertising to light manufacturing—have located in the first phase of an 80-acre industrial park at La Salle underwritten by local interests.

Twenty-five businessmen from the cities of La Salle, Peru, Oglesby and Spring Valley contributed $2,500 each in 1976 to form CIVIC, the Central Illinois Valley Industrial Combine. Four local banks participated by offering about $500,000 in reduced-interest loans.

And that enterprising venture has generated almost 70 more jobs as the valley communities fight their way back toward full employment, inch by laborious inch.

Lower tax rates and a good work ethic in the area recently prompted the Sunstrand Corp.'s Hydro-Transmission Division to consolidate machine tool operations in La Salle from two other cities. The United Auto Workers cooperated by agreeing to a wage freeze and modest work reduction.

Felix Fenza of the operating engineers' union proudly pointed to a labor-management committee formed to defuse potential labor problems, thereby enhancing the attractiveness of the valley to new industries. The group uses bumper stickers and outdoor signs to display its slogan, Cooperation Country. And its members really mean it.

"We've found we can help the area and help ourselves at the same time," Fenza said. "That slogan means we're looking for jobs together."●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, February 24, 1983, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

FEBRUARY 25

8:30 a.m.
Finance
Taxation and Debt Management Subcommittee
To hold hearings on S. 70, to delete certain IRS provisions which treat Members of Congress separately with respect to living expense deductions.
SD-215

9:30 a.m.

HOUSE OF REPRESENTATIVES—*Thursday, February 24, 1983*

The House met at 11 a.m.

Rev. Philip A. Tammaru, Estonian Lutheran Church, Seabrook, N.J., offered the following prayer:

O Lord, Author of Liberty, You have endowed us, Your children, with certain unalienable human rights. Help us to secure them to ourselves and to our neighbors in the world.

We see these rights curtailed in many nations. Today we remember especially Estonia, declared independent on this day 65 years ago. Now Estonia is in the clutches of a totalitarian Communist power.

Help us to preserve Your world through human works of civil righteousness. Restore the dignity of man.

Endow with the spirit of wisdom those to whom the authority of government is entrusted that there may be justice and peace at home and abroad.

Help us to eliminate terror and oppression, that peace may prevail with righteousness and justice with order; and that men and women from various cultures and with differing talents may find with one another the fulfillment of their humanity. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

REV. PHILIP A. TAMMARU

(Mr. HUGHES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUGHES. Mr. Speaker, I am pleased to acknowledge the presence of my constituent, the Reverend Philip A. Tammaru. Reverend Tammaru is pastor of the Estonian Evangelical Lutheran Church of Seabrook, N.J.

Reverend Tammaru offered the prayer in the House of Representatives this morning, which is the 65th anniversary of the declaration of independence of the Republic of Estonia.

Reverend Tammaru was born of Estonian parents in St. Petersburg, now Leningrad, Russia. He attended school in Estonia and graduated from the School of Theology of the University of Tartu in 1934. In 1935 he was ordained by the archbishop of the Estonian Lutheran Church in Tallinn, the capital of Estonia.

After immigrating to the United States in 1950 Reverend Tammaru served parishes in Ohio for more than 20 years before coming to New Jersey in 1973 where he presently conducts services in Estonian and German as well as in English at the Estonian Evangelical Lutheran Church of Seabrook.

Pastor Tammaru has been awarded the Crusade for Freedom Award for outstanding assistance against aggression. He has served two terms as a member of the Estonian-American National Council.

In addition to his service in the Estonian Evangelical Luthern Church of Seabrook, he has contributed articles and sermons on religion to magazines in the United States and Sweden and he has conducted devotions on radio.

It is with great pride and pleasure that I welcome him here today.

REQUEST FOR PERMISSION FOR COMMITTEE ON SCIENCE AND TECHNOLOGY TO HAVE UNTIL MIDNIGHT TOMORROW TO FILE REPORT ON H.R. 1310, EMERGENCY MATHEMATICS AND SCIENCE EDUCATION AND THE NATIONAL ENGINEERING AND SCIENCE PERSONNEL ACT OF 1983

Mr. FUQUA. Mr. Speaker, I ask unanimous consent that the Committee on Science and Technology may have until midnight Friday, February 25, 1983, to file a report to accompany the bill (H.R. 1310) to provide assistance to improve elementary, secondary, and postsecondary education in mathematics and science; to provide a national policy for engineering, technical, and scientific personnel; to provide for costsharing by the private sector in training such personnel; and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

Mr. CHANDLER. Mr. Speaker, reserving the right to object, I would ask the gentleman if this has been cleared with the ranking minority member of the Committee on Science and Technology.

Mr. FUQUA. Mr. Speaker, will the gentleman yield?

Mr. CHANDLER. I yield to the gentleman from Washington.

Mr. FUQUA. The gentleman is a member of the committee and the bill was reported by the committee. In order to accommodate a request by the minority to file minority views by the close of business today, under the rules of the House the bill cannot be filed unless the House is in session, and this gives us until tomorrow to file the bill which was reported by the committee.

Mr. CHANDLER. I would ask the gentleman if he would just allow us to reach the ranking minority member of the committee and withhold his request until we have heard from him.

Mr. FUQUA. Mr. Speaker, I withdraw my request.

The SPEAKER. The gentleman withdraws his request.

DEMISE OF A GREAT AMERICAN MYTH

(Mr. MOLLOHAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOLLOHAN. Mr. Speaker, yesterday the newspapers reported a story that signals the demise of a great American myth. Yesterday Atari, one of the major American high-tech companies, announced that it was abandoning this country in pursuit of lower production costs in Taiwan. As a result, 1,700 American workers will be without a job.

For too long, Mr. Speaker, this myth has gone unchallenged. The people of this country have been encouraged to foresake the industrial backbone of this country in favor of the high-tech diety. This newcomer promised a cure for our economic and environmental ills. We were told that jobs would be plentiful and the air cleaner without our smokestack industries such as steel.

I do not question the need, Mr. Speaker, for high technology. It is woven into the fabric of our daily lives and provides necessary diversity.

I submit, however, that the rhetoric surrounding this new industry has succeeded primarily in shrouding the real issue—unfair foreign trade practices.

What has happened to Atari has and will continue to cripple every major American industry as long as we continue to compete against other nations that heavily subsidize their national corporations, dump their products, and receive foreign aid from us to bolster their own foreign trade markets.

It is time, Mr. Speaker, to lay the myth of high technology to rest and protect all our industries against these unfair trade practices.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

HARSH CRIMES DESERVE HARSH PENALTIES

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, today I am introducing a package of major anticrime bills aimed at slowing the revolving door of our Nation's criminal justice system.

Specifically, my bills would:

Impose a mandatory 2- to 25-year prison sentence for persons convicted of using a firearm to commit a crime;

Prescribe the death penalty for certain Federal crimes that result in death, including terrorist acts, treason, kidnaping, and attacks against the President of the United States, the President-elect, a foreign head of state—while in the United States—a Federal judge or a Federal law enforcement officer;

Eliminate the insanity defense for persons charged with assassinating or attempting to assassinate the President of the United States;

Make it a Federal crime to willfully damage a mass transportation system and sentence those convicted to a maximum $10,000 fine and/or up to 25 years in prison;

Lower the age persons can be tried as adults from 18 to 15; and

Require the fingerprinting of juvenile criminals and allow the courts to obtain information about a person's juvenile crime record.

These tough anticrime measures are more than justified. Violent crime has risen 58 percent from 1972 to 1981—an average increase of 5.8 percent a year. Property crime has gone up 61 percent from 1972 to 1981—an average increase of 6.1 percent a year.

The 1981 Uniform Crime Report, issued by the Federal Bureau of Investigation, shows that in 1981 there were a total of 13.3 million crimes committed in the United States—1,321,900 violent crimes, and 11,968,400 property crimes.

In the violent crime category, there were 22,520 murders, 81,540 forcible rapes, 574,130 robberies, and 643,720 aggravated assaults.

In the property crime category, there were 3,739,800 burglaries, 7,154,500 larceny-thefts, and 1,074,000 motor vehicle thefts.

In my home city of New York, the figures are equally disturbing. In 1981, there were 1,826 murders, 3,862 forcible rapes, 107,495 robberies, 43,783 aggravated assaults, 205,825 burglaries, 258,369 larceny thefts, and 104,706 motor vehicle thefts.

This means that in New York City, there are approximately 1,988 total crimes committed per day, over 430 violent crimes per day, and over 1,558 property crimes per day. More specifically, there are over 5 murders per day, over 10 rapes per day, over 294 robberies per day, over 119 aggravated assaults per day, over 563 burglaries per day, over 707 larcency-thefts per day, and over 286 motor vehicle thefts per day.

As a former law enforcement officer, I am proud to say that more and more arrests are being made. But, all too often, the thugs and hoodlums terrorizing our streets are given little more than a slap on the wrist by our overly lenient judicial system. My bills would take some of the discretionary sentencing powers away from the courts and insure that harsh penalties are imposed for harsh crimes.

Mr. Speaker, I would urge that these bills and other similar anticrime measures, including my bills (H.R. 473) to impose tough new penalties for antireligious acts of violence and (H.R. 474) to establish increased mandatory penalties for terrorist attacks on Federal buildings, receive prompt and favorable consideration.

PERMISSION FOR COMMITTEE ON SCIENCE AND TECHNOLOGY TO HAVE UNTIL MIDNIGHT TOMORROW TO FILE A REPORT ON H.R. 1310, EMERGENCY MATHEMATICS AND SCIENCE EDUCATION AND THE NATIONAL ENGINEERING AND SCIENCE PERSONNEL ACT OF 1983

Mr. FUQUA. Mr. Speaker, renewing my earlier request, I ask unanimous consent that the Committee on Science and Technology may have until midnight Friday, February 25, 1983, to file a report to accompany the bill (H.R. 1310) to provide assistance to improve elementary, secondary and postsecondary education in mathematics and science; to provide a national policy for engineering, technical, and scientific personnel; to provide for cost-sharing by the private sector in training such personnel; and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

EQUAL PROTECTION IN EMPLOYMENT TO THE HANDICAPPED

(Mr. MOAKLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MOAKLEY. Mr. Speaker, I have recently reintroduced legislation that will bring equal protection in employment to the handicapped under the Civil Rights Act of 1964.

Under existing law there is no generally applicable prohibition against employment discrimination on the basis of handicap. Title VII of the Civil Rights Act of 1964 prohibits employment discrimination on the basis of race, color, religion, sex, or national origin: But it provides no protection for disabled workers.

The widespread exclusion of handicapped workers from employment exacts an enormous toll in terms of human dignity and the quality of life for countless Americans. Over 16 million people age 18 to 64 years reported some level of work disability in the 1976 census. Of this handicapped population, there were only 7.1 million persons working.

It is vital to realize that most of these people desire employment but do not work because of unjust and discriminatory hiring policies.

The handicapped face the dilemma of being discriminated against in employment opportunities because they are evaluated on the basis of false generalizations, misconceptions, and misinformation about their handicaps, not on the basis of their job skills, productivity or performance.

Qualified individuals, time and again, are denied employment because of their disability when the disability would in no way interfere with their job performance. Our handicapped deserve the opportunity to be evaluated and hired on the basis of their ability and not their handicap.

The need for this legislation is obvious. There are too many employers who still will not hire an otherwise qualified individual for the sole reason of their disability. Some employers cling to the myths related to hiring the handicapped. Fears of increased insurance rates, lower job performances and job stability, poor attendance and the required physical adjustment turn employers away from hiring the handicapped.

This unnecessary situation weighs a heavy cost on society. In 1980, it was estimated that the Federal Government spent approximately $1 out of every $13 in the Federal budget—$40 billion—to support our disabled population. State, local, and private support for disabled citizens amounts to approximately an additional $60 billion. Surely by eliminating employment discrimination of the handicapped we can help reduce this economic burden on taxpayers.

Additionally, and more important, by enacting this legislation we can help reduce the loss in human terms that is caused by discrimination against handicapped individuals. Too many deserving people are excluded from society's mainstream; left to lose their dignity and self-worth.

The time has come to include the handicapped individuals as a protected element in our population under title VII of the Civil Rights Act of 1964; protecting handicapped persons

against all forms of employment discrimination under that title.

We must demonstrate our Nation's firm commitment to ending discrimination against the handicapped by enacting this legislation. I hope my colleagues will support me in my effort to give the handicapped an equal opportunity in employment.

Text of the bill follows:

H.R. 1200

A BILL To amend title VII of the Civil Rights Act of 1964 to make discrimination against handicapped individuals an unlawful employment practice

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That a reference in section 2, 3, 4, 5, or 6 of this Act to a section or other provision is a reference to a section or other provision of the Civil Rights Act of 1964.

SEC. 2. Section 701 is amended by adding at the end thereof the following:

"(l)(1) The term 'handicap' means the status of any individual—

"(A) who has a physical or mental impairment which substantially limits any of such individual's major life activities;

"(B) who has a record of such an impairment; or

"(C) who is regarded as having such an impairment.

"(2) Such term does not include the status of an individual who is an alcoholic or a drug abuser—

"(A) whose current use of alcohol or drugs prevents such individual from performing the job involved; or

"(B) whose employment, because of such current use of alcohol or drugs, would constitute a direct threat to property or safety of other individuals.".

SEC. 3. (a) Sections 703(a)(1), 703(a)(2), 703(b), 703(c)(1), 703(c)(2), 703(d), and 703(e)(1) are each amended by striking out "or national origin" each place it appears and inserting in lieu thereof "national origin, or handicap".

(b) The sentence beginning "Notwithstanding any" in section 703(h) is amended—

(1) by striking out "or national origin" the first place it appears and inserting in lieu thereof "national origin, or handicap"; and

(2) by striking out "sex or national origin" and inserting in lieu thereof "sex, national origin, or handicap".

(c) Section 703(j) is amended—

(1) by striking out "or national origin" the first place it appears and inserting in lieu thereof "national origin, or handicap";

(2) by inserting after "national origin" the second place it appears the following: ", or persons with any handicap,"; and

(3) by inserting after "national origin" the third place it appears the following: ", or person with such handicap,".

(d) The center heading of section 703 is amended by striking out "OR NATIONAL ORIGIN" and inserting in lieu thereof "NATIONAL ORIGIN, OR HANDICAP".

SEC. 4. Section 704(b) is amended by striking out "or national origin" each place it appears and inserting in lieu thereof "national origin, or handicap".

SEC. 5. The sentence beginning "No order of the court" in section 706(g) is amended by striking out "or national origin" and inserting in lieu thereof "national origin, or handicap".

SEC. 6. (a) Section 717(a) is amended by striking out "or national origin" and inserting in lieu thereof "national origin, or handicap".

(b) Section 717(c) is amended by striking out "sex or national origin" and inserting in lieu thereof "sex, national origin, or handicap".

SEC. 7. The amendments made by this Act do not affect any right, remedy, obligation, or responsibility under the Rehabilitation Act of 1973.

SEC. 8. this Act and the amendments made by this Act shall take effect at the beginning of the sixth month after the month in which this Act is enacted.

THE 98TH CONGRESS SHOULD REEXAMINE FOREIGN POLICY PRIORITIES

(Mr. EDGAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDGAR. Mr. Speaker, this week the Defense Minister of the Republic of the Philippines, Juan Ponce Enrile, is in Washington to consult with Pentagon officials. This visit signifies our Government's continuing support for a repressive regime in the Philippines.

The administration has fully supported the Marcos government, despite the latter's well-documented record of human rights violations. Since President Marcos' trip to the United States last September, suppression of dissent in the Philippines has increased—it includes the arrest of church leaders and the establishment of a strategic hamlet program in contested areas.

With the visit of Minister Enrile, the Philippine Government will ask for more military aid. This event, as well as the upcoming renegotiation of the Philippine bases agreement, should motivate all Members to reconsider our current policy of unqualified support for an undemocratic government. Are our national security interests served by propping up an unpopular dictator? Are our interests advanced by backing isolated regimes whose domestic programs thwart their people's desire for justice, self-determination, and equality?

I hope that my colleagues will join me in taking this opportunity to reexamine our foreign policy priorities for the 98th Congress.

SWEETWATER JAYCEES 25TH ANNUAL RATTLESNAKE ROUNDUP

(Mr. STENHOLM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STENHOLM. Mr. Speaker, I am proud to have this opportunity to salute the Sweetwater, Tex., Jaycees on the very special occasion of the 25th anniversary of their annual rattlesnake Roundup. Each year since 1958, the Sweetwater Jaycees have sponsored what has become the largest event of its kind in the United States. The Jaycees Rattlesnake Roundup brings thousands of visitors to Nolan County in west Texas, where they participate in a variety of activities associated with this unique community event.

This year, in celebration of their 25th anniversary, the roundup has been expanded to 4 days, March 10 to 13, and planned activities include snakehandling and snake-milking demonstrations, a rattlesnake meat eating contest, and a parade featuring the Miss Snake Charmer Queen contestants.

The Sweetwater Rattlesnake Roundup not only provides fun and entertainment, but important benefits as well. Proceeds from the roundup go to the Sunshine Inn in Sweetwater, a facility for handicapped and disadvantaged citizens of Nolan County. The venom is made available for public and private research by reputable groups and individuals. Venom extracted from the snakes has proven to be quite useful in medical research. Treatment of certain ailments in unborn children, treatment of certain mental disorders, medical applications for snake bite and other medical benefits have come from the venom extracted at this Sweetwater event. Most recently, significant discoveries have been made in cancer research through tests with the venom coming from the Sweetwater Rattlesnake Roundup.

The Sweetwater Jaycees are effectively informing countless thousands of people from all across the United States about the rattlesnake, and have been since this event began. Their year-round efforts are impressive. I congratulate them on their past successes, and extend my personal wish that this year's roundup be the very best ever.

□ 1115

REPORT ON RESOLUTION PROVIDING FOR PERMANENT PROFESSIONAL AND CLERICAL STAFF OF THE PERMANENT SELECT COMMITTEE ON INTELLIGENCE

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 98-8) on the resolution (H. Res. 58) providing for permanent professional and clerical staff of the Permanent Select Committee on Intelligence, which was referred to the House Calendar and ordered to be printed.

GROUND DISPOSAL OF TOXIC HAZARDOUS WASTES

(Mr. BREAUX asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BREAUX. Mr. Speaker, if there is any one thing that is absolutely essential that we learn coming out of our experiences with the Environmental Protection Agency and all the problems that we have been having, it is simply that as long as we continue to dispose of toxic hazardous waste in the ground or on the ground, we are going to continue to have problems with any administration and with any agency in trying to delicately balance all the interests that are concerned.

I will be introducing legislation this morning which will, within 5 years, completely eliminate all land disposal of toxic hazardous waste. The legislation would also immediately after its enactment eliminate the use of landfill disposal of hazardous wastes if the administration can certify that there are other means of treating these toxic hazardous wastes such as incineration, such as neutralization, such as chemical destruction, such as thermal destruction.

There are numerous other ways that we should be handling toxic chemical wastes other than sticking them in the ground or on the ground.

I would urge my colleagues to look at this legislation and consider cosponsoring it.

PERMISSION FOR COMMITTEE ON THE JUDICIARY TO FILE REPORT ON H.R. 3, PROVIDING FOR APPOINTMENT OF UNITED STATES BANKRUPTCY JUDGES

Mr. SCHUMER. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary may have until midnight tonight, February 24, 1983, to file a report on the bill (H.R. 3) to provide for the appointment of United States bankruptcy judges under article III of the Constitution, and for other purposes.

The SPEAKER pro tempore (Mr. PENNY). Is there objection to the request of the gentleman from New York?

There was no objection.

INDUSTRIAL DEVELOPMENT BOND LIMITATION ACT

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKLE. Mr. Speaker, the purpose of my asking for a special order today is to discuss with this body a bill that I have introduced today, H.R. 1635, which is called the Industrial Development Bond Limitation Act.

This bill places meaningful restrictions on the use of tax exempt, private purpose industrial development bonds and is intended to help prevent further erosions of the value of public purpose municipal bonds used to finance the traditional functions of State and local governments.

This is a very serious matter which affects the American people, and I hope that the Members will be privileged to hear my remarks and to notice in the RECORD also a copy of the bill which is being requested for publication.

MUGGING LOW-INCOME WORKERS

(Mr. PETRI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PETRI. Mr. Speaker, the President's opponents claim they are for the little guy. But look at what some of them want to do—they want to eliminate tax indexing, which is the best protection low-income workers have against higher taxes.

Without tax indexing, inflation causes taxes to go up by pushing people into higher tax brackets. The tax-and-spend crew in Congress likes this because it means higher taxes without the embarrassment of having to vote for them.

Because of the bracket creep, for every 1 percent of inflation, the Federal Government's income tax collections go up 1.6 percent; 1 percent of that figure keeps the Government even with inflation, but the extra 0.6 percent is a windfall for the Government—a windfall at the expense of the taxpayers who lose purchasing power even though their pretax wages are only keeping pace with price increases.

The indexing law which is scheduled to go into effect in 1985 is designed to stop this mugging of the taxpayers.

Who benefits from indexing? It is the guy with a low income, not the rich. The tax brackets are narrowest at the low end of the scale, and the rich are already in the highest bracket, so it is those who are hurting the most who find themselves paying more as a result of bracket creep.

Why, then, do the "friends of the poor" in this Congress want to do away with indexing? Such legislators are addicted to high spending policies. For them, raising taxes takes precedence over most everything else.

TO REPEAL SECTION 311 OF THE FEDERAL PUBLIC TRANSPORTATION ACT OF 1982

Mr. LEVITAS. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be discharged from further consideration of the bill (H.R. 1572) to repeal section 311 of the Federal Public Transportation Act of 1982, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

Mr. GINGRICH. Mr. Speaker, I reserve the right to object.

Mr. LEVITAS. Mr. Speaker, will the gentleman yield?

Mr. GINGRICH. I yield to my colleague from Georgia.

Mr. LEVITAS. I thank the gentleman for yielding.

Mr. Speaker, the purpose of this legislation, which is cosponsored by myself, the gentleman from Georgia, and the other gentleman from Georgia, is to repeal a provision that was written into the Surface Transportation Act passed in December of last year, which provision likewise was put into that legislation by the two gentlemen from Georgia dealing with the matter of the Metropolitan Atlanta Rapid Transit Authority to assure that the State government and local officials could make some decisions concerning the direction of the rapid transit line.

That action has been effected now. The purpose of the amendment has been very well served and we are seeking by this action to repeal that provision so that the compromise reached in the Georgia Legislature may go forward.

Mr. GINGRICH. Further reserving the right to object, Mr. Speaker, would the gentleman agree that this lays the base for the successful completion of a complete rail system from the airport to downtown and the opportunity for both De Kalb County, which has more than amply paid its fair share, and the airport, which is the economic center of our region, to be adequately served?

Mr. LEVITAS. Mr. Speaker, if the gentleman will yield further, the gentleman is absolutely correct. The arrangements which have now been harmoniously reached will serve the best interests not only of those citizens in De Kalb County, Ga., whom I represent, by getting the rapid transit line further out into that area at a much earlier time, but also serve the needs of the entire State of Georgia and the Metropolitan Atlanta area by insuring adequate rapid rail transportation from the magnificent, beautiful, large Atlanta Airport serving not only Atlanta, Ga., the South, but the Nation and the world.

● Mr. HOWARD. Mr. Speaker, I rise to commend the gentlemen from Georgia for taking the leadership role insuring that the Atlanta metropolitan area will continue to have and develop one of the Nation's model rapid rail systems. I am pleased to have played a role in this endeavor because as chairman of the Public Works and Transportation Committee which authorizes funding for the Nation's transportation systems, as well as oversees the development of the Na-

tion's transportation systems infrastructures, it is good to see the positive results of this hard work, and the Metropolitan Atlanta Rapid Transit Authority (MARTA) is an excellent example. It is important to note that MARTA is supported by a local sales tax and that the gentlemen from Georgia have diligently worked to protect the large investment made not only by the local people and governments but by the Federal Government.●

Mr. GINGRICH. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Clerk read the bill, as follows:

H.R. 1572

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 311 of the Federal Public Transportation Act of 1982 is repealed.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. LEVITAS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

WELCOMING HER MAJESTY QUEEN ELIZABETH II AND HIS ROYAL HIGHNESS THE PRINCE PHILIP, DUKE OF EDINBURGH, ON THEIR OFFICIAL VISIT TO THE UNITED STATES

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that the Committee on Foreign Affairs be discharged from further consideration of the concurrent resolution (H. Con. Res. 65) welcoming Her Majesty Queen Elizabeth II and His Royal Highness The Prince Philip, Duke of Edinburgh, on their official visit to the United States, and ask for its immediate consideration in the House.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

Mr. BROOMFIELD. Mr. Speaker, reserving the right to object, I do so for the purpose of giving the committee chairman an opportunity to discuss the resolution.

Mr. ZABLOCKI. Mr. Speaker, will the gentleman yield?

Mr. BROOMFIELD. I am happy to yield to the gentleman from Wisconsin.

Mr. ZABLOCKI. I thank my friend, the gentleman from Michigan, for yielding.

Mr. Speaker, House Concurrent Resolution 65 is a simple, straight-forward and very brief expression of welcome on behalf of the Congress to Her Majesty Queen Elizabeth II and His Royal Highness The Prince Philip, Duke of Edinburgh, on the occasion of their forthcoming visit to the United States.

The gentleman from California (Mr. LAGOMARSINO) had introduced and cosponsored this resolution, and I do want to pay tribute to him as well as to the ranking minority member of the Committee on Foreign Affairs, the gentleman from Michigan (Mr. BROOMFIELD).

As noted in the text of the resolution, the royal couple will be visiting a number of cities and regions of the west coast, exclusively, between February 26 and March 7 and will meet on two occasions with President and Mrs. Reagan. House Concurrent Resolution 65 specifically welcomes them on their goodwill visit to this country and in so doing, accords special recognition to the ties of the friendship between the peoples of the United States and the United Kingdom and the important political, economic, and cultural relationship existing between the two countries.

Mr. Speaker, this resolution was approved by unanimous voice vote by the Committee on Foreign Affairs. I urge its immediate adoption as a gesture of courtesy and respect, which this body traditionally accords to the chief of state of a friendly country and important NATO ally.

Mr. BROOMFIELD. Mr. Speaker, I am delighted to rise in support of this resolution. I am pleased to know that Her Majesty Queen Elizabeth II and His Royal Highness The Prince Philip, Duke of Edinburgh, are again planning to visit America. I trust that the royal couple will find their all-too-brief visit to several American cities, naval facilities, national parks, and universities both informative and pleasant. I am certain that all of us in Congress wish the royal couple a memorable stay in our country.

After many visits to England, I have always been impressed by the hospitality and the sincere friendliness of the English people. Milton once said that England set a precedent in teaching the nations of the world how to live. I see in the English people a high level of personal integrity, a sense of fair play, and a respect for others. These qualities are a testimony to England's invaluable contributions to mankind in the area of human rights.

As all of my colleagues well know, the English people and England have played a special role in America's history. The English occupy a special place in the hearts of all Americans. Although G. B. Shaw once said that England and America were two countries separated by the same language, cooperation and trust have typified the relationship between our peoples.

We have marched together in good times and in bad ones. We have shared the joy of victory and the agony of failed hopes. As a child of the Old World, America carried the culture of England, its European mother, to the New World. Our language and our political and judicial systems are rooted in England. Our close cultural bonds have long enriched our two societies. The great accomplishments of America are, in a sense, England's accomplishments. I believe that I can say that all of us in Congress and all Americans look forward to working with the English people in the future in this unique and rewarding relationship between our two free nations.

I eagerly support this fine resolution. I extend a personal welcome to our special visitors to a land which cherishes so much the values of freedom and liberty. During this period when the forces of suppression, who would gladly deprive all of us of our freedom, are increasingly active in the world at large, we relish this all-too-frequent opportunity to have the royal couple visit America. I extend a warm and hearty welcome to Her Majesty and His Royal Highness The Prince Philip.

Mr. Speaker, I withdraw my reservation of objection, and I wish to commend the chairman of our committee for his explanation of this resolution. I join him in his sponsorship.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 65

Whereas Her Majesty Queen Elizabeth II and His Royal Highness The Prince Philip, Duke of Edinburgh, will pay an official visit to the United States from February 26 to March 7, 1983;

Whereas the royal couple will travel on board the H.M.Y. Britannia, visiting several cities on the west coast of the United States, including San Diego, Los Angeles, Palm Springs, Santa Barbara, San Francisco, Sacramento, and Seattle;

Whereas they will visit important United States naval facilities, institutions of higher learning, business and cultural organizations, and hospitals, and will spend a weekend at Yosemite National Park; and

Whereas they will be received by President and Mrs. Reagan at the President's ranch and, in return, will host a dinner for the President and First Lady aboard the H.M.Y. Britannia: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That in special recognition to the historical ties of friendship

between the peoples of the United States and the United Kingdom, the highly valued political and economic relationship which exists between our two countries, and the cultural bonds which have long enriched our two societies, the Congress hereby extends a warm welcome to Her Majesty Queen Elizabeth II and His Royal Highness The Prince Philip, Duke of Edinburgh, on the occasion of their official visit to the United States.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the concurrent resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

TIGHTER SUPERVISION NEEDED ON FOREIGN LOANS

(Mr. WYLIE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WYLIE. Mr. Speaker, one of the issues we will be considering on the House floor soon will be the international debt problem and the role of the IMF. The administration has negotiated a reasonable increase in the IMF quota. The subject is very controversial and not one which is easily understood. Ted English, a friend of mine and the business editor of the Columbus Citizen-Journal, has done an excellent job in summing up the difficulty of understanding the problem which I commend to my colleagues for their attention.

TIGHTER SUPERVISION NEEDED ON FOREIGN LOANS

(By Ted English)

With world attention focusing on the meetings of the International Monetary Fund, publication of a knowledgeable new book about the worldwide banking crisis comes at just the right time.

The "Money Lenders," written by Anthony Sampson, comes out Thursday. Sampson also authored "The Sovereign State of ITT," "The Arms Bazaar" and "The Seven Sisters."

His new book maintains that the worldwide banking crisis has resulted from huge loans to unstable, low-growth countries by a few private money lenders who are not answerable to anyone.

It is imperative, says Sampson, that international organizations, "including the IMF and the World Bank and groups of central banks like the BIS in Basel—take over more responsibility for lending to developing countries."

Sampson, a British journalist, is editorial adviser to the Brandt Commission which met in Ottawa in December. His book reflects the knowledge gained from that position and also throws a light into the labyrinthine corridors of international finance.

But we live in Central Ohio. Who cares if Citibank, Chase Manhattan, Bank of American or Manufacturers Hanover get into trouble because they advanced too much money to foreign firms and governments?

It would be great if we didn't have to care. But in the 1980s, what happens in another part of the country, or another part of the world, cannot be avoided or ignored in Columbus.

Corn and soybeans grown in Ohio cannot be sold to Russia, Poland, India or China if those countries don't have the money to pay their international bills. The whole system suffers if they can't pay their bank loans.

That lesson was driven home last year as prices of U.S. bank stocks plunged, pulling other stock prices down, when it appeared Mexico might default on loan payments because of lower oil prices.

The Mexican crisis came on the heels of the Penn Square Bank collapse. Penn Square failed partly because of its "aggressive loan policy" which led to too many loans based on ever increasing oil prices. In plain English, they loaned money to poor risks. Penn Square's demise was even felt in Columbus (fortunately not very strongly).

With huge loans out to Mexico, Brazil, Argentina and Poland, it's easy to see why the debate in Congress over the U.S. contribution to IMF has sometimes been labeled an effort to "bail out" the big, international banks.

Sampson's book does not provide any concrete solutions, but it does help one understand how tightly interwoven the world's economies have become in the last decade.

In today's world, more than ever before, neither governments nor bankers can operate in isolation. The bankers' huge foreign loans and the political decisions by American administrations can have grave consequences for the entire world.

Sampson makes this clear as he walks the reader through the Iranian hostage crisis. He details the maneuvering by bankers, lawyers and diplomats on three continents when the Carter administration froze Iran's assets because it made prisoners of 42 Americans.

That crisis was worked out. But it gave new urgency to demands for more international safeguards. As the Brandt Commission said in Ottawa, "In this crisis the fate of the rich and the poor countries, the industrial and the agricultural communities, is inextricably linked."

In its first report, "A Program for Survival," Sampson said, the commission noted that richer countries have so many mutual interests with developing countries that it's dangerous to ignore their economic plight.

The book indicates loan considerations will have to be made on a different basis. It will no longer suffice that a loan makes the bank a lot of money, but banks will have to consider the consequences—whether or not the loan will help the country and its people.

On Friday in Washington, the finance ministers of 22 countries called on nations around the world to add another $32 billion to the IMF. Now it is up to the various governments.

In hearings, before the House Banking committee, ranking Republican Chalmers P. Wylie, R-Columbus, urged a bipartisan approach to the issue. He predicted Congress would act to avert an international financial crisis, which also would threaten the U.S. economic recovery.

Earlier, Federal Reserve Chairman Paul A. Volcker had asked the committee and Congress to approve a $10 billion increase in the U.S. quota to the IMF.

Wylie said that, although Congress has no choice but to back an IMF quota increase, members on both sides of the aisle want tighter foreign loan supervision by the bank regulatory agencies.

"Today, ironically, bank regulators, the Fed and the Treasury are all in the position of having to encourage U.S. Banks—often the smaller and medium-sized banks—to actually increase their exposure to countries already deeply in debt," said Wylie, "to give those countries some breathing space in which to bring their accounts into balance."

He called for "permanent reforms of the system so that we are not soon confronted with another crisis."

THE INDUSTRIAL DEVELOPMENT BOND LIMITATION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. PICKLE) is recognized for 30 minutes.

Mr. PICKLE. Mr. Speaker, today I am introducing H.R. 1635, the Industrial Development Bond Limitation Act. This bill places meaningful restrictions on the use of tax-exempt, private-purpose industrial development bonds and is intended to help prevent further erosion of the value of public purpose municipal bonds used to finance the traditional functions of State and local government.

The need for this legislation, Mr. Speaker, is urgent. Historically, the Congress has preserved for public entities, and public entities alone, the right to raise the moneys needed to finance their activities, free of Federal income tax.

Yet, Mr. Speaker, for the first time, in 1982, the dollar volume of private purpose, tax-exempt bonds, which has grown dramatically since 1975, actually surpassed the volume of public purpose tax-exempt issues.

This development was little noted in the headlines of the Nation's newspapers; but, rest assured, it's impact will be felt by every community and every pocketbook in this country for many years to come.

As the use of private purpose industrial development bonds skyrocketed from $4.9 billion in 1975 to $41.6 billion in 1982, the cost of local government has increased. The fact that local tax and local user fees must be raised to pay for the resulting increase in interest rates has become increasingly clear.

In the process of providing cheaper financing for private businesses, industrial development bonds have increased the cost of public projects and services, reduced Federal tax revenues, and put our cities and counties in the position of serving as financial intermediaries for private sector developers and speculators.

The use of industrial development bonds has become popular with some Members of Congress and has been endorsed and used by many of our cities and counties and other public entities. This is understandable because in some instances these kinds of bonds can be very useful and can help a community. But the use of industrial development bonds (IDB's) nationwide has increased in such an alarming manner that we, the Congress, must take direct and immediate action to prevent further deterioration in the value of traditional "public purpose" bonds.

Mr. Speaker, our local officials have been placed in the position of approving and promoting the sale of private purpose tax exempts. In many instances, they have done it without public hearings and without the approval of the local electorate or its representative government. Our TEFRA legislation last summer change that and made a few other cosmetic corrections, but we did not go far enough. The temptation for local officials to parcel out tax subsidies to private enterprise is still too strong. Many have recognized that there is virtually no accountability in the present system and that by "sprinkling holy water" on an IDB project, the city council or county government can take credit for the construction of a new plant facility, shopping center, or hotel/motel. Rarely are economic feasibility studies or cost analyses required. Seldom is an independent assessment of need requested. IDB financing is cheap and it is easy. And, unfortunately, little thought is given to the fact that in approving a project for IDB financing, local officials are helping dry up sources of revenue for traditional municipal tax-exempt bond programs. The inevitable result of IDB financing, as attractive as it may seem, is that local political subdivisions will have to raise taxes or user fees in order to pay for the increased cost of interest on public purpose bonds.

There are times and places where IDB's can and should be used. But, Mr. Speaker, if we do not control them, if we do not reduce their overall attractiveness, we may very well destroy the traditional tax-exempt program. As much as a community wants to have an IDB project in its area, as appealing as it is to build a new shopping center or a hotel or apartments, the cold and honest truth is that we are allowing private business to reap a tax benefit amounting to some 2 to 3 percent interest on the bonds—$200,000 to $300,000 per year in tax subsidy on a typical $10 million "small issue" deal. The revenue loss to the Federal Government exceeds the interest savings to the beneficiary of the tax-exempt financing. We have to ask ourselves what business does the Federal Government have in allowing DuPont or any other large corporation the right to ask Uncle Sam to finance their projects. The Federal Government has many serious problems of its own, and we ought to avoid trying to help any major corporation or real estate developer in making the Federal Treasury foot the bill for their projects.

For the record, Mr. Speaker, let me give you a bit of background on these IDB programs:

Tax-exempt, private purpose bonds are corporate bonds issued by a government entity and are similar to municipal bonds. They differ, however, from municipal bonds which are used to fund public works projects sponsored by a municipal, State or public authority in that they are issued by governments to raise funds for private development.

In the past 6 or 7 years, the use of these bonds to subsidize the borrowing costs of private business has increased dramatically. In 1975, the issuance of bonds for private business activities amounted to $4.9 billion or 16 percent of all tax-exempt bonds. By 1982, the figure had jumped to a total of $41.6 billion or 48 percent of all tax-exempt bonds issued. At the present time—because of the flood of IDB applications throughout the United States—IDB's probably constitute some 60 percent of the tax-exempt bonds issued. Given another year or two, this could easily climb to 75 percent.

The cost of all this private purpose bond activity has been high. Five years ago, the ratio of interest rates on tax-exempt bonds to the interest rates on taxable bonds averaged about 65 percent. Last year, the interest rate ratio of tax-exempt bonds to taxable bonds jumped to 80 percent and above. As more tax-exempt bonds are issued, this ratio can be expected to increase, driving up the cost of traditional public projects.

If the increase amounts to just 1 percentage point of added interest local governments must pay to finance public projects, then the private purpose, tax-exempt bonds issued in 1983 alone could cost taxpayers well over $1 billion in extra interest, and that will continue for each year the bond issue remains outstanding. Many finance experts believe the impact could be even greater than that.

The ingenuity of bond attorneys and investment bankers should never be underestimated. These bond attorneys peddle IDB's like hotcakes. It is a downright embarrassment to witness this selling procedure. Recently, a new issuance technique has been developed which combines FDIC or FSLIC deposit insurance with tax-exempt financing. Here is how it works. Bonds are issued with an understanding that no bondholders will purchase more than $100,000 of the bonds—FDIC and FSLIC insurance is limited to deposits of $100,000 or less. A trustee then deposits the proceeds of the issue on behalf of each bondholder in special certificates of deposit in a cooperating savings and loan association or commercial bank. The funds are then lent by the financial institution to the beneficiary at an interest rate reflecting the rate on the tax-exempt bonds. The bondholders not only enjoy tax-exempt interest income, but bear no risk because of the Federal deposit insurance. The banks essentially sell the deposit insurance provided by the Federal Government by charging the beneficiary of the tax-exempt borrowing a few extra points.

Incidentally, Mr. Speaker, commercial banks and wealthy individuals gobble up these IDB issues to shelter their income from Federal taxes. The banks claim the tax-free exemption—a 100-percent exemption—and bank portfolios are stuffed with all the IDB's the law will allow. One result is that the effective tax rate on bank movers around 5 percent while all the rest of us pay four, five, and six times that amount.

For many years, the Federal Government has had the policy of not insuring or guaranteeing tax-exempt bonds because, by doing so, debt instruments are created that are superior to those issued by the Federal Government. This new practice violates that policy. By eliminating bondholder risk, it will lead to the further proliferation of IDB's. By tying FDIC and FSLIC insurance to particular real estate projects rather than bona fide deposits, the FDIC and FSLIC are being exposed to new and unintended risks. This practice must be stopped.

Mr. Speaker, I know there are some valid, worthwhile multifamily bonds in the pipeline, and I do not want to hurt a project which is nearing completion. But, we must set an early effective date for this measure so that the industry and public officials will know that we are going to sharply control the issuance of these kinds of bonds.

Accordingly, the effective date of my bill with repect to the FSLIC/FDIC provision is April 15 or date of enactment, whichever is sooner.

With this exception, the remainder of the bill will become effective on date of enactment.

I think it is entirely appropriate, Mr. Speaker, that lucrative tax loopholes like the FSLIC-backed bonds, be shut down effective April 15, the filing date when most of the rest of us pay our fair share of Federal income taxes.

Beyond doubt, the issuance of private purpose bonds will continue to grow explosively in the absence of additional limits. Meaningful restrictions on these tax-exempt bonds will help restore the benefit of tax-exempt financing for traditional Government purposes and will reduce the growing

Federal revenue loss attributable to the increasing volume of private purpose, tax-exempt obligations.

H.R. 1635, the Industrial Development Bond Limitation Act will meet this need. Major provisions of the bill are as follows:

(1) Restrictions on "private purpose" tax-exempt IDB's.

(a) Requires recovery of the costs of depreciable assets financed with tax-exempt bonds using straight line depreciation over extended recovery periods: 5 years for 3-year property; 8 years for 5-year property; 15 years for 10-year property; 22 years for 15-year public utility property; and 25 years for 15-year residential and non-residential real property.

Full ACRS deductions are still allowed for low or moderate income multifamily housing, but extended lives are required for all other properties financed with industrial development bonds.

(b) Prohibits tax-exempt IDB financing where obligation is directly or indirectly guaranteed or insured by the FSLIC or FDIC.

(2) Additional limitations on "small issue" IDB's.

(a) Restricts the use of the small issue exemption to businesses and their subsidiaries:

(i) With total capital expenditures not exceeding $20 million worldwide during the period beginning 3 years prior to issuance of the bonds; and

(ii) With no more than $20 million of tax-exempt IDB's outstanding after issuance of the bonds.

(b) Eliminates the use of the small issue exemption for the purchase of land.

(3) These provisions would become effective on date of enactment.

For your convenience, a copy of H.R. 1635, The Industrial Development Bond Limitation Act, is herewith reprinted.

H.R. 1635

A bill to amend the Internal Revenue Code of 1954 with respect to the tax treatment of industrial development bonds

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Industrial Development Bond Limitation Act of 1983".

SEC. 2. COST RECOVERY FOR PROPERTY FINANCED WITH TAX-EXEMPT BONDS.

(a) GENERAL RULE.—Paragraph (12) of section 168(f) of the Internal Revenue Code of 1954 (relating to limitations on property financed with tax-exempt bonds) is amended by striking out subparagraphs (B), (C), and (D) and inserting in lieu thereof the following:

"(B) RECOVERY METHOD.—

"(i) IN GENERAL.—Except as provided in clause (ii), the amount of the deduction allowed with respect to property described in subparagraph (A) shall be determined by using the straight-line method (with a half-year convention and without regard to salvage value) and a recovery period determined in accordance with the following table:

"In the case of:	The recovery period is:
3-year property	5 years.
5-year property	8 years.
10-year property	15 years.
15-year public utility property	22 years.

"(ii) 15-YEAR REAL PROPERTY.—In the case of 15-year real property, the amount of the deduction allowed shall be determined by using the straight-line method (determined on the basis of the number of months in the year in which such property was in service and without regard to salvage value) and a recovery period of 25 years.

"(C) EXCEPTIONS.—Subparagraph (A) shall not apply to any recovery property which is placed in service in connection with projects for residential rental property financed by the proceeds of obligations described in section 103(b)(4)(A)."

(b) TECHNICAL AMENDMENT.—Paragraph (12) of section 168(f) of such Code is amended by redesignating subparagraph (E) as subparagraph (D).

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to property placed in service after the date of the enactment of this Act to the extent such property is financed by the proceeds of an obligation issued after such date of enactment.

SEC. 2. TAX EXEMPTION DENIED WHERE PROCEEDS INVESTED IN FEDERALLY-INSURED DEPOSITS.

(a) GENERAL RULE.—Subsection (b) of section 103 of the Internal Revenue Code of 1954 (relating to industrial development bonds) is amended by adding at the end thereof the following new paragraph:

"(15) PROCEEDS MAY NOT BE INVESTED IN FEDERALLY-INSURED DEPOSITS.—

"(A) IN GENERAL.—Paragraphs (4), (5), (6), and (7) shall not apply to any obligation issued as part of an issue if a significant portion of the proceeds of the issue are to be invested (directly or indirectly) in deposits or accounts in a federally-insured financial institution.

"(B) EXCEPTIONS.—Subparagraph (A) shall not apply to—

"(i) proceeds of the issue invested for an initial temporary period until such proceeds are needed for the purpose for which such issue was issued,

"(ii) investments related to debt service, or

"(iii) investments of a reserve which meet the requirements of subsection (c)(4)(B).

"(C) FEDERALLY-INSURED FINANCIAL INSTITUTION.—For purposes of this paragraph, the term 'federally-insured financial institution' means—

"(i) a bank (as defined in section 581),

"(ii) a mutual savings bank, cooperative bank, domestic building and loan association, or other savings institution, or

"(iii) a credit union,

the deposits or accounts in which are insured under Federal law."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to obligations issued after April 14, 1983 or, if sooner, the date of the enactment of this Act.

SEC. 3. LIMITATIONS ON SMALL ISSUE EXEMPTION.

(a) GENERAL RULE.—Section 103 of the Internal Revenue Code of 1954 (relating to interest on certain governmental obligations) is amended by redesignating subsection (m) as subsection (n) and by inserting after subsection (l) the following new subsection:

"(m) LIMITATIONS ON SMALL ISSUE INDUSTRIAL DEVELOPMENT BONDS.—

"(1) SMALL ISSUE EXEMPTION LIMITED TO SMALL BUSINESSES.—

"(A) IN GENERAL.—Paragraph (6) of subsection (b) shall not apply to any issue if the principal user of any facilities being financed with such issuer is a large business.

"(B) LARGE BUSINESS.—For purposes of subparagraph (A), the term 'large business' means any person if the aggregate amount of capital expenditures incurred by such person in connection with a trade or business during the 3-year period ending on the date of the issuance of the issue exceeds $20,000,000.

"(C) CERTAIN CAPITAL EXPENDITURES NOT TAKEN INTO ACCOUNT.—For purposes of subparagraph (B), any capital expenditure described in clause (i) or (iv) of subsection (b)(6)(F) shall not be taken into account.

"(D) RELATED PERSONS.—For purposes of this paragraph, all persons who are related (within the meaning of subsection (b)(6)(C)) to each other shall be treated as 1 person.

"(2) AGGREGATE LIMIT PER TAXPAYER FOR ALL ISSUERS.—

"(A) IN GENERAL.—Paragraph (6) of subsection (b) shall not apply to any issue if the aggregate authorized face amount of such issue (when increased by the outstanding small issue obligations of any principal user of any facilities being financed with such issue) exceeds $20,000,000.

"(B) OUTSTANDING SMALL ISSUE OBLIGATIONS OF ANY PERSON.—For purposes of applying subparagraph (A) with respect to any issue, the outstanding small issue obligations of any person who is a principal user of any facilities being financed with such issue is the aggregate face amount of all small issue obligations—

"(i) which financed any facilities a principal user of which was such person, and

"(ii) which are outstanding at the time of such later issue (not including as outstanding any obligation which is to be redeemed from the proceeds of the later issue).

"(C) DEFINITIONS.—For purposes of this paragraph—

"(i) SMALL ISSUE OBLIGATION.—The term 'small issue obligation' means any industrial development bond (as defined in subsection (b)(2)) to which paragraph (1) of subsection (b) does not apply solely by reason of paragraph (6) thereof.

"(ii) RELATED PERSONS.—All persons who are related (within the meaning of subsection (b)(6)(c)) to each other shall be treated as one person."

(b) SMALL ISSUE EXEMPTION NOT AVAILABLE FOR FINANCING LAND.—Subparagraph (A) of section 106(b)(6) of such Code is amended by striking out "land or".

(c) EFFECTIVE DATE.—

(1) Except as provided in paragraph (2), the amendments made by this section shall apply to obligations issued after the date of the enactment of this Act.

(2) For purposes of determining the outstanding small issue obligations of any person under section 103(m)(2)(B) of such Code (as added by this section), all obligations whether issued before, on, or after such date of enactment shall be taken into account.

□ 1145

HAZARDOUS WASTE DISPOSAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Tennessee (Mr. SUNDQUIST) is recognized for 5 minutes.

Mr. SUNDQUIST. Mr. Speaker, today I am introducing two bills, which together can turn what appears to be an unresolvable problem into industrial and employment opportunities.

It is clear that the problem of hazardous wastes has become a monumental one. We continue to produce over 60 million metric tons of hazardous wastes each year, yet negative public reaction to landfills has virtually brought the location of new landfills to a complete standfill.

Health and potential future problems from these landfills continually fill our media with horror stories. Just this week the Federal Government has offered to buy out all 2,400 residents of a community in Missouri because it was confirmed that the town is too contaminated to be safe for human habitation. But the amazing thing to me is that despite all the disasters we have witnessed associated with chemical pollution in the ground, EPA continues to license trash companies to bury toxic wastes. The EPA officials tell me that the current state of the art techniques for dumping chemical wastes are sufficient. The problem with that is that state of the art techniques change every year—hazardous wastes are supposed to stay in the ground forever. We only have to look back to the infamous Love Canal and remember that it was state of the art technology when the chemical wastes were first dumped there.

So, my review of the problem suggests that EPA does not have the comprehensive authority necessary to make national environmental policy. Even the basic data to make such a policy is not available at the Federal level. Recently, I went to EPA with what I consider to be fundamental questions. How many acres of land have been licensed for the purpose of dumping hazardous wastes? How much of that acreage has been filled to date? And what volume remains? Believe it or not, this data is not available at EPA and officials there told me that even if the data were available from State sources there would be no way to assure its accuracy.

We must look at an entirely new approach to the problem of what to do with continuing production of these wastes in this country.

So what the alternative? Obviously more regulation at EPA is not the answer. The population of this country has spoken clearly on that subject. Government can take a role but it should be to provide an incentive to the private sector to solve this problem. My proposal does this.

First, I propose a moratorium on any additional EPA licensed permits for hazardous waste landfills. It is very likely that we now have decades, indeed hundreds of years of existing landfill capacity, and until we know for sure, we cannot continue granting these permits and dumping these chemicals all over this country.

After establishing that we will no longer license those potentially unsafe landfills, we must then address the major issue of what do we do with the 60 million mertic tons of hazardous wastes produced here each year.

My second legislative proposal addresses this issue by providing to the generators of hazardous wastes a tax credit of 2 cents a pound, if that generator chooses to dispose of that waste through recycling procedures as opposed to dumping. This amount would be sufficient to make existing and new recycling facilities competitive with firms that dump hazardous wastes underground.

I feel this is a realistic approach with a modest goal of recycling 25 percent of this 60 million metric tons of waste in 5 years, or in simple terms 33 billion pounds. The revenue impact woud be $660 million over these 5 years, however, there is a substantial amount of revenue and savings that certainly will offset this entire revenue loss. This is no pie-in-the-sky proposition—100 percent of all hazardous wastes can be dealt with in ways besides digging a hole and dumping them into the ground. In fact, 70 percent can be recycled in an economically feasible way. This technology exists and the companies exist to recycle these wastes.

Let us look at a hypothetical model for example. If you were to establish a relatively small recycling facility capable of transporting, processing, and recycling 30 million pounds of hazardous waste, that firm or plant would employ about 45 persons, with an average payroll of $900,000 or $20,000 per employee. These 45 employees would in turn generate $130,000 in taxes annually while the corporation that employs them would pay $250,000 in taxes. Also, there would be a significant capital investment in new plant equipment.

If we were successful in recycling this 25 percent of hazardous wastes in 5 years we could generate an estimated 40,000 jobs in the recycling industry alone. And this does not even include the impact of a multiplier effect in the economy. We could also expect a reduction in the current administration and structure at EPA by an equivalent 25 percent, and in the long term we can look forward to the reduction in the Superfund account because we will be reducing the threat of cleanup costs for hazardious wastes dumps. Also, this tax credit for recycling will assist in developing energy resources, thus our dependence on foreign energy sources is reduced.

In conclusion, Mr. Speaker, I urge the Congress to study and analyze these revenue losses and gains carefully, I am confident that the benefit to the Treasury far outweighs the costs from this tax credit I am proposing.

Since coming into office I have heard much talk about the nationwide chemical waste dilemma, but little talk about long-range solutions. After considerable study by myself and my staff, I am convinced that these two bills are at least the beginning of the answer to the fundamental problems surrounding hazardous waste disposal.

LEGISLATION AMENDING SOCIAL SECURITY ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maine (Mr. McKERNAN) is recognized for 5 minutes.

● Mr. McKERNAN. Mr. Speaker, in recent months, matters concerning social security have been foremost on the minds of many Americans. Today, I am pleased to be introducing a bill on behalf of myself and several of my colleagues, to amend title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954 to provide for two changes to move us toward the goal of insuring social security trust fund solvency and toward restoring the confidence of social security program participants.

Title I of this bill provides for coverage of Members of Congress under the social security system. It is often argued by critics of the social security system that if social security is such a good program, and in fact if the program is sound, than why are Members of Congress exempted from participation? This provision answers that concern. Those who pay into social security, and who depend upon it, deserve the reassurance that their elected representatives who create the laws are subject to them. This action will both demonstrate our faith that Congress will resolve the problems of social security and it will allay the fears of citizens who are concerned about the future of social security. The provision to cover Members of Congress under the social security system would be effective on January 1, 1984.

Title II of this bill mandates changes in the handling of uncashed social security checks. Money paid by citizens in good faith for social security should not be used by the Government for other purposes. Under the current procedures, the Social Security Administration estimated that more than $30 million in uncashed checks will go into the Treasury's general fund this year, rather than being credited back to the social security trust funds from which they were originally drawn. As Members of the 98th Congress, we have the responsibility of facing the long-term problem of social security solvency; procedures such as this are a slow drain on the system and clearly must be corrected. In fact, the Nation-

al Commission on Social Security Reform addressed this problem specifically in its proposal, recommending that the amount of uncashed Old Age, Survivors and Disability Insurance checks in the past be credited back to the social security trust funds. This proposal enjoyed bipartisan support among members of the Commission. I am happy to say that this bill, too, enjoys bipartisan support here in the House.

The two changes proposed in this bill, while small in nature, will help to demonstrate that the 98th Congress believes in the long-term solvency of the social security system, and will be taking steps to insure it.●

U.S. INVOLVEMENT IN MIDDLE EAST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. PAUL) is recognized for 5 minutes.

Mr. PAUL. Mr. Speaker, this week President Reagan pledged U.S. border protection for Israel if Israel removes its troops from Lebanon. As Commander in Chief the President certainly can respond militarily in an emergency, if our Nation is attacked or our security threatened. But by no stretch of the imagination can it be said that such an elaborate arrangement in the Middle East is required for America's security. Moreover, the President has no authorization to make any such agreement.

This assumption of power is, nevertheless, the logical outgrowth of a decades-old foreign policy based on our extended commitments overseas. An interventionist foreign policy creates problems, the so-called solutions to which can only be found in further commitments and intervention. I do not believe the American people are happy with the ever-growing number of obligations we have assumed over the last several decades, but they feel helpless to change this policy.

Israel has not and will not benefit from our persistent involvement in the Mideast. Since our dollars flow to both Arabs and Israelis, we will not be inclined to allow either side to decide for itself what is in its own best interest.

Israel under today's circumstances cannot retain its sovereignty for we will always feel compelled to criticize their actions if in our opinion these actions destabilize the area. This is true whether it involves their borders with Gaza in the south or the settlement on the West Bank. I think what they do in these areas is their business, not ours. How would we feel if a country halfway around the world told us how we should act in the face of what we believed to be a threat to our borders?

Committing unlimited troops and Americans dollars to secure a border betweeen two warring factions who have fought for thousands of years does not make much sense. Our presence in the Middle East helps neither the Arabs nor the Israelis and it does little to increase the probability of peace in the long run. Although the proponents of these policies are sincere in their intent to bring peace, their actions in fact jeopardize America's interests. They increase the likelihood of our being engulfed in a regional conflict in which we need not and should not become entangled. In our attempt to befriend both Arab and Isreali, we inevitably will alienate both. Giving military support to two sides of a conflict and then proclaiming neutrality is not a tenable policy.

It is like buying two tomcats, putting them in a cage and then insisting they should not fight since they belong to the same owner. Obviously, putting your hand between the two to stop the fighting while pleading for reason will not work either.

But even if it did work, which it will not, where is the moral and constitutional authority for such a grandiose assumption of responsibility? Quite frankly, there is none. The responsibility of the administration and the Congress is to promote security for our Nation and to seek peace and harmony with all nations. Pursuing a policy of free trade with all and not giving aid to allies or potential adversaries would do more to enhance peace and prosperity than any attempt to guarantee borders in the Middle East or anywhere else. Such a policy cannot achieve peace between enemies halfway around the world. There is neither authority nor a popular mandate for it. There is no money for this kind of intervention either. We are broke, with $1 trillion debt staring us in the face. Expenditures of this sort will only hasten the day of our collapse.

We have already pumped a billion dollars into the Mideast in the name of peace, yet the powderkeg is as hot and dangerous as ever. This policy has been costly beyond words. There are many more dollars hidden in our Pentagon budget over and above the direct foreign aid expenditures we all know about. But the real threat lies ahead.

Continued intervention in the Middle East will only guarantee greater problems for us in the future. It cannot enhance our security. It can only jeopardize peace and weaken our own defenses.

TENANT RENTAL CONTRIBUTION ACT OF 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. FRANK) is recognized for 5 minutes.

● Mr. FRANK. Mr. Speaker, today I am introducing the Tenant Rental Contribution Act of 1983. I am pleased to be joined by 39 of my colleagues, including the chairman of the Committee on Banking, Finance and Urban Affairs, Mr. ST GERMAIN; the chairman of the Housing Subcommittee, Mr. GONZALEZ; and my colleague on the Housing Subcommittee, Mr. SCHUMER.

As part of the Omnibus Budget Reconciliation Act of 1981, Congress, the President, made a very unfair decision. It raised the percentage of income to be paid by tenants in the various assisted housing programs from 25 percent of adjusted income, the level which had existed for a number of years, to 30 percent. With the multitude of budget cuts in domestic programs implemented by this administration already placing tremendous strain on our poorest citizens, increasing rents was a particularly unfortunate and untimely action.

The bill I am introducing today would return the proportion of income to the 25 percent level in the section 8, public housing, section 236, and rent supplement programs. In addition, it would standardize for the first time in statute the definitions of "income" and "adjusted income" for these programs. In these and other respects, this legislation does not change past or proposed regulatory policy by the Department of Housing and Urban Development. However, in order to insure continued fair treatment of low income tenants by the administration, I am proposing to put these policies into statute.

Likewise, the term "adjusted income," which serves as the base from which the 25-percent amount is calculated, is specifically defined in this legislation. Adjusted income is defined as the income remaining after deducting; $400 for each family member residing in the household who is under 18 (other than the head of household or his or her spouse), who is handicapped, disabled, a student, or is elderly; any unreimbursed medical expenses over 3 percent of income; or amounts paid for care of children, handicapped or disabled family members if such care is necessary to enable another family member to be employed; and any unreimbursed and unusual occupational expenses.

The act is made effective in the first month following enactment.

Mr. Speaker, those who reside in assisted housing are often those most directly affected by this administration's assault on domestic programs critical to the poor, elderly and disabled. Yet they are being asked at the same time to contribute a greater portion of their already strained budgets to housing costs. I believe this Congress has a responsibility to correct its action in the 97th Congress and to return the rental contribution to the much fairer 25-percent level.●

ESTONIAN INDEPENDENCE DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, 65 years ago on February 24, 1918, the people of Estonia established an independent nation of their own, free of the domination imposed on them for centuries by the Russians. Today, I am privileged to commemorate the 65th anniversary of Estonian Independence Day and to focus attention on the heroism and courage of the Estonian people who continue to struggle, to pray, and to work for the day when Estonia can once again enjoy liberty.

The Estonian American National Council has issued a statement concerning the current situation in Estonia, and that statement follows as well as a memorandum from the Relief Centre for Estonian Prisoners of Conscience in the U.S.S.R.:

STATEMENT ON THE SITUATION IN ESTONIA

As the Estonian people all over the free world commemorate the 65th anniversary of their Declaration of Independence, the Estonians in Estonia are facing very serious threats to their language, culture, and their very existence as a nation.

One of the declared policies of the Soviet Union is the creation of the "new Soviet man". Schooled to believe in the tenets of Soviet communism, the "new Soviet man" would reject the culture of his ancestors, and embrace that of the Soviet Union. In reality, this is a policy aimed at crushing the individuality of the scores of nationalities encompassed by the Soviet Union, and subjugating them completely to the dominance of the Russian majority. It is an attempt to russianize them out of exestence.

In Estonia, this policy has already had many frightening consequences. The status of the Estonian language, and the right of the Estonians to use their mother tongue in their everyday lives has been sharply attacked. The ILTA-SANOMAT, Helsinki's evening newspaper, recently published photocopies of a secret directive ordering the Russian language to be granted preferential status at all official and educational levels in Estonia, in all cultural areas and, especially, in teacher's training. Addressed to the Estonian Communist Party, the directive was issued by its First Secretary, Karl Vaino, himself a russianized Estonian, born in Siberia.

The demographic situation of Estonia is also causing grave concern. A recent appeal to the West from 15 Estonian human rights activist expresses the fear that Tallinn, the Estonian capital, will be turned into a Russian city upon the completion of the new harbor. At present, Estonians constitute only 51.5% of the city's population, and the new harbor could bring an additional 100,000 to 200,000 non-Estonian immigrants to Tallinn. Over-industrialization of Estonia as a whole, with its resulting immigration of non-Estonians to fill the labor shortage, had, by 1979, already resulted in the number of Estonians falling to 64.7% of their country's total population (down from 92.5% in 1934).

1982 has brought tremendous changes in the leadership of the entire Soviet Union. The prospect of a future under Yuri Andropov cannot, however, be a very hopeful one for the Estonian people. Andropov is the only Russian leader, to date, who has personally visited Estonia. He came, after the student demonstrations of 1980, in his role as chief of the KGB, to chastise the local KGB for not effectively controlling and suppressing the nationalist sentiments of the population, as expressed by the thousands of school children marching through the streets of Tallinn and shouting anti-Soviet as well as anti-Russian protests. Considering also the ruthless suppression of the Ukrainian national movement executed by the KGB under Andropov's leadership, the Estonian national movement—inded, all national movements in the Soviet Union—must view the future with apprehension.

The beginning of 1983, has, however, brought some hopeful indications for the future. On January 13th, the European Parliament passed a resolution reiterating the right of the Baltic States of Estonia, Latvia and Lithuania, to self-determination. The resolution called for their case to be brought up at the follow-up meetings for the Helsinki Accords, and to be submitted to the UN Subcommittee on Decolonization, inasmuch as these countries are, in effect, Soviet colonies.

Happily, the United States government, as stated in a Voice of America editorial, has heartily endorsed this proposal:

". . . Bringing their colonial status before the United Nations would emphasize that time has not legitimized the Soviet claims to Estonia, Latvia and Lithuania. It would also remind the Kremlin leaders that the outside world is aware of their treatment of the Baltic populations—and of the harassment and imprisonment of the Baltic patriots who even today continue to defy the imperial Soviet state."

The resolute refusal by the United States to legitimize the Soviet seizure of the Baltic States is a fact which gives moral strength to those struggling within the Soviet Union. The Soviet authorities continually attempt to demoralize any opposition by constantly convincing them that they are alone, and abandoned by the rest of the world.

Dissident sources confirm that every scrap of evidence assuring them of the continued policy of non-recognition of the Soviet incorporation of the Baltic States, by the United States and other Western governments, serves as a boost to their morale. It means that they have not been forgotten after all!

NEW YORK, N.Y., *February 15, 1983.*

MEMORANDUM

STOCKHOLM,
December 8, 1982.

To: The Delegations at the Conference on Security and Cooperation in Europe at the Follow-up Meeting in Madrid.

From: Relief Centre for Estonian Prisoners of Conscience in the USSR.

The signing of the Final Act of the Conference on Security and Cooperation in Europe provided the guidelines for promoting peace, prosperity and security in Europe. The Final Act recognized that respect for human rights is an essential factor for the peace, justice and well-being necessary to insure the development of friendly relations and co-operation among individuals as among all States.

In flagrant violation of the Final Act the Soviet Union continues to deny the Estonian people basic human rights. Human rights activists and nationalists who dare to speak out against the oppressive Soviet regime are jailed, confined to psychiatric institutions and physically abused. In 1980–1982 about 40 national and human rights activists were arrested and sentenced to forced labour camps, compared with 60 during the whole decade of 1970–1979. In addition, more people had their homes searched, were questioned, forced out of employment, expelled from schools etc.

The most illuminating example of the many breaches of the Helsinki Agreement is the case of Mart Niklus, sentenced on January 8, 1981, to 10 years in special regime labour camp plus five years internal exile for "anti-Soviet agitation and propaganda", already referred in our memorandum of April 7, 1981. As appears from the attached description of his case (Appendix I) Mart Niklus is at present being held in a cell for solitary confinement in Perm forced labour camp No. 389/36. That means less food, ban on meetings with relatives and more restricted right to send and receive mail until April 8, 1983. Another example is the case of Tiit Madisson, sentenced on May 15, 1981 to four years in strict regime labour camp plus two years internal exile for "anti-Soviet agitation and propaganda" (Appendix II). On November 9, 1982, he started in Perm forced labour camp No. 389/37 a hunger strike in connection with the Follow-up Meeting in Madrid, lasting until the end of the Madrid Conference. He wants to leave the USSR and is seeking an emigration permit for himself and for his family.

We appeal to the signatories of the Helsinki Agreement to seek the implementation of the Final Act by requesting that:

1. The Soviet Union release Mart Niklus, Tiit Madisson and all other Estonian political prisoners from prisons, labour camps, psychiatric institutions and other places of detention and facilitate their return home.
2. The Soviet Union allow Mart Niklus and Tiit Madisson, who are seriously ill and have applied for emigration permits to leave the USSR.
3. The Soviet Union put an end to the deliberate violation of the human rights in Estonia.

Respectfully submitted.

ANTS KIPPAR,
Chairman.

Mr. Speaker, since 1917, when the Communists seized power in Russia, they have worked unceasingly to expand Russia's colonial empire, and even worse than the czars, they kill, torture, or imprison all those, Russian and non-Russian alike, who believe in the value and strength of religion. In 1940, Estonia was one of the victims of these brazen attempts to impose the Russian language and Russian Government on non-Russian peoples, just as in 1980 Afghanistan became the most recent victim in the Communist program of mass murder and slavery of subject peoples.

I am honored to join with Americans of Estonian descent in my own 11th District, which I am honored to represent, in the city of Chicago, and all over this country as they share with Estonians everywhere the prayers, the hopes and the determination that the Estonian people will have a free nation once again, and that the American people will remain alert to the fe-

rocious nature of the Communist tyrant.●

NOW IS THE TIME FOR A NEW GI BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentelman from Mississippi (Mr. MONTGOMERY) is recognized for 5 minutes.

● Mr. MONTGOMERY. Mr. Speaker, on February 10, I introduced H.R. 1400, to establish a new educational assistance program for veterans and members of the Armed Forces.

It will be recalled that at the beginning of the 97th Congress I introduced H.R. 1400, to establish a peacetime GI bill for persons who enter on active duty in the Armed Forces as a measure to enhance the recruitment and retention of quality military personnel. Subsequently, the Committee on Veterans' Affairs reported H.R. 1400 on May 19, 1981. Since my bill was jointly referred to the Committee on Armed Services, further hearings were held by its Subcommittee on Military Personnel and Compensation, following which H.R. 1400 was reported with amendments on May 17, 1982.

The bill I introduced has all the provisions of the legislation reported by the Armed Services Committee in the 97th Congress, except for the deletion of a cash-out provision which authorized the cashing out of earned educational benefits as provided in that legislation.

It is my view that it continues to be absolutely essential that we have an educational assistance program for the All Volunteer Force that will attract quality people and retain key personnel that are vital to the Armed Forces. Until the present economic downturn, the military was having extreme difficulty meeting its recruitment goals. Key mid-level noncommissioned and commissioned officers were leaving the service.

The decline in the economy, and particulary the increase in the unemployment rate, have been major factors in helping the Armed Forces meet their recruitment goals during this past year and have dramatically improved the retention rates. However, despite these statistics, it is pretty well agreed that for the long haul we must have a GI bill if the military is to effectively carry out its mission. We know that as the rate of unemployment begins to fall and the economy straightens out, the military will again have serious difficulties in recruiting and retaining quality personnel. In addition, the manpower pool is shrinking. The number of 17- to 21-year-old males will drop by more than 2 million by 1989, a time when military manpower needs will be increasing.

During the 97th Congress, 19 separate hearings were held in the House on this legislation by both committees. We received excellent testimony in support of H.R. 1400. For example, Lt. Gen. Maxwell R. Thurman, Deputy Chief of Staff for Personnel, U.S. Army, and former chief recruiter for the U.S. Army, stated:

> One of the things that is essential is that we get a long-term educational incentive program that is not subject to the vagaries of year-by-year determination. . . . We need a GI bill, and many of the features of H.R. 1400 are similar to the features that we perceive.

The President has indicated his support for an All Volunteer Force GI bill, However, the Department of Defense has taken the position that a GI bill is not needed at this time. I believe that this is a shortsighted view on the part of the Department of Defense policymakers, and it is totally inconsistant with the views of the military service chiefs.

The Department of Defense talks about H.R. 1400 being too costly. H.R. 1400 would end enrollments for new recruits in the veterans' educational assistance program (VEAP) with the Government's cost of VEAP offset against the estimated cost of H.R. 1400. It is estimated that in 1995, the military services will be spending $98.1 million for tuition and reimbursement programs. Most of this cost could be eliminated with the approval of H.R. 1400. The Congressional Budget Office has stated that this new proposed program has a cost projection range from $1 million in outlays for the first fiscal year to $187 million for the fifth fiscal year.

While H.R. 1400 is called a peacetime GI bill, it does not provide a level of benefits anywhere near comparable to previous GI bills. The bill attempts to accomplish the goal of providing recruitment and retention enhancement for members of the Armed Forces, including educational assistance for service in the National Guard and Reserves, but at the same time the provisions of the bill have been modified to give the Armed Forces more flexibility to recruit higher quality personnel and to retain key midlevel noncommissioned officers. The result is a bill with a very modest cost which will be paid back many times by the beneficiaries of the bill.

Mr. Speaker, we have a GI bill without the GI. The administration has requested over $5 billion for higher education assistance for fiscal year 1984.

My question is: Why cannot some of this money be made available to enhance the recruitment and retention ability for our military to have some money for education available for those who agree to serve a tour of duty in the military service.

During the 97th Congress, H.R. 1400 had 128 cosponsors. I hope that there will be an increase in the number of Members who will join me as cosponsors of H.R. 1400, 98th Congress. Therefore, any Members desiring to have their name added as a cosponsor should contact Beth Kilker at 225-9166.●

INTRODUCTION OF THE NEIGHBORHOOD DEVELOPMENT DEMONSTRATION ACT OF 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. COYNE) is recognized for 5 minutes.

● Mr. COYNE. Mr. Speaker, I am today introducing, along with Mr. GARCIA of New York and 27 of our colleagues, the Neighborhood Development Demonstration Act of 1983.

Most Members of this body know, as I do, that the strength of a Nation is often rooted in the neighborhoods of its towns and cities. The cooperative and innovative activities undertaken there by largely volunteer groups accomplish tasks beyond the capability of other institutions in our society.

The Neighborhood Development Demonstration Act would stretch the Federal dollar while enabling neighborhood groups to go forward with projects that might otherwise be stillborn for lack of funds. Depending in part on the economic condition of the neighborhood involved, the Secretary of the Department of Housing and Urban Development could match the amount of private funds raised by a neighborhood group by ratios ranging from 3 Federal dollars to every voluntarily contributed dollar to 10 Federal dollars for each private one. Neighborhood groups could be funded for initiating projects in such areas as job training, housing rehabilitation, new enterprise development, and service delivery.

My city of Pittsburgh was the birthplace of the very successful neighborhood housing services, a program which encourages cooperation between neighborhood groups, lenders, and local governments. The vitality of the neighborhood groups in my city, and of those in the towns and cities elsewhere in the Nation where people have joined together for the common good, convinces me that this approach to development makes as much good sense as the NHS model.

A similar bill is today being introduced in the other body by Senator HEINZ of Pennsylvania. I urge my colleagues to consider sponsoring this House bill, and to join in working to make sure this measure becomes law this year.

At this point, I would like to insert into the RECORD a letter of support for this bill from the United States Conference of Mayors and a legislative summary of the bill's provisions.

Here follows that material:

U.S. CONFERENCE OF MAYORS,
Washington, D.C., February 23, 1983.

Hon. WILLIAM J. COYNE,
House of Representatives,
Cannon House Office Building,
Washington, D.C.

DEAR REPRESENTATIVE COYNE: On behalf of the membership of the U.S. Conference of Mayors, it is my pleasure to lend our support to the Neighborhood Development Demonstration Act of 1983.

The demonstration program authorized by your bill is a sensible way to continue federal support of neighborhood-based development efforts which are designed to stimulate employment and housing in distressed cities. Strong neighborhoods are the backbone of healthy cities. Continued federal support as envisioned by your legislation will ensure that the efforts which have been growing in recent years do not wither now for lack of support.

We are especially pleased by the bill's provision for a certification from the chief elected official of the locality in which the neighborhood group is located, that the activities are consistent with the city's own development efforts. This guarantee of close cooperation between City Hall and neighborhood development groups is an important feature of the bill.

We look forward to participating further in the development of this legislation as it moves through the legislative process, and hope you will feel free to call on our staff for assistance or comment as the bill moves along.

Thank you for this opportunity to share our views on your legislative initiative.

Sincerely,

JOHN J. GUNTHER,
Executive Director.

LEGISLATIVE SUMMARY—NEIGHBORHOOD DEVELOPMENT DEMONSTRATION ACT OF 1983

PURPOSE

The objective of the act is to demonstrate the feasibility of a new mechanism for encouraging neighborhood development activities such as housing rehabilitation, job training, service delivery, new enterprise development, and other endeavors. Federal matching funds—up to $50,000 in one year—would be provided to eligible neighborhood organizations which raise voluntary charitable contributions from individuals, businesses and religious organizations in their neighborhoods.

METHOD

The Act would authorize the Secretary of Housing and Urban Development to establish a three-year demonstration program to determine the practicality of this new mechanism. Participation in the demonstration program would be limited to 100 eligible neighborhood organizations in the first year, 200 in the second year, and 300 in the third year. The Secretary would establish a 15-member neighborhood development advisory council, composed of representatives of eligible neighborhood development organizations. This council would review and evaluate applications for funds, making recommendations to the Secretary for selection. The Secretary and council would attempt to balance population size, economic condition and geographic location of neighborhoods to provide a fair demonstration of the effectiveness of the assistance.

OPERATION

For each participating organization, the Secretary would establish a ratio by which voluntary charitable contributions made by individuals and businesses would be matched by federal funds. Depending on the economic conditions and the number of households and businesses in the neighborhoods involved, this ratio would be set no lower than 3 Federal dollars for every dollar of voluntary contribution, nor higher than 10 Federal dollars for every dollar of voluntary contributions. The local government must certify that the financial assistance is consistent with the neighborhood revitalization objectives of that unit.

ELIGIBILITY

Neighborhood development organizations would be eligible to participate in the program if they (1) are organized as a nonprofit corporation under laws of the state in which they operate (2) have a representative governing board (3) have conducted business for at least three years (4) operate within neighborhoods that meet the "pockets of poverty" criteria of the Housing and Community Development Act of 1974 (5) conduct one or more activities that mainly benefit persons of low or moderate income.

AUTHORIZATIONS

The Act would authorize $5 million dollars for fiscal year 1983; $10 million for fiscal 1984 and $15 million for fiscal 1985.●

H.R. 1028, SEMICONDUCTOR CHIP PROTECTION ACT OF 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. EDWARDS) is recognized for 30 minutes.

● Mr. EDWARDS of California. Mr. Speaker, H.R. 1028 is a bill to amend title 17 of the United States Code to protect semiconductor chips and masks against unauthorized duplication, and for other purposes; to the Committee on the Judiciary.

SEMICONDUCTOR CHIP PROTECTION ACT OF 1983

On January 27, 1983, Congressman MINETA and I introduced a bill to extend the copyright law to protect semiconductor chip designs. Integrated circuits, or semiconductor "chips," have revolutionized the electronics industry. These chips are used to operate microwave ovens, cash registers, typewriters, printers, TV sets, refrigerators, hi-fi equipment, automobile engine controls, and many other consumer and industrial products. The chips are typically a quarter-inch square, and yet they may contain over 100,000 transistors photographically etched and deposited on a silicon wafer. Fitting these transistors into that small space, and placing them so that the device operates efficiently and economically, is a fine art and also a costly one. The layout and design process, and the preparation of the photographic "masks" used to etch, deposit layers on, and otherwise process the chips often take the innovating chip firms years, consume thousands of hours of their engineers' and technicians' time, and cost millions of dollars.

Yet, a pirate firm can photograph the chip and its layers, and in several months and for a cost of less than $50,000 duplicate the mask work of the innovator. Because the pirate firm does not have the enormous development costs borne by the innovator, the pirate firm can undersell the innovator and flood the market with cheap copies of the chip.

Continuation of such piracy may make it impossible for the semiconductor industry to continue to invest in development of new chips. Thus, unless this piracy is stopped, the industrial leadership enjoyed in the past by the American semiconductor industry may vanish.

Present law offers American industry only limited protection against this misappropriation of their technology. The current copyright laws give little, if any, protection, to semiconductor chips. Patent law can protect the basic electronic circuitry for new microprocessors or other new such products. But patent law does not protect the particular layouts and art work performed by the different American chip manufacturers in adapting those electronic circuits for a particular industrial purpose. Yet, it is those layouts and art works that consume thousands of staff hours, cost millions of dollars, and are pirated by free riders.

Summary of the bill. The bill addresses two major issues. First, it protects the substantial investments of innovating firms from misappropriation. It does this by granting 10 years of copyright protection to those who develop new integrated circuit mask designs and grants copyright owners exclusive rights to make, distribute, and reproduce images of the mask design and the chips embodying that design. Second, it protects semiconductor chip users from liability for innocent conduct and it also makes compulsory, reasonable royalty licenses available to them when necessary to protect their reasonable interests in their ongoing business activities as users of chips.

The text and the analysis of the bill follows:

H.R. 1028

A bill to amend title 17 of the United States Code to protect semiconductor chips and masks against unauthorized duplication, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Semiconductor Chip Protection Act of 1983".

DEFINITIONS

SEC. 2. Section 101 of title 17 of the United States Code is amended by adding at the end thereof the following:

"A 'semiconductor chip product' is the final or intermediate form of a product—

"(1) having two or more layers of metallic, insulating, or semiconductor material, deposited on or etched away from a piece of semiconductor material in accordance with a predetermined pattern;

"(2) intended to perform electronic circuitry functions; and

"(3) that is a writing or a discovery, or the manufacture, use, or distribution of which is in or affects commerce.

"A 'mask work' is a series of related images—

"(1) having the predetermined, three-dimensional pattern of metallic, insulating, or semiconductor material present or removed from the layers of a semiconductor chip product; and

"(2) in which series the relation of the images to one another is that each image has the pattern of the surface of one form of the semiconductor chip product.

"A 'mask' is a substantially two-dimensional partially transparent and partially opaque sheet. A mask embodies a mask work if the pattern of transparent and opaque portions of the mask is substantially similar to the pattern of one of the images of the mask work. Masks and mask works shall not be deemed pictorial, graphic, or sculptural works.

"As used in sections 109(a), 401, 405, 406, 501(a), 503, 506, 509, and 602 of this title, 'copy' includes a semi-conductor chip product that is subject to the exclusive rights described in section 106.".

SUBJECT MATTER OF COPYRIGHT

SEC. 3. Section 102(a) of title 17 of the United States Code is amended—

(1) by adding after paragraph (5) the following:

"(6) mask works;"; and

(2) by redesignating paragraphs (6) and (7) as paragraphs (7) and (8), respectively.

EXCLUSIVE RIGHTS

SEC. 4. Section 106 of title 17 of the United States Code is amended—

(1) by striking out "and" at the end of paragraph (4);

(2) by striking out the period at the end of paragraph (5) and inserting "; and" in lieu thereof; and

(3) adding at the end thereof the following:

"(6) in the case of mask works—

"(A) to embody the mask work in a mask;

"(B) to distribute a mask embodying the mask work;

"(C) to use a mask embodying the mask work to make a semiconductor chip product;

"(D) in the manufacture of a semiconductor chip product, substanitally to reproduce, by optical, electronic, or other means, images of the mask work on material intended to be part of the semiconductor chip product; and

"(E) to distribute or use a semiconductor chip product made as described in subclause (C) or (D) of clause (6) of this section.".

LIMITATION ON EXCLUSIVE RIGHTS AS TO MASKS

SEC. 5. (a) Chapter 1 of title 17 of the United States Code is amended by adding at the end the following:

"§ 119. Scope of exclusive rights: Compulsory licensing with respect to mask works

"(a) In the case of mask works, the exclusive rights provided by section 106 are subject to compulsory licensing under the conditions specified by this section.

"(b) The owner of a copyright on a mask work shall be required to grant a compulsory license under the copyright, to any applicant therefor, on the following terms and conditions, and in the following circumstances:

"(1) The applicant has purchased a semiconductor chip product made or distributed in violation of the owner's exclusive rights under section 106.

"(2) When the applicant first purchased such semiconductor chip product (hereinafter in this section referred to as the 'infringing product'), the applicant did not have actual knowledge that or reasonable grounds to believe that the infringing product was an infringing product (hereinafter in this section referred to as 'having notice of infringement').

"(3) The applicant, before having notice of infringement, committed substantial funds to the use of the infringing product; the applicant would suffer substantial out-of-pocket losses (other than the difference in price between the infringing product and a noninfringing product) if denied the use of the infringing product; and it would be inequitable in the circumstances not to permit the applicant to continue the use or proposed use of the infringing product.

"(4) The applicant offers, subject to the applicant's rights, if any, under section 501(e) of this title, to pay the copyright owner a reasonable royalty for infringing products.

"(5) The royalty shall be for each unit of the infringing product distributed or used by the applicant after having notice of infringement.

"(6) The license shall be one to make, have made (but only if the copyright owner and the owner's licensees, if any, are unable to supply the applicant at a reasonable price), use, and distribute the infringing product, for substantially the same purposes that gave rise to the applicant's right to a compulsory license, throughout the United States, for the life of the copyright, revocable only for failure to make timely payments of royalties.".

(b) The sectional analysis at the beginning of chapter 1 of title 17 is amended by adding the following:

"119. Scope of exclusive rights: Compulsory licensing with respect to mask works.".

DURATION OF COPYRIGHT

SEC. 6. Section 302 of title 17 of the United States Code is hereby amended by adding at the end thereof the following:

"(f) MASKS.—Copyright in mask works endures for a term of ten years from the first authorized—

"(1) distribution;

"(2) use in a commercial product; or

"(3) manufacture in commercial quantities of semiconductor chip products made as described in subclause (C) or (D) of clause 6 of section 106 of this title.".

INNOCENT INFRINGEMENT

SEC. 7. Section 501 of title 17 of the United States Code is amended by adding at the end thereof the following:

"(e) Notwithstanding the other provisions of this chapter, a purchaser of a semiconductor chip product who purchased it in good faith, without having notice of infringement (as that term is used in section 119 of this title), shall not be liable as an infringer or otherwise be liable or subject to remedies under this chapter with respect to the use or distribution of units of such semiconductor chip product that occurred before such purchaser had notice of infringement.".

IMPOUNDING AND SEIZURE

SEC. 8. Sections 503(a), 503(b), and 509(a) of title 17 of the United States Code are each amended by inserting "masks," after "film negatives," each place it appears.

EFFECTIVE DATE

SEC. 9. The amendments made by this Act shall take effect ninety days after the date of enactment of this Act, but shall not apply to—

(1) semiconductor chip products manufactured in the United State or imported into the United States before the effective date;

(2) masks made in the United States or imported into the United States before the effective date; or

(3) semiconductor chip products manufactured in the United States by means of masks described in paragraph (2) of this section.

SECTION-BY-SECTION ANALYSIS OF SEMICONDUCTOR CHIP PROTECTION ACT OF 1983

SECTION 1. TITLE OF THE BILL

Section 1 of the bill provides that the Act would be cited as the "Semiconductor Chip Protection Act of 1983."

SECTION 2. DEFINITIONS

Section 2 of the bill defines the terms "semiconductor chip products," "mask works," and "mask," and it amends Section 101 of the Copyright Code to include them. The bill also includes semiconductor chip products as "copies" under certain other sections of the Copyright Code. This is more economical of wording than it would be to insert the phrase "semiconductor chip product made as described in Section 106(6) of this title" or equivalent phraseology in each of the listed sections, but the effect is the same.

Semiconductor chips are defined as multilayer products etched into semiconductor material in accordance with a predetermined pattern, which are intended for use as electronic circuits, and which are writings or discoveries, or whose manufacture, use, or distribution is in or affects commerce. Mask works are defined as series of related images embodying the pattern of the surface of the layers of semiconductor chips. Masks are embodiments of the image used to etch a layer of a simiconductor chip.

SECTION 3. SUBJECT MATTER OF COPYRIGHT

Section 3 of the bill amends Section 102(a) of the Copyright Code by adding "mask works" as one of the specifically enumerated categories of copyrightable works.

SECTION 4. EXCLUSIVE RIGHTS

Section 4 of the bill amends Section 106 of the Copyright Code by adding to the present categories of exclusive rights under copyright law a new right as to mask works. The exclusive right of the owner of the copyright in a mask work is to embody the mask work into an individual mask, to distribute such masks, to use such masks to make semiconductor chips, to otherwise reproduce the images of the mask work onto material intended to be part of a semiconductor chip, and to distribute and use semiconductor chips so made.

SECTION 5. COMPULSORY LICENSING

Section 5 of the bill limits the exclusive rights of the owner of a copyright on a mask by requiring reasonable royalty compulsory licenses for bona fide purchasers, when they have already innocently committed substantial funds to the use of the chip and it would be inequitable not to permit them to continue their use of the chip in their product.

SECTION 6. DURATION

Section 6 of the bill limits mask copyrights to ten years.

SECTION 7. INNOCENT INFRINGEMENT

Section 7 of the bill adds, to present Copyright Code provisions as to innocent infringement of copyrights, a provision that innocent bona fide purchasers of semiconductor chip products are not infringers and are not liable to damages or other remedies for their innocent conduct. Innocent conduct is good faith purchase, use, or distribution of the product without knowledge that it is protected by someone else's copyright.

SECTION 8. IMPOUNDING AND SEIZURE

Section 8 of the bill amends the impoundment and seizure provisions of Sections 503(a) and (b), and 509(a), of the Copyright Code by including masks in the same category as plates, molds, film negatives, and other articles used to make infringing copies.

SECTION 9. EFFECTIVE DATE

Section 9 of the bill makes the Act effective in 90 days, but exempts previously manufactured products.

Detailed analysis

The bill amends the present copyright laws and adapts their remedies to protect semiconductor chips. Sections 2 and 3 of the bill add a new category of "work" to those works already protected under the Copyright Act. The existing Act, 17 U.S.C. § 102(a), protects literary works, musical works, dramatic works, choreographic works, pictorial works, motion pictures and other audiovisual works, and sound recordings. The bill lists "mask works" as an additional category of protected work. The bill's definition of "mask works" is generally parallel to the present Copyright Act's definitions of audiovisual works and motion pictures (17 U.S.C. § 101), i.e., as a series of related images. In the case of a mask work, these images are the images having the pattern of the various transitional or final layers of the semiconductor chip.

The bill defines "masks" as sheets respectively embodying one of the individual layer images making up the mask work. For example, one mask of the mask work would be that used to open holes in a silicon dioxide coating in order to admit "dopants" such as boron; another mask would be that used to configure an upper layer of aluminum in the chip for electrical contacts. Thus, a mask is related to a mask work as a single frame of a motion picture is related to the whole motion picture work or as a page or chapter of a book is related to the whole literary work.

Section 4 of the bill defines the exclusive rights accorded the owner of a copyrighted mask work. It does so by adding a further paragraph to present 17 U.S.C. § 106, which sets forth the exclusive rights enjoyed by the owners of the different types of copyrightable works that are presently recognized in the Copyright Act. The exclusive rights accorded the owner of a mask work are:

To make masks embodying the copyrighted work,

To distribute such masks,

To make chips with such masks,

To reproduce images of a mask work onto a layer of a chip; and

To use or distribute such chips.

The fourth of these exclusive rights is inclusive of all means of embodying the images of a mask onto a chip. This includes not only the use of masks to do so, but also the new technological process of impressing the image directly onto the chip with the aid of a computer-driven light beam. It is believed that this provision has sufficient breadth to cover foreseeable advances in chip manufacturing technology, so that pirates will not be encouraged to try to exploit loopholes in the law.

Limitations on these exclusive rights are imposed by sections 5 and 7 of the bill, and existing copyright law. Section 5 provides a compulsory licensing provision for chips, under somewhat different procedures from the compulsory licensing provisions of section 115 of the present Copyright Act. The provisions of new section 119 of the Copyright Act, added by section 5 of this bill, apply to bona fide purchasers of infringing chips, who do not have notice or reason to believe that they are engaging in copyright infringement. Such bona fide purchasers may commit substantial funds to the development of a product built around the infringing chip, and it could work an undue hardship later to compel them to abandon manufacture of the product. An example might be a personal computer innocently designed around an infringing microprocessor chip. If the innocent infringer has the "equities" on his side, he becomes entitled under section 119 to a permanent, reasonable-royalty license as to the chip. In general, the concept of the balance of equities under new section 119 of the Copyright Act would be like that provided in section 252 of the Patent Act (35 U.S.C. § 252), which protects intervening rights of manufacturers of products that are subject to a reissue patent.

The reasonable royalty license applies to chips distributed or used after the bona fide purchaser acquires reasonable notice of copyright infringement. No royalty is required from the bona fide purchaser as to products already sold and gone before the bona fide purchaser had notice, or for other past conduct that is wholly completed before notice.

Similarly, persons further down the distribution chain have equivalent rights if they are bona fide purchasers. While each case must be decided on its own equities, it would appear that an ordinary consumer who was a bona fide purchaser should rarely or never be liable to pay anything, while a commercial user might well be obliged to pay something to continue his economically beneficial use of the infringing product. The question of royalty or no royalty merges into that of what constitutes a "reasonable" royalty for the use of the chip. That is a matter, in part, of the equities of the user, and in part of more objective question—usually posed as what a "willing purchaser" would pay a "willing seller" if they negotiated a license in good faith. This test or standard for "reasonable royalty" is described more fully in such decisions as *Horvath v. McCord Radiator & Mfg. Co.*, 100 F.2d 326 (6th Cir. 1938) ("that which would be accepted by a prudent licensee who wished to obtain a license but was not so compelled and a prudent patentee who wished to grant a license but was not so compelled . . . that amount which a person desiring to use a patented machine and sell its product at a reasonable profit would be willing to pay"), and other decisions construing 35 U.S.C. § 284. That section of the patent law provides that a patentee shall recover as damages "in no event less than a reasonable royalty for the use made of the invention." See also 28 U.S.C. § 1498, which requires the government to pay "reasonable and entire compensation" for the infringement of a patent or copyright, which compensation is generally equated to a "reasonable royalty." *Decca Ltd. v. United States*, 640 F.2d 1156 (Ct. Cl. 1980); *Leesona Corp. v. United States*, 599 F.2d 958 (Ct. Cl.), *cert. denied*, 444 U.S. 991 (1979).

The license under section 119 is to make, use and distribute the chip. Also, if the copyright owner and the copyright owner's licensees, if any, cannot supply the chip at a reasonable price, the licensee is free to purchase the chip from a nonlicensed source, at a reasonable royalty rate to the copyright owner. Again, the term "reasonable" as applied to price has the same meaning as it does with regard to royalty rate in the foregoing case law precedents.

Section 7 provides the further limitation on the copyright owner's exclusive rights that innocent infringers will have no liability at all. This provision is complementary to section 5 of the bill, and confirms that a bona fide purchaser need not pay any royalty or be subject to liability for conduct occurring before the bona fide purchaser had reasonable notice of copyright infringement.

Finally, the existing "fair use" provisions of section 107 of the present Copyright Act apply to the exclusive rights of a chip innovator. Accordingly, in the case of masks and chips, it is not an infringement of copyright to reproduce the pattern on the mask solely for the purpose of teaching, analysis, or evaluation, or to use the concepts or techniques embodied in the mask or chip, such as the circuit schematic or organization of components. That means that legitimate reverse engineering is not prohibited by the bill. Rather, the bill is directed at the appropriation of substantial parts of the drawings embodied in the masks and chips. It is possible, perhaps, that cases could be imagined in which it would be hard to draw the line between legitimate reverse engineering and the misappropriation forbidden by this bill. But as a practical matter, it does not make economic sense for a pirate to appropriate the fruits of a chip innovator's mask design labor unless the appropriation is wholesale. That is, to save the cost of making a set of masks the piratical copyist will want to make a photographic or nearly photographic copy of the original chip. Otherwise, the copyist will not ordinarily get the full benefit of the piracy and "free ride." Hence, it is unlikely that cases will need to be dealt with that are in a gray zone between clear copying and clearly legitimate reverse engineering. The lack of a bright line conceptual distinction between copying ideas (reverse engineering) and copying expression (piracy) is thus of little practical concern when most actual semiconductor chip fact situations are either at one end or else the other end of the spectrum.

It is the intent of this legislation that the Congress exercise its full powers in this field. In this regard, primary reliance is placed on the Congress' enumerated powers under Article I, Section 8, Clause 8 of the Constitution, which authorizes the Congress to regulate "writings." In order to insure full scope for the remedial provisions of the bill, however, reliance is also placed on the "discoveries" aspect of Article I, Section 8, Clause 8, and also on the Congress' broad power to regulate commerce under the Commerce Clause. This approach obviates any possible problems or speculations as to legislative power, such as those found in The Trademark Cases, 100 U.S. 82 (1879) (trademark act held unconstitutional because rested on Art. I, § 8, cl. 8, instead of on commerce power). Accordingly, even though it may be deemed that a chip is not a "writing," chips may be regulated and are regulated under this bill as useful "discoveries,"

or alternatively by the commerce power. As a practical matter, virtually any conduct relating to chip piracy will be in or will affect commerce. There is therefore no need to resolve possible speculation over whether chips should be regarded as writings, discoveries, or articles of commerce.

Cost of the legislation

It is estimated that the cost of the legislation will be insubstantial. The bill does not create budget authority or direct spending.

Regulatory impact statement

No significant additional regulatory impact would be incurred in carrying out the provisions of this legislation; there would not be additional impact on the personal privacy of companies or individuals; and there would be no additional paperwork impact.●

TARGETED EMPLOYMENT ASSISTANCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 10 minutes.

● Mr. LAFALCE. Mr. Speaker, today I am introducing a bill to target assistance under the emergency jobs program to high unemployment areas. My bill would provide $1.2 billion in supplementary community development bloc grant (CDBG) assistance to communities with high unemployment.

As early as next week, Congress is going to consider a $4.3 billion emergency jobs package, but we have received no indication that any of these funds will be targeted to areas of high unemployment.

The $4.3 billion package will include $2 billion for transportation and conservation-related jobs, $1.2 billion for supplementary CDBG funds, $765 million for accelerated maintenance and repair of construction of Federal buildings, $50 million for day care facilities, and $250 million for emergency assistance for food and shelter.

The $1.2 billion supplementary CDBG funds will be allocated to all eligible communities through the CDBG entitlement formula.

This means that every city and urban county will get its fair share of the funds on the basis of the bloc grant formula.

My bill would set aside 75 percent of the supplementary CDBG funds for cities and urban counties where unemployment exceeds 9 percent.

This is an emergency program, Mr. Speaker, and the allocation of funds should reflect the unemployment emergency that afflicts communities like Niagara Falls where unemployment hovers around 20 percent and Buffalo where unemployment approximates 15 percent.

The remaining 25 percent would be allocated through the States for other units of general local government where unemployment exceeds 9 percent. This provision sets aside funds for communities like Lockport and Orleans and Niagara Counties, nonentitlement communities where unemployment is having a devastating effect on the local economies.

When the emergency jobs bill comes to the floor, there will be tremendous pressure to pass the bill as reported by the Appropriations Committee. Mr. Speaker, I share sentiments of the leadership—we do not want a large number of amendments that threaten the agreement that has been worked out with the White House on this program. The program is too important and the need too great to jeopardize this emergency bill.

However, the $4.3 billion package agreed to by the Democratic leadership is phase I of our 1983 economic recovery program. Phase II will include additional emergency assistance and I hope to make targeted community development aid part of our phase II package.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. PICKLE, for 30 minutes, today.

(The following Members (at the request of Mr. CHANDLER) to revise and extend their remarks and include extraneous material:)

Mr. MCKERNAN, for 5 minutes, today.
Mr. SUNDQUIST, for 5 minutes, today.
Mr. PAUL, for 5 minutes, today.

(The following Members (at the request of Mr. PICKLE) to revise and extend their remarks and include extraneous material:)

Mr. FRANK, for 5 minutes, today.
Mr. GONZALEZ, for 30 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. MONTGOMERY, for 5 minutes, today.
Mr. COYNE, for 5 minutes, today.
Mr. EDWARDS of California, for 30 minutes today.
Mr. LAFALCE, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. CHANDLER), and to include extraneous matter:)

Mr. GUNDERSON.
Mr. YOUNG of Alaska.
Mr. WHITEHURST.
Mr. VANDER JAGT.
Mr. LENT.
Mr. MICHEL in two instances.
Mr. EVANS of Iowa.
Mr. SENSENBRENNER.
Mr. DAUB.
Mr. LEWIS of California in two instances.
Mr. PAUL.
Mr. WOLF.

(The following Members (at the request of Mr. PICKLE) and to include extraneous matter:)

Mr. LANTOS.
Mr. RODINO.
Mr. DINGELL in two instances.
Mr. GAYDOS.
Ms. KAPTUR in two instances.
Mr. STRATTON.
Mr. RATCHFORD.
Mr. HOWARD.
Mr. EDGAR.
Mr. FEIGHAN in two instances.
Mr. CONYERS.
Mr. FORD of Michigan in two instances.

ADJOURNMENT

Mr. SLATTERY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock noon), the House adjourned until tomorrow, Friday, February 25, 1983, at 11 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

412. A letter from the U.S. Railroad Retirement Board, transmitting a report on a violation of section 3679 of the Revised Statutes, as amended; to the Committee on Appropriations.

413. A letter from the Administrator, U.S. Environmental Protection Agency, transmitting the Agency's annual report on the administration of the Toxic Substances Control Act, covering fiscal year 1982, pursuant to section 30 of the act; to the Committee on Energy and Commerace.

414. A letter from the board members, Railroad Retirement Board, transmitting a report on the Board's determination that it must use 50 percent of its general fund borrowing authority in fiscal year 1983, pursuant to section 22(a) of the Railroad Retirement Act as amended; to the Committee on Energy amd Commerce.

415. A letter from the Director, Office of Legislative Affairs, U.S. International Development Cooperation Agency, transmitting a report on the economic conditions in Egypt during 1982 and the ability of that country to meet its debt service obligations, pursuant to section 723 of Public Law 97-113; to the Committee on Foreign Affairs.

416. A letter from the Director, Peace Corps, transmitting a draft of proposed legislation to further amend the Peace Corps Act; to the Committee on Foreign Affairs.

417. A letter from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

418. A letter from the Special Counsel, U.S. Merit Systems Protection Board, transmitting a report in response to a complaint filed with the Secretary of the Interior, pursuant to 5 U.S.C. 1206(b)(5); to the Committee on Post Office and Civil Service.

419. A letter from the Secretary of Housing and Urban Development, transmitting the Department's report on Federal tax incentives and rental housing, pursuant to the report of the House Committee on Banking, Finance and Urban Affairs which accompanied the Housing and Community Development Act of 1980; jointly, to the Committees on Banking, Finance and Urban Affairs and Ways and Means.

420. A letter from the Secretary of State, transmitting a report of the Department's activities related to recruitment and equal employment for the period October 1, 1981 to September 30, 1982, pursuant to section 105(d)(e) of the Foreign Service Act of 1980; jointly, to the Committees on Foreign Affairs and Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MOAKLEY: Committee on Rules. House Resolution 58. Resolution providing for permanent professional and clerical staff of the Permanent Select Committee on Intelligence (Rept. No. 98-8). Referred to the House Calendar.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. RODINO: Committee on the Judiciary. H.R. 3. A bill to provide for the appointment of U.S. bankruptcy judges under article III of the Constitution, and for other purposes; with an amendment; referred to the Committee on Appropriations for a period not to exceed 15 legislative days with instructions to report back to the House as provided in section 401(b) of Public Law 93-344 (Rept. No. 98-9). And ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BREAUX:

By Mr. BIAGGI:

H.R. 1636. A bill to amend section 924 of title 18 to increase the penalties for certain offenses relating to firearms, and to provide mandatory minimum penalties in certain circumstances; to the Committee on the Judiciary.

H.R. 1637. A bill to amend title 18 of the United States Code to provide that persons accused of committing Federal felonies who have attained the age of 15 years shall be tried as adults, and to require the several States, the District of Columbia, and other territories and possessions of the United States to treat all felony offenders alike who have attained the age of 15 years; to the Committee on the Judiciary.

H.R. 1638. A bill to amend title 18 of the United States Code to establish rational criteria for the imposition of the sentence of death, and for other purposes; to the Committee on the Judiciary.

H.R. 1639. A bill to amend section 1751 of title 18 of the United States Code to eliminate the insanity defense to prosecutions for the offense of assassination of the President and related offenses; to the Committee on the Judiciary.

H.R. 1640. A bill to require the fingerprinting of juvenile delinquents upon conviction of or adjudication and to forbid the withholding of information from criminal trials on the grounds such information relates to a juvenile proceeding; to the Committee on the Judiciary.

H.R. 1641. A bill to amend the Urban Mass Transportation Act of 1964 by proscribing certain acts committed against a mass transportation system; to the Committee on Public Works and Transportation.

H.R. 1642. A bill to amend title 38, United States Code, to provide for the payment of service pensions to veterans of World War I and the surviving spouses and children of such veterans; to the Committee on Veterans' Affairs.

By Mr. D'AMOURS (for himself, Mr. JONES of North Carolina, Mr. FORSYTHE, Mr. PRITCHARD, Mr. STUDDS, Mr. BONKER, and Mr. DE LA GARZA):

H.R. 1643. A bill to authorize appropriations to carry out the national sea grant college program for fiscal years 1984 and 1985; to the Committee on Merchant Marines and Fisheries.

By Mr. EDGAR (for himself and Mr. CONTE):

H.R. 1644. A bill to authorize the Secretary of the Army, acting through the Chief of Engineers, to make loans to operators of certain water supply systems for the rehabilitation, improvement, and expansion of those systems, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. EDGAR (for himself, Mr. MONTGOMERY, Mr. HAMMERSCHMIDT, Mr. CORRADA, Mr. DE LUGO, Mr. SAM B. HALL, JR., Mr. WYLIE, Mr. LEATH of Texas, Mr. HILLIS, Mr. SHELBY, Mr. MICA, Mr. MCEWEN, Mr. DASCHLE, Mr. DOWDY of Mississippi, Mr. SMITH of New Jersey, Mr. MARTINEZ, Ms. KAPTUR, Mr. BURTON of Indiana, Mr. HARRISON, Mr. SUNDQUIST, Mr. PENNY, Mr. BILIRAKIS, Mr. STAGGERS, Mrs. JOHNSON, Mr. SLATTERY, Mr. BRYANT, and Mr. RICHARDSON):

H.R. 1645. A bill to amend title 38, United States Code, to increase the per diem rate payable by the Veterans' Administration to States providing domiciliary, nursing home, and hospital care to veterans to State homes, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. FLORIO:

H.R. 1646. A bill to amend the Railroad Retirement Act of 1974 and the Railroad Retirement Tax Act to assure sufficient resources to pay current and future benefits under the Railroad Retirement Act of 1974, to make technical changes, and for other purposes; jointly, to the Committees on Energy and Commerce and Ways and Means.

By Mr. FOGLIETTA:

H.R. 1647. A bill to require the Secretary of Health and Human Services to make grants to States and to local governments, for the purpose of providing emergency assistance to the homeless; jointly, to the Committees on Agriculture, Banking, Finance and Urban Affairs, and Energy and Commerce.

By Mr. FRANK (for himself, Mr. GONZALEZ, Mr. SCHUMER, Mr. ST GERMAIN, Mr. MITCHELL, Mr. FAUNTROY, Mr. D'AMOURS, Ms. OAKAR, Mr. VENTO, Mr. GARCIA, Mr. LOWRY OF WASHINGTON, Mr. COYNE, Ms. KAPTUR, Mr. MORRISON of Connecticut, Mr. RANGEL, Mr. TORRES, Mr. LEVINE of California, Mr. OWENS, Mr. MOAKLEY, Mr. SAVAGE, Mr. WEISS, Mr. TOWNS, Mr. SMITH of Florida, Mr. FORD of Tennessee, Mr. CONYERS, Mr. GEJDENSON, Mr. OTTINGER, Mr. SCHEUER, Mr. WYDEN, Mr. YATES, Mr. BORSKI, Mr. MOLLOHAN, Mr. STOKES, Mr. CROCKETT, Mr. MINETA, Mr. LEHMAN of Florida, Mr. RODINO, Mr. MAVROULES, Mr. FROST, Mr. MURPHY, and Mr. KILDEE):

H.R. 1648. A bill to provide that the tenant contribution toward rental payments under certain lower income housing assistance programs may not exceed 25 percent of adjusted income, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. GEJDENSON:

H.R. 1649. A bill to provide that certain trusts shall not be treated as private foundations; to the Committee on Ways and Means.

By Mr. SAM B. HALL, JR. (for himself and Mr. ALBOSTA):

H.R. 1650. A bill to extend the authorization of appropriations for the Office of Government Ethics for 5 years; jointly, to the Committees on the Judiciary and Post Office and Civil Service.

By Ms. KAPTUR (for herself, Mr. APPLEGATE, Mr. ECKART, Mr. FEIGHAN, Mr. HALL of Ohio, Mr. LATTA, Mr. LUKEN, Mr. MCEWEN, Ms. OAKAR,

Mr. PEASE, Mr. SEIBERLING, and Mr. STOKES):

H.R. 1651. A bill to authorize the Secretary of the Army to construct a project to provide shoreline protection for Maumee Bay State Park, Ohio; to the Committee on Public Works and Transportation.

By Mr. KAZEN (for himself, Mr. UDALL, Mr. CHENEY, Mr. KOGOVSEK, Mr. MCCAIN, Mr. MCNULTY, Mr. LEHMAN of California, and Mr. SEIBERLING:

H.R. 1652. A bill to amend the Reclamation Safety of Dams Act of 1978, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. LAFALCE:

H.R. 1653. A bill to amend the Housing and Community Development Act of 1974 to provide supplementary community development block grant assistance to communities with high unemployment due to adverse national economic conditions, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. LEATH of Texas (by request):

H.R. 1654. A bill to amend title 38, United States Code, to provide that a person who has not been married previously and marries a veteran who has a permanent and total service-connected disability after the disability is determined to exist shall be afforded educational assistance by the Veterans' Administration comparable to that which would have been afforded had the marriage preceded the determination of such disability; to the Committee on Veterans' Affairs.

H.R. 1655. A bill to amend title 38, United States Code, to repeal the authority for eligible veterans and eligible spouses to pursue correspondence training, and for other purposes; to the Committee on Veterans' Affairs.

H.R. 1656. A bill to amend title 38, United States Code, to terminate the authority of the Administrator of Veterans' Affairs to make advance payments of educational and subsistence allowances, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. LEHMAN of Florida:

H.R. 1657. A bill to amend the Internal Revenue Code of 1954 to allow the deduction for adoption expenses for all adoptions, and for other purposes; to the Committee on Ways and Means.

By Mr. MCKERNAN (for himself, Mrs. VUCANOVICH, Mr. CHANDLER, Mr. DEWINE, Mrs. SNOWE, Mrs. JOHNSON, Mr. ALBOSTA, Mr. CARPER, and Mr. BARTLETT):

H.R. 1658. A bill to amend title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954 to provide mandatory social security coverage for Members of Congress, and to provide for the crediting of unnegotiated benefit checks to the OASDI trust funds; to the Committee on Ways and Means.

By Mrs. MARTIN of Illinois (for herself, Mr. BEREUTER, Mr. DAUB, Mr. GUNDERSON, Mr. HARTNETT, Mr. HAMMERSCHMIDT, Mr. MCNULTY, Mr. STENHOLM, Mr. TAUKE, Mr. WEBER, and Mr. WINN):

H.R. 1659. A bill to require the Secretary of Agriculture to establish an export payment-in-kind program to offset the adverse effects of agricultural export subsidies imposed by foreign countries; jointly, to the Committees on Agriculture and Foreign Affairs.

By Mr. MINISH:

H.R. 1660. A bill to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition; to the Committee on Ways and Means.

By Mr. MURPHY (for himself, Mr. MATSUI, Mr. SUNIA, Mr. BENNETT, Mr. FORSYTHE, Mr. REID, Mr. DAUB, Ms. FIEDLER, Mr. HORTON, Mr. TALLON, Mr. MONTGOMERY, Mr. DWYER of New Jersey, Mr. EDWARDS of Oklahoma, Mr. HOWARD, Mr. EVANS of Iowa, Mr. TOWNS, Mr. SENSENBRENNER, Mr. WILSON, Mr. WILLIAMS of Montana, Mr. NICHOLS, Mr. VANDERGRIFF, Mr. PATMAN, Mr. YATRON and Mr. WINN):

H.R. 1661. A bill to impose a Federal criminal penalty for robbery of controlled substances from a pharmacist; to the Committee on the Judiciary.

By Mr. PAUL (for himself, Mr. MCDONALD, Mr. HANSEN of Idaho, Mr. HANSEN of Utah, Mr. PHILIP M. CRANE, Mr. BROWN of Colorado, Mr. VALENTINE, and Mr. DANIEL B. CRANE):

H.R. 1662. A bill to provide for the minting of American gold eagle coins pursuant to article 1, section 8, of the Constitution of the United States; to the Committee on Banking, Finance and Urban Affairs.

H. Res. 25: Mr. DREIER of California.

SENATE—*Thursday, February 24, 1983*

(Legislative day of Wednesday, February 23, 1983)

The Senate met at 11:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

The PRESIDENT pro tempore. Our opening prayer today will be delivered by the Reverend E. E. Wheeless, Jr., pastor of the First Baptist Church, Springfield, Va. Rev. Wheeless is sponsored by Senator JOHN WARNER, of Virginia.

PRAYER

The Reverend E. E. Wheeless, Jr., M. Div, M.R.E., pastor, First Baptist Church, Springfield, Va., offered the following prayer:

Almighty God and Sovereign Ruler over men and nations, we come before Thy presence seeking divine guidance. Provide the wisdom and insight for the Senators in their many responsibilities. May they know divine wisdom for decisions that affect a great people and a great nation.

Because Your word teaches us that righteousness exalts a nation, grant that each of us individually will be what the Lord expects. Speak to our hearts that the steps of a righteous man are ordered by the Lord.

May You not only bring peace into the world but may You provide justice among the peoples of the world.

Thank You that You hear our prayer. We are grateful for the confidence that we have in the presence and the power of God. We are truly amazed that You allow imperfection to speak to perfection and humanity to speak to divinity.

Our prayer is with a sense of hope and with great thanksgiving.

In the name of our Lord Jesus Christ, Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

ORDER FOR PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order and the recognition of the distinguished junior Senator from Hawaii (Mr. MATSUNAGA) on special order, there be a period for the transaction of routine morning business to extend not longer than 30 minutes in which Senators may speak for not more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, at the conclusion of the time just provided for the transaction of routine morning business, the Senate will resume debate on the motion to proceed to the consideration of S. 47, calendar order No. 13, the Shipping Act of 1983.

Mr. President, I hope that what I am about to say next will not be misunderstood because it is not meant to be in the nature of a threat and certainly not coercive.

We attempted yesterday to get a unanimous-consent order that would provide for a cloture vote on the bill on Tuesday next. For a variety of reasons that did not work on yesterday, but a part of that multipart agreement was that we would not be in session on Friday. I am sure by now Senators, knowing them as I do and as we all do, have begun, at least tentatively, to make plans for Friday, more often than not, to travel back to their States or to undertake other important responsibilities.

I feel I must give a final answer on whether we will be in session on Friday early enough for Senators to make their plans and to adjust their schedules, so let me say this, Mr. President. I am still hopeful that we can work out an agreement on this matter. I regret that it fell through yesterday. I think that the parties are very close to getting that done. But if we do not have such an agreement by 2 p.m. today, it seems to me that to wait any longer to make the decision on the Friday session would be unfair to Senators. Therefore, if we do not have an agreement by 2 p.m., it will be my intention to ask the Senate to be in session on Friday and perhaps on Saturday in order to dispatch the business presently before us.

Mr. President, I have no further need for my time under the standing order.

Mr. METZENBAUM. Mr. President, will the majority leader be good enough to yield to me for just a couple of minutes?

Mr. BAKER. I am happy to yield to the Senator from Ohio.

Mr. METZENBAUM. Let me say as one who has been involved in this particular measure that the majority leader knows that I actually called him the other day and indicated that I was prepared to enter into an agreement with him in reference to a cloture vote to occur on Tuesday around 4 p.m. I actually suggested Wednesday, and he indicated that he needed to do it on Tuesday in order to proceed with the orderly conduct of the business of the Senate. I indicated my agreement.

We then had some negotiations in which we got rather close to an agreement, and it had to do actually not with anything more than the makeup of the conference committee.

Later in the day, that matter seemed to be moving toward resolution on an amicable basis. Then developed a new matter which I will not discuss at this moment, but as one who has been involved in the debate I still am prepared to attempt to move forward and not to keep the Senate in session on Friday or Saturday. If we have to, we will, but I hope that we can accommodate Senators as well as the leadership of the Senate. I think that in order to achieve that objective, there will have to be some give so that we may proceed.

When I am talking about give, I am really only talking about one matter of some consequence, and that is about the Senate taking up the amendments that a committee has already determined should be offered by the chairman of that committee. I am hopeful that we will be able to work that out. I will try to cooperate in every way with the leader of the Senate, but at this moment we still are just a bit apart.

Mr. BAKER. Mr. President, I thank the Senator.

Mr. President, let me repeat now the request that I was prepared to make yesterday so that Senators will be aware of it. Perhaps they will confer and consult for the next hour or so before we have to make a final decision on the Friday session.

Mr. President, I am not now making this request. I am merely reciting it for the information of Senators. This is the request I would have made yesterday had the negotiations not failed.

I would have asked unanimous consent that the bill, S. 47, be made the pending business and to provide that no cloture motion would be in order until 4 p.m. on February 24, which is today; provided that the committee substitute proposed by the Committee on Commerce, Science, and Transportation as well as the 17 committee

amendments to be offered by the Committee on the Judiciary be considered germane under rule XXII and that the vote on the cloture motion occur without the necessity of a mandatory quorum at 4 p.m. on March 1; provided that if there are disagreeing votes between the two Houses on S. 47 and a conference is required that there be five conferees on the part of the Committee on Commerce, Science, and Transportation, three Republicans and two Democrats, and three conferees on the Committee on the Judiciary for the consideration only of those parts dealing with antitrust matters, two Republicans and one Democrat; provided further that the Senate convene at 12 noon on Thursday, February 24, go over from Thursday until Monday, February 28, at 11:30, and go over from Monday to Tuesday, March 1, at 11:30, to recess on that day at 12 noon until 2 p.m., and that the time from 2 p.m. on next Tuesday until the vote on cloture at 4 p.m. be equally divided and controlled by the majority and the minority leaders or their designees.

That was the plan that I had urged yesterday, Mr. President, and thought we were going to get. I gather from the remarks of the Senator just now and from—has my time expired?

The PRESIDING OFFICER (Mr. TRIBLE). No, it has not.

Mr. BAKER. I gather from the remarks made just now and based on conversations yesterday that the sticky point now is whether or not the Judiciary Committee will offer all 18 amendments or, rather, only 17 of the 18 amendments. That is not a matter I am trying to arbitrate, Mr. President. That is purely up to the Judiciary Committee or any other Senator if they wish to offer the 18th amendment, if that amendment is germane under the provisions of rule XXII after cloture and at any time, of course, when recognition can be gained before cloture.

May I inquire of the Chair, does the Chair have a copy of the 18th Judiciary Committee amendment and can it tell the Senator whether that amendment would be germane under the provisions of rule XXII after cloture?

The PRESIDING OFFICER. The Chair does not, at this time.

Mr. BAKER. Mr. President, I will make an effort in the meantime to obtain a copy of the controversial 18th amendment.

I have bad recollections of the 18th amendment. In any event, perhaps we will have better luck with this one than we did with the one that created prohibition.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. BYRD. If it had not been for that amendment, would we have the song "Old Rocky Top?"

Mr. BAKER. We might not have, and Tennessee would be poorer for it. [Laughter.]

Mr. President, I will make an effort to obtain that amendment and will submit it to the tender mercies of the Parliamentarian and obtain some expression of opinion on whether or not it is germane under the provisions of rule XXII, post cloture.

The impression I have and the advice I have received from staff who believe they have examined it adequately is that the amendment is probably germane. So we may have a tempest in a teapot on the question of whether that qualified under rule XXII. It may be qualified by its terms.

Mr. METZENBAUM. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. METZENBAUM. Mr. President, it seems to me that if we could work out an arrangement whereby definitely it would be offered prior to the cloture vote, we would never have that concern. If we would obtain some agreement that it would be brought to a vote prior to cloture, then the whole question of germaneness would not be relevant, as I understand it.

Mr. BAKER. I thank the Senator.

Mr. President, I have just now had a conversation with the distinguished President pro tempore on this subject.

If they would do me the kindness of consulting with other Senators, on both sides of the aisle, who also are involved in this mater, I would be extremely pleased to be able to announce that we have resolved the issue.

Personally, I am perfectly willing to do it on the basis of 18 amendments offered en bloc or 17 amendments offered en bloc, with one amendment to be debated separately, or any combination of that.

I urge Senators, then, to talk to other Members who have indicated a particular interest. I am thinking of the Senator from Oregon (Mr. PACKWOOD), the chairman of the Commerce Committee; the Senator from Alaska (Mr. STEVENS); the Senator from Washington (Mr. GORTON), on this side. I believe there are others on the other side. I wish they would let us know as soon as possible if something can be worked out on this basis. Otherwise, it is going to be necessary to provide, for a certainty, that the Senate will be in session on Friday.

Mr. President, having said that, I am once again prepared to yield to the distinguished minority leader any time I have remaining under the standing order.

Mr. BYRD. I thank the majority leader.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The minority leader is recognized.

PEACE IS THE BEST GUARANTEE OF SECURITY IN THE MIDDLE EAST

Mr. BYRD. Mr. President, earlier this week, the President announced that the United States would guarantee the security of Israel's northern border, but only after all Israeli troops had been withdrawn from Lebanon.

I commend the President for recognizing the legitimacy of Israel's security requirements as they relate to the border with Lebanon. Last summer's incursion into Lebanon by Israeli Defense Forces was reflective of these legitimate concerns. However, I want to take this opportunity to offer my own observations as they relate to the President's proposal.

First, the best guarantee of security for Israel, or any other nation in the region, is peace. Yet, I have not detected any willingness on the part of the Arab world, exclusive of Egypt, to pursue peace with Israel.

Second, Israel has demonstrated that it is fully capable of guaranteeing its own security. It has done so without risking the lives of U.S. servicemen.

Third, one can understand the reluctance on the part of Israel to turn over the most basic responsibility of any nation to anyone else. The experience with UNIFIL forces in southern Lebanon, who could not prevent PLO shelling of Israeli settlements or PLO terrorist raids against Israel's civilian population, certainly would give any rational person pause for thought before entrusting one's own security to someone else.

Fourth, there is also the matter of the role of Congress when it comes to the commitment of U.S. forces abroad or guarantees made by our Government. I do not see how a President can offer any guarantee in the absence of the normal consultation process with the Congress. This is not to say that Congress is not committed to the security of Israel. We are certainly prepared to respond in any way necessary in support of Israel when its security is threatened. But as I pointed out earlier in my remarks, Israel has demonstrated it is fully capable of taking care of itself.

I suspect the President made the offer as an inducement to secure Israeli troop withdrawals from Lebanon. However, I think it is important to focus on the facts as they relate to the situation in Lebanon.

Last summer, the President outlined the appropriate principles governing U.S. policy toward the situation in Lebanon. He stated it was U.S. policy

that all foreign forces—Syrian, PLO, and Israeli—should be removed from Lebanon and that full Lebanese sovereignty should be restored to all its territory.

Since that time, considerable public attention has been paid to one element of this policy, that of Israel's negotiations with the Government of Lebanon. Little attention has been focused on the lack of progress in securing the withdrawal of Syrian and the remaining PLO forces.

In fact, the administration has, from time to time, expressed its displeasure over the slowness with which the Israeli-Lebanese negotiations have proceeded. Some administration spokesmen have gone so far to claim that the Israelis were placing undue demands upon the Lebanese Government in an exchange for withdrawal.

Yet, what about Syria and the remaining PLO forces? The only justification for a Syrian presence in Lebanon stems from the Arab League mandate designating that country's forces as the peacekeping force in Lebanon following the 1975-76 civil war. That mandate expired last June and can only be renewed at the request of the Lebanese Government. Since the Lebanese Government has not renewed the mandate, Syria has been an illegal occupier of the sovereign territory of another Arab nation for nearly 8 months now. So why is not pressure being applied to Syria?

I can recall during the debate on AWACS sales to Saudi Arabia that the administration argued the sale was necessary to insure the Saudis would contribute to the peace process. Well, what are the Saudis doing to pressure the Syrians and the PLO to withdraw from Lebanon? As major financial backers of the PLO and the Syrian presence in Lebanon, the Saudis certainly are able to bring pressure to bear on both.

I have heard arguments that an agreement has to be reached first with Israel before an agreement can be achieved with Syria and the PLO. I have heard arguments that as long as Israel has an occupation force in an Arab country, King Hussein does not have any flexibility to join the peace process. I do not buy those arguments, for the following reasons:

First, it appears the Arab world is perfectly willing to sit on their hands as long as occupiers of Arab countries are other Arab armies.

Second, it appears the Arab world was perfectly content to accede to the creation of a state-within-a-state, as was the case with the PLO in Lebanon prior to last summer's fighting, as long as it is Arabs violating the sovereignty of other nations.

Third, it appears that Arabs killing Arabs, as was the case when the PLO attempted to overthrow King Hussein in 1970, or Arabs killing Israelis, as has been the case with PLO terrorism, are perfectly legitimate exercises in the eyes of many in the Arab world.

But let Israel exercise the most basic responsibility of any sovereign state—that of protecting the lives of its citizens—and, all of a sudden, our most reliable ally in the region for more than 30 years is an obstacle to peace.

If Saudi Arabia, Jordan, and Syria truly wanted peace with Israel, they could have it. All Israel has ever asked from its neighbors is the right to exist in peace as a legitimate, sovereign state within secure and defensible borders. It has been, and continues to be, denied that right by all its neighbors, with the exception of Egypt. Therefore, it should be obvious to all that the burden rests squarely on the shoulders of those in the Arab world who still refuse to negotiate a permanent peace with Israel.

I think that our own Government should recognize the facts. While I have no problem with pressure to bring about some agreement between the Lebanese and Israelis, there should also be pressure applied to the other foreign military forces that are in Lebanon because I cannot blame Israel, if Israel refuses to pull back to its own borders while Syria and its forces remain in Lebanon in violation of the Arab mandate which has not been renewed and can only be renewed by request of the Lebanese Government. Then I can understand the hesitancy of the Israelis to withdraw.

I want the Israelis out of Lebanon also, but I also think it only fair to expect that the Syrians and the PLO's also leave Lebanon so that once again the Lebanese can have a country of their own, a Government that is sovereign over its own territory and peace in that area of the Middle East.

It seems to me that if this matter could be resolved it would be a major factor in the stability of the Middle East and in the securing of an ultimate peace in the Middle East.

Let me say again that peace is the best guarantee of the borders of Israel, and I would hope that the administration would exert its efforts in the direction to bring about peace there and to bring pressure on certain Arab countries which can, in turn, bring pressure on the Syrians and the PLO to remove their forces because until those forces are removed there is not going to be any great likelihood of peace to the north of Israel.

We have already seen what has happened and, of course, that explains the reasons for the move of the Israelis into Lebanon in the first place. They did it out of the natural law, I would suspect of self-preservation, they being attacked from the north. Syrians were in Lebanon in violation of the Arab mandate, and Lebanese Moslems and Lebanese Christians were being driven from their homes, driven from their villages. The Israelis in the northern part of Israel were being shelled and rocketed. They were having to leave their homes, schools, and farms, and they did just what we ourselves would do under the same circumstances.

We would not stand for that 1 minute. If Canada or some force in Canada were to shell our northern States, we would go in and take the attacking forces out, and the Israelis went in for reasons of self-protection. I want to see them out, but I also think that we should do what we can to get the Syrians out, get the PLO out, and we should not put the whole pressure on the Israelis because it is rather naive in my way of thinking to expect the Israelis to leave unless there is a guarantee that the Syrians are going to leave also and the PLO is going to leave. Else Israel will have to do it all over again when there arises the necessity of self-protection.

Mr. President, I yield the floor.

RECOGNITION OF SENATOR MATSUNAGA

The PRESIDING OFFICER. Under the previous order, the Senator from Hawaii (Mr. MATSUNAGA) is recognized for a period not to exceed 15 minutes.

COMMISSION ON WARTIME RELOCATION AND INTERNMENT OF CIVILIANS RELEASES ITS FINDINGS

Mr. MATSUNAGA. Mr. President, the 96th Congress judiciously enacted legislation providing for a Federal study of the relocation and internment of civilians during World War II. The nine-member Study Commission established by Congress was specifically mandated to examine the relocation and internment of Japanese Americans living on the west coast of the United States, and Aleuts living in the Aleutian Islands chain in Alaska. During the last 2 years, I have followed the progress of this study with great interest and as one of the principal sponsors of the legislation which authorized the study, I was pleased to learn that the Commission's study is now substantially complete. I have been informed that part I, of its report, containing its findings of fact, will be officially released today. I have been further informed that the Commission's recommendations to Congress, based on its findings, will be submitted in June of this year.

Having had the privilege of reading an earlier-released copy of part I of its report, I commend the Commission on Wartime Relocation and Internment of Civilians for its thorough and unbiased examination of the facts surrounding the relocation and internment of Japanese Americans and

Native Aleuts. This volume—containing the Commission's findings of fact—is a first, and I might point out it is a rather thick volume giving in detail the findings of the Commission. It is the first time that any Federal body has ever fully examined what is regarded as one of the darkest pages in American history. Indeed, the evidence gathered and published today by the Commission indicates that even the U.S. Supreme Court was kept in the dark during its consideration in 1943 and 1944 of the Hirabayashi and Korematsu cases.

The Commission's report confirms what Americans of Japanese ancestry have always known: The exclusion of Japanese Americans from the west coast of the United States and their detention under armed guard in isolated camps during World War II, was not justified by military necessity, and the decisions were shaped by racial prejudice, war hysteria, and failure of political leadership.

The Commission found, further, that "a grave injustice was done to American citizens and resident aliens of Japanese ancestry, who, without individual review or any probative evidence against them, were excluded, removed, and detained by the United States during World War II."

The Commission report confirms that the exclusion, removal, and detention of Japanese Americans inflicted tremendous material costs, including the loss of homes and businesses sold or abandoned under duress, and injury to careers and professional advancement. But, even more importantly, there was the loss of liberty and the personal stigma of suspected disloyalty for approximately 120,000 people who knew themselves to be devoted and loyal Americans. Even today, 40 years later, many Americans find it extremely difficult to believe that their Government would imprison them when not one—not even one—of the Japanese Americans was even indicted or convicted of a crime. If there is a lingering belief that there must have been some good reason for the evacuation and detention of the Japanese Americans, this report will surely dispel it forever. Many attribute the relocation of Japanese Americans to wartime hysteria. However, the Commission found that the exclusion and removal of Japanese Americans was racially motivated and followed a long and ugly history of west coast anti-Japanese agitation. Antipathy and hostility toward the Japanese, as an ethnic group, was a major factor of life on the west coast for more than 40 years before the enemy attack on Pearl Harbor.

Moreover, the record, revealed during the Commission's study, shows that responsible public officials, knowing full well that there was no danger of an enemy attack on the west coast, took no action to allay public fears. According to the Commission report, the country was unfairly led to believe—or misled to believe—that both American citizens of Japanese ancestry and resident Japanese aliens were a threat to American Security. The Commission's findings include the following:

(1) Lt. Gen. John DeWitt, Commanding General of the Western Defense Command, recommended exclusion of Japanese Americans to the Secretary of War on the grounds that ethnicity (or race) determined loyalty;

(2) The Federal Bureau of Investigation—FBI—and members of Naval Intelligence, who had relevant intelligence responsibility, were ignored when they recommended that nothing more than careful surveillance of suspected individuals was necessary;

(3) Gen. DeWitt relied heavily on civilian politicians rather than informed military judgments in reaching his conclusions as to what actions were necessary, and civilian politicians largely repeated the prejudiced, unfounded themes of anti-Japanese factions and interest groups on the west coast;

(4) No effective measures were taken by President Roosevelt to calm the west coast public and refute unfounded rumors of sabotage and fifth column activity at Pearl Harbor;

(5) Gen. DeWitt was temperamentally disposed to exaggerate the measures necessary to maintain security and placed security far ahead of any concern for the liberty of citizens;

(6) Secretary of War Stimson and Assistant Secretary of War John J. McCloy, both of whose views on race differed from those of General DeWitt, failed to insist on a clear military justification for the measures General DeWitt wished to take;

(7) Attorney General Francis Biddle, while contending that exclusion of the Japanese Americans was unnecessary, did not argue to the President that failure to make out a case of military necessity on the facts would render the exclusion constitutionally impermissible or that the Constitution prohibited exclusion on the basis of ethnicity given the facts on the west coast;

(8) Those representing the interests of civil rights and civil liberties in Congress, the press, and other forums were silent or indeed supported exclusion. Thus, there was no effective opposition to the measures vociferously sought by numerous west coast interest groups, politicians, and journalists; and

(9) President Roosevelt, without raising the question to the level of Cabinet discussion or requiring careful review of the situation, and despite the Attorney General's arguments and other information before him, agreed with the Secretary of War that exclusion should be carried out.

In contrast to the sorry record of Japanese American detention during World War II, the Commission found that the evacuation of Aleuts from their island homes was militarily necessary. Islands in the chain were actually under enemy attack and, in one case, more than 40 American Aleuts were captured and imprisoned in Japan. All residents of islands under threat of attack, including military personnel and dependents and employees of the U.S. Department of the Interior, were evacuated along with Native American Aleuts.

However, the Commission report reveals that American Aleuts, who were evacuated to southeastern Alaska, were subjected to deplorable conditions. Typical housing consisted of an abandoned gold mine or fish cannery. Lack of medical care contributed to extensive disease and an estimated 10 percent of the Aleuts died as a result. Removal from their island homes and the death of many village elders caused irrevocable changes in the Aleuts' traditional way of life, and upon their return home after the war, they found their homes and villages destroyed. The evacuation of the early 1940's remains for the American Aleuts, as it does for Japanese Americans, the single most traumatic experience of their lives.

Mr. President, I have related only a brief summary of the Commission's findings. I strongly urge all of my colleagues to read the Commission's report, for it merits the most careful study and reflection. It reinforces my strong belief that some form of compensation is warranted for those who were the victims of what the Commission has found to be pure and simple racial prejudice and failure of political leadership. Justice delayed may be justice denied, but, no matter how long overdue, compensatory action on the part of our Government would demonstrate once again the greatness of America. In this connection, I look forward to the release of part II of the Commission's report, which I understand will include recommendations for congressional action.

Mr. President, it has been said by wiser men than me that those who neglect their history are doomed to repeat their errors of the past. The story of the Japanese Americans during World War II is one which would be told and retold, so that no other group of Americans will ever be forced to suffer the same experience because of their race or ancestry. Their experience, perhaps more than any other, poignantly reinforces the truth so dramatically uttered by President Franklin Delano Roosevelt that "Americanism is a matter of the heart and mind, not of race or ancestry."

Mr. President, I yield the floor.

(Mr. GOLDWATER assumed the chair.)

● Mr. INOUYE. Mr. President, today, as the culmination of many months of extensive hearings and meticulous archival research, the Commission on Wartime Relocation and Internment of Civilians has issued a detailed report documenting its findings. As an author of the legislation which established the Commission, I have looked forward to reviewing this report with some anticipation, and upon doing so I have found it to be an eminently read-

able as well as thoroughly documented work.

The report demonstrates conclusively that the exclusion, evacuation, and detention of over 100,000 U.S. citizens and resident aliens were unjustified and unnecessary. According to the Commission, the background of the decision leading to the exclusion of Japanese Americans was the "long and ugly history of West Coast anti-Japanese agitation and legislation." The report points out that, in spite of the fact that ethnic Japanese comprised less than 3 percent of the population of California, antagonism and hostility toward this minority group was widespread and persistent.

Other factors which contributed to the decision for exclusion were disconcerting Japanese battle victories in the Pacific, and the widespread belief that the Pearl Harbor attack was facilitated by sabotage and fifth column activity carried out by ethnic Japanese in Hawaii. Political pressure on the west coast added fuel to the fire, and the report indicates that the Federal Government did little or nothing to quell the hysteria and antagonism.

The culmination of these various circumstances and events was the issuance of Executive Order 9066. With the signing of this order by the President, in concurrence with the War Department, American citizens and alien residents were compelled to leave the west coast based on wartime military necessity. As a result, approximately 120,000 people were placed in locked and guarded internment camps. Property was confiscated or sold for almost nothing, assets were frozen, but more importantly, dignity was sacrificed, and self-respect suffered considerably. Mr. President, how can we put a price tag on the suffering which these people, our fellow Americans, endured only four decades ago?

In establishing the Commission, it was, and still is my hope that its findings will serve to inform and educate the American people, to haunt our consciences to such an extent that this black chapter in our Nation's history will never be reopened, not in our lifetime or in future generations. Ladies and gentlemen, let us make the Commission's report a sober reminder of past errors, a record of grave injustice committed against our brothers. Let us remember that the ignorance, fear, and anger which precipitated the incarceration of thousands of loyal Americans are "wolves in sheep's clothing" engendered by, but not necessarily limited to, conditions of wartime hysteria.

I, and most other ethnic Japanese residents of Hawaii, at the time were fortunate in that we were not interned. As a soldier, however, I visited the Rohwer, Arkansas' internment camp, and try as I have, I cannot forget this experience. I still recall the question I asked myself as the barbed wire fences came into view: "Is this America?" Hopefully, as a result of the Commission's excellent work, this black chapter can be closed but not forgotten.

Mr. PROXMIRE. Mr. President, will the junior Senator from Hawaii yield me some of his time which, I understand, he may have left?

Mr. MATSUNAGA. Yes; I will be happy to yield the time to the distinguished Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I have some matters I want to discuss, but I would like to congratulate my good friend from Hawaii on an excellent statement. This is certainly one of the most tragic and serious abridgments of civil liberties this country has ever carried out. It was a studied policy of our country, and it is one, in retrospect, that every one of us deplores, and I am just delighted that the great Senator from Hawaii has called it to our attention. It should be on our conscience and it should be resolved to never let it happen again.

Mr. MATSUNAGA. Mr. President, I thank the Senator from Wisconsin, and especially because he represents the great State of Wisconsin and its wonderful people. I recall that shortly after the attack on Pearl Harbor, although I was even before the attack on active duty and temporarily in command of a company defending the Island of Molokai in the Hawaiian Islands chain, shortly after it became rather remote that the Japanese would invade, which was in June 1942, I was ordered, along with all other Americans of Japanese ancestry in Uncle Sam's uniform, to turn in my arms and ammunition, and without more notice than 76 hours we were on board the converted troop ship, the SS *Maui,* sailing for a destination unknown.

When we landed in Oakland, Calif., we were put upon a troop train, 1,565 of us, all of Japanese ancestry in American uniform, stripped of our arms and ammunition. When that train finally came to a screeching halt, we looked out the window and the first thing we saw were barbed wire fences. We exclaimed: "Well, the pessimists were right. We are headed for a concentration camp." But it turned out that the barbed wire fences held two Japanese prisoners of war whom our men had captured on Waimanalo Beach on December 7, two men who had manned a two-man submarine and mistakenly was beached on Waimanalo Beach.

Mr. PROXMIRE. Japanese or Americans?

Mr. MATSUNAGA. Americans of Japanese ancestry captured the two Japanese sailors who manned the two-man submarine and 1,565 of us, a battalion, an infantry battalion, had the duty of guarding these two Japanese prisoners of war as our first duty. We trained with wooden guns, although we were veterans already of war.

Had it not been for the great people of Wisconsin, who welcomed us as the pure unhyphenated Americans, who took us into their homes and who showed us such kindness, believe me—I have this flashback, and one of the most pleasant experiences—as one who had been stripped of his arms, accused of being a disloyal American, had it not been for the people of Wisconsin, my faith in this great country would have been shattered. And through you, I say to Senator PROXMIRE, I take this opportunity to thank the people of Wisconsin.

Mr. PROXMIRE. Mr. President, I wish to thank my good friend again. Once again, I point out that some of the most magnificent soldiers that this country has ever had were the Americans of Japanese ancestry who represented us, and fought for us, and defended this country at great risk and, in some cases, losing their lives. The senior Senator from Hawaii, I understand, left an arm in Europe. Both Senator MATSUNAGA and Senator INOUYE are not only outstanding Senators but were great soldiers fighting for this country.●

THE ADMINISTRATION'S PROPOSED JOBS PROGRAM

Mr. PROXMIRE. Mr. President, we have one of the most absurd economic policy ironies in recent years now. Here we have the supreme test of Keynesian economics: We have a deficit in this fiscal year of more than $200 billion. Indeed, in the first 3 months of this fiscal year—October, November, and December—the deficit was $68.3 billion. That is for 3 months alone. That makes the deficit ink the first 3 months of this fiscal year worse than the deficit for any full year in history prior to 1982. By the time the fiscal year expires next September 30, the deficit will be at least three times as high as any this country has ever suffered.

Mr. President, we can talk about stimulating the economy by increasing spending and cutting taxes, but this is ridiculous. Every penny of that deficit must be borrowed. It must be borrowed from the savings of the American people. Some calculate that the deficit will absorb more than 90 percent of all private savings, leaving very little for borrowing by home buyers and auto buyers and farmers buying tractors and businessmen borrowing to buy equipment.

Obviously, any private sector recovery will run right smack into these colossal demands on the credit market. And with a limited supply of credit interest rates, the price of credit will once again go through the roof,

unless—unless—the Federal Reserve Board massively increases the supply of credit. It might just do that. In fact, for the last 3 months the Fed has been doing exactly that. In spite of this explosion of money, M-1 has increased at an annual rate of about 15 percent since the first of the year; M-2, at the breathtaking rate of 30 percent; and, in spite of pumping huge amounts of credit into the market, interest rates have stabilized and started to rise.

It is astonishing that that could happen with this new credit coming in, but that is, of course, because we have such an immense amount of Federal borrowing because of the debt.

All of this, Mr. President, brings us to the wisdom, or lack thereof, of a jobs bill. Obviously, with such a high proportion of the work force being without jobs, with evidence everywhere of the heartbreak and tragedy of unemployment, Congress cannot simply stand by and do nothing.

But, what can we do? If we cut taxes further or spend more, we will create no new net jobs. Whatever we spend for a jobs program, we must borrow and, in the process, crowd out through higher interest rates those who would like to buy homes or cars, and other private borrowers in this credit economy of ours.

So what kind of program should we adopt to ease the misery of the unemployed? Well, yesterday morning's Washington Post, in a lead editorial, recognizes our dilemma and says wisely that, under present circumstances, the only good reason to spend money on a jobs program is to relieve the hardships of people who have been out of work for a long time and have scant hope of being rehired. The editorial points out that nearly a fourth of the unemployed have been out of work for more than a half year. It suggests that any jobs program should help the worst off among this group.

Such a policy might not create any new net jobs. It would, however, provide an equity and justice that causes the worst kind of heartbreak in our society.

Meanwhile, it is time Congress considered changing the wage and hour law from the 8-hour, 5-day-a-week discipline with time and a half for overtime, to a 7-hour day with double time for overtime. Such a change would provide at least 5 million additional jobs in the private sector, without a penny of additional spending; in fact, with a reduction in unemployment compensation and welfare spending.

Now mind you, I do not call for this dramatic change in policy. I am not introducing legislation to achieve it. It could be costly, it could be inflationary, and it could be a mistake in the long run.

We have not had a change in hours in this country for 50 years. The changes, when we went from a 12-hour day and a 6-day workweek to an 8-hour day and a 5-day workweek have been wholesome and have been constructive. We have been able to live with them and influence other countries to adopt a similar policy. So I think we should consider them. But I think before we take the step we should be very careful in what we do. However, it is one clear answer to our unemployment problem that has not been given the kind of consideration it deserves.

Mr. President, I ask unanimous consent that the editorial from the Washington Post be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Feb. 23, 1983]

FIGHTING UNEMPLOYMENT NOW . . .

By announcing its commitment to a $4.3 billion "jobs" program of vague specification, the White House has put Congress in a bind. Congressional leaders of both parties agree that swift action is needed—preferably by adding a jobs package to a March emergency appropriations bill needed to keep unemployment benefits flowing. But they are also aware that the limitations the White House has put on its program pretty much ensure that it won't do much to help the long-term unemployed.

The President's chief economic adviser, Martin Feldstein, described the program to a Senate subcommittee last week as an acceleration of planned spending on construction and maintenance, with no special targeting on the long-term unemployed. That probably means work on highways, dams, federal buildings, mass transit, port dredging, veterans' hospitals and urban renewal.

That will be good news for the construction unions in areas where these projects happen to be located. Unfortunately, most of the long-term unemployed aren't construction workers, and certainly no one would want to attract more workers into this perennially overcrowded field.

Mr. Feldstein defends this approach in more traditionally Keynesian terms. If the projects are going to be built anyway, they might as well be built when the economy is slack for whatever general stimulus value they may have. Looked at this way, however, the money is hardly worth spending.

It is far from clear that more of this sort of general stimulus is needed. Large tax rebates are due in April as the result of overwithholding last year; another tax cut comes in July; the $5 billion in added highway spending will begin shortly, and defense spending is accelerating. If there is any punch left in deficit spending, these outlays should provide it.

Mr. Feldstein should also ask himself whether it is really likely that this "speed-up" of public works won't add permanently to the deficit. When Congress looks in the pork barrel next year and finds it empty, the temptation to replace the missing $4.3 billion will be irresistible.

Studies of local public works programs have also shown that their job-creation value—even when both direct and multiplier effects are taken into account—is very low initially. In the first two years of operation, it would cost almost $50,000 a year for each direct and indirect job created in this way. The $4.3 billion would add only about 90,000 jobs a year—a drop in the unemployment bucket.

The only good reason to spend this kind of money on a jobs program is to relieve the hardships of people who have been out of work for a long time and have scant hope of being rehired. Almost 24 percent of the unemployed have been jobless for over half a year—a considerably higher number than in any other post-war recession. Their number, moreover, continues to grow. Spending $4 billion on helping the worst-off among this group could do much to get them back on their feet. If Congress and the President are interested in more than a symbolic jobs program, this is where their efforts should be concentrated.

NUKESPEAK—HOW OUR LANGUAGE PUSHES US TOWARD A NUCLEAR CATASTROPHE

Mr. PROXMIRE. Mr. President, I call to the attention of the Congress a new book entitled "Nukespeak," by Hilgartner, Bell, and O'Connor.

In the years I have been in this body, I have rarely called the attention of my colleagues to any book on any subject. But the steady, unremitting, year-after-year march of this world toward nuclear war cries out for action from the American Government and from this U.S. Senate.

So, Mr. President, I ask unanimous consent that the brief introduction to "Nukespeak," which indicates how our words and how the assumptions we make in our lives have conditioned us to accept the possibility of nuclear war too uncritically, be printed in the RECORD.

There being no objection, the introduction was ordered to be printed in the RECORD, as follows:

INTRODUCTION

The language we use has important influences on our thinking.

George Orwell wrote passionately about the role of language in shaping political discourse and understanding. In his 1946 essay, "Politics and the English Language," Orwell charged that political language consists mainly of "euphemism, question-begging and sheer cloudy vagueness." Thus "pacification" is the bombing of defenseless villages; "transfer of population" or "rectification of frontiers" is the robbing of millions of peasants of their farms; "elimination of unreliable elements" is accomplished when "people are imprisoned for years without a trial or shot in the back of the neck or sent to die of scurvy in Arctic lumber camps."

In the thirty-six years since the atomic bombings of Hiroshima and Nagasaki, a new language has evolved. We call that language *Nukespeak*. Nukespeak is the language of nuclear development, a term we use to include the development of both nuclear weapons and nuclear power. In Nukespeak, atrocities are rendered invisible by sterile words like *megadeaths;* nuclear war is called a *nuclear exchange*. Nuclear weapons accidents are called *broken arrows* and *bent spears*. Plutonium is called a *potential nuclear explosive*. The accident at Three Mile Island was called an *event*, an *incident*, an *abnormal evolution*, a *normal aberration*, and a *plant transient*. India called its nuclear bomb a *peaceful nuclear device*.

Nukespeak is the language of the nuclear mindset—the world view, or system of beliefs—of nuclear developers. The word *mindset* means what it implies, a mind that is already set. A mindset acts like a filter, sorting information and perceptions, allowing some to be processed and some to be ignored, consciously or unconsciously. Nukespeak encodes the beliefs and assumptions of the nuclear mindset; the language and the mindset continuously reinforce each other.

Euphoric visions of nuclear technologies are an important expression of the nuclear mindset. The discovery of X-rays and radium at the end of the nineteenth century brought forth visions of a technological *Garden of Eden*. The *philosopher's stone* and the *elixir of life* had been found at last. The discovery of nuclear fission in 1938 unleashed a torrent of similar imagery: nuclear-powered planes and automobiles would whisk us effortlessly around the globe, while unlimited nuclear electricity powered underground cities, farms, and factories.

After World War II and the bombing of Hiroshima and Nagasaki, nuclear developers used information-management techniques—official secrecy and public relations—to promote what one called the *"sunny side of the atom."* Once atomic energy was applied for peaceful purposes, a nuclear-powered *paradise* would be at hand. Electricity *"too cheap to meter"* would power the new *Golden Age*. No problem would be too difficult to solve quickly and economically. Reactors would operate safely; the disposal of radioactive waste would be a nonproblem; international *safeguards* would allow the benefits of the *peaceful atom* to spread to every nation while preventing the spread of nuclear bombs.

In his novel *1984*, Orwell warned about the danger of complete state control over the dissemination of information. The history of nuclear development has been profoundly shaped by the manipulation of information through official secrecy and extensive public-relations campaigns.

Nukespeak and the use of information-management techniques have consistently distorted the debate over nuclear weapons and nuclear power. Time and time again, nuclear developers have confused their hopes with reality, publicly presented their expectations and assumptions as facts, covered up damaging information, harassed and fired scientists who disagreed with established policy, refused to recognize the existence of problems, called their critics mentally ill, generated false or misleading statistics to bolster their assertions, failed to learn from their mistakes, and claimed that there was no choice but to follow their policies.

The nuclear debate is the most important debate in human history. We hope that this book will help readers understand the language, visions, and mindset underlying nuclear development, and that this understanding will contribute to a fruitful redirection of the discussion.

GENOCIDE CONVENTION: LEARNING FROM MISTAKES IN NAZI GERMANY

Mr. PROXMIRE. Mr. President, one-half century ago this month, Adolf Hitler was appointed Chancellor of Germany. As head of the Third Reich, Hitler took his dream of wiping every Jew off the face of Europe and tried to make it a reality. As a result of this endeavor, 6 million Jews perished.

How could one man be allowed to cause so much suffering affecting so many people, and what caused him to prevail? These questions must be addressed because if we fail to understand the past, we will repeat our mistakes in the future.

Some claim that Hitler had an uncanny insight into mass psychology and an extraordinary ability as an orator and organizer that allowed him to seize power. P. H. Terzian, in a January 1983 article for the Los Angeles Times, explains why he disagrees with this evaluation. Terzian points out that Hitler's ideology scarcely made him unique: anti-Semitism, grievances about the Versailles Treaty, and a platform of national self-renewal were not new to the Weimar Republic.

Terzian also doubts the theory that the Weimar Republic was so debauched by a decade of inflation, reparations, and unemployment, that a supine fatherland had no way out but to seek desperate remedies. After all, he asserts, the Reichstag was representative, the press was free, and art and literature were in the midst of a golden age.

So what did go wrong? Terzian offers this explanation:

> . . . the republic—delicate or otherwise—subsisted on a fallacy. It was assumed that the existence of democratic institutions presupposed their success, that democracy required no effort, only faith. This was no more true in the Germany of 1933 than it is plausible today. The Germans had no knowledge of democracy under strain, and so in the midst of crisis reverted to atavism.

Within this discourse lies a message which can be translated and applied across the Atlantic: Democracy is a delicate institution which must be protected and preserved.

It is crucial that we here in a democratic nation like the United States understand the ways in which our democratic way of life may be denied, because a country cannot rely on faith to protect its freedom. We learned this lesson from Nazi Germany.

In 1983, on the 50th anniversary of Hitler's rise to power, the threat of genocide still exists. A treaty that has been pending before the Senate since 1949, the Genocide Convention, deals with this threat. If ratified, the Genocide Convention would make the extermination or intent to exterminate any national, racial, ethnic, or religious group an international crime. The United States still refuses to become a party to the Genocide Convention, even though the need for such a treaty has not diminished since the Holocaust. Those who would destroy an entire group of people, for whatever reason, have found their work shamefully easy. Oppressors feel that they can work without fear of retribution. The Genocide Convention is a step in the direction of correcting this situation.

Let us not wait for future horrors to occur before we are spurred to action. I urge my colleagues to ratify this treaty immediately.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business that will not last longer than 30 minutes where Senators may speak for 5 minutes each.

A NEW DAY IN CHICAGO

Mr. PROXMIRE. Mr. President, the day before yesterday, Tuesday, a remarkable thing happened in the city of Chicago. Chicago, as we all know, is our second biggest city. There were three candidates running for mayor. Chicago has never had a black mayor. One of the candidates, Representative WASHINGTON, is black. Representative WASHINGTON won.

I think that is a great development. This is a great week for our country, because there is no question that blacks have been discriminated against in our country. In this body, we have no blacks now. A few years ago, we had a remarkably fine Senator from Massachusetts, Senator Ed Brooke, who is black.

Blacks are beginning to develop the kind of outstanding leadership that I think is going to make quite an impression on this country in the future. We recognize that not only does Chicago have a black mayor, but Los Angeles, Atlanta, Detroit, Newark, Gary, and New Orleans do, also. It is a remarkable indication of the ability of our black citizens, who have suffered such really serious discrimination—economically, educationally, and in so many ways—and have overcome this.

I have great respect for both Rich Daley and Jane Byrne. They are two fine people, and I think either one would have made a good mayor. There is no question in my mind that the best person won, that Representative WASHINGTON won strictly on the basis of the merits. He has been a fine Congressman. He was one of the few people, black or white, in Chicago who devoted a great deal of time to civil rights. Although he was in the Chicago political organization, he was a person who goes beyond it. He has indicated, incidentally, that he is going to stop the kind of patronage that has been the heart and core of the Chicago machine in the past.

I think this is a good day for all those who believe in representative government, especially those who believe our black citizens have not had the kind of opportunity they deserve and that they can and will provide the

kind of leadership this country urgently needs at all levels.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNIFORM PARCEL WEIGHT AND SIZE LIMITATIONS EFFECTIVE FEBRUARY 27, 1983

Mr. STEVENS. Mr. President, last summer the President signed into law a small but significant piece of legislation which I introduced to repeal long outdated parcel size and weight limitations imposed on the mailing public. The limitations, intended to protect the Railway Express Agency, provided that the Post Office Department, and later the U.S. Postal Service, could not accept parcels larger than 40 pounds or 84 inches in combined length and girth between first-class post offices. That is to say that Americans served by the approximately 6,000 largest post offices, and at that time by the REA, were not able to mail packages as large as residents of smaller communities.

The REA went out of business in 1975, thus ending any arguable need for this very real discrimination among Americans. Last August, we repealed this arbitrary limitation. The Governors of the U.S. Postal Service requested a change in regulations from the Postal Rate Commission, and recently accepted the Commission's recommended decision.

Uniform parcel weight and size limitations of 70 pounds and 108 inches, respectively, will become effective this Sunday, February 27. I am pleased to note this small measure of additional equality for the American people, and one less burdensome and unnecessary regulation.

LEATHER PRODUCTS EXEMPTION FROM CARIBBEAN BASIN INITIATIVE

Mr. COHEN. Mr. President, I support the goals of legislation to implement the economic provisions of the Caribbean Basin Initiative (CBI). I believe that promoting political stability through development of economic strength is a laudable goal. I do not believe, however, that industries such as leather products manufacturers—already suffering the effects of import competition—should bear the burden of this new policy.

I am very pleased that President Reagan's proposal already contains an exemption for leather products from the duty-free provisions of the CBI. I do not see how, without this assurance, I could justify supporting one-way trade liberalization to the 2,500 unemployed shoe and leather workers who have lost their jobs during the past year in my State. The exemption is needed both because of the import-sensitive nature of the leather products industry and the lack of alternative remedies available through our domestic trade laws.

The footwear industry is among the most sensitive to the effects of import competition. To substantiate this claim, I need only to refer to some historical facts. In 1968, the United States produced 642 million pairs of shoes and imports accounted for 21 percent of the domestic market. Based on trends in 1982, production has been reduced to an annual rate of 167 million pairs, while imports have now captured over 60 percent of the domestic market.

Similarly, in the State of Maine, America's No. 1 footwear-producing State, there were nearly 27,000 workers employed in this industry in 1968 producing 58 million pairs in 82 plants throughout the State. By this year, however, only 63 plants employing 16,300 workers remain and production has declined to 47 million pairs.

In fact, the International Trade Commission, which is statutorily authorized to make injury determinations under our trade laws, has found on two separate occasions that imports were causing serious injury to the domestic shoe industry.

The administration recognized the need for special consideration for certain industries when the Caribbean Basin Initiative was originally proposed to Congress. The textile and apparel industry was exempted totally from the trade liberalization provisions due to the import-sensitive and labor-intensive nature of the industry. Now I am pleased that the same treatment is afforded the leather products and footwear industry.

Mr. President, the footwear industry has undertaken many of its own initiatives to improve its competitiveness with foreign imports and has reasonable wage rates. In spite of these efforts, imports continue to grow, forcing Americans out of work. I feel that these jobs cannot be sacrificed to improve our relationship with the Caribbean region.

It is for all these reasons that I want to express my continued support for exempting the leather products and footwear industries from the trade liberalization portions of the Caribbean Basin Initiative.

MR. CALE YARBOROUGH OF SARDIS, S.C., WINNER OF THE 1983 DAYTONA 500 STOCK CAR RACE

Mr. THURMOND. Mr. President, I want to take this opportunity to formally congratulate stock car driver Cale Yarborough of Sardis, S.C., on winning the 1983 Daytona 500 race on Sunday, February 20, in Daytona, Fla.

This is Mr. Yarborough's third Daytona 500 victory, yet this particular race was perhaps more special to him than any other race he has driven. While driving during the time trials on the Monday before the race, Mr. Yarborough's high-performance Chevrolet Monte Carlo suddenly rose off of the racetrack and violently tumbled through the air before being virtually demolished. Fortunately, Mr. Yarborough escaped injury from this grueling accident. His car, which only moments earlier had set an all-time one-lap record of 200.503 miles per hour, was damaged beyond repair. The chances of winning the race with his backup car seemed slim, but the quality of one's automobile is only half of the art of racing. The other half of this challenging sport depends upon the abilities of the driver. Mr. Yarborough proved his skills at Daytona and made a remarkable recovery—one which race car enthusiasts recognize as one of the great comebacks in stock car history.

I commend Cale Yarborough for his skill and competitive spirit, and for his unique ability to overcome adverse circumstances to obtain the ultimate goal of victory. Such is the mark of greatness.

Mr. President, I know that my colleagues in the Senate will want to join me in congratulating Mr. Yarborough for this superb achievement. In order to better describe this exciting race, I ask unanimous consent that an article from the Charleston News and Courier be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Charleston (S.C.) News and Courier, Feb. 21, 1983]

RESILIENT YARBOROUGH WINS DAYTONA 500

DAYTONA BEACH, FLA. (AP)—Cale Yarborough, who this past week had flipped through the air in a frightening crash, drove his backup car past Buddy Baker on the back stretch of the last lap to win the $1 million Daytona 500 Sunday.

Yarborough, a three-time Winston Cup champion, sat solidly in the second spot, behind Baker, for 10½ of the last 11 laps. On the final trip around the 2.5-mile Daytona International Speedway, the 42-year-old driver from Sardis, S.C. dropped low near the end of the long backstretch and whipped his Pontiac LeMans past Baker's Ford Thunderbird, taking Bill Elliot's Ford and the Chevrolet of Joe Ruttman with him in the draft.

Yarborough stayed ahead through the final two turns to win his third Daytona

500, while the trailing threesome came across the finish line in a virtual dead heat. Elliott wound up second, about four car lengths behind Yarborough, with Baker third and Ruttman fourth, Dick Brooks was fifth, a lap behind the leaders.

The winner averaged 155.979 mph in earning the top prize of more than $100,000.

The race was fast and relatively clean despite tensions that built prior to the event after a week of spectacular and violent crashes, one resulting in a severe head injury for Bruce Jacobi, who remains in critical condition.

The top four finishers locked together and ran single file when the green flag fell 32 laps from the end of the 200-lap event following the sixth and final caution period of the race.

Yarborough, who last won this race in 1968 and 1977, set an all-time one-lap record of 200.503 mph last Monday before crashing in the Chevrolet Monte Carlo that the team of Harry Ranier had prepared for this race. That came during the opening time trial for the race and put the team, headed by crew chief Waddell Wilson, far behind in preparations.

Yarborough came back with the backup car and qualified in the eighth starting position.

The start of the race was clean and competitive, with six lead changes among five drivers in the first eight laps and nine changes among seven drivers in the first 20 trips around the high-banked trioval.

Among the early big name dropouts were Benny Parsons, Tim Richmond, and seven-time Daytona 500 winner Richard Petty.

Parsons, the 1975 Daytona 500 winner, retired his Buick on lap seven with a dropped cylinder. Richmond's Pontiac LeMans started 24th and ran as high as eighth before going out on lap 25 with a broken cylinder. Petty's Pontiac Grand Prix retired while leading the race on lap 48 when the engine blew. Petty had led four times in the fast-paced race.

There were no caution flags in the first 50 laps, but Bosco Lowe spun his Buick while speeding down pit road on lap 39 and scattered crewmen in the pits of Buddy Baker and David Pearson. The car hit the low concrete pit wall and had to be retired, but the only injuries were to a crewman and one spectator, both of whom suffered scratches on the leg and bruises while scrambling out of the way.

The first yellow flag came out on lap 52 when Phil Parsons, Benny's younger brother, began smoking badly while running down the main straightaway. His Buick skidded into the infield grass and slid almost 400 feet before Parsons got the car back in hand and drove slowly around to the pits.

Darrell Waltrip's bad luck in Daytona's major events continued as he crashed his Chevrolet coming out of the fourth turn moments after the second caution flag was brought out by Dale Earnhardt's blown engine on lap 54.

Both Lake Speed and Waltrip, who has won nine times on this track but never has taken the 500 or the Firecracker 400, were trying to unlap themselves by passing leader Dick Brooks before the start-finish line.

Waltrip was taken to Halifax Hospital, where his injuries were diagnosed as a mild concussion and contusions. Waltrip was to be kept overnight for observation.

SHOPPING CENTER PROTECTION IMPROVEMENTS ACT OF 1983

Mr. DECONCINI. Mr. President, I rise today to speak in support of S. 549, the Shopping Center Protection Improvements Act of 1983, a bill which I cosponsored along with Senator HATCH. This bill would improve the protections in the bankruptcy code for shopping centers and their solvent tenants in the event of the bankruptcy of other tenants.

It is important to understand that S. 549 makes changes in the code that only make effective provisions already contained in the code. These changes strengthen protections which Congress sought to provide in the Bankruptcy Reform Act of 1978; they are not a departure from the basic principles of the 1978 act.

It is important that Congress act very quickly on these changes because without them many viable small businesses may be threatened with insolvency as an unintended and unnecessary consequence of the administration of other bankruptcies under the code. An important goal of these proposed changes is to protect shopping center tenants—often small businesses trying to survive in a difficult economy—against a bankruptcy domino effect. Under current law, the administration of a shopping center lease by the debtor or his trustee can and has caused the bankruptcies of other tenants by hurting the business of the entire shopping center.

Shopping centers are unique real estate arrangements. They are unique because of the high degree of interdependence of many businesses—some of which are direct competitors—and because of the nature of the agreements between merchants and the shopping center which are necessary to make such competition profitable to all parties. A successful shopping center is the product of sophisticated planning and negotiation which results in a carefully chosen balance of merchants. Tenants are chosen on the basis of their business use, their type of operation, the market they will serve, their financial viability, and business experience, and the needs of the surrounding community. All of these factors determine the appeal of the shopping center, as a whole, to a broad segment of the population to be served. To insure that the desired tenant mix is maintained in a shopping center, the landlord and all of the tenants enter into agreements which specify in detail the business use permitted for each tenant space.

Shopping center leases are necessarily made on a long-term basis. Generally, the tenants make large financial investments in preparing their establishments for the contemplated business, and the value of these investments is dependent upon the success of the entire shopping center. To be successful, the tenant space in a shopping center must be fully occupied by establishments operating at full capacity and offering products or services which, in conjunction with those offered by other tenants, are designed to maximize the attraction of customers to the shopping center.

To avoid the disruption of the business of a shopping center and all of its solvent tenants in the event of the insolvency of a tenant, it is necessary that tenant space not be left vacant, operated at a curtailed level, or changed to a new business use. Prior to the Bankruptcy Reform Act of 1978, shopping centers were able to prevent such disruption by incorporating into the leases clauses which permitted the landlord to take the lease back in the event of the insolvency of a tenant. These clauses were made unenforceable by the 1978 act.

However, Congress recognized the unique nature of shopping centers and sought to avoid or at least minimize the disruption of the business of a shopping center and its other tenants by incorporating specific protections into the bankruptcy code. These protections generally provide that in the event a trustee chooses to assume or to assign an unexpired shopping center lease, he must make certain assurances, including that the use provisions of master agreements will not be substantially breached and that the tenant mix will not be substantially disrupted.

Unfortunately, experience has shown that the protections provided by Congress in 1978 are inadequate. Because the bankruptcy code sets no deadline for the trustee to decide whether to reject or to assume an unexpired shopping center lease, tenant space has been boarded up for extended periods of time. Such a situation has a depressing effect on the business of the other tenants of a shopping center and has caused the bankruptcy of other tenants in some cases. Where the debtor's establishment is an anchor store—for example, the grocery store anchor of a small strip center—the entire shopping center can be destroyed.

Another problem which has arisen regards the assignment of unexpired leases to businesses not conforming with the use restrictions of the lease. Although this is plainly contrary to the intent of Congress, it appears that the use of the word "substantially" regarding breach of the lease provisions and disruption of the tenant mix has enabled debtors to avoid these restrictions.

These and other problems which have occurred under the bankruptcy code need to be expeditiously remedied. In recent months, bankruptcies of large national chain stores, as well

as small merchants, have occurred which are affecting dozens of shopping centers across the country. The vacancy, curtailed operation, or deviation from the specific use of this space will affect hundreds of other shopping center tenants. Many of these other tenants are presently operating under difficult circumstances due to the recession. There is a substantial danger, therefore, that further reductions in the business of the shopping center due to the actions of the debtor or of his trustee could create a ripple effect, causing the bankruptcies of other tenants in affected shopping center. For example, in a Michigan shopping center where an Anchor department store was vacant for several months the business in the center dropped over 50 percent, leading to the bankruptcy of a neighboring store.

For these reasons, it is important that Congress act quickly to make the necessary changes in the bankruptcy code. Trustees or debtors in possession should be required to decide whether to assume or reject an unexpired shopping center lease within 60 days of the filing of the bankruptcy petition. The word "substantially" should be deleted from the provisions requiring assurances that an assignment of a shopping center lease would not breach lease agreements and would not disrupt the tenant mix. The trustee should be required to perform all of the obligations of the tenant under the lease until the lease is assumed or rejected.

These and other changes in the bankruptcy code contained in S. 549 are needed to make effective the protections which Congress ought to provide shopping centers and their tenants in the 1978 act. Indeed, these protections are needed by the economy as a whole to avoid jeopardizing the solvency of the large numbers of merchants in shopping centers with a bankrupt tenant.

A hearing on this bill was held on January 24, before the Courts Subcommittee of the Judiciary Committee. I urge my colleagues to consult the record of that hearing. Upon consulting that record, I am sure they will recognize the need for swift action in the House and Senate on this bill.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate a message from the President of the United States submitting a sundry nomination which was referred to the Committee on Environment and Public Works.

(The nomination received today is printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE

At 11:44 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that pursuant to section 3(b), Public Law 96-317, as amended, the Speaker appoints Mr. LUNGREN as a member on the part of the House of the Commission on Wartime Relocation and Internment of Civilians.

The message also announced that pursuant to section 451(a) of Public Law 96-374, the Speaker appoints as members of the National Commission on Student Financial Assistance the following Members on the part of the House: Mr. FORD of Michigan and Mr. ERLENBORN.

At 12:23 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 65. Concurrent resolution welcoming Her Majesty Queen Elizabeth II and His Royal Highness The Prince Phillip, Duke of Edinburgh, on their official visit to the United States.

HOUSE CONCURRENT RESOLUTION REFERRED

The following concurrent resolution was read, and referred to the committee on Foreign Relations:

H. Con. Res. 65. Concurrent resolution welcoming Her Majesty Queen Elizabeth II and His Royal Highness The Prince Phillip, Duke of Edinburgh, on their official visit to the United States.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-278. A communication from the Administrator of Veterans' Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to extend the authority of the Administrator of Veterans' Affairs to provide certain contract hospital care and medical services in Puerto Rico, the Virgin Islands, and other territories; to the Committee on Veterans' Affairs.

EC-279. A communication from the Secretary of the Interior, transmitting, a draft of proposed legislation to amend Section 1(a)(1) of Public Law 95-348 (92 Stat. 487) to authorize the appropriation of $4,038,000 for capital improvement projects on Guam for fiscal year 1984; to the Committee on Energy and Natural Resources.

EC-280. A communication from the Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a request by the Sun Gas Company for a refund of excess royalty payments; to the Committee on Energy and Natural Resources.

EC-281. A communication from the Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a plan for the East Carroll Watershed, Louisiana; to the Committee on Agriculture, Nutrition and Forestry.

EC-282. A communication from the President of the National Railroad Passenger Corporation, transmitting, pursuant to law, a draft amendment to Amtrak's Criteria and Procedures for Making Route and Service Decisions; to the Committee on Commerce, Science, and Transportation.

EC-283. A communication from the Assistant Secretary of the Treasury (Legislative Affairs), transmitting, pursuant to law, a Treasury fact sheet on the Contingency Tax Plan; to the Committee on Finance.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BUMPERS:

S. 581. A bill to establish competitive oil and gas leasing and modify leasing procedures for onshore Federal lands; to the Committee on Energy and Natural Resources.

By Mr. EXON:

S. 582. A bill to amend the Internal Revenue Code of 1954 to allow a farmer to elect to include in income agricultural commodities received under a payment in kind program at the time such commodities are sold, and for other purposes; to the Committee on Finance.

By Mr. HEINZ:

S. 583. A bill to amend the Tariff Schedules of the United States; to the Committee on Finance.

By Mr. SASSER:

S. 584. A bill to provide that no gain shall be recognized for purposes of the Internal Revenue Code of 1954 from any net gift made before March 4, 1981; to the Committee on Finance.

By Mr. GRASSLEY:

S. 585. A bill to amend title 18 of the United States Code to prohibit the robbery of airline tickets; to the Committee on the Judiciary.

By Mr. HEINZ (for himself, Mr. HATFIELD, Mr. RIEGLE, Mr. ANDREWS, Mr. DODD, Mr. LEVIN, Mr. D'AMATO, Mr. HART, Mr. MOYNIHAN, and Mr. EAGLETON):

S. 586. A bill to direct the Secretary of Housing and Urban Development to undertake a program to demonstrate the feasibility of funding neighborhood development activities by providing Federal matching funds to private nonprofit neighborhood organizations on the basis of the voluntary contributions to such organizations from individuals, businesses, and religious institutions in their neighborhoods; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. COHEN:

S. 587. A bill for the relief of Pandelis Perdikis; to the Committee on the Judiciary.

By Mr. CHILES:

S. 588. A bill to amend the Immigration and Nationality Act to prevent the unauthorized entry into, and the transportation to and within, the United States of illegal aliens; to the Committee on the Judiciary.

By Mr. McCLURE (by request):

S. 589. A bill to amend section 1(a)(1) of Public Law 95-348 (92 Stat. 487) to authorize the appropriation of $4,038,000 for capital improvement projects on Guam for fiscal year 1984; to the Committee on Energy and Natural Resources.

By Mr. COHEN:

S. 590. A bill to increase the amount available for weatherization under the low income home emergency assistance program, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. INOUYE (for himself, Mr. STEVENS, Mr. HART, Mr. HOLLINGS, Mr. THURMOND, Mr. COCHRAN, Mr. LAXALT, Mr. LUGAR, Mr. TSONGAS, Mr. MURKOWSKI, Mr. MELCHER, Mr. BRADLEY, Mrs. HAWKINS, and Mr. EAGLETON):

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BUMPERS:

S. 581. A bill to establish competitive oil and gas leasing and modify leasing procedures for onshore Federal lands; to the Committee on Energy and Natural Resources.

FEDERAL OIL AND GAS LEASING ACT OF 1983

Mr. BUMPERS. Mr. President, today I am introducing legislation to replace the current system for issuing oil and gas leases on Federal lands with an all-competitive system. The legislation is identical to the proposal which I introduced in the past Congress, and to legislation which the Senate Energy and Natural Resources Committee approved in the 96th Congress.

The legislation is based upon several premises. First, issuance of Federal oil and gas leases constitutes an award of valuable Government property that should be made on a competitive basis in order to assure the public of a fair price. Second, the rights to develop energy resources which belong to the taxpayers should not be awarded through a system which invites fraud and speculation. Third, replacing the existing lottery system for awarding leases with an all-competitive bidding system would generate additional revenues, promote diligent development of leases, and simplify leasing procedures to encourage rapid development of oil and gas on Federal lands.

Mr. President, every Member of the Senate is aware of my strong opposition to the way in which our federally owned oil and gas reserves are leased. I first became aware of the Interior Department's leasing procedures in 1979, when 33,000 acres near producing gas wells at Fort Chaffee, Ark., were leased noncompetitively for only $1 per acre. But the situation at Fort Chaffee is not unique. In many areas,

valuable leases are being given away at bargain prices simply because the Interior Department has not determined that they lie within a "known geologic structure." In Idaho, for example, the State recently accepted competitive bids ranging from $7 per acre to $230 per acre for State lands adjacent to Federal tracts. The adjacent Federal Tracts have all been leased noncompetitively for only $1 per acre. A similar situation exists in Oregon. Private lands adjacent to the Umatilla National Forest have been leased for bonus bids ranging from $47 per acre to $250 per acre. But the lands within the national forest—the Federal lands—have been leased for only $1 per acre. The high prices offered for the adjacent, non-Federal lands in all of these areas indicate that industry considers the regions to have some potential for oil and gas production. But because the Federal lands do not fall within a "known geologic structure," arbitrarily defined by the Interior Department, they cannot be competitively leased. The existing leasing program is clearly anachronistic, wasteful, and must be replaced.

Other energy minerals owned by the Federal Government, including coal reserves and oil and gas on the Outer Continental Shelf, are leased by competitive bid. But onshore oil and gas are primarily leased noncompetitively. Under the existing system for leasing onshore oil and gas, only about 3 percent of Federal leases are sold competitively. Regardless of the fair market value of the tracts, the remaining 97 percent are sold noncompetitively for an annual rental of $1 an acre without any obligation to drill. Nearly all of the noncompetitive leases are awarded through a lottery system, in which applicants submit a filing fee for the opportunity to gamble for valuable oil and gas resources. As of February 1982, only 2,845 of the existing 121,818 onshore oil and gas leases had been awarded by competitive bidding. The remaining 118,973 leases, covering nearly 134 million acres, have been awarded for only the $1 per acre annual rental.

The current noncompetitive leasing system is an outgrowth of the 19th century need to develop an underdeveloped continent in order to secure it forever from possible incursions. During that time, Congress approved laws giving lands to railroads in order to encourage their efforts to build new lines. The homestead laws gave land to settlers. Mining laws virtually gave minerals away, and the leasing laws were equally generous. We are no longer giving away land, and we should no longer give away oil and gas leases. The very existence of the lottery is an admission that the system is an anachronism, because it demonstrates the existence of a competitive interest in lands, replacing the former need to entice development.

That competitive interest should be met with a competitive bidding system, the sort of system which nearly every State employs in awarding leases on State lands. It is the best way to make sure that the Government gets a fair return on its property; it will eliminate the opportunity for fraud; and it will insure the participation of applicants who will develop the lease rather than applicants merely using the system as a tax shelter, selling leases with the gain taxed as capital gains while deducting their application fees against ordinary income.

The most compelling argument for replacing the lottery system with a competitive bidding system is the potential for realizing additional revenue. The Department of the Interior admits that in 1981, revenues from competitive leases averaged $440 per acre, while revenues from the noncompetitive leases averaged only $3.66 per acre. Obviously, the competitively issued leases should be expected to generate more revenue, because these are issued only in those areas with proven oil and gas reserves. But many of the noncompetitive leases have been issued in producing areas, as demonstrated by the royalties collected from these leases, and it is reasonable to assume that large bonuses would have been paid for the rights to drill in these areas.

A recent study completed by the Congressional Budget Office confirms this assumption. In a letter to Senator HENRY M. JACKSON, the CBO concluded that the competitive bidding system that my bill would establish would result in a net increase in revenues of approximately $700 million over the next 5 years. Of this total, approximately $660 million would be distributed to State governments under the provisions of the Mineral Leasing Act. I ask unanimous consent that a copy of that letter be included in the RECORD.

Another reason for discontinuing the noncompetitive leasing system is the number of filing service companies—more than 250—which encourage people who have no intention of developing oil and gas leases to enter the lottery. The lottery system, aided by these companies, creates a situation in which revenues that should go to the Federal Government are instead siphoned off by the companies and the lottery winners. Advertising literature of filing services, which were created solely to take advantage of the lottery system, is filled with examples of people who won noncompetitive leases in the lottery and paid the first year's rental of $1 per acre only then to reassign them to major energy companies for immediate cash bonuses payments and future royalties. Information supplied by the Department of the Interior at hearings in 1980 showed that one lessee received $200,000 plus future royalties for a lease obtained from the Federal Government for $2,157, plus a $10 filing fee. Clearly we have a competitive system for oil and gas leasing, but the competition begins only after the Department of the Interior has issued a lease for $1 per acre to a lottery winner, and the real value of the lease is realized by that winner rather than by the public.

Despite the logic of having a competitive system, some people have opposed this proposal. Many supporters of the existing system merely play the lottery to capitalize on its tax advantages. I am not interested in preserving unwarranted tax breaks, and I doubt that any other Senator is either. Most other opponents to competitive bidding are independent producers of oil and gas. This opposition is curious, because these producers have prospered under the existing competitive systems used by most States. Arguments are made that independent companies, which indeed do most of the exploring in this country, will not be able to obtain leases under a competitive system. Yet, of the leases sold competitively, both by the States and by the Federal Government, more than 80 percent have been awarded to independent companies.

I have great regard for the independent producers, and my proposal accommodates their concerns. For example, it adopts the various bidding systems employed by the Outer Continental Shelf Lands Act, which were designed to preserve the independent's ability to compete with the major oil companies in obtaining offshore leases. My bill also provides a very simple and straightforward method for leasing. If there is competitive interest in a tract, it will be offered for lease within 3 months. Even if no competitive interest is expressed for a tract, a single applicant can secure a lease for the tract within 6 months. I am perfectly willing to consider modifications to my proposal in order to allay the independents' fears, and I would welcome the suggestions of any Senator for improving my proposal.

Mr. President, at a time when every effort is being made to increase revenues to the Treasury, balance the budget, and increase energy production on the Federal lands, we simply cannot afford the existing onshore leasing program. The leasing program outlined in my bill contains all the reforms necessary to establish an efficient, effective, and equitable leasing program for Federal energy resources. I hope my colleagues will review it carefully and support its adoption by the Senate.

By Mr. EXON:

S. 582. A bill to amend the Internal Revenue Code of 1954 to allow a farmer to elect to include in income agricultural commodities received under a payment-in-kind program at the time such commodities are sold, and for other purposes; to the Committee on Finance.

TAX TREATMENT OF PAYMENT-IN-KIND FUNDS

Mr. EXON. Mr. President, I am introducing today a measure to address the recent questions which have been raised regarding the tax treatment of commodities received under the USDA's payment-in-kind program. The Treasury Department has indicated that under current law, a farmer would realize income for tax purposes in the amount of the fair market value of the commodities received at the time they are made available to the farmer.

This announcement by the Treasury has raised a reluctance among many farmers to participate in the PIK program in light of the uncertain tax consequences. Although the administration has voiced support for legislative changes to address this situation, doubts have been expressed as to whether legislation can be enacted before the March 11 deadline for signing up for the PIK program. An "eleventh hour" attempt by the Congress on March 10 is not sufficient to help those reluctant farmers who are concerned about this matter.

The legislation I am introducing today is exactly like the bill introduced earlier this month, S. 446, but with one minor change. I would propose that a farmer be given the option to "elect" the tax treatment of PIK commodities. Under this measure, a farmer could have PIK commodities recognized for tax purposes when received, or he could choose to realize income only at the time when the PIK commodities are sold.

Since this distribution under the PIK program is an "out of the ordinary" situation for farmers, this option to "elect" tax treatment would provide flexibility for those who anticipate higher incomes in later years. For 1982, net farm income is down by nearly $5 billion according to latest estimates. Farm cash receipts are down by nearly $4 billion. It may be more advantageous for a farmer to elect to declare the receipt of the PIK commodities as income for this 1983 tax year, then to wait until the commodities are sold in 1984.

I am hoping that the Senate Finance Committee will review this option during hearings on PIK tax proposals. I am hoping even more that the Congress will act on this matter soon, before the PIK program becomes a part of history with all other Government promises which end up with a "Catch-22."

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 582

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 451 of the Internal Revenue Code of 1954 (relating to general rule for taxable year of inclusion) is amended by adding at the end thereof the following new subsection:

"(f) SPECIAL RULE FOR AGRICULTURAL COMMODITIES RECEIVED UNDER A CERTIFIED PAYMENT IN KIND PROGRAM.—

"(1) IN GENERAL.—At the election of a taxpayer who receives any commodity under a certified payment in kind program—

"(A) no income shall be treated as realized by reason of receipt of such commodity, but

"(B) there shall be included in gross income the amount of any gain from the sale or exchange of such commodity.

"(2) SPECIAL RULES FOR DETERMINING AMOUNT OF GAIN, ETC.—If a taxpayer makes an election with respect to any commodity received under a certified payment in kind program, in the case of any sale or exchange of such commodity—

"(A) in determining the amount of gain from such sale or exchange—

"(i) the taxpayer shall be treated as having a zero basis in such commodity, and

"(ii) such gain shall be treated as ordinary income, and

"(B) the taxable year in which gain from such sale or exchange is included shall be determined under the taxpayer's method of accounting for the taxable year in which such sale or exchange occurs.

"(3) CERTIFIED PAYMENT IN KIND PROGRAM.—The term 'certified payment in kind program' means any program—

"(A) under which the Secretary of Agriculture or his delegate makes payments in kind of any agricultural commodity to any producer of agricultural commodities who—

"(i) diverts farm acreage from the production of an agricultural commodity, and

"(ii) devotes such acreage to conservation uses, and

"(B) which the Secretary of Agriculture certifies to the Secretary of the Treasury as being described in subparagraph (A).".

(b) The amendment made by this section shall apply to taxable years beginning after December 31, 1982.

SEC. 2. (a) Section 2032A(e) of the Internal Revenue Code of 1954 (relating to special rules for valuation of certain farm, etc., real property) is amended by adding at the end thereof the following new paragraph:

"(15) TREATMENT OF PAYMENTS RECEIVED UNDER A CERTIFIED PAYMENT IN KIND PROGRAM.—For purposes of this section, any commodity received by, or on behalf of, any person under a certified payment in kind program (within the meaning of section 451(f)(3)) shall be treated as a commodity produced by such person on acreage diverted from agricultural use under such program.".

(b) The amendment made by this section shall apply to estates of decedents dying after December 31, 1976.

By Mr. GRASSLEY:

S. 585. A bill to amend title 18 of the United States Code to prohibit the robbery of airline tickets; to the Committee on the Judiciary.

ROBBERY OF AIRLINE TICKETS

● Mr. GRASSLEY. Mr. President, I am introducing legislation to provide Federal jurisdiction over airline ticket thefts. This legislation would amend title 18 of the United States Code to prohibit the transportation or use in interstate or foreign commerce of counterfeit or stolen airline tickets. In order to provide the most efficient and effective use of manpower and resources in dealing with the most serious cases, this language would limit Federal jurisdiction to those cases involving at least $5,000 in value.

Airline tickets which have been stolen or fraudulently obtained are readily negotiable, can be converted to cash or sold to the unsuspecting public for use in interstate and international air transportation.

For example, in New York on September 24, 1981, airline tickets valued at $5 million were stolen, along with 3 ticket validating machines, 5 travel agency identification plates and 200 plates representing nearly every airline in the world.

The total potential liability that airlines were exposed to increased from $42,405,600 in 1981 to $51,187,200 in 1982. This alarming increase demonstrates the grim seige that is being waged upon our Nation's airline ticket offices.

At present, stolen airline ticket cases are handled in a fragmented manner under local and State statutes. A lack of coordination through one central agency has resulted in a limited number of successful apprehensions and prosecutions.

The investigation, apprehension, and prosecution of suspects involved in this type of criminal activity requires a coordinated nationwide approach, which can be developed by providing Federal jurisdiction which would be the result of this bill's passage. I urge all of my colleagues to support this legislation.●

By Mr. HEINZ (for himself, Mr. HATFIELD, Mr. RIEGLE, Mr. ANDREWS, Mr. DODD, Mr. LEVIN, Mr. D'AMATO, Mr. HART, Mr. MOYNIHAN, and Mr. EAGLETON):

S. 586. A bill to direct the Secretary of Housing and Urban Development to undertake a program to demonstrate the feasibility of funding neighborhood development activities by providing Federal matching funds to private nonprofit neighborhood organizations on the basis of the voluntary contributions to such organizations from individuals, businesses, and religious institutions in their neighborhoods; to the Committee on Banking, Housing, and Urban Affairs.

NEIGHBORHOOD DEVELOPMENT DEMONSTRATION ACT OF 1983

● Mr. HEINZ. Mr. President, today on behalf of myself and Senators HATFIELD, RIEGLE, ANDREWS, DODD, LEVIN, D'AMATO, HART, MOYNIHAN, and EAGLETON, I am introducing the Neighborhood Development Demonstration Act of 1983. A companion bill is being introduced in the House today by Congressman BILL COYNE of Pennsylvania and Congressman ROBERT GARCIA of New York. This bill is a significant initiative to help rebuild distressed communities and spur economic development through neighborhood-based nonprofit organizations.

The objective of this act is to demonstrate the feasibility of a new mechanism for encouraging neighborhood development organizations to undertake activities such as job creation, new enterprise development, housing rehabilitation, and social services improvement. The mechanism would provide Federal matching funds to nonprofit neighborhood organizations which raise voluntary charitable contributions from individual businesses and charitable organizations in their neighborhoods.

Since October last year when I first introduced this legislation with Senator HATFIELD, I have worked with the Neighborhood Coalition, an umbrella organization comprised of more than 40 national groups, the Senate and House Housing Subcommittees, and the additional Senate cosponsors to refine the bill. This new version highlights the two principal objectives of this demonstration project:

1. To achieve tangible improvements in neighborhoods through public/private partnerships; and

2. To foster the long-term self-sufficiency of nonprofit neighborhood development organizations.

It is important to note that the neighborhood organizations would have to work closely with local government to assure coordination on proposed activities. With this requirement in the bill we have been assured of the endorsement of the National League of Cities and the U.S. Conference of Mayors.

In this difficult period of high unemployment and economic distress, we believe that the bill points the way toward an effective public/private partnership that can address some of the key problems in lower income communities. The major strengths of the bill's approach are as follows:

1. The bill would help to leverage additional private-sector involvement in lower income communities by providing neighborhood organizations with a pool of unrestricted capital that could be used as seed money for commercial and industrial development.

2. The proposed legislation builds upon the strengths and successes of established neighborhood development organizations with a proven track record of working with municipal leadership. It does not attempt to create or finance new entities.

3. The proposed legislation is based upon principles of private initiative, self-help, and voluntarism. No Federal funds would be disbursed unless neighborhood groups raise charitable donations from residents of their own communities.

4. The proposed legislation minimizes bureaucratic redtape. It establishes a simple matching process.

5. The proposed legislation supplements and reinforces other recent initiatives to strengthen economic development in low-income communities. In particular, the bill reinforces the emphasis on neighborhood-based economic development in the enterprise zone proposals and provides a special incentive for charitable giving by lower income, nonitemizing taxpayers. Charitable deductions for nonitemizers were authorized by the Economic Recovery Tax Act of 1981.

In my home State of Pennsylvania, groups in the cities of Pittsburgh and Philadelphia already have outstanding records of neighborhoods voluntarily organizing to address specific community needs. This bill would provide an additional incentive across the Nation for greater private sector partnerships with community groups for neighborhood revitalization. The Department of Housing and Urban Development would administer the 3-year demonstration project under which neighborhood groups would be selected competitively nationwide to receive a matching grant to locally raised funds.

The Neighborhood Development Demonstration Act would authorize several hundred demonstration projects over 3 years in distressed areas. Selection of neighborhood groups would be based on the past accomplishments of and the tangible results expected by the applicants for matching funds, as well as on geography, community population, size, and neighborhood economic conditions. Eligibility would require nonprofit status, and depend on a proven track record, a representative government board, location in pockets of poverty, and a plan to coordinate with local government. The maximum grant would be $50,000 in 1-year seed money. The ratio of Federal money to match locally raised funds would vary according to need. It is foreseen that the first year's funding would be used to attract longer term financial support from philanthropic and charitable organizations.

I must reemphasize for the record, that the ultimate purpose of this bill is to encourage voluntarism and public/private partnership on behalf of better neighborhoods. Several States—including Pennsylvania and Missouri—have enacted Neighborhood Assistance Act legislation which provides tax breaks for neighborhood development contributions by State businesses. This initiative at the Federal level, would directly dovetail with those State programs and others aimed at improving neighborhoods.

This program would require an authorization of only $15 million for the entire 3-year demonstration. I believe that this is a small price tag for the improvement of a valuable national asset: the neighborhoods of our Nation's cities.

In sum, we think this bill meets the needs of the times. It provides a tangible, substantial demonstration of Federal concern and involvement in meeting the needs of the Nation's distressed communities, but does so within the context of Federal budgetary realities and the need for public/private partnerships to meet social needs. We hope that many of our colleagues will join with us in seeing this bill through to passage.

Mr. President, I ask unanimous consent that letters of endorsement be included in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

NATIONAL LEAGUE OF CITIES,
Washington, D.C.

Hon. JOHN HEINZ,
U.S. Senate, Washington, D.C.

DEAR SENATOR HEINZ: On behalf of the National League of Cities I would like to express our support and commend you for your positive leadership in introducing the "Neighborhood Development Demonstration Act of 1982." We believe your bill recognizes the important role neighborhood organizations can play in conserving and improving the physical, economic, cultural and social opportunities in our distressed urban areas.

We are pleased that the legislation provides incentives for the leveraging of private sector resources by community groups in conjunction with local and federal efforts in community revitalization. These interactions and relationships are particularly critical during this period of limited budgets and scarce public resources. In addition, the requirement that city governments must certify that neighborhood development organization activities are consistent with and supportive of local government community and economic development plans and objectives is an important feature. Increased coordination and cooperation is necessary if local governments and neighborhood organizations are to supplement and support local revitalization activities rather than undercutting or competing with them.

Thank you for the opportunity to comment on the proposed "Neighborhood Development Demonstration Act." We look forward to working with you and Congress toward its enactment.

Sincerely,

ALAN BEALS,
Executive Director.

U.S. CONFERENCE OF MAYORS,
Washington, D.C.

Hon. JOHN HEINZ,
U.S. Senate, Washington, D.C.

DEAR JOHN: On behalf of the membership of the U.S. Conference of Mayors, it is my pleasure to lend our support to the Neighborhood Development Demonstration Act of 1982.

The demonstration program authorized by your bill is a sensible way to continue federal support of neighborhood-based development efforts which are designed to stimulate employment and housing in distressed cities. Strong neighborhoods are the backbone of healthy cities. Continued federal support as envisioned by your legislation will ensure that the efforts which have been growing in recent years do not wither now for lack of support.

We are especially pleased by the bill's provision for a certification from the chief elected official of the locality in which the neighborhood group is located, that the activities are consistent with the city's own development efforts. This guarantee of close cooperation between City Hall and neighborhood development groups is an important feature of the bill.

We look forward to participating further in the development of this legislation as it moves through the legislative process, and hope you will feel free to call on our staff for assistance or comment as the bill moves along.

Thank you for this opportunity to share our views on your legislative initiative.

Sincerely,

JOHN J. GUNTHER,
Executive Director.

OICs OF AMERICA, INC.,
Philadelphia, Pa.

The Honorable JOHN HEINZ,
U.S. Senator, Washington, D.C.

DEAR SENATOR HEINZ: As you know, OICs of America has become actively involved in efforts to serve inner-city development, particularly through housing, and targeted neighborhood community development. We have reviewed proposed legislation regarding a demonstration program to provide federal matching funds to private, non-profit neighborhood organizations on the basis of the voluntary charitable contributions such organizations receive from individuals and businesses, and learned of your interest in it.

This approach is basically sound and conforms with OIC's focus on strengthening community based activities while providing incentives to expand public-private partnership development. I will be interested in the progress of this program concept, and be glad to offer thoughts to your staff as you consider final versions.

As ever, we deeply appreciate your support of the OIC movement.

Sincerely,

GRACE A. WHITNEY,
Director, Community Economic Development.●

By Mr. CHILES:

S. 588. A bill to amend the Immigration and Nationality Act to prevent the unauthorized entry into, and the transportation to and within, the United States of illegal aliens; to the Committee on the Judiciary.

STRENGTHENING IMMIGRATION LAWS AGAINST THE SMUGGLING OF ALIENS

● Mr. CHILES. Mr. President, today I am introducing a bill to strengthen our immigration laws regarding the bringing in and harboring of illegal aliens in the United States. Over the past few years, thousands of undocumented aliens have crossed our borders, often with assistance from persons in the United States. In Florida, it has been estimated that as many as 2,000 persons a month are being smuggled into our State from Haiti, Cuba, the Dominican Republic, and South America. Lately, aliens from as far away as Pakistan and Bangladesh have joined in the influx.

There is an obvious demonstrated need for clarifying and strengthening our laws regarding entry and harboring. Experience, as well as the courts, has called for change. One U.S. district court concluded that the current law against illegal entry only applies to "surreptitious entries." In the court's view, the thousands of Cubans who came with the flotilla did not come surreptitiously and, therefore, those who assisted them were not guilty of violating immigration law. My bill would clearly prohibit any bringing in or harboring of illegal aliens on a day-to-day basis, not just during an emergency or mass migration, such as the Cuban flotilla.

Mr. President, this clarification is essential if we are to effectively curtail the smuggling of illegal aliens into the United States. I want to make certain that if someone is assisting illegal aliens into the United States under the dark of night or in broad daylight, it is a criminal offense and will be enforced and prosecuted as such.

Florida is still a major docking point for undocumented aliens from various points in South America and the Caribbean. These aliens are often assisted by smuggling operations whose travel packages are often more Madison Avenue than those of commercial airlines. One enterprising smuggler offers the alien a "second trip free" if the alien is caught or deported on the first attempt. Travel agencies in Florida and neighboring countries openly direct interested parties to these various smuggling operations, and provide information on prices and arrangements. Therefore, not only do we have a continual flow of illegal entry of aliens into our country, but someone is making an awful lot of money off of it.

As with the drug flow into Florida, these smuggling operations will continue until the U.S. Government cracks down as they have with drug enforcement. The perpetrators must know that a stiff penalty awaits them if they are caught bringing, assisting, or harboring one illegal alien, let alone a boatload.

In addition to strengthening our law enforcement against such smugglers, this bill will prevent the swindles and tragedies which have befallen many of the aliens who "hire" the smuggling service. Reports from the Bahamas and Caribbean show that many aliens have been left penniless on these islands, after being tricked into believing they are in Florida. The Bahamas, in particular, have become a haven for aliens, left with no money and provisions, and no means of going home or leaving for another country.

There have also been several known, and probably many unknown, instances of drowning and killings of aliens by the smugglers. The most publicized was that of the 21 Haitians who washed up on a Florida beach. The smugglers are not held accountable and most often are not even detained or sentenced under immigration law, let alone other criminal law.

Mr. President, it is uncertain if another flotilla will invade Florida or other States. Regardless, any form of alien smuggling must be stopped by the United States. My legislation merely builds on the Immigration and Nationality Act to more clearly express our intent to stop the bringing in and harboring of illegal aliens in this country.

Specifically, my bill would charge a person bringing an illegal alien into this country with a misdemeanor punishable by a $2,500 fine per alien and/or a 1-year imprisonment. For the bringing in of an alien for commercial or financial gain, the person shall be charged with a felony with a fine of $10,000 and/or imprisonment up to 5 years for each alien. In addition, my bill would make it a felony with a $10,000 fine and/or 5 years imprisonment for one to bring an alien into this country at a point other than a designated port of entry, regardless of the alien's documentation status. A person who transports, conceals, harbors, or shields an illegal alien would be charged with a felony, fined up to $10,000, and receive a 5-year prison sentence, or both. Any conveyance used in the transportation of illegal aliens shall be subject to seizure and forfeiture. My bill would make immigration law regarding the seizure and forfeiture of a vessel, vehicles, and aircraft comparable to such law in customs and drug enforcement. Currently, immigration law requires that INS bear the burden of proof when seizing a conveyance suspected of violating immigration law and INS bear the financial and administrative costs as well. It is my understanding, that no other law enforcement agency is subject to such liability. My bill would put the burden of proof on the suspect to demonstrate his innocence. The weaknesses and unrealistic application of the current immigration law was demonstrated during the Cuban flotilla when hundreds of vessels were in-

volved. I believe that my legislation would certainly strengthen the hand of INS to seize vessels or aircraft when there is probable cause.

The final provision of my bill is the one I feel is most crucial for an effective curtailment of alien smuggling. My legislation expressly gives Federal, State, and local law enforcement officials the authority to arrest persons suspected of bringing in, harboring, concealing, or transporting an illegal alien. This authority expands upon existing law which only allows INS officials to make such arrests.

Mr. President, this lack of authority in current law has certainly impeded efforts to detect, detain, and arrest those involved in smuggling or harboring illegal aliens. Often, it is the Coast Guard and local law officers who first detect alien smugglers. Under current practice, such officials can only report spottings to INS under a friendly agreement of cooperation. It is a gamble whether or not INS officials will have the ability to follow up on the detection report. The last I heard, the INS in Florida had only two boats, one helicopter, and one light plane—on loan—to detect and detain such smugglers. It would certainly add to INS' ability to stop such smuggling if all law enforcement officers could detain and arrest such perpetrators. We have encouraged such cooperation against drug smuggling and it has been effective. I believe the problem of alien smugglers has grown to such proportions along our shores that stiffer laws are necessary.

Mr. President, these changes in current law do not represent major alteration of our immigration laws. However, they will go far in providing the INS and law enforcement officials with a stronger hand against alien smuggling. We must have the ability to protect our own borders. We simply cannot establish such control if persons are encouraged by substantial financial motives while only slightly discouraged by the law. We must alter this balance. I believe my bill will strengthen our laws toward this goal.●

By Mr. McCLURE (by request):

S. 589. A bill to amend section 1(a)(1) of Public Law 95-348 (92 Stat. 487) to authorize the appropriation of $4,038,000 for capital improvement projects on Guam for fiscal year 1984; to the Committee on Energy and Natural Resources.

CAPITAL IMPROVMENT PROJECTS ON GUAM

● Mr. McCLURE. Mr. President, at the request of the administration, I send to the desk for appropriate reference a bill to amend section 1(a)(1) of Public Law 95-348 (92 Stat. 487) to authorize the appropriation of $4,038,000 for capital improvement projects on Guam for fiscal year 1984.

Mr. President, this draft legislation was submitted and recommended by the Department of the Interior, and I ask unanimous consent that the bill, and the executive communication which accompanied the proposal from the Secretary of the Interior be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 589

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1(a)(1) of Public Law 95-348 (92 Stat. 487) as amended by Public Law 97-357 (96 Stat. 1705) is amended by deleting the word "and" where it last appears, and inserting after the words "fiscal year 1983," the words "and $4,038,000 for fiscal year 1984,".

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., February 1, 1983.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: There is enclosed a draft bill "To amend Section 1(a)(1) of Public Law 95-348 (92 Stat. 487) to authorize the appropriation of $4,038,000 for capital improvement projects on Guam for fiscal year 1984."

We recommend that the bill be referred to the appropriate committee for consideration, and that it be enacted.

The proposed bill would authorize funds for fiscal year 1984 for needed capital improvement projects on Guam in the amount contained in the President's 1984 budget. The current authorization will expire at the end of fiscal year 1983. The authorization would be for water and sewer construction at Tumon Bay.

The Office of Management and Budget has advised that enactment of this proposal would be in accord with the program of the President.

Sincerely,

JAMES G. WATT,
Secretary.●

By Mr. COHEN:

S. 590. A bill to increase the amount available for weatherization under the low-income home emergency assistance program, and for other purposes; to the Committee on Labor and Human Resources.

LOW-INCOME HOME EMERGENCY ASSISTANCE AMENDMENTS OF 1983

Mr. COHEN. Mr. President, I rise to introduce legislation that would amend the Omnibus Reconciliation Act to allow States to use up to 25 percent of their energy assistance allotments toward weatherization activities.

As a Senator from a cold-weather, oil-dependent State, I am particularly sensitive to the hardship that has resulted from the increases in home energy prices. Home heating oil prices have tripled from the 1976 average price of 40.6 cents a gallon to the current average price of $1.19 per gallon.

Although the price of home heating oil has finally begun to stabilize, the price of natural gas has recently skyrocketed. In many areas of the country, natural gas prices are 20 to 40 percent higher than they were a year ago.

While rising energy costs force all Americans to make some difficult choices, they often cause real hardship and suffering to low-income Americans.

Low-income families are forced to come to terms with an entirely different set of questions that plague them throughout the winter months. Where will the money come from for the next purchase of heating oil? What can I do without today so I might increase my chances of having enough money on hand to purchase some heating oil tomorrow or next week? Can I do without the medicine the doctor prescribed? Can I skimp on the nutrition I require?

While the average U.S. household spends about 5 or 6 percent of income on home energy costs, according to new data compiled by Project Energy Care of the National Council of Senior Citizens, the energy costs of low-income households—after low-income energy assistance is included—average 19 percent of annual income. The study also concludes that during the winter months, over 70 percent of low-income elderly individuals spend over 20 percent or more of their incomes on energy bills, and one of every four elderly poor individuals spends more than 30 percent of his income on heating bills. Only about one-half of low-income Americans eligible for energy assistance payments actually received them.

The study further points out that about 17 percent of the low-income population heats with fuel oil, while nearly 60 percent use natural gas. With the price of natural gas approaching that of home heating oil, the prediction that the percentages of income spent on energy costs by elderly and poor families will rise considerably seems inevitable.

I ask unanimous consent that the Executive Summary of the National Council of Senior Citizens' study be inserted in the RECORD at the end of my statement.

In recognition of the desperate plight of many low-income Americans, Congress authorized a $1.875 billion spending level for the energy assistance program in the Omnibus Reconciliation Act of 1981 and provided this amount for fiscal year 1982. Congress approved a 1983 appropriations level of $1.975 billion in response to the large increase in applications for assistance nationwide during the early weeks of the program this year.

A few weeks ago, Senators DANFORTH, EAGLETON, and SARBANES introduced legislation to increase the authorization level to $2.5 billion for fiscal years 1983 and 1984.

The legislation I am offering today would complement the legislation of-

fered by my colleagues. It would allow States to use up to 25 percent of their energy assistance funds to supplement their weatherization activities. While the energy assistance program is necessary to reduce the burden of rising fuel costs on low-income families, the weatherization assistance program is more effective in reducing fuel costs over the long run. By reducing home energy consumption by 15 to 30 percent, the weatherization assistance program has proved invaluable to our national conservation effort.

In addition, this legislation would require States to apprise the Department of Health and Human Services of the amount of funds to be used for weatherization activities and of the types of activities to be undertaken. This information will be included in the State's annual application. Furthermore, this legislation provides for the collection of data on the number and income levels assisted by these weatherization activities.

Obtaining accurate data on the use of energy assistance funds for weatherization activities has been very difficult. Including weatherization information in existing reports will allow us to obtain this important data without placing additional burdens on the State.

The low-income energy assistance block grant program was reauthorized for fiscal years 1982, 1983, and 1984, in Public Law 97-35, the Omnibus Reconciliation Act of 1981, at $1.875 billion. This program is quite similar to earlier energy assistance programs, with greater flexibility afforded the States because of fewer Federal requirements. Perhaps the greatest improvement in this program is the provision allowing States to use up to 15 percent of their allotments for weatherization activities. Since the adoption of this provision, 47 States have used portions of their fuel assistance allotments to weatherize an estimated 330,000 homes. Seventeen States have used up to 14 percent of their allotment for weatherization activities, 10 States have used from 10 to 15 percent, 10 States have used from 5 to 10 percent, and 7 States have used 1 to 5 percent.

Maine, which established the first weatherization assistance program in 1973, used 15 percent of its $25.1 million allotment—$3.5 million—for weatherizing 3,000 homes. This money has added greatly to the weatherization activities in Maine which, all told, have provided 33,062 Maine homeowners with weatherization improvements.

Despite administration attempts to terminate the low-income weatherization assistance program, support for its continuation remains strong in both Houses of Congress. For fiscal year 1982, $144 million was appropriated—a reduction of only $37 million from the previous year's level of $181 million. The fiscal year 1983 funding level for the weatherization assistance program is $145 million. While this appropriation is certainly helpful, it is not enough.

While the Department of Energy's low-income weatherization assistance program has weatherized 1 million homes since the program began in 1977, the Department has estimated that 12 to 13 million low-income Americans live in homes still in need of weatherization improvements. In Maine alone, there are 20,000 people on the waiting list for weatherization assistance.

The real value of the weatherization assistance program rests on its ability to dramatically—and permanently—reduce energy consumption in the home. With the continual rise in fuel prices, the cost of providing energy assistance will ultimately rise as well. But, if a portion of energy assistance funds are used for weatherizing homes, reducing fuel bills by about 20 percent, the value of the energy assistance will be greatly enhanced. And, as fuel prices continue to rise, the dollar value of the energy saved through weatherization improvements will continue to go up.

The Congress is to be commended for giving States greater flexibility and discretion in establishing their own energy assistance program through the passage of the Omnibus Reconciliation Act. Yet, I believe States should be given even greater discretion in using allotted energy assistance funds to meet the fuel-assistance needs of their residents. Therefore, the amendment I am offering today to the Omnibus Reconciliation Act will authorize States to use up to 25 percent of their energy assistance block grant funds for weatherization or home repairs related to energy conservation. My amendment will not require States to use any of their funds for weatherization activities. Rather, States will have the option of providing more households with weatherization improvements or assisting more families in paying their fuel bills. This is consistent with the administration's policy of returning control of assistance programs to State and local governments. This legislation will greatly improve the energy assistance program by allowing States to increase the value of their allotment by permanently reducing fuel bills. I urge my colleagues to support it.

Mr. President, I ask unanimous consent that an executive summary be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SEARED HOPES AND FROZEN PROMISES—EXECUTIVE SUMMARY

Seared Hopes & Frozen Promises is a report prepared by Project EnergyCare of the National Council of Senior Citizens (NCSC). Funded by the Community Services Administration in 1980, Project EnergyCare was a national information and outreach program focusing on the home energy needs of the elderly and disabled poor. It has recently completed a national survey of 24,000 elderly households in 38 states. The findings are:

(1) The average U.S. household spends about five-six percent of income on home energy costs, but the energy costs of low-income households—after low-income energy assistance—average 19 percent of annual income. Only about one-half of such households receive any help from federal energy assistance programs.

(2) The percentage of income that poor elderly households spend on energy is much higher during the winter months. In the winter, over 70 percent of the low-income elderly spend over 20 percent or more of their income on energy bills. One of every four elderly poor households spends more than 40 percent of its income on heating bills during the winter.

(3) For the poorest group of elderly—those on SSI—the situation is starker. In 12 states, the average energy bills during the coldest month equals or exceeds the maximum SSI payment. In nine additional states, less than $25 a week remains of the SSI payment after energy bills are paid.

(4) The percentages of income used for energy bills are considerably higher for those who heat with fuel oil than for those who use natural gas. About 17 percent of the low-income population heats with fuel oil, while nearly 60 percent use natural gas. Over coming years, natural gas prices are expected to rise to the level of fuel oil prices, as natural gas is deregulated. The percentages of income spent on energy costs by large numbers of elderly and poor families are expected to rise considerably over future years as natural gas prices increase.

For example, in the Southeastern United States, 23 percent of the elderly poor heating with oil spend more than 60 percent of their incomes to stay warm in winter, versus three percent of those who now heat with gas. As natural gas prices increase (over 21 percent last year in this region), more and more elderly poor will see dramatic increases in their home heating budgets. Like those using oil, one out of every four may soon be spending three-fifths of their income to stay warm in the South during the winter.

A key purpose of this sample, from the more than 600,000 elderly and disabled poor reached by Project EnergyCare, was to look at the impact of rising energy costs on older Americans with low, fixed incomes and thereby assess the value of existing energy services directed to them. Were, in fact, such services needed by only a few who face a grim energy picture today and tomorrow? Or is the problem of home energy shared by the many elderly poor?

Taken together with the three other studies sponsored by Project EnergyCare, the sample quite clearly shows that the problem of home energy affects thousands and thousands of people—not just isolated individuals—who live in every community of the United States, from the colder Northeast to the warmer Southwest and Southeast. The difficulties the elderly are having in affording adequate heating or cooling is bound to become more severe in the future, as funding for critical federal energy programs is reduced or eliminated and as prices for other energy sources that the poor depend upon, such as gas and electricity, begin to

reach the equivalent cost of home heating oil.

The other studies reviewed in this report and prepared for NCSC's Project EnergyCare are:

(1) Poor + old = Cold, by the Grier Partnership. This report explores the economic impact of rising energy costs on low-income households. It contains extensive data on average energy expenditures, and compares these costs to maximum allowable SSI payments broken down by state.

(2) The Cost of Survival, by the Grier Partnership. If low-income Americans were to pay what the average American pays for home energy—roughly five percent of their income—over $7 billion in subsidies would be needed. The Report's purpose is to calculate on a state-by-state basis the amount of subsidy necessary to keep low-income persons from paying more than a certain percentage of their income for home energy. Frozen Promises contains a comparison between the state-by-state needs revealed in this study with current distribution of federal energy assistance funds.

(3) A Comprehensive Analysis of the Costs and Benefits of Low-Income Weatherization and Its Potential Relationship to Low-Income Energy Assistance by the Consumer Energy Council of America.

This report provides an in-depth analysis of the social and economic impact of weatherization on low-income households. The study explores data from numerous field sites to determine rates of energy savings at various levels of investment under different programs. The results show that weatherization is a lower cost alternative to increasing our national energy supply than is investment in new production. The study also shows that the Department of Energy's Weatherization program has been effective in reducing low-income households energy consumption at a reasonable cost.

For additional information, contact Project EnergyCare, National Council of Senior Citizens, 925 15th Street, N.W., Washington, D.C. 20005, (202) 347-8800, Att'n: Michael Sandifer or Eric Shulman.

By Mr. INOUYE (for himself, Mr. STEVENS, Mr. HART, Mr. HOLLINGS, Mr. THURMOND, Mr. COCHRAN, Mr. LAXALT, Mr. LUGAR, Mr. TSONGAS, Mr. MURKOWSKI, Mr. MELCHER, Mr. BRADLEY, Mrs. HAWKINS, and Mr. EAGLETON):

S. 591. A bill to amend the Internal Revenue Code of 1954 to provide a mechanism for taxpayers to designate $1 of any overpayment of income tax, and to contribute other amounts, for use by the United States Olympic Committee; to the Committee on Finance.

UNITED STATES OLYMPIC CHECKOFF ACT OF 1983

Mr. INOUYE. Mr. President, today, Senator STEVENS and I, on behalf of ourselves and Senators HART, HOLLINGS, THURMOND, COCHRAN, LAXALT, LUGAR, TSONGAS, MURKOWSKI, MELCHER, BRADLEY, HAWKINS, and EAGLETON are reintroducing the United States Olympic Checkoff Act of 1983. This bill would amend the Internal Revenue Code of 1954 to establish an Olympic trust fund within the Treasury of the United States. Taxpayers could allocate $1 of their personal income tax refunds to that account or they could include cash contributions with their returns to be given to the U.S. Olympic fund. The Treasury would periodically turn over the funds to the United States Olympic Committee, which would use the money to carry out programs for the expansion and improvement of amateur athletics in the United States so that all Americans, including women, minorities, the aged, and the handicapped, are able to participate in athletic endeavors.

Mr. President, 17 Senators cosponsored an earlier version of this bill, S. 1595, in the 97th Congress, and over 200 Members cosponsored a companion measure in the House of Representatives. The legislation has been modified this year to allow the Treasury to recover administrative costs from the fund before turning over money to the United States Olympic Committee. The checkoff will thus operate at no cost to the Government. The bill also allows taxpayers to include voluntary contributions of any size with their Federal income tax returns; it does not limit these donations to $1, as was the case with S. 1595.

Mr. President, the Senate Finance Subcommittee on Taxation and Debt Management held hearings on this measure on October 30, 1981. Several of our finest Olympic athletes and members of the U.S. Olympic Committee testified strongly in favor of the bill. Those of us introducing the bill today believe that the hearing record presents an excellent case for prompt action in the 98th Congress.

The need for this legislation is clear. As Robert J. Kane, past president of the U.S. Olympic Committee pointed out to the Subcommittee on Taxation and Debt Management:

The Olympics are the most visible peaceful involvement of the United States with other nations. Our pride and prestige and our youth are on view for billions of people of differing ethnic and political persuasion and, as well, of our friends to see and appraise. It is a wholesome and healthful involvement. Our American athletes are the very best anywhere, when they are given a proper chance. The facts prove this. But fewer than half of our sports are on the high school and college programs, and there is really no other good way in this country to help amateur sports other than on the educational programs.

Of the 26 Olympic sports of the winter and summer games, only 12 are on high school and college programs. So unless our young people have financial resources to pay their way, they are not able to take part in the other 14 sports. And only recently have our women been given a proper chance, even on our educational programs.

So, there are about 14 pauper sports in this country, the great capitalist nation of the world; whereas, in the Soviet Union, East Germany, and virtually every other large country in the world, all sports are richly supported, and in each case by their governments.

Not surprisingly, then, we do very well in the sports that are on our high school and college programs, and really not very well in the others. In making this point, I would like to refer on a factual basis to what happened the last time we took part in the summer games—and, as you all know, that was in 1976, not 1980—and at the same time to explode the myth that the recent emergence of the Soviet bloc countries had undermined our part in victories in the Olympic games.

In 1976, at Montreal, Russia got the most gold medals, 57; East Germany, 40; and the United States, third, with 34. Now the Russians won 10 medals in Greco-Roman wrestling. We won none. Greco-Roman wrestling is not a high school or college sport. The Russians won five gold medals in weightlifting, and we don't have that on our college programs. They won five gold medals in canoeing; we won none. The East German women won 11 of 13 swimming events; we won none. The United States won 8 gold medals in track and field; overwhelmingly in men's swimming, 12 gold; first in men's basketball, but men's basketball is only 1 gold medal.

The East Germans, of their 40 medals, the women won 25 of those 40. The Russian women won 12 golds; our U.S. women won 2. I think that demonstrates that what has happened in the world from 1952 and thereafter is that the Russians figured where we were vulnerable and made sure that the sports that we were vulnerable in, they beefed up.

We are still doing as well as ever in the sports that we support. And I don't have to remind you of what happened in the winter games. In the past 4 years the Olympic has advanced more, done more things, than in their 50 years previous. The great victory of our hockey team, the apotheosis of Eric Heiden, the showing of our skiers, the showing of our other speed skaters, that can happen in all sports in this country if we give our athletes a chance. I hope with this bill that's here today that we can provide that chance for all our athletes.

Mr. President, we need to expand our Olympic training efforts, but this requires money. Of the more than 140 Olympic teams around the world, ours is the only one which does not receive governmental assistance. If the United States is to remain competitive, and if it is to provide the caliber of team we expect, then we must find a way to provide our Olympic athletes with a dependable means of financial support. Instead of providing direct monetary assistance, it is our judgment that the proud tradition of amateur athletics that we have in this country is best served by providing the American public with the opportunity to support the effort themselves through a checkoff mechanism on their income tax returns.

Before commending this bill to my colleagues, I would like to take a moment to answer some of the questions raised about last year's version of the United States Olympic Checkoff Act. In his testimony before the Senate Finance Subcommittee on Taxation and Debt Management in 1981, Hon. John E. Chapoton, Assistant Secretary of the Treasury for Tax Policy, stated:

Treasury is opposed to S. 1035, and S. 1595. We do not believe that Federal tax returns, or the Federal tax collection system, should be used as a vehicle for voluntary contributions to any charity or cause, however meritorious. If a voluntary check-off of the kind proposed by S. 1035 and S. 1595 were incorporated on tax returns, the flood gates would be opened for other charities and worthwhile causes to request a similar check-off system. Thus, an issue to be considered by this Subcommittee is whether the Internal Revenue Service should serve as a collection agent for all charities. It would be difficult to argue that certain charities, such as the National Endowments, should have a check-off, but that other charities, such as the Boy Scouts, should not.

This flood gate argument is the reservation most often heard about the Olympic tax checkoff bill. As I have already pointed out, the bill will not pose a burden on the Treasury since the Government will be able to recover the cost of administering the program from the Olympic fund. I was, therefore, surprised to read the following message from the Commissioner of the Internal Revenue Service on the cover of the 1040 Federal income tax forms and instructions for 1982:

Quite often we receive inquiries about how people may make voluntary contributions to reduce the public debt. If you wish to contribute, just enclose in your tax return envelope a separate check made payable to "Bureau of the Public Debt." Subject to the limitations on charitable contributions, you can deduct this contribution on next year's tax return. * * *

Mr. President, after insisting that the Federal tax collection system should not be used as a vehicle for voluntary contributions to good causes, we now find that the IRS is itself urging taxpayers to make charitable donations toward retiring the public debt. The flood gate is open, and it has been opened by none other than the Department of the Treasury.

The question, therefore, comes down to the following: Is the U.S. Olympic effort important enough to merit establishing a checkoff mechanism on Federal tax returns? The sponsors of this bill believe it is, and we hope that our colleagues will agree with us. Indeed, during the hearings on S. 1595, Senator PACKWOOD asked Mr. Chapoton: "Don't you think there is almost a basic difference in kind between the Olympics and almost every other kind of charity you might want to name?" To which Mr. Chapoton replied: "When the Senators were testifying, that thought was apparent to me. Yes, there is a difference. I agree."

Mr. President, the 1984 Summer Olympic Games in Los Angeles are almost upon us, and there is no doubt in my mind that the time has come to establish the U.S. Olympic fund and the checkoff mechanism necessary to support the U.S. Olympic effort. I urge my colleagues to cosponsor this worthwhile measure and trust that it will receive favorable consideration in the 98th Congress.

Mr. President, I ask unanimous consent that the full text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 591

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "United States Olympic Checkoff Act of 1983".

SEC. 2. DESIGNATION OF OVERPAYMENTS AND CONTRIBUTIONS FOR UNITED STATES OLYMPIC TRUST FUND.

(a) IN GENERAL.—Subchapter A of chapter 61 of the Internal Revenue Code of 1954 (relating to returns and records) is amended by adding at the end thereof the following new part:

"PART IX—DESIGNATION OF OVERPAYMENTS AND CONTRIBUTIONS FOR UNITED STATES OLYMPIC TRUST FUND

"SEC. 6097. Amounts for United States Olympic Trust Fund.

"SEC. 6097. AMOUNTS FOR UNITED STATES OLYMPIC TRUST FUND.

"(a) IN GENERAL.—With respect to each taxpayer's return for the taxable year of the tax imposed by chapter 1, such taxpayer may designate that—

"(1) $1 of any overpayment of such tax for such taxable year, and

"(2) any cash contribution which the taxpayer includes with such return,

be paid over to the United States Olympic Trust Fund.

"(b) JOINT RETURNS.—In the case of a joint return showing an overpayment of $2 or more, each spouse may designate $1 of such overpayment under subsection (a)(1).

"(c) MANNER AND TIME OF DESIGNATION.—A designation under subsection (a) may be made with respect to any taxable year only at the time of filing the return of the tax imposed by chapter 1 for such taxable year. Such designation shall be made on the first page of the return.

"(d) OVERPAYMENTS TREATED AS REFUNDED.—For purposes of this title, any overpayment of tax designated under subsection (a) shall be treated as being refunded to the taxpayer as of the last date prescribed for filing the return of tax imposed by chapter 1 (determined without regard to extensions) or, if later, the date the return is filed.".

(b) CLERICAL AMENDMENT.—The table of parts for subchapter A of chapter 61 of such Code is amended by adding at the end thereof the following new item:

"PART IX—DESIGNATION OF OVERPAYMENTS AND CONTRIBUTIONS FOR UNITED STATES OLYMPIC TRUST FUND.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after the date of enactment of this Act.

SEC. 3. ESTABLISHMENT OF UNITED STATES OLYMPIC TRUST FUND.

(a) IN GENERAL.—Subchapter A of chapter 98 of the Internal Revenue Code of 1954 (relating to trust fund code) is amended by adding at the end thereof the following new section:

"SEC. 9504. UNITED STATES OLYMPIC TRUST FUND.

"(a) CREATION OF TRUST FUND.—There is established in the Treasury of the United States a trust fund to be known as the 'United States Olympic Trust Fund', consisting of such amounts as may be appropriated or credited to the United States Olympic Trust Fund as provided in this section or section 9602(b).

"(b) TRANSFER TO UNITED STATES OLYMPIC TRUST FUND OF AMOUNTS DESIGNATED.—There is hereby appropriated to the United States Olympic Trust Fund amounts equivalent to the amounts designated under section 6097 and received in the Treasury.

"(c) EXPENDITURES FROM TRUST FUND.—

"(1) IN GENERAL.—The Secretary shall pay, not less often than quarterly, to the United States Olympic Committee from the United States Olympic Trust Fund an amount equal to the amount in such Fund as of the time of such payment less any administrative expenses of the Secretary which may be paid under paragraph (2).

"(2) ADMINISTRATIVE EXPENSES.—Amounts in the United States Olympic Trust Fund shall be available to pay the administrative expenses of the Department of the Treasury directly allocable to—

"(A) modifying the individual income tax return forms to carry out section 6097,

"(B) carrying out this chapter with respect to such fund, and

"(C) processing amounts received under section 6097 and transferring such amounts to such Fund.".

(b) CLERICAL AMENDMENT.—The table of sections for such subchapter A is amended by adding at the end thereof the following new item:

"Sec. 9504. United States Olympic Trust Fund.".

Mr. STEVENS. Mr. President, I am pleased to join my good friend from Hawaii in sponsoring this very important measure for amateur sports.

As the United States readies itself to host the 1984 Olympics, athletes throughout our country are training to earn a spot on the U.S. Olympic team. These men and women will represent our country in competition against the finest athletes from around the world. However, there is one significant difference between our athletes and those from other countries, and that is the amount of support they receive from their governments.

Of the 140 Olympic teams around the world, only the United States does not provide governmental assistance to its team. This puts our team at a marked disadvantage with other countries. Many of today's advanced training methods require expensive facilities and equipment. These facilities are needed if our country hopes to remain competitive in international competition.

The best illustration reflecting the importance of Government support of Olympic teams is the 1976 Olympics. For the first time in the history of the summer Olympics, the United States did not finish first or second in gold medals. Instead, East Germany, with a population one-thirteenth that of the United States, surpassed the United States. I do not believe this is because East Germany has more superior athletes than those in the United States.

Instead, I believe this reflects the support of their team by their government, and their advanced training facilities.

The Olympics are no longer simply a game. They reflect our country's strength and will, and serve as an important international symbol. The victories of our Olympic athletes are victories for the American people. We can all recall the intense pride felt by Americans when our hockey team beat the Russians in the 1980 winter Olympics. We are all moved when we witness the grace and beauty of a gymnast or when we watch the determination of an exhausted athlete pushing himself to his body's limits in search of victory.

Our Olympic teams need dependable financial support if we hope to continue our winning tradition. The U.S. Olympic Committee (USOC) has been charged with 14 separate goals and functions by Congress. President Ford's Commission on Olympic Sports estimated the need of amateur sports in the United States at $215 million, in 1976 dollars, and a continuing need of $83 million annually. The USOC's entire budget for the 1980-84 quadrennium is only $77.1 million.

Instead of providing direct monetary assistance, it is our judgment that the proud tradition of amateur athletics that we have in this country is best served by providing the American public with the opportunity to allocate $1 from their tax refund to an Olympic trust fund. The program would operate much like the Presidential election checkoff, except that no Government money would be used. Even the administrative costs of the Treasury would be paid for out of the donations. The money raised through this act would insure that our Olympic teams have the dependable income base it requires to support its programs.

This bill costs the Government nothing, but it does reflect our support of our Olympic programs and our athletes. Our teams represent our country in international competitions, and inspire our people. I strongly feel that our Olympic teams deserve our backing, and I hope that you will join me in supporting this measure.

By Mr. CHILES:

S. 592. A bill to amend the Immigration and Nationality Act to provide special authorities and procedures for the control of immigration emergencies; to the Committee on the Judiciary.

AUTHORITIES AND PROCEDURES FOR IMMIGRATION EMERGENCIES

● Mr. CHILES. Mr. President, today I am reintroducing my legislation to clarify the Federal Government's role during large scale immigration emergencies. My bill provides for a contingency plan which specifies the steps the President and appropriate agencies may take to stop an uncontrolled mass migration of aliens to the United States.

Mr. President, the Senate took the first step last year toward reforming our immigration policy. Unfortunately, the House of Representatives failed to complete action on the bill before the end of the 97th Congress. Therefore, we are back to ground-zero, which troubles me greatly. The State of Florida is still digging out from the impact of the mass migration from Cuba and Haiti during the last few years. The major influx has slowed considerably but there are still many detected and undetected boats slipping into Florida harbors daily carrying hundreds of undocumented aliens from Haiti, Colombia, the Dominican Republic, Pakistan, and Bangladesh. Control of this influx is at best sporadic with only informal agreements regulating the cooperation between the Immigration and Naturalization Service (INS), the Coast Guard, and local law enforcement. It is obvious that a constructive plan and additional resources are needed to effectively control our shores.

Last year, Senator SIMPSON skillfully and diligently steered an immigration reform package through the Senate. He has assured me that he will continue this year to strive for an immigration reform bill. With the absence of any reform in our immigration policy, it is even more imperative that some form of contingency plan be defined to set forth the current authorities of the President to deal with immigration emergencies. Early last year the administration testified that such a plan was being drafted. Yet, no such plan has been presented to Congress. I would hope the administration will soon act on this pressing matter.

In addition to a contingency plan based on current law, I feel that it is necessary to have additional legal authorities for responding to declared immigration emergencies. Attorney General Smith concurred with this judgment last year and I am hopeful we will have his counsel again on this issue in the near future. Last year I withdrew my proposed emergency powers amendments when I received assurances from both the Justice Department and State Department that the administration does have authority under existing law to stop another immigration emergency. The Justice Department indicated that it had developed a plan to control future crisis situations. Yet, such a plan is still not in place. If another Mariel boatlift occurred this month, we would still be unable to effectively control the situation. Fidel Castro would once again have the upper hand. I firmly believe that if the United States had a strong contingency plan in place, Castro would not even attempt to violate our controls. Castro and others must receive the message that the United States can protect the integrity of its borders.

Mr. President, the legislation I am introducing today would lay the groundwork for such a contingency plan.

First, the bill would allow the President to declare an immigration emergency if a substantial number of undocumented aliens are about to embark, or have embarked, for U.S. shores and in his judgment, additional procedures and resources are needed to respond. Within 48 hours, the President would notify the President pro tempore of the Senate and the Speaker of the House that such a declaration had been made and the reasons for such action. An announcement would be made in the Federal Register. The emergency period would end after 120 days or sooner if the President so determines. The emergency could also be extended for an additional 120 days.

During a declared emergency, the President would have the authority to take special steps to cut off a massive influx of illegal aliens. In order to prevent the likes of a Mariel boatlift or mass migration of thousands of Haitians from Haiti and the Bahamas, the President would have the authority to restrict departures of U.S. registered boats from ports and harbors which could be used as staging points for bringing aliens into the United States. Fines and penalties could be imposed on those who violate the restrictions. Persons on vessels not involved in the migration could obtain authorizations to leave the port. In addition, Government agencies such as the Coast Guard would be allowed to assist in preventing unauthorized immigration by intercepting ships bound for staging areas. In order to assure that this aspect of the contingency plan is effectively enforced, the President would be able to use the resources of other Federal agencies.

Under this legislation, an alien who arrives in the United States without proper documentation could be summarily excluded from entering the United States if he does not appear to have a legitimate asylum claim. This provision could also be used to stop undocumented aliens traveling by sea to the United States before they reach U.S. territorial waters, utilizing the President's existing authority to interdict foreign vessels on the high seas. The Attorney General would develop procedures for deciding whether an alien shall be excluded or admitted to the United States for a hearing.

Finally, my legislation would allow for aliens who are admitted to the United States to be held in detention at Federal facilities specified by the President until their immigration status is determined. Aliens who are

ineligible for asylum in the United States would be returned to the country from which they came, or a third country. Current law requires that aliens be returned to the country from which they came. In both the Cuban and Haitian influxes, this was to be impractical because the Cuban Government refused to repatriate the refugees and many of the Haitians had come from the Bahamas, not Haiti. This provision of my bill would make the law more flexible and hopefully, more enforceable.

The purpose of my bill is not to close our doors to the legitimate refugee. We have a great responsibility and tradition as a free, democratic nation to assist those fleeing from persecution and repression. Yet, we cannot accept every alien who arrives on our shores simply because they are here. The legal definition of refugee is very narrow and should be reserved for those who are truly victims of persecution.

We must, case by case, make a decision about the status of an alien. Such screening demands a comprehensive plan and procedure. I do not feel we have anything close to this now in our immigration policy especially for mass migration. Some will argue that the President now has the authority to exercise such a plan under his implied powers and his authority as Commander in Chief under the Constitution and I am inclined to agree. However, there are many who hold different views. I cannot stand by and witness another crisis like the Mariel boatlift while we debate the President's authority for such powers here in the Congress or in the courts. I believe that it is crucial that we define the precise powers and responsibilities of the President and the Federal Government during immigration emergencies. Immediate action during such emergencies is the only effective tool. I believe my bill sets forth a contingency plan that allows for swift action. I urge my colleagues and the administration to join me in recognizing the critical need for such legislation.●

By Mr. INOUYE (for himself, Mr. KASTEN, Mr. DOLE, Mr. JEPSEN, Mr. THURMOND, Mrs. KASSEBAUM, and Mr. MATSUNAGA):

S. 593. A bill to amend the Federal Meat Inspection Act and the Poultry Products Inspection Act to permit distribution of certain State-inspected meat and poultry products, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

FEDERAL MEAT AND POULTRY PRODUCTS INSPECTION ACT OF 1983

Mr. INOUYE. Mr. President, today, I am introducing legislation on behalf of Senators KASTEN, DOLE, JEPSEN, THURMOND, KASSEBAUM, MATSUNAGA, and myself which would allow State-inspected meat and poultry products to enter into interstate commerce. This bill would permit the sale of State-inspected meats to consumers in neighboring States and to federally inspected plants. However, it would continue the present practice of barring State-inspected meats from international trade, where by treaty all meat must be federally inspected.

Under present law, State meat inspection plans must either meet or exceed Federal standards for wholesomeness, cleanliness, and freedom from residues. However, quality State-inspected products are often barred from nearby markets by virtue of an arbitrary State line that bisects a local community. The bill we are offering will correct this inequity by allowing State-inspected meats equal access to American meat and poultry markets.

State-inspected meat and poultry plants may be smaller than the average federally inspected plant, but they produce as wholesome a product. They may follow some different procedures under State law and use different equipment, but it would be a mistake to assume that their products are inferior. Take for example the requirement that all federally certified plants must provide an inspector with a private office. This may be feasible for some of the larger, newer plants which can tailor their specifications to Federal requirements, but what about the small family producer who has been making specialty meats for decades? His packing procedures and end product are as good as anyone else's, and he meets all of the necessary laws and State requirements, but what if he does not have space for a separate inspector's office? Should we really deny that producer the right to ship his products in interstate commerce? Is this fair to either the small producer or the nearby consumer who would like to buy his products but cannot because he happens to live in a different political jurisdiction?

Consumer confidence in our Nation's meat and poultry products is at an all-time high, and this bill will do nothing to harm that confidence. What it would do is end the discrimination against State-inspected meats which enjoy the confidence of consumers in 27 States throughout the country.

The benefits of this legislation are clear. First, consumers would be rewarded with a greater variety of wholesome meats at competitive prices. Second, livestock producers would not have to ship their animals clear across a State to reach a Federal plant: They could use local, State-inspected plants and still get their meat into interstate commerce, thus saving a great deal on transportation costs and helping smaller meatpacking plants stay in operation. Third, State plants would no longer be pushed to join the Federal meat inspection system. This bill would thus save the U.S. Department of Agriculture and the American taxpayer money by keeping meat-inspection programs in the hands of individual States.

Mr. President, last year I introduced legislation identical to this bill, S. 2400, which received favorable comment from the U.S. Department of Agriculture. Indeed, the Secretary of Agriculture recommended that it be enacted into law. I ask unanimous consent that Secretary Block's letter of August 30, 1982, be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
Washington, D.C., August 30, 1982.

Hon. DANIEL K. INOUYE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR INOUYE: This is in response to your request for a report on S. 2400, a bill entitled the "Federal Meat Inspection Act Amendments of 1982."

The Department of Agriculture recommends enactment of this bill.

This bill amends the Federal Meat Inspection Act and the Poultry Products Inspection Act to permit carcasses, parts of carcasses, meat and meat food products of cattle, sheep, swine, goats, equines, or poultry prepared under State inspection to be eligible for sale or transportation in interstate commerce. Furthermore, the bill permits the entry of State inspected product into Federally inspected plants for further processing. However, under provisions of this bill State inspected product would not be eligible for sale or transportation in foreign commerce. Therefore, any State inspected or mixed State-Federal inspected product would be kept separated from any federally inspected product in a federally inspected plant.

The Federal Meat Inspection Act and the Poultry Products Inspection Act, as amended, as well as strict regulatory trade agreements on meat and poultry exports and imports, require the United States to accept only meat and poultry inspected by a national system of inspection that is at least equal to our Federal inspection system; our trading partners have the same requirements as regards product imported from this country. Therefore, neither the United States nor our trading partners are permitted to accept imports from plants that have been inspected by a State, local or provincial system. The provision in the bill which would make State-inspected products ineligible for sale or transportation in foreign commerce is thus consistent with maintaining our trading relations regarding meat and poultry imports and exports.

The Wholesome Meat Act and the Wholesome Poultry Products Inspection Act require States carrying out State inspection programs to develop and effectively enforce requirements, with respect to intrastate operations, "at least equal to" the Federal requirements imposed under the Acts. There are now 27 States conducting meat and/or poultry inspection programs for intrastate product. These programs conduct inspection at plants accounting for 5 percent of the total red meat and one percent of poultry slaughtered in the United States. USDA's responsibility for maintaining a national

standard for meat and poultry inspection under these Acts is enforced in such States through a review of each State program. Also, a statistically selected sample of State plants is reviewed periodically as a further check on the effectiveness of the State's inspection system.

Since States which choose to carry out inspection programs must develop and effectively enforce meat inspection requirements "at least equal to" those of the Federal program, it is reasonable that States should be allowed comparable benefits under the law with respect to sales in other than foreign commerce. This legislation would give State inspected plants the opportunity to expand their markets to include wholesale and retail outlets in other States and State or federally inspected plants regardless of where they are located. The Department does not believe that this bill as written will have any significant impact on the meat and poultry industry, or on consumer confidence in that industry.

The Office of Management and Budget advises that there is no objection to the presentation of this report from the standpoint of the Administration's program.

Sincerely,

JOHN R. BLOCK,
Secretary.

Mr. INOUYE. Mr. President, allowing State-inspected meat and poultry products into interstate commerce is an idea whose time has come. I urge my colleagues to join us in passing this important piece of legislation.

I ask unanimous consent that a position paper by the American Association of Meat Processors and the full text of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 593

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Meat and Poultry Products Inspection Act of 1982".

FEDERAL MEAT INSPECTION ACT

SEC. 2. (a) Section 301 of the Federal Meat Inspection Act (21 U.S.C. 661) is amended—

(1) by striking out "solely for distribution within such State" in subparagraph (1) of paragraph (a);

(2) by adding at the end of subparagraph (2) of paragraph (a) the following new sentence: "In carrying out the provisions of this Act, the Secretary may conduct such examinations, investigations, and inspections as he determines practicable through any officer or employee of any State or Territory or the District of Columbia commissioned by the Secretary for such purposes.";

(3) by striking out "with respect to the operations and transactions within such State which are regulated under subparagraph (1)," in subparagraph (3) of paragraph (c) and inserting in lieu thereof "with respect to all establishments within its jurisdiction which do not operate under Federal inspection under title I of this Act and at which any cattle, sheep, swine, goats, or equines are slaughtered or their carcasses or parts or products thereof are prepared for use as human food and with respect to the distribution of carcasses, parts thereof, meat, or meat food products of such animals within the State,"; and

(4) by adding at the end thereof the following new paragraph:

"(e) Notwithstanding any other provisions of this Act—

"(1) Carcasses, parts thereof, meat, and meat food products of cattle, sheep, swine, goats, or equines prepared under State inspection in any State not designated under paragraph (c) of this section, and prepared in compliance with the meat inspection law of the State, shall be eligible for sale or transportation in commerce and shall be eligible for entry into and use in the preparation of products in establishments at which Federal inspection is maintained under title I of this Act, in the same manner and to the same extent as products prepared at such establishments. Such State inspected articles, and federally inspected articles prepared, in whole or in part, from such State inspected articles, shall not be eligible for sale or transportation in foreign commerce and shall be separated at all times from all other federally inspected articles in any federally inspected establishment which engages in the preparation, sale, or transportation of carcasses, or parts thereof, meat, or meat food products, for foreign commerce.

"(2) All carcasses, parts thereof, meat, and meat food products that are inspected under a program of inspection pursuant to the law of a State not designated under paragraph (c) of this section shall be identified as so inspected only by official marks which (A) clearly identify the State as the State which performed the inspection, and (B) are of a design prescribed by the State. Federally inspected articles prepared, in whole or in part, from such State inspected articles shall be identified as so inspected only by the same official marks as prescribed by the Secretary for articles slaughtered or prepared under title I of this Act.

"(3) The operator of any establishment which is operated under Federal inspection may transfer to State inspection and the operator of any establishment which is operated under State inspection may transfer to Federal inspection if—

"(A) the operator gives written notice to both the appropriate Federal and State officials of the proposed transfer; and

"(B) the Secretary determines that such transfer will effectuate the purposes set forth in section 2 of this Act and will not adversely affect the stability of the total State and Federal inspection systems.

A transfer of inspection authority under this paragraph may not become effective until October 1 of any year and until at least one hundred and eighty days have elapsed after notice of the proposed transfer has been given to the appropriate Federal and State officials. The Secretary may, in his discretion, make individual exceptions for any applicant for Federal inspection under title I of this Act who presents clear and convincing evidence that he intends to, and will be able to, engage in foreign commerce to the extent that Federal inspections would be required, to engage in such commerce.".

(b) The second sentence of section 408 of such Act (21 U.S.C. 678) is amended to read as follows: "Marking, labeling, packaging, or ingredient requirements in addition to, or different than those made under this Act may not be imposed by any State or Territory or the District of Columbia with respect to articles prepared at any establishment under Federal inspection under title I of this Act or with respect to articles prepared for commerce at any State inspected establishment in accordance with the requirements under section 301(e) of this Act; but any State or Territory or the District of Columbia may, consistent with the requirements of this Act, exercise concurrent jurisdiction with the Secretary over articles distributed in commerce, or otherwise subject to this Act, for the purpose of preventing the distribution for human food purposes of any such articles which are not in compliance with the requirements of this Act and are outside of any federally or State inspected establishment, or, in the case of imported articles, which are not at such an establishment after their entry into the United States.".

POULTRY PRODUCTS INSPECTION ACT

SEC. 3. (a) Section 5 of the Poultry Products Inspection Act (21 U.S.C. 454) is amended—

(1) by striking out "solely for distribution within such State" in subparagraph (1) of paragraph (a);

(2) by striking out "with respect to the operations and transactions within such State which are regulated under subparagraph (1) of this paragraph (c)," in subparagraph (3) of paragraph (c) and inserting in lieu thereof "with respect to all establishments within its jurisdiction which do not operate under Federal inspection under this Act and at which any poultry are slaughtered or any poultry products are processed for use as human food and with respect to the distribution of poultry products within the State,"; and

(3) by adding at the end thereof the following new paragraph:

"(e) Notwithstanding any other provisions of this Act—

"(1) Poultry products processed under State inspection in any State not designated under paragraph (c) of this section, and processed in compliance with the poultry products inspection law of the State, shall be eligible for sale or transportation in commerce and shall be eligible for entry into and use in the preparation of poultry products in establishments at which Federal inspection is maintained under this Act, in the same manner and to the same extent as poultry products processed at such establishments. Poultry products complying with the requirements under the poultry products inspection laws of States not designated under paragraph (c) in which the products were processed shall be considered as complying with this Act. Such State inspected poultry products, and federally inspected poultry products processed, in whole or in part, from such State inspected poultry products, shall not be eligible for sale or transportation in foreign commerce and shall be separated at all times from all other federally inspected poultry products in any federally inspected establishment which engages in the processing, sale, or transportation of poultry products for foreign commerce.

"(2) All poultry products that are inspected under a program of inspection pursuant to the law of a State not designated under paragraph (c) of this section shall be identified as so inspected only by official marks which (A) clearly identify the State as the State which performed the inspection, and (B) are of a design prescribed by the State. Federally inspected poultry products processed, in whole or in part, from such State inspected poultry products shall be identified as so inspected only by the same official marks as prescribed by the Secretary for poultry products processed under sections 1

through 4, 6 through 10, and 12 through 22 of this Act.

"(3) The operator of any establishment which is operated under Federal inspection may transfer to State inspection and the operator of any establishment which is operated under State inspection may transfer to Federal inspection if—

"(A) the operator gives written notice to both the appropriate Federal and State officials of the proposed transfer; and

"(B) the Secretary determines that such transfer will effectuate the purposes set forth in section 2 of this Act and will not adversely affect the stability of the total State and Federal inspection systems.

A transfer of inspection authority under this paragraph may not become effective until October 1 of any year and until at least one hundred and eighty days have elapsed after notice of the proposed transfer has been given to the appropriate Federal and State officials. The Secretary may, in his discretion, make individual exceptions for any applicant for Federal inspection under title I of this Act who presents clear and convincing evidence that he intends to, and will be able to, engage in foreign commerce to the extent that Federal inspection would be required, to engage in such commerce.".

(b) The second sentence of section 23 of such Act (21 U.S.C. 467e) is amended to read as follows: "Marking, labeling, packaging, or ingredient requirements in addition to, or different than, those made under this Act may not be imposed by any State or Territory or the District of Columbia with respect to articles prepared at any establishment subject to Federal inspection under this Act or with respect to articles prepared for commerce at any State inspected establishment in accordance with the requirements under section 5(e) of this Act. Further storage or handling requirements found by the Secretary to unduly interfere with the free flow of poultry products in commerce shall not be imposed by any State or Territory or the District of Columbia. However, any State or Territory or the District of Columbia may, consistent with the requirements of this Act, exercise concurrent jurisdiction with the Secretary over articles distributed in commerce, or otherwise subject to this Act, for the purpose of preventing the distribution for human food purpose of any such articles which are not in compliance with the requirements under this Act and are outside of any federally or State inspected establishment, or, in the case of imported articles, which are not at such an establishment after their entry into the United States.".

POSITION PAPER OF THE AMERICAN ASSOCIATION OF MEAT PROCESSORS

Legislation being considered: S. 2400 introduced by Senator Daniel Inouye; H.R. 5268 presented by Congressman William Wampler.

These bills, if enacted, would permit state inspected meat products to be shipped in interstate commerce and to be sold to federally inspected establishments.

ASSOCIATION POSITION

For.

ASSOCIATION PROFILE

The American Association of Meat Processors, which we will refer to throughout this document as AAMP, is the non-profit meat trade group which represents the small to medium size independent meat processors in the United States. AAMP's membership includes over 1,500 independent, family-owned meat businesses located throughout the United States and Canada.

Many of these small business people maintain their meat plants under state meat inspection programs while others operate with federal inspection in states which no longer maintain state meat inspection programs. The plants which are operating under state meat inspection are generally satisfied with their present inspection status . . . except for the discrimination against them insofar as free and unhindered shipment of their products and sales of their meat to federally inspected meat plants is concerned. Federally inspected small meat plants, for the most part, are also operating satisfactorily in their present situations . . . except for the problems they often experience in working with the federal bureaucracy.

SUPPORTIVE STATEMENTS FOR PASSAGE

State meat inspection programs are equal to, but not necessarily identical to, the Federal meat inspection program

The state and federal programs, contrary to the unfounded allegations of some opponents of the present system, are equal; but they are far from being the same.

Either the states are doing the job or they aren't. If anyone can show irrefutable proof to Congress that the job is being inadequately handled by the state programs, then the USDA should assume the responsibility for administering these programs. If they can't prove that the states are doing an inadequate job, and we believe that this evidence cannot be provided because it is nonexistent, then there is no reason to oppose passage of legislation to end this gross inequity and barrier to free trade in the meat industry.

Study after study has been done on the equal status of state meat inspection programs. These inquiries have shown that the USDA has kept its finger on the pulse of the state programs. Problems found in the state programs during these studies, whether they be in individual plants or in a specific area of a state, would exist if the meat inspection were administered by the federal government. Inherent problems do not cease to exist simply because the governing agency changes.

Successful compliance programs, including the ability to trace and recall adulterated product should it be necessary, have been implemented in all state programs. The last remaining program without such a compliance program, Florida, recently completed steps to activate a separate compliance branch. Prior to that time, compliance activities had been handled by inspection supervisors. Evidence of the excellence of these activities is provided by the fact that all of the state inspection programs assisted the USDA in the recall of horse and kangaroo meat which had been shipped into this country from Australia.

Small plants voluntarily applying for Federal inspection find the process too expensive, frustrating and the bureaucracy too difficult to deal with—

On the surface, it would seem that it should be a breeze to transfer a plant from state meat inspection to the federal meat inspection program. After all, state systems are equal to the federal program and must abide by federal regulations. If the plant is operating satisfactorily under state inspection, shouldn't it be easy to apply for and receive federal inspection?

Maybe it should be, but it is not. Some of these problems and expenses are outlined here.

Facilities Requirements—The major hurdle facing the small existing meat plant applying for federal inspection is the facility requirements. These are set forth in a document known as "Handbook 570."

Many of the small plants were built prior to enactment of the Fedeal Meat Inspection Act. While they were built according to generally accepted industry specifications for the production of wholesome products, they were not bound by guidelines laid down by any governmental agency. Consequently, as these plants were brought into the meat inspection systems, many were often unable to meet the federal facility requirements in "Handbook 570" designed primarily for big packing plants. These facilities deviations did not necessarily affect sanitation or wholesomeness of product. In the early days of meat inspection, many small meat businesses were forced out of business because of unwarranted demands that facilities changes be made.

For example, overhead rails, which support trolleys by which sides and quarters are moved about in meat plants, are required by federal regulation to be 11 feet high in beef coolers. It is a sensible requirement where beef carcasses are handled as sides since it prevents the meat from dragging on the floor. Many small plants did not meet this specification because they were designed to handle beef in quarters rather than sides. Also, many small plants did not have private offices for an inspector, as required in federally inspected meat plants.

Eventually, the USDA recognized the fact that small plants do operate different than large packing houses and published a document entitled "Federal Facilities Requirements for Small Existing Meat Plants." This guideline permitted the lower rail heights for handling beef quarters, plus many other such variations which do not affect sanitation or wholesomeness of product. As the title suggests, these variations applied only to existing facilities and were not applicable to the construction of new plants or to expansion of old ones.

As the result of the issuance and use of the "Small Existing Plant Handbook," thousands of small establishments are successfully operating today under inspection, turning out product that is sanitary and wholesome, under both federal and state programs. But, there are only two instances in which meat plants are permitted to be "grandfathered" into meat inspection using this guideline:

1. When an entire state is designated for federal takeover, and,

2. When a meat plant is brought into a state meat inspection program.

When small plants voluntarily apply for federal inspection without their entire state program designated, they must renovate to make any facilities changes which had been permitted under the Small Existing Plant Handbook guidelines. If a small meat plant is operating in a sanitary manner, producing a wholesome product today, it would not necessarily be permitted into the federal program tomorrow without extensive and expensive renovations

In a state designated for federal inspection, the "Small Existing Handbook" automatically applies to the plants which are brought under the federal program during the designation. Therefore, those plants absorbed into the federal program during a designation are not normally faced with the massive expenditures for facilities renovations. In addition, they have three years in which to make any needed corrections while

those voluntarily applying must complete the work before the grant of inspection is considered.

Thus, obtaining federal inspection on an individual plant basis is not as easy as it sounds even though the state program under which it is operating is certified, and is being operated, as equal to federal by the United States Department of Agriculture.

Expense of Applying for Federal Inspection—Initially, small plants which had been permitted to operate under the guidelines of the Small Existing Plant Handbook in a state program were faced with thousands of dollars in expenditures for facilities renovations. This, incidentally, is on top of the money that most of them spent to make renovations when they were first brought under state meat inspection. In applying for federal inspection, a state inspected plant runs into a mass of paperwork which must be completed prior to the plant being granted federal inspection. The procedure is as follows:

1. The Plant must be reviewed by the federal inspection authorities.
2. Deficiencies must be corrected to bring the plant up to "570" standards.
3. Blueprints must be drawn up and sent to Washington for approval.
4. Label applications must be submitted.

Problems always arise. The approval of blueprints and labels is an area fraught with problems for plants being brought into the federal inspection. After the plant has gone to the expense of preparing the blueprints and waded through the label approval forms, they are frequently returned from Washington with a list of questions and corrections which must be made to the labels and/or blueprints. This often happens to a plant several times before final approval is granted.

But, the major expense is the large number of facility changes that must be implemented, changes which too often have no relationship to or bearing on the wholesomeness of the meat being handled.

Scheduling of Inspectors in Small Plants—When they shift from state to federal inspection, another problem that state inspected establishments face is inflexibility of inspection hours. State programs are generally much more flexible than federal in this regard. A plant which is voluntarily applying for federal inspection is apt to have to rearrange the plant's work schedule to meet the availability of an inspector. These rearrangements can often result in a plant having to reschedule employee's hours to work around the availability of a federal inspector. Obtaining an additional day of inspection on a temporary basis or making an emergency change in inspection hours is often difficult if not impossible. Often an overtime charge is made for small plants requiring federal inspection, even in cases where the inspector is in the plant less than eight hours a day.

Small meat plant operators find it difficult to obtain answers to questions and problems from the massive Federal bureaucracy.

Of all objections to federal inspection, this is the one most often voiced and one of the major concerns of small operators who are faced with the decision of applying for federal inspection. The operators of most small plants do not want to face the massive bureaucracy with which federally inspected plants must deal on a regular basis.

In some areas, such as Hawaii, getting a problem resolved under federal inspection means contacting Washington. The time zone differences alone point out the ludicrousness of the federal communications channels on a practical basis. Unresolved problems typically means production halts. Stoppages of hours or days can too readily translate into economic losses which are non-recoverable.

Small plant operators find it extremely difficult to deal with such a complex bureaucracy. They need a direct line of communication with their official policymakers. Speed in solving problems and clarifying policies is crucial to the survival of small plants. Unless they have someone like AAMP assisting them, small meat plant operators under federal inspection must take their problems to a myriad of federal government employees before possibly finding an answer.

In comparison with the Federal Meat Inspection Program, state program organizational structures are simple and direct. If a problem can't be solved working with the inplant state inspector or his supervisor, the plant operator and/or the inspector can appeal to the state program director. Unresolved problems are handled quickly and without costly delays. A typical organizational chart for both programs might look like this:

[Chart deleted in the RECORDS.]

People in the state government offices are normally in tune with what is going on in their program, even in the individual plants. There is little or no passing the buck from one bureaucrat to another until everyone is so frustrated that they give up rather than try to solve the problem. Once a decision has been rendered by a state meat inspection director, it is a relatively simple matter for supervisors to insure that the directive is followed by all inspection personnel.

In contrast, a federal inspector, after receiving a final determination from Washington, is not necessarily bound to abide by the answer because he is closer to the situation and may be aware of circumstances not known to the Washington staff. After hours and days of frustrating phone calls, the operator is often left with the feeling that he has won the fight but lost the battle because the inspector is not under the direct control of his ultimate supervisor and may choose not to abide by national policies.

The closest link in the chain of upper level management in the USDA is the Area Supervisor. The Area Supervisor is often called upon to resolve problems in meat plants under jurisdiction. This often requires that he visit the plant. Now, this closest link is being removed. The USDA is planning to close all area offices. This means that someone in Maine with a problem will have to deal with an Area Supervisor located in Philadelphia. The supervisor may be familiar with the problem at issue but may never have seen it or even know where the town is located.

Close contact by top level State officials with their employees and the meat plants under their jurisdiction makes it more difficult for illicit activities such as bribery and collusion to exist—

It has been suggested that, because of the kind of direct contact with policymakers which is typical of state programs, there is a proneness to influence by politicians and businesspeople. We have seen no evidence of this. In fact, we suspect that such illicit activities are easier to cover up and hide in a program as massive as the Federal meat inspection program.

Communications between top level policymakers and their field personnel are efficient—

The additional levels of bureaucracy in the federal program have created the problem of properly relaying information to the lay inspector. When a policy decision is made in Washington, it is relayed from the Washington office to the Regional office to the Area Office to the Circuit Supervisor and then to the lay inspector. The inspector often does not receive the information at all or receives it long after he really should have it. This results in confusion when, through USDA news releases, association bulletins and/or magazines, a policy is announced and the inspector has not yet received official notice of its implementation.

Confusion is also apparent when an AAMP member calls for help with a problem, obtains the information as to Washington's official policy from the AAMP staff and then finds the inspector has no record or knowledge of the regulation or policy which applies to the given situation.

Because of the simple lines of communications in state programs, this problem is almost non-existent. Circuit supervisors and inplant inspectors can be quickly and efficiently advised of policy decisions affecting the plants in their jurisdiction.

Policy decisions are often made in Washington by unelected Federal policy makers with no opportunity for public comment—

Changes have been made in federal "policies" which have not been announced through proper rulemaking procedures. One area in which this frequently occurs is in approving new product standards through the label approval process. These "closed door" decisions have often resulted in some confusion and a lot of frustration for meat plant owners. It is rather easy for "policy" decisions to be made and to be buried in the federal bureaucracy. However, at the state level where plant operators have easier access to public officials who oversee the state inspection programs, this kind of problem does not often surface.

Foreign meat products, which are subject to less intense inspection than is offered by the States or the USDA, are permitted free access to American markets. The same privilege should be given to American businesses that are constantly watched—

Foreign meat products from countries having an agreement with the USDA have free access to any market in the United States. Yet, the USDA is not conducting continuous onsite meat inspection in foreign countries which export to the United States. Foreign systems are certified by the USDA as meeting USDA requirements and the foreign governments, with the help of a handful USDA veterinarians, conducts the inspection of those plants exporting meat to the United States.

These foreign programs receive minimal supervision and oversight by the USDA and most have not been visited by a USDA inspector. The state meat inspection programs, on the other hand, receive quarterly onsite checks by the USDA and are often subjected to more frequent visits if a deficiency in the state program is found during the quarterly visit. Yet, this state inspected meat, which is receiving intense inspection by people who are often trained in federal training facilities under a program monitored directly by the USDA, is not permitted the same privilege of free movement into United States commerce which is enjoyed by foreign products. If imported meat, which is often subject to less inspection than domestic meat, is permitted access to U.S. markets, is it fair to deny state inspected meat this same right?

Consumer confidence in our Nation's meat supply, including state inspected meat, is at an all-time high, and there is no reason to believe, or proof that has been offered, which would lead anyone to believe that passage of this bill will change this—

As long as we continue to deny state inspected meat the right to move into interstate commerce and into federally inspected plants, we are saying that state inspected product is inferior and is not to be trusted. We maintain that this is not the consumer's view of inspection. We doubt that most consumers are even aware that both the federal and state meat inspection systems exist nor to what extent their meat is inspected. What they do know is that they are constantly supplied with wholesome, quality meat. Consumers in 26 states continue to express their confidence in state inspected meat by purchasing and consuming millions of pounds of state inspected meat every year.

The argument that consumer confidence in meat will be undermined by allowing state inspected products to be shipped interstate is ludicrous and unfounded. We have yet to see any evidence, study or indication that this is true. Some of our nation's top meat products, evidenced by the fact that they are annually winners in national competition, are produced in state inspected meat plants. These products are as successful as they are because of their excellence and high quality.

The present restrictions do not allow small plants to serve their natural marketing areas and inhibit their growth—

Meat plants operating under state inspection cannot now serve their natural marketing areas because of restrictions in the current law. This means that plants ten, five, even one mile, from a state line are restricted from serving their natural marketing areas. They must pay a penalty in their advertising costs because newspapers, periodicals, radio and television stations base their rates on the number of readers or audience reached. Paying full rates for advertising when the law does not allow them to serve those reached by the advertising is a compounded penalty for small plants operating under state meat inspection.

There is an artifical and political barrier to the growth of these small businesses that are forced to stagnate. By not allowing them to expand beyond political, they are required to remain small or face expensive technical and administrative programs of the Federal inspection system.

Livestock producers pay a penalty of lessened competition under the present law—

A small plant that is allowed to serve its natural marketing area without regard to political jurisdictions increases its volume. That means it buys more cattle, hogs, lambs, chickens, turkeys and veal animals. To the livestock producer, that means increased local markets and better competition for his animals. It translates into profits for the livestock grower. Simply by being able to sell more animals two or three miles away from the farm instead of trucking them hundreds of miles to major packing plants means less expense and greater profit for the producer.

Consumers would be rewarded with more variety and competitive pricing—

Consumers would be the greatest beneficiaries of this legislation. Many areas of the country feature meat items that are not available elsewhere. Small, state-inspected plants would be able to introduce their regional or ethnic products into area where they are currently not available. The opportunities for mail-order and catalogue sales by small firms would be greatly enhanced by this legislation.

State and Federal plants would be able to cooperate and operate more efficiently—

Present law allows a federally inspected meat plant to buy meats from Australia, New Zealand, Argentina or European countries and ship them into interstate commerce as processed or fabricated products. Yet these same federal plants cannot buy meats from small, state inspected plants that produce the meats and other raw materials that they need. Thus, we see a scenario of plants in the same town that cannot trade with one another, stiffling the efficiency and economic growth of both facilities. Nor can federal plants subcontract or "job out" work to smaller state-inspected facilities. Many federal plants find it necessary to subcontract smoking, slicing, private labeling, breaking or other operations, either as a matter of course of during seasonal or peak times. Present law prohibits them from engaging in these mutually beneficial arrangements if a state-inspected plant is involved. The consequence is that federal plants must pay expensive shipping costs to have such work done or do it themselves with new equipment that will be used only occasionally and with workers who will be facing layoffs after those peak or seasonal periods.

Five thousand State-inspected plants are prohibited from bidding on most Government meat contracts under present law—

Federal government meat purchases for the military, school lunch programs, prisons, hospitals and other institutions are off-limits to 5,000 state-inspected meat plants because that product must be shipped across state lines. The lessened competition and higher prices that the government and taxpayer endure are totally unwarranted, but are yet compelled by the present restrictions. Many schools, institutions, etc., receive meats from federal government purchases in large quantities or in forms they cannot handle. They commonly take them to be stored, processed, sliced, or further handled in small, local state-inspected meat plants . . . plants that were originally forbidden to have bid on those government contracts. Local school districts and other entities pay additional storage and processing costs at further cost to the taxpayer.

Close cooperation between USDA and State programs is essential in continuing to supply American consumers with the wholesome, unadulterated, properly labeled product to which they are accustomed—

One point needs to be made absolutely clear. In no way should any of the criticisms of the Federal inspection program we've presented be considered as a condemnation of the federal meat inspection programs. The program is needed, has been well run and, judging by the low incidence of illness and death related to consumption of meat which has been inspected by either federal or state officials, the both programs have accomplished their goal of providing consumers with a continuous supply of wholesome meat.

The federal program has its place in inspecting large plants, in dealing with export problems, providing guidance and assistance to the states in maintaining their programs and providing laboratory capabilities. Large packing plants need the assurance that they can produce meat in one state to sell it in other states without having to subject the product to differing standards in different states.

State inspection programs also have their place alongside the federal program. It is our experience that, by and large, small meat plants function more efficiently and economically under state inspection programs because of the less cumbersome bureaucracies in state programs.

It is time to recognize that the monumental task of providing the American consumer with a safe, wholesome supply of meat cannot be accomplished by the federal government alone. The close cooperation which has developed between the state meat inspection programs and the federal inspection program is evidenced by the large part state meat inspection programs played in the recall of Australian horse and kangaroo meat. This cooperation and pooling of resources between the states and the federal government should be encouraged.

Ultimate responsibility for assuring that a safe supply of meat enters interstate commerce lies with the USDA. They have demonstrated for years that this responsibility can be safely and economically met through cooperation with the state programs. Far from abdictating their responsibilities, the USDA has met the challenge with foresight and with the best interests of the consuming public in mind by continuing to foster the state meat inspection programs.

SUMMATION

Both state and federal programs are needed. The USDA and the state programs need to work together, complementing each other's programs, without the constant feeling that the state system is inferior to the federal. The state programs are doing a tremendous job of providing consumers in their states with a wholesome supply of meat. The passage of legislation to permit the interstate shipment of state inspected meat products would be a step in the right direction in eliminating the feeling of competitiveness which has always seemed to prevail as these programs are discussed.

Mr. KASTEN. Mr. President, I thank my distinguished colleague from Hawaii and join him in support of the Federal Meat and Poultry Products Inspection Act of 1983.

Primarily, the bill will allow for State-inspected meats to be shipped and old interstate. Under present law, State-inspected meat products may not be marketed in interstate commerce despite the fact that Federal law requires State-inspection standards to be at least equal to Federal inspection standards. This limitation works a particular hardship on those small family-owned meat-processing plants located near State borders. Bear in mind that the meat processors I am referring to are small, family owned and operated businesses that employ 10 or less people. There are more than 14,000 of these businesses nationwide. In my State alone, there are 600 plants that fall into this category.

As our attention is directed toward unfair trade practices and protectionism tactics of foreign competitors, it is ironic that we are imposing domestic trade restrictions on our own meat industry. We cry "foul" to foreign trade practices, yet present law governing

U.S. meat inspection smacks of that which we condemn. For example:

Four small meat processors in Texas formerly sold their products to a larger, State-inspected plant for distribution. Business was prosperous. The larger receiving plant decided to undertake an ambitious expansion program which included the lengthy process of becoming federally certified in their inspection program. As a result, these four small processors lost a viable market outlet and ended up with diminished market share.

A small plant in Lodi, Wis., specializes in the production of cured summer sausage. Recent recognition this fall of their product appeared in a national publication which resulted in nationwide requests for their product. The Lodi locker could not fill these orders as their meat is State inspected and not allowed to be shipped interstate. Estimated loss in receipts: over $6,000.

A small plant situated in the panhandle of Maryland is located 10 miles from Pennsylvania, 15 miles from Virginia and 5 miles from the West Virginia border. His marketing area is confined to Maryland under present law, with other markets close to him. Regardless of the demand for his product, he cannot sell his State-inspected meat products interstate.

From the examples just cited, trade barriers are obvious. By removing these barriers, a more competitive atmosphere will be created for all meat processors, large and small. It will allow consumers a wider variety and choice of specialty meats to choose from. Healthy competition would also result in lower prices to the consumer for quality foods. Market expansion for the small processor could result in the creation of more jobs. Consumers would experience the added convenience of being able to purchase variety meats at their local supermarket without having to drive any great distance or by having relatives/friends purchase an item for them to later be shipped across the country.

Let me stress that this bill in no way modifies present inspection laws. The consumer is protected. Quality and wholesome meat products will continue to crowd the shelves of retail outlets. The change witnessed by consumers will be a more diversified line of meat products on which they can discriminantly spend their dollars.

The rumor that State-inspection programs are inferior to Federal inspection programs is grossly untrue. The State inspection program is required to meet, if not exceed, the quality level of Federal inspection programs. If State inspection programs are found to be inferior, USDA steps in to assume inspection responsibilities until such time State inspection can be certified to meet stringent requirements. In the areas where USDA can determine equality, sanitation and wholesomeness of product, the Department of Agriculture has asserted State programs to be equal in quality of inspection.

Successful State compliance programs united with Federal inspection efforts have assisted USDA in the recall of horse and kangaroo meat which had been shipped into the United States from Australia last year. In this instance, the quality of State inspection programs speaks for itself. Ironically, present law allows a federally inspected meat plant to buy meats from Australia, New Zealand, Argentina, and European countries for shipment into interstate commerce as processed products. Yet, these same Federal plants cannot buy meats from State-inspected plants for sale into domestic channels.

This bill was introduced to the Senate last session, but due to time constraints, final action was not taken. Last August, comment was requested from USDA concerning this bill. USDA's comment was favorable and OMB advised of no objection to this bill from the standpoint of the administration's program. With this in mind, it is my hope that passage of this bill be expedited, for it will result in greater competition in the marketplace by tearing down domestic trade barriers we have unwittingly fostered throughout the years.

I urge my colleagues to support the Federal Meat and Poultry Products Inspection Act of 1983.

By Mr. DURENBERGER (for himself, Mr. BOREN, and Mr. THURMOND):

S. 594. A bill to amend the Internal Revenue Code of 1954 to treat as a reasonable need of a business for purposes of the accumulated earnings tax any accumulation of earnings by such business in anticipation of section 303(a) distributions before the death of a stockholder; to the Committee on Finance.

FAMILY BUSINESS PRESERVATION ACT

Mr. DURENBERGER. Mr. President, we hear a lot today about the problems many family-owned businesses are having in these troubled economic times. But we hear little about two important problems that successful family-owned businesses face in passing these businesses on to future generations.

The Family Business Preservation Act, which I am introducing today along with my colleagues Senators BOREN and THURMOND, addresses these problems. It modifies the accumulated earnings tax to permit family-owned businesses to prepare for the purchase of a deceased owner's stock. The bill also conforms the section 6166 shareholder requirement for extended payment of estate tax to the subchapter S changes made last year.

In 1981 with the Economic Recovery Tax Act, we took critical steps to remove estate tax barriers to passing family-owned businesses to future generations. Our bill today takes another important step to keep the family in family-owned businesses.

Presently the income tax laws impose a barrier to owners of businesses who want to accumulate earnings in the corporation for redeeming stock after the death of one of the owners. After an owner's death, the family frequently must sell part or all of the stock because of lack of liquidity to pay estate taxes—a substantial burden in many cases despite the changes made by the 1981 act. But the corporation cannot accumulate sufficient earnings because of the accumulated earnings tax. This tax of 27½ to 38½ percent is in addition to the regular corporate tax and is levied on earnings accumulated in excess of $250,000. The law allows accumulations for reasonable business needs, and one of these needs is money to buy out a shareholder. But this is available only after the shareholder's death. Too often the liquidity this provides is too little too late for estate tax purposes without depriving corporations of the liquidity they need for ongoing operations.

This rule is especially severe for businesses with a high market value compared with annual earnings. Family-owned newspapers—the independent newspapers so essential to the free press in our democracy—are prime examples of high value-low earning companies. High tech companies increasingly are also facing this problem because of sharp appreciation in a short period of time. In fact, the problem could face any nonliquid corporation.

Last year when I introduced a similar bill I cited a prime example of the need for this legislation, and I would like to draw it to my colleagues' attention once again. The Wall Street Journal, on August 19, 1981, carried the story of the Salisbury, N.C., Post. The paper with a circulation of 24,700 had earnings of $400,000 the previous year on revenues of about $4 million. The asset value was $3 million, but the market value was about $20 million. Even with the $600,000 exclusion that will be phased in by 1987, the estate tax would be $9.8 million, or 24½ times annual earnings.

Enactment of this legislation would permit owners of family-owned newspapers and other businesses to set aside funds for redemption of stock at the death of a major shareholder—to undertake the planning so essential for avoiding undue disruption at the time of the death of a principal owner. By taking these steps a business could avoid the necessity of selling to a larger corporation—to a chain, in the case of newspapers—just to meet the

liquidity demands of the estate tax. Our bill would help in an important way to stem the tide of undue concentration in business.

In this time of massive Federal deficits, it is more essential than ever to weigh every measure by how much it will cost the Federal Treasury. This bill passes muster because it allows the accumulation of earnings prior to death, but only with after-tax dollars.

The liquidity problem caused by estate taxes can also be alleviated by payment of estate taxes over a number of years. The second part of the bill will conform the provisions of section 6166 that set forth the requirements for qualifying for extended payment of estate taxes with the subchapter S changes made last year. Historically, the requirement that the business have 15 or fewer shareholders to qualify for section 6166 mirrored the rules for subchapter S qualification. Both were directed at aiding closely held businesses. In October of 1982 we changed the subchapter S rules to increase the shareholder requirement to 35, but we neglected to make the corresponding change in section 6166. Our bill would make this change.

Mr. President, small businesses are more important today than they have ever been. The economy requires that these independent concerns remain a vibrant, vital and growing part of American productivity. I urge my colleagues to give this measure quick and affirmative consideration.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 594

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Family Business Preservation Act".

SEC. 2. SECTION 303 REDEMPTION NEEDS OF A BUSINESS.

(a) IN GENERAL—Paragraph (1) of section 537(b) of the Internal Revenue Code of 1954 (relating to section 303 redemption needs) is amended to read as follows:

"(1) SECTION 303 REDEMPTION NEEDS.—The term 'section 303 redemption needs' means, with respect to any taxable year of the corporation, the amount needed (or reasonably anticipated in such taxable year to be needed) in such taxable year or any subsequent taxable year to make redemptions of those shares of stock of such corporation to which section 303(a) applies (or to which such corporation reasonably anticipates section 303(a) may apply)."

(b) CONFORMING AMENDMENT—Subsection (b) of section 537 of such Code (relating to special rules) is amended by striking out paragraph (5).

(c) EFFECTIVE DATE—The amendment made by this section shall apply with respect to taxable years beginning after December 31, 1982.

SEC. 3. COORDINATION OF SECTION 6166 WITH SUBCHAPTER S.

(a) IN GENERAL—Paragraph (1) of section 6166(b) of the Internal Revenue Code of 1954 (relating to interest in a closely held business) is amended by striking out "15" in subparagraphs (B)(ii) and (C)(ii) and inserting in lieu thereof "35".

EFFECTIVE DATE—The amendment made by this section shall apply with respect to estates of decedents dying after December 31, 1982.

● Mr. BOREN. Mr. President, I am pleased to join Senators DURENBERGER and THURMOND in sponsoring the Family Business Preservation Act. This legislation will go a long way toward addressing the significant liquidity problems faced by newspaper owners and other family-owned businesses upon the death of a major owner who was the last of his or her generation.

A recent study by the Rand Corp. examines the dramatic changes which have taken place in the ownership structure during the 20th century. It shows whereas at one time this industry was dominated by small, family-owned enterprises; today about 70 percent of all newspaper firms are subsidiaries of larger corporations. Further, the study shows that the increase in the number of newspaper chains is, "* * * not the result of efficiency gains associated with conglomeration." The study goes on to point out that "* * * tax laws can provide strong economic incentives for merger. Estate taxes make it impossible for most families to retain ownership from generation to generation."

This legislation is designed to deal with this problem. It will amend section 537 of the Internal Revenue Code to allow family-owned businesses to accumulate funds which can be used to facilitate payment of estate taxes upon the death of an owner. The change would include as a "reasonable business need," funds accumulated to facilitate payment of taxes on estates of major owners of a closely held business. A major owner would be defined as one who owns at least 20 percent of a business—a test consistent with other provisions of estate tax law.

As it currently stands funds accumulated year by year to facilitate redemption of stock by heirs to pay estate taxes without forcing the sale of the business are subject to the accumulations penalty tax which currently renders any such effort useless. This tax requires that any corporation which accumulates more than $150,000 must show that the accumulation is justified by reasonable business needs. If it is determined that the accumulation is unreasonable, and thus taxable, the excess accumulation each year is taxed at the rate of 27½ percent on the first $100,000 and 38½ percent on the excess.

This legislation is also designed to make a minor change in section 6166 of the Internal Revenue Code to open the extended time payment provisions of existing Federal estate tax law to more family-owned businesses. Currently there are three tests in section 6166:

First, the interest of the deceased in the business must be at least 20 percent.

Second, such business interests must constitute at least 35 percent of the estate.

Third, the business must have fewer than 15 shareholders.

This legislation will replace the 15 shareholder limit to allow that a business may have 35 or fewer shareholders. It is interesting to note that this is little more than a technical correction. Under the Economic Recovery Tax Act of 1981 the test used for subchapter S election (Small Business Corporations as to Taxable Status) was raised to 35 or fewer shareholders.

Current IRS estate tax valuations based "market values" of small, family-owned businesses often result in heavy estate tax burdens on heirs who desire to continue a business which enjoys only modest earning power. With earnings far short of the taxes levied on the business, the business cannot realize its taxable value short of actual sale. This result cannot be tolerated in that it serves to further weaken the sense of community in the United States and threatens our Nation's economy.●

By Mr. NICKLES:

S. 595. A bill to amend title II of the Social Security Act to restrict the payment of benefits under such title to certain aliens; to the Committee on Finance.

ALIENS RECEIVING SOCIAL SECURITY

● Mr. NICKLES. Mr. President, today I am introducing legislation to restrict the amount of social security benefits which flow to aliens working illegally in the United States and to aliens living abroad.

When it was created in 1935, social security's purpose was to provide greater economic security to workers in the United States. The act did not discriminate in eligibility on the basis of citizenship, but looked only at the type and location of employment of a worker. Few aliens were working and earning social security credits even in 1940. There were only 100 beneficiaries living abroad, receiving benefits totaling about $12,000. No one could have anticipated that in 1981 that number would have increased to 313,000 beneficiaries receiving payments of about $1 billion. Of course, some of those beneficiaries living abroad are U.S. citizens, but most—62 percent—are aliens.

As a result of the initial statute and Congress subsequent inadequacy to deal with this issue, two areas of abuse in the payment of social security bene-

fits to aliens have developed. The first is that current law allows aliens who have lived in the United States to receive social security benefits as a result of illegal employment. The second inconsistency is that aliens living abroad who have earned social security credits as a result of legal employment are now receiving benefits far in excess of what Americans in comparable situations receive.

ILLEGALLY EMPLOYED ALIENS RECEIVING SOCIAL SECURITY BENEFITS

The Immigration and Nationality Act regulates the entry of non-U.S. citizens to America. The act requires that prior to being permitted to enter the United States for employment, the Secretary of Labor must certify to the Attorney General that the entry and employment of the alien will not displace any American workers. In short, the effect of this act is to make it illegal for any alien to work in the United States without this country's express permission.

In contrast, the Social Security Act allows aliens to work and earn social security credits and benefits regardless of whether they are legally living or working in this country. The result of this inconsistency in law is that both illegal aliens and aliens who are legally in this country, but without permission to work, are earning and receiving social security benefits.

It is difficult to estimate the total amount of benefits which go annually to aliens who have worked illegally in this country. However, the General Accounting Office, in a draft report on this issue, estimates that between $0.9 to $2.3 billion in social security benefits go to illegally employed aliens.

Obviously it is a flagrant waste of the scarce funds available in the social security trust fund to support aliens who have worked illegally in our country. The legisation that I am proposing today would bring consistency to our laws on this matter by amending the Social Security Act to require legal resident and employment status in order to earn social security credits. Authority is given to the Social Security Administration to stop any benefits or credits from going to an alien as a result of illegal employment. In addition, any alien filing for benefits must show sufficient evidence that he was lawfully employed when earning social security credits.

ALIENS LIVING ABROAD RECEIVE EXCESSIVE SOCIAL SECURITY BENEFITS

The second issue addressed by this legislation is the excess in social security benefits which are going to aliens and their dependents living outside of the United States. Again, drawing from the General Accounting Office's audits of the Administration's files, there were about 194,000 alien beneficiaries living abroad in 1981. Approximately $700 million in benefits went to this population.

In looking at the alien beneficiary issue, it is most informative to compare the average alien beneficiary to the average U.S. beneficiary. Stark differences in the amount of benefits received become apparent.

First, the average American retiree receives $5 for every dollar paid into the trust fund. The average alien beneficiary receives $23 for every dollar paid into the system—more than three times the amount of U.S. citizens.

Second, the average American beneficiary has worked 20.5 years prior to retirement. The average alien beneficiary has worked only 10.5 years—almost half the time of Americans.

And finally, a large proportion of the added benefits which go to aliens are not going to the wage earner, but to dependents. GAO found that for every American wage earner, 0.4 dependents exist. However, for every alien wage earner, 1.69 dependents exist—over three times the dependents of Americans. To explain this unusual characteristic of the alien population, GAO reviewed individual case files and found that a common trend exists. Often the alien wage earner will retire and, subsequent to his retirement, add dependents through new marriages and additional children. This results in large increases in the monthly benefits received by the family. This characteristic also explains why aliens receive so much more in benefits than the average American per tax dollar. Following are three true examples which GAO found in its case study:

An alien in a foreign country retired at age 63. He got married to a 29-year old woman who one year later had a child. The annual benefit for the wife and child is $1,074. The child will be 18 years of age in 1996, and, therefore could continue to receive benefits until then.

An alien in a foreign country retired at age 62 and at age 65 married a 29-year old woman. She had three children during the succeeding five years. She and the children have received $11,509 in Social Security benefits over five years. Their annual benefit amount is $2,256. Their benefits could continue until the children are age 18 and could resume for the spouse when she attains age 62 or, if widowed, age 60.

An alien in a foreign country retired at age 62 and one year later began living with his 15-year old granddaughter in a common-law marriage relationship. He fathered two children by her during the succeeding six years. The children became eligible for benefits and received $12,896 over a six-year period. Benefits could continue until the youngest child reaches 18 in 1995.

I think that these examples provide convincing evidence of the abuse which is currently taking place in the Social Security system. The following is a chart summarizing the differences between alien beneficiaries and American beneficiaries.

Comparisons	U.S. beneficiaries	Alien beneficiaries
1. Benefits received per dollar paid into system	5:1	23:1
2. Years worked prior to collecting benefits	20.5	10.5
3. Dependents per wage earner	1.69	0.4

Some may wonder why the United States pays retirement benefits to aliens at all. As transportation methods have evolved to make world travel more convenient and companies have expanded, nonresident employment has become much more frequent. In an effort to remove barriers for such exchange, the United States has entered into agreements with a number of countries regarding pension plans. The intention of these agreements is to insure that Americans have the opportunity to participate in a retirement program when they work abroad which is comparable and equal to social security.

However, the United States does not just honor citizens from countries with which we share a formal negotiated agreement. Current law also allows an alien to participate in the social security program even if no formal reciprocal agreement exists for Americans between the United States and the alien's country. The only requirement is that the alien come from a country which has some program that resembles our social security system and is open to U.S. citizens. Unfortunately, what often occurs is that the program offered by the other country doesn't approach the generosity of the social security system. The GAO estimates that 99 percent of aliens receiving social security payments qualify, in part, because they come from a country which has some semblance of a social insurance program which is open to Americans or a formalized agreement with the United States. Because the treaty clauses are estimated to be one of the major exceptions under which many aliens gain participation in the social security program, it should be used to insure equal treatment of American workers. Simply having an open pension plan in existence should not qualify a country for participation in our program.

The legislation that I am proposing today corrects the excessive flow of benefits to aliens living abroad through four provisions. First, future alien beneficiaries would be entitled to receive social security benefits only up until the point at which they have recovered the taxes they paid into the trust fund. Second, the proliferation of dependents after retirement would be addressed by limiting dependent benefits to the spouse alone, provided that the relationship existed at least 1 year prior to the wage earner's application for benefits. Third, the immediate imbalance in benefit payments to aliens—represented by the 23-to-1

ratio—would be corrected by stopping the cost-of-living adjustments which current alien beneficiaries receive. The COLA is based on the U.S. economy and is meant to help those living on fixed incomes in this country to keep pace with inflation. The final provision of my legislation deals with the "informal treaty" loophole. All of the above provisions would apply to those aliens living abroad in countries with which the United States has no formally negotiated agreement. An alien from a country which simply has some form of social insurance program open to Americans would no longer be eligible to participate in our social security program. It must be certain, through a negotiated agreement, that the alien's country provides a truly comparable program for American workers abroad.

This legislation comprises a fair and realistic proposal for aliens and social security. It should be evident that if Congress expects to have the support of this Nation to make the sacrifices required to save social security, then Congress must be willing to cut excess and inequity out of the program. It does not make sense to continue to provide so generously for non-U.S. citizens when we face the prospect of not being able to meet obligations to U.S. citizens in June. Although it represents only a small fraction in the context of the overall shortfall in social security, this legislation is significant. For it is this and other inexplicably inconsistent policies like it which make up much of the reason for America's cynicism about Congress ability to deal with the social security problem.

I hope that my colleagues will join me in making these changes in the problem.●

By Mr. PRYOR:

S. 596. A bill to provide surplus commodities to farmers who lost grain stored in certain insolvent warehouses; to the Committee on Agriculture, Nutrition, and Forestry.

GRAIN STORAGE COMPENSATION ACT OF 1983

● Mr. PRYOR. Mr. President, every Member of the Senate has heard horror stories about farmers who have worked many hours planting and harvesting a crop, only to see it go down the drain when a grain elevator becomes insolvent or bankrupt. This has become a very serious problem the last few years. I have seen figures which show that over the last few years there have been almost 125 elevator bankruptcies. This has cost over 3,500 farmers more than $25 billion and has resulted in a great deal of human suffering.

There have been many changes proposed at both the State and Federal levels to deal with this situation. I have supported amendments to the Bankruptcy Act, initiated by the Senator from Kansas, Mr. DOLE, which would set up expedited procedures for farm crops and would also clarify title to the grain. In addition, I have introduced legislation designed to protect against future losses by setting up an insurance fund, funded by farmers, that would compensate them for losses resulting from the insolvency or bankruptcy of a grain elevator. Both this legislation, and the Bankruptcy Act amendments would deal with insolvencies that might occur in the future. I am convinced, however, that we can do something to help farmers who have suffered losses the past couple of years due to the insolvency or bankruptcy of a grain elevator.

Mr. President, today I am introducing the Grain Storage Compensation Act of 1983. This bill will expand the PIK program to allow farmers who have suffered a loss due to the insolvency or bankruptcy of a grain elevator to receive PIK commodities. With an enormous surplus, and many communities economically wrecked due to the collapse of a local grain elevator, it seems to me that we should provide this assistance. Our farmers are the envy of the entire world, yet many of them are on the edge of an economic cliff, largely through no fault of their own.

Several features of this bill are important, and I would like to point them out. First, it only applies to insolvencies or bankruptcies occurring on or after the Soviet grain embargo and the date of enactment of the bill. Since it is a narrowly defined period, it is not open ended. The elevator insurance legislation I have proposed will deal with prospective insolvencies. Second, the first date involved—the grain embargo—is important because it had such a profound effect upon the commodity markets and international trade. Third, the program will be conducted by the ASCS and will require no additional personnel. A farmer who has suffered a loss will have to establish this fact by competent evidence before he can receive PIK commodities.

Mr. President, the farmers of this country have been devastated the last few years by declining prices and rising production costs. Net farm income has fallen, and exports have declined for the first time in over a decade. These problems are serious enough, but imagine the frustration and pain a farm family feels when an entire year's work is lost. Many of them can never recover. Therefore, Mr. President, I submit that we expand the PIK program in a way which is reasonable and equitable and will literally bring back many small towns in this country. I urge my colleagues to join me in this effort and ask unanimous consent that the text of the bill be included in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 596

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Grain Storage Compensation Act of 1983".

DEFINITIONS

SEC. 2. As used in this Act, unless the context clearly requires otherwise—

(1) the term "depositor" means the owner or holder of a scale ticket, a warehouse receipt, or other original source document issued by a public grain warehouse for grain who resides in a State and who is entitled to possession or payment for the grain represented by such ticket, receipt, or other document;

(2) the term "grain" means barley, corn, cotton, dry edible beans, flaxseed, grain sorghum, oats, rice, rye, soybeans, sunflower seeds, wheat, and any other commodity which is commonly classified as a grain and traded at, or stored in, a warehouse;

(3) the term "insolvent" has the same meaning given to such term under section 101(26) of title 11, United States Code;

(4) the term "Secretary" means the secretary of Agriculture;

(5) the term "State" means a State, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, and the Trust Territory of the Pacific;

(6) the term "surplus commodities" means agricultural commodities owned and held by the Commodity Credit Corporation that are not obligated for any other purpose under any other provision of law; and

(7) the term "warehouse" has the same meaning given to such term under section 2 of the United States Warehouse Act (7 U.S.C. 242).

COMPENSATION FOR INSOLVENCY OF LICENSED WAREHOUSES

SEC. 3. In any case in which a depositor has sustained a loss of grain, the loss of such grain was the direct result of the insolvency of a public grain warehouse in which the grain was stored, and the insolvency of such warehouse occurred at any time during the period beginning on December 1, 1979, and ending on the date of the enactment of this Act, the Secretary shall transfer to such depositor, in accordance with this Act, surplus commodities, or title to such commodities, in an amount, type, and quality the Secretary determines sufficient to compensate such depositor for such loss.

NOTICE OF COMPENSATION

SEC. 4. (a) Within sixty days of the date of enactment of this Act, the Secretary shall publish—

(1) in the Federal Register a notice containing a list of the public grain warehouses throughout the United States which became insolvent during the period described in section 3; and

(2) in a newspaper of general circulation in the area of each public grain warehouse which became insolvent during the period described in section 3 a notice containing the name of such warehouse.

(b) The Secretary shall include in each notice described in subsection (a) a summary of the compensation program provided for in this Act, including a summary of the eligibility requirements described in section 5(a).

PAYMENT OF COMPENSATION

SEC. 5. (a) To be eligible to receive compensation under this Act, a depositor must, within sixty days after the date of publication of the notice described in section 4(a)(2), file a written application for such compensation with the depositor's local office of the Agricultural Stabilization and Conservation Service. The application must describe the type and quantity of grain lost as a result of the insolvency of a warehouse described in section 3.

(b)(1) Within thirty days of the receipt of an application described in subsection (a), the Secretary shall determine if a depositor qualifies for compensation under this Act.

(2) If the Secretary approves an application for compensation under this Act, the Secretary shall, at the earliest practicable time, transfer to such depositor surplus commodities, or title to such commodities, in accordance with section 3.

(3) If the Secretary denies, in whole or in part, an application for compensation under this Act, the depositor shall have the right to appeal administratively such denial.

AUTHORIZATION OF APPROPRIATIONS

SEC. 6. There are authorized to be appropriated such sums as may be necessary to carry out this Act.●

By Mr. DECONCINI (for himself and Mr. GOLDWATER):

S. 597. A bill to convey certain lands to Show Low, Ariz.; to the Committee on Energy and Natural Resources.

SHOW LOW, ARIZ.

Mr. DECONCINI. Mr. President, today I am introducing a measure to convey certain Forest Service lands to the city of Show Low, Ariz., for public purposes.

This bill, Mr. President, is identical to legislation I sponsored in the 97th Congress, S. 2308, which was favorably reported by the Energy and Natural Resources Committee and passed by the full Senate prior to adjournment. However, because there was little time remaining in the session, consideration by the House was not possible. I am hopeful, Mr. President, that this body can take quick action on this bill and send it to the House for early consideration this Congress.

I would like to point out again to the Senate that we are hoping to convey title to approximatley 585.46 acres of Forest Service land to the city of Show Low for a municipal airport and public park. The parcels of land we wish to convey have been occupied by the city under special use permit for many years. Title to these lands will allow the city to expand airport services without creating unnecessary restraints for both the city and the Forest Service.

Mr. President, Senator GOLDWATER has cosponsored this measure and we both want to repeat how important this bill is to the city of Show Low. I urge its expeditious consideration by the full Senate.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 597

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. That the Secretary of Agriculture is authorized and directed to survey and convey, by quitclaim deed and without consideration, to the city of Show Low, Arizona, all right, title, and interest of the United States to the lands generally depicted on a map entitled "Land Conveyance, City of Show Low, Arizona," and dated July 1982, which shall be on file and available in the office of the Chief Forest Service, Department of Agriculture, and more particularly described as follows:

(a) a tract of land, together with improvements thereon known as the David C. Porter Park estimated to include approximately 52.46 acres; and

(b) a tract of land, together with improvements thereon known as the Show Low Municipal Airport estimated to include approximately 533 acres.

SEC. 2. Title to any real property acquired by the city of Show Low pursuant to this Act shall revert to the United States if the city or any successor of the city uses such real property for other than public purposes.

By Mr. DECONCINI (for himself and Mr. GOLDWATER):

S. 598. A bill to authorize a land conveyance from the Department of Agriculture to Payson, Ariz.; to the Committee on Energy and Natural Resources.

PAYSON, ARIZ.

Mr. DECONCINI. Mr. President, the bill my distinguished colleague Senator GOLDWATER and I are introducing today will demonstrate how successfully a group of citizens in a small community and a Government agency can work together to build a memorial paying tribute to both the community and the Government agency.

Mr. President, I am referring to a plan by the residents of a town in Arizona, Payson, to restore the first forest ranger district office and dwelling house in that area. These buildings have been abandoned by the Forest Service for larger and more modern facilities. Payson citizens propose to restore the ranger station, and construct a fireproof building to serve as a museum to display historical artifacts and antiques from pioneer Forest Service days and other items of historic value to the town of Payson.

As a forest town, much of the history of Payson and its residents reflect the flavor of our national forest which has added to the charming character and the quality of the town. The residents of the community wish to preserve a piece of the Forest Service's past and the effects this Government agency has had on their own lives.

The purpose of this legislation is to convey approximately 1.1 acres of Forest Service land to the town of Payson just for that objective. By conveying this land to the town, historic preservation of the community and the Forest Service will be enhanced.

We are talking about a relatively miniscule portion of Federal property in this area, Mr. President. This conveyance, however, will signify a major investment in the quality and caliber of achievements made today and yesteryear in this Arizona town.

Mr. President, the members of the Northern Gila County Historical Society should be commended for their foresight and efforts to make this unique plan a reality. It is my hope that this bill can be expeditiously considered by the Energy and Natural Resources Committee this year so that the community may move forward with their plans as soon as possible.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 598

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled That, notwithstanding any other provision of law, the Secretary of Agriculture is authorized to transfer, without consideration, to the town of Payson, Arizona the following described parcel:

A parcel of land entirely within the S½ of the SE¼ of the SE¼ of the SE¼, of Section 5, T10N, Range 10E, G&SRB&M, Payson, Gila County, Arizona, more particularly described as follows: commencing at the common corner of Sections 4, 5, 8, & 9, T10N, R10E, G&SRB&M; thence N 89°56' W, along the south line of Section 5, a distance of 164.47 feet to the true point of beginning; thence continuing N 89°56' W, along the south line of Section 5, a distance of 337.13 feet; thence N 13°33'08" E, a distance of 223.16 feet, to a point on the south right-of-way line of West Main Street; thence S 74°10'23" E, along the south right-of-way line West Main Street, a distance of 145.02 feet; thence S 43°09' E, along the south right-of-way line of West Main Street, a distance of 243.72 feet; thence N89°56' W, along the south right-of-way line of West Main Street, a distance of 21.36 feet, to the true point of beginning. The above described parcel of land contains 1.10 acres, more or less.

SEC. 2. (a) The property described in the first section shall be used for the preservation and display of articles of historical significance. If the property is not used for historical purposes, title to such property shall revert to the United States.

(b) Subject to the use restrictions provided in subsection (a), the town of Payson, Arizona may provide for the administration of the property by the Northern Gila County Historical Society.

By Mr. LEVIN (for himself, Mr. BOREN, Mr. SPECTER, Mr. RANDOLPH, Mr. SASSER, Mr. ZORINSKY, Mr. MITCHELL, Mrs. HAWKINS, Mr. RIEGLE, Mr. TSONGAS, Mr. HOLLINGS, Mr. FORD, Mr. HUDDLESTON, and Mr. INOUYE):

S. 599. A bill to provide that the amount of unnegotiated social security checks shall be returned to the social

security trust funds; to the Committee on Finance.

SOCIAL SECURITY CHECK TRANSFER

● Mr. LEVIN. Mr. President, I am today introducing with Senators BOREN, SPECTER, RANDOLPH, SASSER, ZORINSKY, MITCHELL, HAWKINS, RIEGLE, TSONGAS, HOLLINGS, FORD, HUDDLESTON and INOUYE legislation which would credit millions of dollars of uncashed social security checks to the social trust funds.

Each year between $20 million to $50 million of unnegotiated social security checks remain in the general fund rather than being recredited to the social security trust funds. According to the National Commission on Social Security Reform, the accumulated total of uncashed benefits is now up to an estimated $300 million to $400 million.

When payment is made to a social security beneficiary, a voucher is submitted by the Social Security Administration to the Treasury Department for the amount of the benefit. This amount is then withdrawn from the social security trust fund and the payment is sent to the beneficiary. For any number of reasons some benefit checks may not be cashed. In many instances the checks are lost, stolen, burned, or saved for later use. Under present procedure, regardless of why the check is not cashed, the money has technically been spent by social security. The Treasury Department holds these funds until the checks are cashed. If the check is never negotiated, this money is added to the Treasury's general fund. The social security trust funds not only lose the initial amount, but also the interest obtainable by proper investment of the trust funds.

Mr. President, considering the deteriorating condition of the social security system, this $300 million to $400 million and $20 million to $50 million annually could make a contribution toward preserving the solvency of the social security system.

For the past several years, the Social Security Administration has been negotiating with the Treasury Department to arrange for a change in the administrative procedure used in handling these outstanding checks, but to no avail. Furthermore, in its package of recommendations, the National Commission on Social Security Reform proposes making a lump-sum payment to the old-age and survivors insurance trust fund (OASDI) from the general fund the amount of uncashed OASDI checks issued in the past. However, the Commission mistakenly indicates that the Treasury Department has changed its procedures in order to resolve the problem of uncashed checks in the future. There have been no changes to date.

In response to this need for a legislative remedy, we are introducing a bill which provides procedures for crediting the Federal old-age and survivors insurance trust fund and the Federal disability trust fund with the amounts of social security checks which have not been negotiated within 12 months. The bill also applies retroactively, transferring the accumulated total of unnegotiated checks.

I urge the speedy enactment of this much needed legislation.●

By Mr. DECONCINI (for himself and Mr. GOLDWATER):

S. 600. A bill to amend Public Law 95-224; to the Committee on Labor and Human Resources.

GRAND CANYON UNIFIED SCHOOL DISTRICT

Mr. DECONCINI. Mr. President, this bill, which is cosponsored by my distinguished senior colleague, Senator BARRY GOLDWATER, amends Public Law 95-244, as amended by section 3 of Public Law 96-581.

All it does, Mr. President, is modify existing law and establish a "special fund" to provide some needed additional support to the Grand Canyon Unified School District—which is within the Grand Canyon National Park. This educational support has already been authorized by the acts of Congress previously mentioned. The revenues for the fund would come entirely from revenues received by the United States from visitors to the Grand Canyon National Park. This is money received at the gate—$2 a car, 50 cents per person on buses.

Pursuant to terms prescribed by the Secretary of the Interior, payments from this fund would be made to the Grand Canyon School District for the education of the children who actually reside on Federal land. Because Federal property is not subject to taxation by State or local agencies, this amendment will assure that the Federal Government pays its fair share of the cost of the health, safety, and education of the children of its employees.

If this support were not necessary on a continuing basis, we would not suggest that a special fund be established. But the district simply does not have the tax base to support the yearly costs of operating the school. Establishing a fund under the control of the Secretary is a much more effective way of dealing with the problem than asking the Congress for a line item appropriation year after year.

These children, for the most part, are the children of Federal employees—the people who operate and maintain the facilities at the Grand Canyon. The Grand Canyon is not an Arizona monument Mr. President, it is a national monument. It is one of America's greatest tourist attractions. It brings a lot of tourists and tourist money into this country. All we are asking for is that a very small amount of these Federal revenues, of which millions are collected at the park, be set aside to cover some of the costs of operating and maintaining the school facilities. The Secretary of the Interior simply estimates how much money will be necessary—in addition to the moneys received for the general tax levies, State equalization aid, and the various Federal programs—and expends the funds when they are needed for operation and maintenance. There is no authorization to use the funds for construction.

Mr. President, as I said, all but a small portion of the land within the boundary of the school district is owned by the Federal Government. Less than 2 percent of the property in the district is privately owned. About 10 to 15 percent of the land is held by the State and 85 percent of the land is managed by the National Park Service and the U.S. Forest Service.

Because so little land is privately owned, the assessed valuation for tax purposes for the district during the 1981-82 school year was $6.7 million. This results in a tax rate of $5.78 per $100. And this rate is projected to increase by at least $1 per $100 for the coming school year. The tax base, such as it is, is eroding. When the Santa Fe Railroad removes it tracks, as planned, it will no longer pay taxes to the district. Last year it paid over $44,000.

In the 1981-82 school year, the district had an enrollment of 216 students and 186 of these students lived within the Grand Canyon National Park boundary and were classified as category A for Federal impact aid purposes. The district received $276,000 in impact aid funding and approximately $47,000 in other Federal education funds, for a total of $323,000 in Federal assistance.

Thus, even though over 80 percent of the district's students are dependents of Federal employees who reside on Federal nontaxable land, only 36 percent of the district's total budget was financed by Federal funds. Next year the Federal share will be even less, about 29 percent, because of less impact aid and lower Federal education funding levels. Also, one major misconception should be clarified: The district does not receive payment in lieu of tax assistance. It has not received such assistance since the program's enactment.

It is quite clear the Federal Government is not providing its share of assistance to this school district which has, as its primary purpose, the education to dependents of Federal employees. It should be remembered that if this district did not exist, the children would have to be bused to either Flagstaff, Ariz., 89 miles one way, or Williams, Ariz., 60 miles one way. This, of course, assumes one of those districts would be able to accept them. Busing 4 hours a day simply is not practical and

I seriously doubt it would be acceptable to the parents of these children.

Another important point to remember also is that having an adequate school system within the park makes it much easier for the National Park Service to attract quality personnel.

Mr. President, as I have stated, current law authorizes additional Federal support to the district. In fact these statutes, over a 7-year period, have authorized up to $6 million to supplement the other sources of the district's moneys. However, the only funds which have been appropriated under this authorization have been added by the Senate, at my request. The amounts $500,000 in fiscal year 1979 and $250,000 in fiscal year 1980. In fiscal year 1982, the Senate, again at my request, added $1 million to the bill but the amendment was rejected by the House of Representatives. The administration has never requested funding under this authorization and has requested none for fiscal year 1983.

This is a small bill, Mr. President, but it is not small or trifling to this school district. It leaves it to the Secretary to control the fund and to estimate how much will be required to meet the minimum standards of the act. It is roughly estimated that it would take $1 to $2 million over 1 or 2 years to bring the facilities up to the required health and safety standards.

I would ask my colleagues to act on this legislation as expeditiously as possible.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 600

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. (a) The first section of the Act entitled, "An Act to authorize the Secretary of the Interior to make payments to appropriate school districts to assist in providing educational facilities and services for persons living within or near the Grand Canyon National Park on nontaxable Federal lands, and for other purposes," approved March 14, 1978 (92 Stat. 154), as amended (20 U.S.C. note following sec. 238), is amended by striking out the matter after the enacting clause through the word "payments" the first time it appears and inserting in lieu thereof the following: "That (a) notwithstanding any other provision of law providing for the disposition of revenues described in this subsection, and under such terms and conditions as may be prescribed by the Secretary of the Interior, payments may be made, in advance or otherwise, from any revenues received by the United States from visitors to Grand Canyon National Park,".

(b) Subsection (c) on the first section of such Act is amended to read as follows:

"(c) For the purpose of this Act, the Secretary of the Treasury is authorized and directed to maintain in a special fund a portion of the park revenues, sufficient for the maintenance and operation of Federally owned buildings, facilities, equipment, real property, and grounds used for school purposes, and for all applicable current Federal, State, and local fire life safety, and building codes, based upon estimates to be submitted by the Secretary of the Interior, and to expend amounts deposited in the special funds under this subsection upon certification by the Secretary of the Interior.

By Mr. QUAYLE (for himself and Mr. PELL):

S. 601. A bill to provide for demonstration projects under which the Secretary of Defense may require a contractor under certain defense contracts to provide training in skilled occupations in which there is a substantial shortage and for other purposes; to the Committee on Labor and Human Resources.

DEFENSE PROCUREMENT TRAINING DEMONSTRATION PROJECT ACT

● Mr. QUAYLE. Mr. President, today I am reintroducing the "Defense Procurement Training Demonstration Project Act." I am pleased to have Mr. PELL again join me in cosponsoring this bill. In hearings before the Subcommittee on Employment and Productivity, which I chair, we have repeatedly heard testimony that there is a shortage of skilled labor for available positions, despite the continuing high rate of unemployment. My proposal would provide one component to resolve this paradoxical problem of continuing skill shortages in the midst of vast unemployment.

The bill requires the Secretary of Labor to publish a list of skilled occupations in which there is a substantial projected shortage, and then authorizes the Secretary of Defense to select from this list those skills in which a shortage will have an adverse impact on defense procurement. With respect to any large contract requiring the use of such skills, the Secretary of Defense is authorized to require the contractor or subcontractor to provide the training in that occupation.

This is a demonstration project only, and the Secretary of Defense is to report to the Congress on its efficiency within 30 months. The bill also contains a provision to facilitate the donation of surplus machine tools and related equipment to vocational education schools in order to assist those schools in providing necessary skill training.

I ask unanimous consent that a copy of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 601

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Defense Procurement Training Demonstration Project Act".

SEC. 2. (a)(1) The Secretary of Defense, after consultation with the Secretary of Labor, is authorized to establish and carry out demonstration projects in accordance with the provisions of this Act to provide training in skilled occupations in which there is a substantial shortage of workers in defense procurement.

(2) For the purpose of this Act "defense procurement" means any procurement defined in section 2303 of title 10, United States Code.

(b)(1) The Secretary of Labor shall develop and publish a list of skilled occupations in which there is a substantial shortage of workers. The list shall be revised annually.

(2) For the purpose of this subsection—

(A) the term "skilled occupations" includes only occupations for which the normal training program is at least two years but the term does not include any occupation for which a college degree is a normal prerequisite; and

(B) there is a substantial shortage of workers with respect to a skilled occupation if the sum of the number of trained programs in that skilled occupation is less than 80 per centum of the anticipated demand for the occupation for the five-year period beginning on the first day of the first month after the determination is made.

(c) The Secretary of Defense shall prepare a list of occupations, based upon the list of occupations prepared by the Secretary of Labor under subsection (b), which, the Secretary of Defense determines will, because of the shortage of workers in any specific occupation, have an adverse effect on defense procurement by expanding the lead-time for such procurement or by increasing the costs of the defense procurement.

(d) The Secretary of Defense shall carry out the demonstration projects authorized by this Act with respect to selected contracts for defense procurement entered into after the date of enactment of this Act if the Secretary determines that—

(1) the defense procurement contract involves the expenditure of at least $10,000,000;

(2) the defense procurement contract will require the contractor or any subcontractor of the contractor to hire additional workers in any of the skilled occupations contained in the list prepared by the Secretary of Defense under subsection (c); and

(3) the training of workers to meet the shortage of workers in any skilled occupation listed under subsection (b) is critical to the timely completion of work under defense procurement contracts in the area in which the contract will be performed.

(e) In carrying out the provisions of this Act the Secretary of Defense is authorized to include, in any contract selected by the Secretary to be a demonstration project, provisions designed to—

(1) require the contractor to provide training (either directly, or by way of contract or other arrangement) in the skills which the Secretary of Defense determines to be necessary to the completion of the contract under subsection (c) of this section; and

(2) specify the type of training, including on-the-job training, training from agencies and institutions experienced in furnishing occupational training, or any combination of such training.

(f) The Secretary of Defense shall, to the extent practicable, assure an equitable geographic distribution of training pilot projects carried out under this Act.

SEC. 3. In awarding contracts under applicable provisions of Federal law, the costs associated with carrying out demonstration projects under this Act shall not be considered.

SEC. 4. Not later than two and one-half years after the date of enactment of this Act, the Secretary of Defense shall prepare and submit to the Congress a report on the demonstration projects carried out under this Act, together with such recommendations, including recommendations for legislation, as the Secretary deems appropriate.

SEC. 5. Section 4 of the Defense Industrial Reserve Act (50 U.S.C. 45) is amended—

(1) by striking out "and" at the end of clause (6);

(2) by striking out the period at the end of clause (7) and inserting in lieu thereof a semicolon and the word "and"; and

(3) by adding at the end thereof the following new clause:

"(8) authorize the donation of any such property directly to the educational institution or training school having a loan agreement for any such property when in the opinion of the Secretary that property is no longer needed by the Department of Defense.".●

By Mrs. HAWKINS (for herself and Mr. CHILES):

S. 602. A bill to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes; to the Committee on Foreign Relations.

RADIO MARTI

Mrs. HAWKINS. Mr. President, I am submitting today a bill to establish a Government-operated radio station for broadcasting to Cuba, known as Radio Marti. If created, Radio Marti will provide the Cuban people with comprehensive and objective news about Cuba and Cuba's role in the world. Legislation similar to this passed the House by an almost 2 to 1 margin, and was favorably reported out of the Senate Foreign Relations Committee during the 97th Congress. Only time constraints in the "lameduck" session prevented this legislation from becoming law last year.

I believe that it is essential that the Senate take swift action on this legislation. If we do, for the first time in a long time the people of Cuba will be able to listen to an alternative to government-censored news and programs. When this legislation is enacted, the Cuban people will finally hear the truth. Access to accurate news reports and varied opinions is something that we in the United States take for granted. We forget sometimes that the truth is a precious and rare commodity in countries where the government censors every broadcast and news report. For decades, the United States has provided the people of Eastern Europe and the Soviet Union an alternative to government propaganda, and now at long last we can provide the same to the people of Cuba.

I believe that the people of Cuba would soon learn to rely on Radio Marti for information about the world—and especially about their own country—in the same way that the people of Eastern Europe and the Soviet Union rely on Radio Free Europe and Radio Liberty. As it stands now, the Cuban people learn the news from either the government-controlled media or by word of mouth. Both of these sources are inadequate and unreliable. True, there are broadcasts that reach Cuba from Florida, but these are for the most part in English and are designed for an American, not a Cuban, audience.

What the people of Cuba need is a Spanish-language broadcast with a clear signal to alert them to events involving Cuba domestically or internationally. They do not get such information now. Most Cubans are unaware of the mismanagement of the Cuban economy. They do not know that during the 1976–80 5-year plan, production in most key sectors fell far below planned goals. They are not aware that the Cuban economy is expected to be even less successful at producing jobs in the future. They are also ignorant of the fact that government-imposed bureaucracy, in addition to the personal inconveniences it causes, is stifling the innovation, productivity, and efficiency needed to improve Cuban economic conditions. The average Cuban does not know that the only thing that has prevented a Cuban economic collapse has been over $13 billion in Soviet aid over the last decade, or that Soviet subsidies now equal over $3 billion per year, 25 percent of the Cuban gross national product. While many Cubans know from their own experience about broken promises concerning the availability of housing, foodstuffs, and consumer goods, they are uninformed that these problems plague the great majority of the Cuban people.

Local disinformation is also a problem. For example, the Cuban Government points to an increase in the number of physicians in Cuba as one of its health care successes. In fact, though, the number of physicians as a percentage of the population has increased marginally since the revolution, and the turn around began 5 years before the Castro takeover. More importantly, infant mortality—a function of illiteracy, poor nutrition, and a rising birth rate—has increased since Castro's revolution.

The Cuban people are also deliberately kept ignorant of the Cuban Government's foreign adventures. Cuban soldiers who have died in Africa have been buried there, and those who have been wounded have been treated in Eastern Europe as part of a concerted effort to hide the truth from the people of Cuba. Closer to home, the Castro regime has armed, trained, and supported guerrillas from Colombia to Nicaragua. Yet, the Cuban people are unaware of their country's deep involvement and commitment of resources to international subversion, or the diplomatic setbacks these policies have caused.

I believe that the people of Cuba need to know the actual outcome of Castro's programs. Radio Marti will accomplish this. Radio Marti will supply the Cuban people with information they cannot get through the government-censored news media. It will encourage the Cubans to draw their own conclusions.

This new station gets its name from José Marti, the leading figure in the Cuban independence movement. He is Cuba's greatest hero and a man held in high regard throughout the Caribbean. By adopting the name "Marti," we have set a high performance standard for ourselves for truthfulness and integrity. I am sure we can meet this standard.

Some may have heard about threatened radio interference from Cuba in retaliation for Radio Marti. The people of Florida, however, have lived with such interference for the past 13 years. Therefore, it is a mistake to suppose that this is related to Radio Marti. Long before Radio Marti was announced, Cuba declared its intention to create or expand 200 radio stations and to construct two half-million-watt transmitters. True, interference may affect American radio stations. However, Cuba began this aggressive radio broadcasting buildup before Radio Marti was announced. Radio Marti is not the cause of Castro's interference. Radio Marti is only an excuse for Castro to try to blackmail the United States.

I believe we have a right, as a nation, to decide our foreign policy independently, regardless of threats of a foreign dictator. We also have the right to expand international radio broadcasts in conformity with international law.

Radio Marti has broad bipartisan support. It passed the House in the 97th Congress by a 2-to-1 margin. It also has the support of President Reagan and the AFL-CIO. I urge my colleagues to renew their support for this important proposal.

● Mr. CHILES. Mr. President, on January 28, the Cuban community celebrated the birthdate of José Marti. This man, known to his countrymen as the apostle of the Cuban revolution, was a man of impeccable character. His life in exile was dedicated to working toward a free and independent Cuba, and it was the fervor that he displayed while trying to accomplish this mission that gained him the title of apostle. José Marti sought the truth for his people. His dream was to take them from under the colonial rule of the Spanish Government and deliver them into the light of democracy. He was a strong believer in democratic principles, in the dignity of man, and he fell in battle in defense of the principles in which he believed. He

was a noble man; he died for a very noble cause.

I am today joining in the introduction of legislation to establish Radio Marti, for like the man it is named after, it also seeks the truth for the Cuban people.

Today, the Cuban people continue to live in the dark. The Castro regime would have it no other way. After 20 years, its empty promises are all too evident in the empty cupboards of Cuban households. The Castro regime would be hard-pressed to explain to its people why they must continue to suffer shortages while their Government commits troops into Angola, advisers into Yemen and Ethiopia, and sends arms to Nicaragua. But explanations are necessary, for the Cuban people have a right to know. Opponents of this measure contend that it is nothing more than a hard-line propaganda ploy that would only entice the Cuban Government to retaliate by jamming our own radio stations. I would not sponsor and support this measure if it was a mere propaganda ploy. Radio Marti, like its counterparts, Radio Free Europe and Radio Liberty, is to serve as an unbiased and reliable news and entertainment source. It will provide the Cuban people with an alternative to the controlled information they receive, in the same way Radio Free Europe and Radio Liberty provide alternative news sources to the people of Eastern Europe and the Soviet Union. If providing for the Cuban people an alternative news source is hard line, then so be it.

Fear of retaliation by the Castro regime should not dictate our foreign policy. I do not need to remind this distinguished body that Cuba's own foreign policy is being exported throughout the world in the form of arms shipments, insurgent troops, and the providing of safe harbor to drug shipments being transported to the United States. Cuba also maintains a radio station in Grenada which broadcasts to the Caribbean, and has interfered with Florida radio stations long before any mention of Radio Marti.

Mr. President, I hope that the Senate will act to pass this needed legislation. We owe the truth to the Cuban people, and we should not forgo this opportunity to provide some measure of light to that troubled and oppressed land.●

By Mr. MOYNIHAN (for himself, Mr. BIDEN, Mr. HEINZ, Mr. KENNEDY, Mr. INOUYE, Mr. PELL, Mr. BRADLEY, and Mr. METZENBAUM):

S. 604. A bill to protect law enforcement officers; to the Committee on the Judiciary.

LAW ENFORCEMENT OFFICERS PROTECTION ACT OF 1983

● Mr. MOYNIHAN. Mr. President, I rise today to introduce legislation, on behalf of myself and seven distinguished colleagues, that is designed to address one of the most serious and potentially dangerous problems facing our Nation's 528,000 law enforcement officers—the proliferation of so-called cop-killer bullets. It would do so by limiting the availability and use of armor-piercing handgun ammunition that can penetrate the bullet-resistant vests worn by police.

There is an urgent need for this legislation. The development of bullet-proof vests in the mid-1970's provided law enforcement officers with a significantly greater degree of protection than had previously been the case. Indeed, these vests have so far been credited with saving the lives of some 400 law enforcement officers. FBI statistics indicate that the number of law enforcement officers killed in the line of duty declined 31 percent between 1974—when such vests were first made available to police departments—and 1981. However, these vests are rendered virtually useless by a new type of bullet that recently has entered the market in large numbers.

These high velocity, small caliber, pointed bullets, made of alloy or steel jacketed lead, have no legitimate commercial use. Those companies presently manufacturing armor-piercing bullets claim they are intended for police use, yet not one police department in the country will employ them—not only because of their awesome penetration capacity, but also because they pose greater ricochet hazards than more conventional ammunition. James P. Damos, former president of the International Association of Chiefs of Police, has said: "We can find no legitimate use for such (armor-piercing) ammunition, either in or out of law enforcement."

As a result, law enforcement agencies are leading the call for a ban on this type of bullet. These groups include the International Association of Chiefs of Police, the Fraternal Order of Police, the International Brotherhood of Police Officers, and the International Union of Police Officers. In addition, U.S. Associate Attorney General Rudolph W. Giuliani recently urged the adoption of legislation banning these bullets in a letter to Congressman MARIO BIAGGI, sponsor of identical legislation in the House, saying: "I continue to believe that any further delay (in adopting such legislation) is a tragic mistake."

The bill we are introducing would require the Department of the Treasury to determine which handgun bullets, when fired from a handgun with a barrel 5 inches or less in length, are capable of penetrating the equivalent of 18 layers of Kevlar, which is the standard composition of most police vests. The Department would then publish its findings in the Federal Register, and 60 days after publication those bullets identified would be banned from further manufacture, import, sale, or use—except when authorized by the Secretary of the Treasury for law enforcement or military purposes.

A licensed importer, manufacturer, or dealer who violated this act would be subject to a fine of not more than $10,000, imprisonment for not more than 10 years, and revocation of their Federal license. In addition, a person using or carrying an illegal bullet during the commission of a Federal felony would be subject to a mandatory sentence of not less than 1 year nor more than 10 years for the first offense, and not less than 2 years nor more than 25 years for the second or any subsequent offense.

During the past year, seven States—Alabama, California, Illinois, Kansas, Minnesota, Oklahoma, and Rhode Island—have enacted their own laws banning such bullets. A number of localities including Alexandria, Va., Brookhaven, N.Y., Broward County, Fla., Dade County, Fla., and Louisville, Ky., have taken similar action.

Although encouraged by these actions we believe the Federal Government needs to assist State and local jurisdictions with their efforts to counter the widespread distribution and use of these lethal bullets. While the primary responsibility for law enforcement should rest with the States and localities, the Federal Government does have a role to play. The most effective means for keeping the armor-piercing bullets out of the hands of criminals is to establish a uniform national law for the manufacture, importation, sale, and use of the bullets. This is the purpose of our legislation.

Let us also be clear about what our bill is not designed to do. Our legislation in no way attempts to limit the availability of armor-piercing bullets for sporting purposes, even though most States prohibit hunters from using such bullets as they tend to cause prolonged suffering to animals rather than instantaneous death. Only bullets capable of penetrating body armor when fired from a handgun are to be banned; rifle ammunition would not be covered.

Moreover, in introducing this legislation, we are not attempting to limit the availability of conventional ammunition to law-abiding citizens for self-defense and sporting purposes. The legislation has been drafted in such a manner as to apply only to a narrow class of bullets capable of penetrating bullet-resistant armor when fired from

a handgun. Based on currently available test data, including a Federal Bureau of Investigation report issued last year, the bill would ban only eight bullets. Other commonly used types of conventional handgun ammunition, such as the .357 magnum, the 9mm, the high velocity .38 special, the high-velocity .22 long rifle, and the .44 magnum, are incapable of piercing standard body armor and thus would continue to be available.

Our legislation, then, is at its core a law enforcement officers protection bill. It is well known that law enforcement is a particularly dangerous and far too often unappreciated occupation. We have entrusted law enforcement officers with the tremendous responsibility of protecting us from criminal acts—a responsibility that often places them in life-threatening situations. In return, it is our duty to protect the approximately 250,000 officers who regularly wear bulletproof vests with the maximum possible protection from the dangers to which they are exposed daily. We owe them nothing less.

Mr. President, I urge my colleagues, on behalf of the men and women of the law enforcement community, to join me in supporting this eminently sensible legislation. I ask that my bill and an informative Congressional Research Service brief on the subject of armor-piercing bullets be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 604

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Law Enforcement Officers Protection Act of 1983."

SEC. 2. (a) Whoever, being a licensed importer, manufacturer, or dealer under chapter 44 of title 18, United States Code, imports, manufactures, or sells a restricted handgun bullet, except as specifically authorized by the Secretary of the Treasury for purposes of public safety or national security, shall be fined not more than $10,000 or imprisoned not more than ten years, or both, and the license of such person shall be subject to revocation under such chapter.

(b) Whoever—

(1) uses a restricted handgun bullet to commit any felony for which he may be prosecuted in a court of the United States; or

(2) carries a restricted handgun bullet unlawfully during the commission of any felony for which he may be prosecuted in a court of the United States;

shall, in addition to the punishment provided for the commission of such felony, be sentenced to a term of imprisonment for not less than one year nor more than ten years. In the case of his second or subsequent conviction under this subsection, such person shall be sentenced to a term of imprisonment for not less than two nor more than twenty-five years. Notwithstanding any other provision of law, the court shall not suspend the sentence in the case of a conviction of such person under this subsection or give him a probationary sentence, nor shall the term of imprisonment imposed under this subsection run concurrently with any term of imprisonment imposed for the commission of such felony.

SEC. 3. (a) The Secretary of the Treasury may prescribe such regulations as may be necessary to carry out this Act, including regulations requiring appropriate persons to provide samples of bullets for testing under this Act.

(b) Any regulation identifying a bullet as a restricted handgun bullet shall take effect sixty days after the date on which such regulation is promulgated in accordance with applicable law.

SEC. 4. As used in this Act, the term—

(1) "body armor" means a commercially available, soft, lightweight material with penetration resistance equal to or greater than that of eighteen layers of Kevlar;

(2) "handgun" means a firearm originally designed to be fired by the use of a single hand; and

(3) "restricted handgun bullet" means a bullet that, as determined by the Secretary of the Treasury, when fired from a handgun with a barrel five inches or less in length, is capable of penetrating body armor.

[The Library of Congress Congressional Research Service, Washington, D.C.]

BULLET THREATS TO PROTECTIVE BODY ARMOR

INTRODUCTION AND SUMMARY

Introduction

Since about 1975, law enforcement officers have been using protective body armor of the "soft" or "lightweight" variety to an increasing extent. This type of body armor, unlike the heavy flak jackets worn by the military and by special police units on dangerous tactical assignments, is designed to be lightweight and soft enough to be worn comfortably under law enforcement officers' uniforms or under plain clothes officers' outer garments.

This type of soft or lightweight body armor has been developed to the extent that it quite effectively "defeats" (stops the penetration of) many types of handgun bullets and some rifle bullets. It is the purpose of this report to analyze the characteristics of bullets which are most likely to defeat soft, lightweight body armor. The following section discusses various types of bullets and the purposes for which bullets are designed. The third section discusses recent law enforcement officer fatalities and the related use of soft body armor. The fourth section discusses recent developments in, and characteristics of, soft body armor. The last section presents a brief analysis of bullet characteristics, particularly those that can defeat currently available soft body armor.

Summary

Existing, commercially available soft, lightweight body armor apparently can effectively stop most of the handgun bullets which pose a threat to law enforcement officers today. However, there is a class of handgun and rifle bullets—often called armor- and metal-piercing—that can penetrate such armor. These types of bullets are: generally constructed of steel-jacketed lead or hard metal alloys; often pointed in shape rather than being flat, rounded, or hollow-pointed; and generally high velocity. Smaller handgun and rifle bullets (for example, .22 caliber) with the above characteristics are generally more effective in penetrating soft body armor than larger bullets (for example, .45 caliber) with the same characteristics.

BULLETS

Types

There are many ways to classify the various types of bullets that have been or are in use.[1] For purposes of this analysis, bullets will be discussed according to the following characteristics:

For use mainly in handguns, rifles, or machine guns, or in more than one type of weapon;

Velocity (low, for example, 730 feet per second, to high, for example, 1800 feet per second);

Caliber (small, for example, .22 caliber, to large, for example, .45 caliber);

"Hardness" (soft nosed lead bullet, or partially jacketed, to full metal jacketed (with copper or steel) to hard metal alloy bullet); and

Shape (round or hollow point to pointed nose).

Sometimes bullets are classified according to either their "stopping power" their ability to knock down or disable a human being—or their "armor- or metal-piercing" ability. These two types of characteristics, however, may be somewhat mutually exclusive. For example, one bullet designed for high "stopping power" is the .357 caliber magnum hollow point bullet. Upon impact, this bullet expands (because of its hollow point) and converts a large percentage of its (high) velocity to kinetic energy within the wounded body—thus knocking down, stopping, or disabling the person. This type of bullet, however, may be effectively stopped by soft body armor without body penetration and hence without wounding, except for "blunt trauma".[2] On the other hand, an armor-piercing bullet which will penetrate soft body armor may, because it is hard and retains its shape, pass through a body with relatively little damage if it does not hit a bone, other hard substance, or vital organ. Obviously, bullet wounding capabilities are not completely predictable because of the exceedingly complex structure of the human body, and even the relatively less devastating bullets can and often do kill. In fact, more law enforcement officers were killed with .38 caliber weapons in 1976 through 1980[3] than with any other weapon, mainly because these weapons are in more common use than other, more devastating bullets like the various magnum and armor-piercing bullets.

Purposes

It can be seen from the above discussion that many, if not most, bullet characteristics derive from the purpose or purposes which the ammunition designers had in mind. Thus, expanding bullets, particularly hollow point bullets, were designed for the purpose of more effectively transmitting kinetic energy to the wounded body than do ordinary bullets. Protective body armor, including the soft or lightweight variety, has been and is being designed to defeat many types of bullets, including many of the relatively more devastating (high velocity, hollow point) bullets. However, certain types of high velocity bullets made entirely of hard metal alloys, or which are fully cov-

Footnotes at end of article.

ered with steel jackets, can defeat the currently available soft body armor. Thus, certain bullets of the armor- or metal-piercing variety, whether or not designated as such by bullet manufacturers, pose a threat to existing body armor which can effectively defeat most "ordinary" bullet threats.

LAW ENFORCEMENT OFFICER FATALITIES

Current statistics

A number of law enforcement officers are killed and wounded each year by handguns, rifles, shotguns, and other weapons. Recent statistics from the Federal Bureau of Investigation (FBI) indicate that this number, while still large, has decreased rather significantly from 1974 and 1975 to 1978. The following table shows statistics for law enforcement officers killed by firearms and other weapons for this period:

LAW ENFORCEMENT OFFICERS KILLED, BY TYPE OF WEAPON

	1971	1972	1973	1974	1975	1976	1977	1978	1979	1980	Total
Weapon used:											
Handgun	97	77	93	95	93	66	59	67	76	69	792
Rifle	16	16	21	12	21	12	13	13	18	13	155
Shotgun	11	18	13	21	13	16	11	11	6	13	133
Total Firearms	124	111	127	128	127	94	83	91	100	95	1,080
Knife	2	3	2	1		5			4	3	20
Bomb		1				4			1		6
Personal Weapons	2						1	1			4
Other (clubs, etc.)	1	1	5	3	2	8	9	1	1	6	37
Grand Total	129	116	134	132	129	111	93	93	106	104	1,147

Source: Federal Bureau of Investigation. Law enforcement officers killed 1980. Washington, U.S. Department of Justice, 1980, p. 11.

There reportedly is a consensus that at least 400 U.S law enforcement officers have been protected from death or injury through the use of bulletproof vests from 1975 to the present.[4] Although such a consensus cannot be confirmed with existing data, it is interesting that the approximately 20 percent decrease in firearm-related deaths indicated in the above table since 1974 could be accounted for partially by increased use of soft body armor by law enforcement officers.

The following table shows the size of bullets and types of firearms which caused the deaths of the 95 law enforcement officers in 1980. The handgun bullets shown in that table are all of a class which can be defeated by existing soft body armor unless they are of the hard metal alloy or steel-jacketed, armor-piercing variety. Soft body armor cannot defeat high velocity, metal jacketed rifle bullets either, some of which may be represented in the "rifle" column of the table.

Officer fatalities while wearing armor

In 1980, the first year such data were collected uniformly by the FBI, 14 law enforcement officers in the United States were killed in the line of duty while wearing protective vests.[5] Seven of the officers were shot in the head and five received fatal gunshot wounds to areas of the upper torso not protected by the vests. One officer was struck by a vehicle. The remaining officer was shot in the back with a bullet that penetrated his vest, but this was a .30-06 caliber rifle bullet fired from about 50 yards away. Soft body armor is not designed to prevent the penetration of most rifle bullets, such as .30-06 caliber bullets.[6]

LAW ENFORCEMENT OFFICERS KILLED, 1980—TYPE AND SIZE OF FIREARM

Size of weapon	Type of weapon			
	Handgun	Officer's own weapon	Rifle	Shotgun

BODY ARMOR

Recent developments

Since at least the early 1970s, there has been considerable interest among law enforcement support agencies in developing effective soft body armor that would be comfortable and unobtrusive enough to be worn continuously by law enforcement officers while on duty. Organizations like the National Institute of Law Enforcement and Criminal Justice (NILECJ) of the Law Enforcement Assistance Administration (LEAA) of the U.S. Department of Justice, and the International Association of Chiefs of Police, have sponsored several studies of soft body armor.[7] Research programs on soft body armor and weapons threats have been administered and carried out by the Law Enforcement Standards Laboratory of the National Bureau of Standards, Department of Commerce; Edgewood Arsenal, Aberdeen Proving Grounds, Department of the Army; the FBI Quantico Test Base; and several private weapons testing laboratories. About 25 to 30 manufacturers of soft body armor are now producing units commercially for sale to an increasing number of U.S. law enforcement organizations.

Commercially available soft body armor

Most, if not all, soft body armor commercially available today is made of differing numbers of layers of Kevlar, a synthetic (aramid) fiber produced by the Du Pont Company. In addition to the number of layers of Kevlar used, the weaving and other processes used in the production of the final protective vest affects the strength of the product.

In the early 1970s, protective body armor generally was classified as to whether it was made of 7, 12, 16, 24, or other numbers of layers of Kevlar. Currently, manufacturers and police departments often designate certain threats (types of bullets) that the vests are to protect against, regardless of the numbers of layers of Kevlar involved.

In 1982 it is estimated that approximately half (about 250,000) of the Nation's law enforcement officers own or have access to soft body armor.[8]

The state of the art of protective body armor, which today is largely based upon the use of Kevlar, involves a trade off between the thickness of the protective vest versus the types of bullets which the vest can defeat. Certain commercially available bullets, like .357 caliber magnum hard metal alloy bullets, and some foreign-made nine millimeter steel jacketed bullets, can defeat commercially available soft body armor.

Protection available

A side-by-side comparison of the handgun weapons used to fatally injure law enforcement officers in 1980 (shown above and repeated for convenience here) and handgun bullets required to be defeated by soft body armor in the equipment purchase specifications of a number of U.S. cities indicates that currently available soft body armor apparently can protect against the large majority of bullet threats facing law enforcement officers today. While most commonly used bullets apparently can be defeated by existing soft body armor, there is a class of bullets which can defeat it. This subject is discussed in the following paragraphs.

Possible remaining threats

Bullet Characteristics

Although a number of bullets can be defeated by currently available soft body armor, a number of threats remain. Most, if not all, types of metal- or armor-piercing bullets will apparently defeat existing soft body armor, whether these bullets are hard, metal alloy bullets, or lead bullets which are steel jacketed. Other types of non-armor- or metal-piercing bullets which might defeat soft body armor are bullets which are small caliber (for example, .22 caliber) or high velocity (particularly magnum) bullets. Bullets which combine these latter two characteristics (small caliber plus high velocity) are more likely to defeat some types of soft body armor (depending upon its thickness

and construction) even if these bullets are not of hard metal alloy or steel jacketed construction. Thus, there currently exist several specific bullets, and a class of bullets having certain characteristics, that can, or could be designed to, defeat currently available soft body armor.

Blunt Trauma

Even if bullets do not penetrate soft body armor, lethal wounds could be caused by "blunt trauma." This type of wounding effect can be described as being similar to being hit on the body by a hard swung baseball bat. Because this phenomenon currently does not appear to be a major wounding cause, it is not discussed further here. However, it is conceivable that, were higher powered bullets used or developed to defeat soft body armor, blunt trauma effects might be a major cause of concern to body armor researchers, developers, and manufacturers, as well as medical practitioners.

BODY-ARMOR DEFEATING BULLETS: THREAT CHARACTERISTICS

This section describes some bullet characteristics that are important to a consideration of what types of bullets can defeat, or can be designed to defeat, existing soft body armor.

Velocity

Handgun bullets typically range in muzzle velocities from about 730 feet per second (fps) (low velocity) to over 1,800 fps (high velocity), depending upon the powder charge of the cartridge and the length of the handgun barrel. Eleven hundred fps (roughly the speed of sound in air) may be a convenient point to differentiate between low and high velocity bullets, although it is unlikely that a consensus could be obtained that significantly different wounding effects occur above and below this velocity for a given type of bullet.

It is clear, however, that high velocity bullets are more likely to defeat soft body armor than low velocity bullets, all other characteristics remaining constant.

Caliber and weight

Caliber measures the diameter of bullets, that is, a .45 caliber bullet has a diameter of .45 inch. Caliber is thus a measure of size. A .45 caliber bullet is considerably larger than a .22 caliber bullet. The most common police bullet, and the most common bullet causing police fatalities, is the .38 caliber, intermediate in size between the .22 caliber and the .45 caliber.

Weights of bullets are measured in grains. The larger the caliber, the more a bullet weight, given a constant shape.

The smaller caliber bullets, for example, the .22 caliber, are more likely to penetrate the commercially available body armor than larger caliber bullets, other bullet characteristics remaining constant.

Shape and hardness

Bullets are produced in several shapes—including round or ball nosed, flat-nosed, pointed, and hollow pointed. Round, flat-nosed (some of which are called wadcutters or semi-wadcutters), and hollow point bullets are often constructed as lead or semi-jacketed bullets which expand upon contract. The hollow point bullets are generally the most effective of these "expanding" bullets. Pointed bullets generally are constructed of lead with metal jackets, which are usually of copper. If such bullets are jacketed with steel, they generally have armor- or metal-piercing capabilities. Another class of bullets is constructed of hard metal alloys and are also armor- or metal-piercing bullets.

Thus, the harder and more pointed a bullet is, the more likely it is to penetrate commercially available body armor, other bullet characteristics remaining constant.

Summary of bullet threat characteristics

Given the characteristics of the most successful, currently available soft body armor, bullet threat characteristics can be summarized in the following way:

Bullet characteristics	Lowest level of threat	Highest level of threat
Velocity	Low velocity	High velocity.
Caliber, weight	Large caliber, heavy	Small caliber, light.
Shape	Round or flat nose, hollow point.	Pointed.
"Hardness"	Lead, or copper semi-jacketed lead.	Full steel jacketed lead, or hard metal alloy bullet.

Thus, the bullet type with the highest probability of penetrating soft body armor, and with a proven capability of penetrating many layers of existing soft body armor, is a high velocity, small caliber, pointed, steel jacketed lead or metal alloy bullet. Such bullets may be handgun bullets, rifle bullets, or bullets which can be used in either handguns or rifles.

Possible ramifications of "perfect" body armor

Commercially available soft body armor is not perfect, that is, it can be defeated by certain bullets of the hard metal alloy or steel-jacketed armor- or metal-piercing types. Assuming that "perfect" body armor could be developed to meet current threat conditions, there is at least one positive and one negative ramification of such a development:

Possible Positive Ramification

Decreased wounding and death of law enforcement officers under current conditions, that is, continued use by criminals of existing types of bullets which, to a considerable extent, can be defeated by existing soft, light-weight body armor.

Possible Negative Ramification

An "arms and ammunition race" by the criminal segment of society for even more powerful bullets and other weapons to defeat existing armor, and increased use by criminals of such armor. This possible negative ramification could be precluded to some extent by controlling, by law and enforcement, the manufacture, distribution, sale, possession, and international trade of all bullets of the armor- or metal-piercing type and, perhaps body armor.

FOOTNOTES

[1] There may be as many as 10,000 different bullets that have been manufactured since the development of the bullet cartridge around the time of the U.S. Civil War.

[2] Blunt trauma is injury caused by bullets which do not penetrate armor. It is injury caused by the force of the blow itself, as when a person is hit in the chest by a hard swung baseball bat.

By Mr. DANFORTH (for himself, Mr. PELL, Mr. BOSCHWITZ, and Mr. DOLE):

S. 605. A bill to amend title 11, United States Code; to the Committee on the Judiciary.

CLOSING BANKRUPTCY LOOPHOLES USED BY DRUNK DRIVERS

● Mr. DANFORTH. Mr. President, Tuesday, the U.S. Supreme Court ruled that a driver's refusal to submit to a blood alcohol test can be introduced as evidence against him at a trial on drunk driving charges. This decision gives local prosecutors yet another weapon in the fight against drunk driving, which, in the words of Justice Sandra Day O'Connor, "occurs with tragic frequency on our Nation's highways."

I commend the Court's action. Tuesday's decision, South Dakota against Neville, recognizes that the decision to drive or not to drive is one of choice, and that our judicial processes should work in ways that hold individuals responsible for their free actions.

Mr. President, I hope Congress will use the occasion of this landmark decision to put its own house in order. Today there exists an unconscionable loophole in the bankruptcy statute which makes it possible for drunk drivers who have injured, killed, or caused property damage to others to escape civil liability for their actions by having their judgment debt discharged in Federal bankruptcy court. This loophole affords opportunities for scandalous abuse of judicial processes.

Imagine the heartbreak of a parent who has been notified that his or her child has been killed or permanently disabled by some fellow weaving down the road, intoxicated and totally oblivious to the danger he poses to others. Then imagine these distraught parents losing whatever compensation they have recovered for their loss because the drunk driver has turned to the Federal bankruptcy court system and has had his liability discharged. Or, imagine the hardship on children who lose a father, a mother, or perhaps both to a drunk driver who is then relieved of his debt. Unfortunately, these are not simply hypothetical possibilities. The bankruptcy process

has already been employed by drunk drivers to avoid financial responsibility for their actions, and to deny victims and their families the right to compensation for loss and suffering.

Consider, for example, the case of a Jefferson County, Mo., man who, according to the St. Louis Globe-Democrat, was ordered to pay $600,000 to the families of three teenagers, two of whom were killed and one of whom was paralyzed for life. The offender, who had been convicted of drunk driving three times in the year preceding the accident, crashed head on into the teenagers' car. He was convicted of manslaughter, but received probation rather than a jail sentence. Here, a repeat offender who devastated three Missouri families, sought to be relieved of civil responsibility as well. As soon as the families were awarded their judgment, the guilty driver marched across the street to the Federal courthouse and asked the bankruptcy court to absolve him of financial responsibility for his deeds.

How could the possibility for such a miscarriage of justice exist? Mr. President, under our current bankruptcy state, drunk driving is not defined as a "willful and malicious" act, and only those liabilities which were incurred for commission of willful and malicious acts are exempt from discharge. Now those who drink too much are certainly aware that they are not in any condition to operate an automobile, and they know that by choosing to drive they are endangering other people on the road. This certainly seems "willful" to me, and the disregard for the safety of others is clearly "malicious."

Mr. President, this situation cannot be allowed to continue. Today, on behalf of myself and Senators PELL, BOSCHWITZ, and DOLE, I am reintroducing legislation I sponsored in the 97th Congress which would define the operation of a motor vehicle while legally intoxicated as a willful and malicious act for purposes of the bankruptcy statute.

All across the Nation, people are outraged over the alarming toll in death and injury wreaked by the drunk driver. Statistics show that over 25,000 people are killed and another 650,000 are injured in alcohol-related crashes each year. Americans are beginning to realize that they do not have to put up with drunkenness on the highways. Last year, I introduced a comprehensive legislative package to address the drunk driving problem. It consisted of three elements. The first two elements provided for a Federal incentive grant and driver register program intended to assist State legislators and law enforcement officials in waging a full-scale attack on drunk driving. These two elements are now law. The third element was this proposal, which is strictly an effort to prevent abuse of the Federal bankruptcy system.

Mr. President, I have recently received two letters in support of this provision. One is from George Wright, a Federal bankruptcy judge in Alabama. He enclosed a copy of an opinion which he says he was forced to render due to the present state of the law. Another is from Ray A. Gerritzen, an attorney in St. Louis, Mo. He is presently representing clients whose son was killed by a drunk driver, and the driver is now involved in bankruptcy proceedings. Their letters and the court's opinion vividly illustrate the need for this legislation. I ask unanimous consent that they be printed, along with the bill, in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. BANKRUPTCY COURT,
NORTHERN DISTRICT OF ALABAMA,
Tuscaloosa, Ala., November 22, 1982.

Re Senate 2159, amending section 523 of the Bankruptcy Code.

Hon. JOHN C. DANFORTH,
U.S. Senate,
Washington, D.C.

DEAR SENATOR DANFORTH: Enclosed herewith is a copy of an opinion which I have *reluctantly* rendered. I write this letter in support of your amendment. It is hoped that your amendment will be successful in passage.

Kindest personal regards, I remain

Very truly yours,

GEORGE S. WRIGHT,
Bankruptcy Judge.

Enclosure.

United States Bankruptcy Court for the Northern District of Alabama Western Division

(AP No. 82-0573, BK No. 82-0779)

IN RE: RODNEY SILAS, DEBTOR

VIRGINIA LEE & TIMOTHY LEE, TIMOTHY PARRISH AND ST. FARM MUTUAL AUTOMOBILE INSURANCE COMPANY, PLAINTIFF

v.

RODNEY SILAS, DEFENDANT

ORDER OF THE COURT

The plaintiff, Timothy Lee, filed an objection to the discharge of the debtor under § 523(a)(6).

I. FINDINGS OF FACT

1. In the late evening on New Year's Day 1981, after too much New Year's celebration by both drivers—the defendant-debtor, Rodney Silas, was involved in a head-on automobile accident with the plaintiff, Timothy Lee, on a two-lane highway on the Warrior River Road in western Jefferson County, Alabama.

2. Deputy Sheriff, Mike Williams, Jefferson County, Alabama, investigated the accident and talked to the debtor, Silas, at the scene of the accident. Silas had a strong odor of alcoholic beverages, was unsteady on his feet, and his speech was slurred so that in the Deputy's opinion, Silas was intoxicated. Silas was arrested for driving under the influence of intoxicants (DUI). Deputy Williams located the point of impact approximately 2½ feet in plaintiff Lee's lane of travel. On cross examination, Deputy Williams testified that no excessive speed was indicated.

3. The plaintiff, Timothy Lee, testified that he had been drinking beer and that he had left Patrick's, which was a neighborhood bar and was going home; that he could not recall seeing the other vehicle and that he was unable to recall the events preceding the impact. As a result of the accident, he was knocked unconscious and regained consciousness a day and one-half later in the hospital. He received a broken nose, broken finger, general contusions and abrasions.

4. Rodney Silas admitted that he had been at a party drinking beer and had brought one case of beer to the party consisting of 6 or 7 people; that the beer was consumed and that he was going back to the store to get another one-half case of beer when the wreck occurred. Silas admitted that he did not know exactly what happened but that he did not think that he was on the wrong side of the road. He pled guilty to driving under the influence of intoxicants (DUI) and the court so finds that he was intoxicated at the time of the accident.

5. However, the court finds that wherein plaintiff Lee was unable to remember the events, there is no evidence that Silas' actions were "deliberate or intentional."

II. CONCLUSIONS OF LAW

A. The Bankruptcy Act of 1898

Section 17(a)(8) of the Bankruptcy Act of 1898 excepted from discharge any debt resulting from a willful and malicious injury as follows: "(8) are liabilities for willful and malicious injuries to the person or property of another other than conversion as excepted under clause (2) of this subdivision."

In the leading case of *Tinker v Colwell,* 193 U.S. 473, 24 S. Ct. 505, 48 L. Ed 754 (1904), the Supreme Court, in construing the "willful and malicious" language of § 17(a)(8) created a "reckless disregard" standard which excepted from discharge injuries resulting from the conscious and reckless disregard of the rights of others even where there was no deliberate intent to injure. Many courts utilizing the reckless disregard standard of *Tinker v Colwell, supra,* held that "willful and malicious" under § 17(a)(8) encompassed debts resulting from injuries caused by the defendant-debtor's drunken driving and that such debts were nondischargeable in bankruptcy. *Den Haerynck v Thompson,* 228 F. 2d 72 (10th Cir. 1955); *Harrison v Donnelly,* 153 F. 2d 588 (8th Cir. 1946); *In re Irwin,* 2 BCD 783 (N.D. Iowa 1976). However, there was a minority line of cases that rejected this reckless disregard standard in motor vehicle cases. See NORTON *Bankruptcy Law and Practice* § 27.28 n. 11 (1981); Annot. 13 A.L.R. 2d 168 (1950) (Later Case Service 1973).

B. The Bankruptcy Code of 1978

11 USCA § 523(a) provides:

"A discharge under section 727, 1141, or 1328(b) of this title does not discharge an individual debtor from any debt . . . (6) for willful and malicious injury by the debtor to another entity or the property of another entity."

In enacting § 523(a)(6) of the Bankruptcy Code of 1978, Congress used the same "willful and malicious" language as appeared in § 17(a)(8) of the 1898 Act. Yet, the House Report to § 523(a)(6) contains the following statement:

"Paragraph (6) excepts debts for willful and malicious injury by the debtor to another person or to the property of another

person. Under this paragraph, 'willful' means deliberate or intentional. To the extent that *Tinker v Colwell, supra,* held that a lesser standard is intended, and to the extent that other cases have relied on *Tinker* to apply a 'reckless disregard' standard, they are overruled." H.R. Rep. No. 595, 95th Cong., 1st Sess. 365 (1977), reprinted in U.S. Code Cong. & AD. News [1978] 5787, 6320.

Also, the Senate Report to § 523(a)(6) contains the following statement:

"Paragraph (5) provides that debts for willful and malicious conversion or injury by the debtor to another entity or the property of another entity are nondischargeable. Under this paragraph "willful" means deliberate or intentional. To the extent that *Tinker v Colwell,* 139 U.S. 473 (1902), held that a less strict standard is intended, and to the extent that other cases have relied on *Tinker* to apply a "reckless disregard" standard, they are overruled." S. Rep. No. 989, 95th Cong., 1st Sess. 79 (1978).

The final bill, representing a compromise between the House and Senate, included the exact wording of the House version. 124 Cong. Rec. H11059 (daily ed. Sept. 28, 1978):

"The statements of the sponsors in the House [124 Cong. Rec. H11096 daily ed. Sept. 28, 1978] and the Senate [124 Cong. Rec. S17412 (daily ed. Oct 6, 1978)] were identical and referred only to the selection of the House version of the bill."

In re Bryson, 3 B.R. 593, 596, 6 BCD 199, 1 CBC 2d 1038 (Bankr. N.D. Ill. 1980). These House and Senate reports evidence a rejection of the "reckless disregard" standard enunciated in *Tinker v Colwell, supra,* "and the many cases holding various degrees of recklessness to constitute willfulness and maliciousness will no longer be controlling in construing section 523(a)(6) of the Code." 3 Collier on Bankruptcy ¶ 523.16 at 523-119 (15th ed. 1982).

There are, however, several cases that have refused to follow the 1978 Code legislative history contained in these Congressional Reports and have continued to apply the "reckless disregard" standard of *Tinker v. Colwell, supra,* in determining dischargeability under § 523(a)(6).[1] Nevertheless, the present weight of authority interpreting § 523(a)(6) concludes that injuries resulting from drunken driving are dischargeable absent proof of intentional or deliberate conduct on the part of the debtor.[2] *In re Morgan,* 22 B.R. 38 (Bankr. D. Neb. 1982); *In re Brown,* 18 B.R. 591 (Bankr. N.D. Ala. 1982); *In re Bryson, supra; In re Vaser,* 7 B.R. 116, 3 CBC 2d 211 (Bankr. W.D. Wis. 1980); *In re Rambo,* 5 BCD 800 (Bankr. M.D. Tenn. 1979).

In a factually similar case, the Bankruptcy Court for the Northern District of Illinois, Eastern Division, considered the dischargeability of a judgment debt arising from injuries received when the debtor, while intoxicated, crashed into the plaintiff's car. The court determined:

"Here the defendant showed reckless disregard. He was drunk when he ran into the plaintiff. But there is no evidence that the defendant intended to injure anyone. His conduct cannot be described as 'willful and malicious' under § 523(a)(6). The court concludes that Bryson's debt to the Williamses is dischargeable." *In re Bryson, supra,* at 596.

[1] Footnotes at end of court case.

III. APPLICATION OF LAW TO FACTS

After having heard testimony and arguments of counsel, this court is of the considered opinion that the plaintiff has failed to carry its burden (pursuant to Bankruptcy Rule 407) in showing that the defendant-debtor intentionally or deliberately injured anyone,[3] so that such debt is due to be discharged.

This opinion is the findings of fact and conclusions of law pursuant to Rule 752 of the Rules of Bankruptcy Procedure. A separate judgment will be entered in accordance with this opinion.

Done and ordered this 22d day of November, 1982.

GEORGE S. WRIGHT,
Bankruptcy Judge.

FOOTNOTES

[1] *In re Askew,* 22 B.R. 641 (Bankr. M.D. Ga. 1982); *In re Rines,* 18 B.R. 666, 8 BCD 1205 (Bankr. M.D. Ga. 1982); *In re Auvernshine,* 9 B.R. 772, 7 BCD 511, 3 CBC 2d 946 (Bankr. W.D. Mich. 1981). These cases hold that a few sentences appearing in the legislative history are insufficient to overrule *Tinker v Colwell* and its progeny particularly where substantially identical language appears in § 17(a)(8) of the 1898 Act and § 523(a)(6) of the Code. Additionally, various problems of statutory construction arise when a judicially interpreted phrase ("willful and malicious") is re-enacted using identical language. See 73 Am. Jur. *Statutes* §§ 150-151, 322-324 (1974); NORTON *Bankruptcy Law and Practice* § 27.28 n. 7 (1981).

[2] Senator John C. Danforth (Missouri) has introduced a bill (S2159) to correct the majority rule by amending § 523 of the Code to except from discharge liabilities arising from drunken driving.

"I was amazed to learn that, although the Federal bankruptcy statute does not allow discharge of debts arising from willful and malicious acts, some Federal judges have said that drunk driving is not, in itself, 'willful and malicious.' "

The proposed amendment provides:

"(e) Any injury resulting in a judgment based upon liability of the debtor where, in connection with such liability such debtor was found to have operated a motor vehicle while legally intoxicated shall be deemed to be a willful and malicious injury for purposes of subsection (a)(6) of this section."

128 Cong. Rec. S1397 (daily ed. March 2, 1982). Although this court is philosophically aligned with such an amendment, it is unfortunately not the present state of the law and it is not the province of this court to legislate but to interpret the intent of Congress as unequivocally enunciated by the legislative history of both the House and Senate.

[3] The court also notes that the plaintiff would have failed to carry its burden even under the relaxed "reckless disregard" standard.

GERRITZEN & GERRITZEN,
St. Louis, Mo., January 20, 1983.

Hon. JOHN C. DANFORTH,
U.S. Senate,
Washington, D.C.

DEAR SENATOR DANFORTH: In view of the keen interest your office has shown in the tragedy of drunk drivers killing people and having their responsibility waived out by United States bankruptcy courts, you should be advised that another such situation has arisen in the case of Carl Leslie Turner.

Carl Leslie Turner was operating an automobile on Sunday, March 1, 1981 in St. Louis County when according to witnesses he violated a red electric traffic signal at approximately 90 miles an hour colliding with an automobile in which our client's son was killed. In hope that you can use it in the United States Senate, I enclose herewith copy of one of the photographs of the vehicle in which our client's son was killed. We have filed a suit for damages against Mr. Turner which is now pending in Jefferson County, Missouri. However, Mr. Turner has filed a motion to stay proceedings because of a petition he has filed in the United States Bankruptcy Court for the Eastern District of Missouri. He had no liability insurance at the time. He plead guilty to manslaughter and was sentenced by the circuit judge in Jefferson County. It is now understood that he has definitely already served time in the Missouri State Penitentiary or some branch thereof. Most importantly, after having plead guilty to manslaughter he is attempting to discharge this civil debt in the United States Bankruptcy Court. I am filing a complaint to except the debt from dischargeability. However, the problem still exists that there are several United States Bankruptcy Court decisions discharging debts of drunken drivers who have killed people or horribly injured them. I hope you are successful in putting this matter to a screeching halt.

In view of the outstanding leadership already shown by the President on many issues and his acute concern for what can be done about the drunk driver, I am sending a copy of this letter to the President of the United States. I keenly await your reply.

Yours very truly,

RAY A. GERRITZEN.

S. 605

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 523 of title 11, United States Code, is amended by adding at the end thereof the following:

"(e) Any injury resulting in a judgment based upon liability of the debtor where, in connection with such liability such debtor was found to have operated a motor vehicle while legally intoxicated shall be deemed to be a willful and malicious injury for purposes of subsection (a)(6) of this section.".●

By Mr. STAFFORD (for himself and Mr. PELL):

S.J. Res. 41. Joint resolution to authorize and request the President to designate the week of April 10, 1983, through April 16, 1983, as "National Education For Business Week;" to the Committee on the Judiciary.

NATIONAL EDUCATION FOR BUSINESS WEEK

Mr. STAFFORD. Mr. President, today I am pleased to join my distinguished colleague, Senator PELL, in introducing a joint resolution to declare the week of April 10-16, 1983, "National Education for Business Week."

Throughout this Nation's history, the contributions of men and women in business support occupations have been vital in keeping our Nation's businesses running smoothly. Today, the rapid scientific and technological advancement of our society and the changing nature of our economy continue to create challenges for these members of the business community. An extremely important part in meeting these challenges is the commitment of the business education community to prepare people for entry into the work world of tomorrow.

According to a recent Labor Department survey, the vast majority of the jobs opening up between now and 1985 will require some vocational and technical training beyond high school. Secretaries, bookkeepers, stenographers,

laboratory technicians, specialists in marketing and merchandizing—the people who compose the backbone of the American business community—will rely more than ever before on the strength of business education to adapt to the rapidly changing conditions of business technology.

Mr. President, recognition of the contributions of business educators will focus attention on the needs of workers whose practical training and skills are basic to the future of business. Students, teachers, parents, business people and Government officials will be reminded that the demand for trained workers in business continues to be high. Attention will be drawn to the contributions that business schools and colleges make to the community. Sponsorship of contests for business students, organization of open houses for business representatives, and the strengthening of the relationship between business schools and other academic institutions are among the many activities that "National Education for Business Week" will promote.

Mr. President, in view of the economic challenges facing this country and of the vital contribution that business educators make to the well-being of business, commercial, and governmental life in America, it is particularly appropriate that the contributions of business educators be recognized. It is in this light that my distinguished colleague, Senator PELL, and I urge all Members to lend support for this joint resolution.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 41

Whereas business educators play a vital role in supporting government, business, and the commercial life of the United States of America;

Whereas men and women in marketing, merchandising, and data processing occupations contribute to efficient business life, are essential in keeping our Nation's businesses running smoothly, and thus contribute to the continued prosperity of the United States;

Whereas the Nation's educators provide the training ground for the continually changing office technology and are depended upon to teach new skills and emphasize positive work values; and

Whereas it is fitting that the contributions of business educators to the well-being of business and governmental life of America be recognized, encouraged, and honored: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the week of April 10, 1983, through April 16, 1983, as "National Education for Business Week", and calling upon the people of the United States to observe the week with appropriate programs, ceremonies, and activities.

By Mr. MURKOWSKI (for himself, Mr. STEVENS, and Mr. JACKSON):

S.J. Res. 42. Joint resolution designating Alaska Statehood Day, January 3, 1984; to the Committee on the Judiciary.

ALASKA STATEHOOD DAY

● Mr. MURKOWSKI. Mr. President, I am proud to introduce today a Senate Joint Resolution with my good friend, the senior Senator from Alaska, TED STEVENS, commemorating the silver anniversary of the entry of Alaska as the 49th State of the Union. The United States bought the Territory of Alaska in 1867 from Russia as an effort to extend this Nation's presence in the Pacific Northwest. Alaska. It took Alaska almost 100 years before it finally became part of the Union.

After years of struggle, proposals, and counterproposals, the U.S. Congress voted statehood for Alaska in June 1958. President Dwight D. Eisenhower on July 7, 1958, signed the bill providing the final action needed to complete the act. Six months later on January 3, 1959, Alaska was formally brought into the Union. Alaska erupted in celebration the day the bill was signed into law. Newspaper headlines printed: "We're In!" in bold letters covering half a page, church bells rang, businesses closed for the day, and city streets were clogged with merrymakers.

Despite the economic buildup during the gold rush, Alaska was an unknown quantity as it entered the Union. In Fairbanks, where I now make my home, the site of the city's first supermarket was still covered with trees and a used car lot. Anchorage, which has a population today of 220,000, had only a few paved streets. And the wealth that lay under Alaska's North Slope would remain undiscovered for nearly a decade.

The people of the United States decided by the enactment of the Alaska Statehood Act that Alaska could be a contributing member of the Union. We, the Government and people of this country have been rewarded many times over for that decision. For an original investment of approximately $7 million, the Nation has reaped a bonanza in return. At the turn of the century, for example, one goldfield near Nome, Alaska, returned that much gold ore in less than 1 year.

The Federal Government currently collects $3 in revenue from Alaska for every $1 it spends there. From Alaska comes one-eighth of the Nation's gold; one-fifth of the Nation's oil production; and two-fifths of its harvested fish. Alaska, in addition, possesses 10 of the 16 strategic minerals needed for the Nation's security. As an example Alaska has one of the world's largest molybdenum deposits located at Quartz Hill near Ketchikan, Alaska. When developed, it will supply one of this country's strategic minerals.

I recite this list of Alaska's resources not to laud my State's wealth, but to point out that America has benefited from the inclusion of its northernmost and most western member, just as Alaska has thrived as the 49th State.

During the 1950's the issue of Alaska statehood was heatedly debated across the Nation and in Alaska. There still exist some people who contend we should not have been allowed in the Union. But the conclusion reached by the Alaska Statehood Commission that just completed its review of the State and Federal relationship, was that statehood was in the interest of the people of Alaska and to the interest of all the people of the Nation.

No Member of the U.S. Senate knows the history of the struggle for Alaska's statehood better than the senior Senator from Washington, HENRY JACKSON. It was his leadership and foresight that helped shepherd the Alaska Statehood Act throughout the U.S. Congress in 1958. I am proud to have my good friend, the senior Senator from the State of Washington, join Senator STEVENS and myself in cosponsoring this resolution.

I therefore respectfully submit that January 3, 1984, be known as Alaska Statehood Day in honor of the silver anniversary of Alaska's entry into the United States of America.

I ask unanimous consent that the resolution be printed in the RECORD immediately after my statement.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 42

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

Whereas, July 7, 1958, marks the twenty-fifth anniversary of enactment of the Alaska Statehood Act as approved by the United States Congress and signed by President Dwight D. Eisenhower;

Whereas the Alaska Statehood Act authorizes the entry of Alaska into the Union on January 3, 1959;

Whereas the State of Alaska is still growing and developing based on the principles established by the Alaska Statehood Act;

Whereas the Alaska Statehood Act is the foundation of the union between the State of Alaska and the United States of America which has been to the benefit of both parties;

Whereas many commitments between Alaska and the Federal government are still being fulfilled;

Whereas the State of Alaska is a storehouse of this nation's natural resources;

Whereas Alaska provides one-eighth of the nation's gold; one-fifth of the nation's oil production; and two-fifths of its harvested fish all to the benefit to the Union;

Whereas Alaska possesses ten of the sixteen strategic minerals needed for our nation's security;

Whereas the Federal government collects three dollars in taxes from Alaska for every dollar it spends there;

Whereas the United States has reaped economic rewards from Alaska many times greater than its original $7 million investment;

Whereas the people of Alaska contribute to the cultural diversity and cultural resources of this nation; and

Whereas the Alaska Statehood Act authorized Alaska's entry into the United States of America and provided the basis for these benefits shared by Alaska and the Union: Therefore, be it

Resolved by the Senate and House of Representatives of the United States in Congress assembled that January 3, 1984, be known as "Alaska Statehood Day" in honor of the silver anniversary of the entry of Alaska into the Union. The President is requested and authorized to issue a proclamation calling upon the people of the United States; and the Federal, State and local governments to observe "Alaska Statehood Day" with the appropriate ceremonies and recognition.●

Mr. STEVENS. Mr. President, today I join with my distinguished colleague from Alaska, Senator FRANK MURKOWSKI, in sponsoring this resolution designating January 3, 1984, as Alaska Statehood Day, recognizing Alaska's 25th anniversary as the Nation's 49th State.

In those 25 years, the Nation and the world have become increasingly aware of the Great Land, the name given to Alaska by its first settlers and cherished by Alaskans today.

In this past quarter century more and more Americans have learned to enjoy our State's natural wonders, from the continent's highest mountain to Alaska's 10 million lakes and streams.

Alaska's 34,000 miles of coastline are the gateway to the world's greatest fishery. Alaska's forests offer the Nation a valuable portion of its timber and pulp. Beneath Alaska's surface lies an abundance of energy for all Americans—coal and oil and natural gas.

By far Alaska's greatest resource is its people. Alaskans typify our forefathers' dreams of freedom of spirit, a love of the land, and the vision and strength to be pioneers.

Since the Secretary of the Treasury William Seward convinced President McKinley that the United States should purchase Alaska for $7.2 million in 1867, Alaska has played a vital part in shaping our Nation. At 2 cents per acre, for 365 million acres, Alaska has been a pretty darn good deal.

Achieving statehood for Alaska was the product of hard work by scores of individuals. Seven Congresses considered legislation regarding the admission of the territory as a State of the Union.

Alaskans by the planeload made countless trips to Washington, D.C., to testify in support of statehood for Alaska. So many Alaskans were involved in creating the compact between Alaska and the Federal Government. Some are no longer with us, but many are Alaskans today, still working to continue the tradition they began. Two are memorialized right here in the Halls of the Capitol, E. L. "Bob" Bartlett, and Ernest Gruening. To them and to all of those Alaskans who worked toward statehood we are eternally grateful.

There are others still in this Congress today who were instrumental in gaining statehood status for Alaska. Among them, my good friend from the State of Washington, Senator JACKSON, who was chairman of Territories on the Senate Interior Committee when the Alaska statehood bill was passed. His work has not gone unnoticed in my State, and over the years he has taken a good friend to Alaska.

When the Alaska statehood bill was debated for the last time in Congress, former Senator James Edward Murray, of Montana, made an observation that has proved prophetic. In noting that 35 new States had been added to the Union prior to Alaska, he said:

> But none . . . has been more freighted with destiny or has been of more potential epoch-making significance than . . . Alaska.

The silver anniversary has a special meaning to me. As the legislative counsel to the Secretary of the Interior Fred Seaton during the Eisenhower administration, I had the opportunity of working on the Statehood Act in its embryonic stage. We spent a great deal of time helping to fashion the final product that was finally passed by Congress.

Alaskans are proud to be part of the United States. They are well aware of the invaluable contributions the State makes to our Nation's well-being. They are conscious of Alaska's critical strategic position for defense, as well as its important resources and its natural beauty.

The Nation and the State are both the stronger for the compact between us.

Alaska, the northernmost, westernmost and easternmost State of the Union, spans four time zones. A land one-fifth the size of the contiguous 48 States, it is unique in its setting, its resources and its needs.

Historically, we Alaskans have enjoyed a streak of independence that will remain a part of our heritage forever. But Alaskans are proud to be a part of the most free, stable, and independent political system in the world, a system designed to allow each State appropriate latitude to manage its affairs.

The silver anniversary of Alaska statehood symbolizes our continued faith and trust in the Federal relationship created 25 years ago.

ADDITIONAL COSPONSORS

S. 14

At the request of Mr. HUDDLESTON, the name of the Senator from South Dakota (Mr. ABDNOR) was added as a cosponsor of S. 14, a bill to provide authority for activities to develop and expand markets for U.S. agricultural commodities, and for other purposes.

S. 17

At the request of Mr. DOLE, the name of the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of S. 17, a bill to expand and improve the domestic commodity distribution program.

S. 23

At the request of Mr. MOYNIHAN, the names of the Senator from West Virginia (Mr. RANDOLPH) and the Senator from Montana (Mr. BAUCUS) were added as cosponsors of S. 23, a bill to conduct an inventory of our Nation's water and sewer systems, bridges, highways and roads; to develop a 10-year investment plan to rebuild the public improvements essential to economic development; and for other purposes.

S. 29

At the request of Mr. GRASSLEY, the name of the Senator from New Mexico (Mr. DOMENICI) was added as a cosponsor of S. 29, a bill to strengthen law enforcement in the areas of child exploitation and pornography, and for other purposes.

S. 44

At the request of Mr. KASTEN, the name of the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 44, a bill to regulate interstate commerce by providing for a uniform product liability law, and for other purposes.

S. 65

At the request of Mr. RANDOLPH, the names of the Senator from Virginia (Mr. TRIBLE), the Senator from New York (Mr. MOYNIHAN), and the Senator from North Dakota (Mr. BURDICK) were added as cosponsors of S. 65, a bill to extend the Appalachian Regional Development Act to provide transitional assistance to the Appalachian region.

S. 103

At the request of Mr. BOREN, the name of the Senator from Alabama (Mr. HEFLIN) was added as a cosponsor of S. 103, a bill to amend the Highway Revenue Act of 1982 to repeal the increase in the highway use tax.

S. 117

At the request of Mr. CHILES, the name of the Senator from Louisiana (Mr. LONG) was added as a cosponsor of S. 117, a bill to improve the effectiveness and efficiency of Federal law enforcement efforts.

S. 131

At the request of Mr. SASSER, the name of the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of S. 131, a bill to require the Economic Regulatory Administration of the Department of Energy to complete the investigation of all oil overcharge cases pending within the Administration.

S. 145

At the request of Mr. MITCHELL, the names of the Senator from California (Mr. CRANSTON), and the Senator from Maine (Mr. COHEN) were added as cosponsors of S. 145, a bill to amend the Clean Air Act to better protect against interstate transport of pollutants, to control existing and new sources of acid deposition, and for other purposes.

S. 209

At the request of Mr. INOUYE, the names of the Senator from South Dakota (Mr. ABDNOR), the Senator from Michigan (Mr. LEVIN), and the Senator from Oregon (Mr. HATFIELD) were added as cosponsors of S. 209, a bill to amend the Controlled Substances Act to establish a temporary program under which heroin would be made available through qualified hospital pharmacies for the relief of pain of cancer patients.

S. 212

At the request of Mr. PRESSLER, the name of the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 212, a bill to authorize funds for the U.S. Travel and Tourism Administration.

S. 222

At the request of Mr. KASTEN, the name of the Senator from Colorado (Mr. HART) was added as a cosponsor of S. 222, a bill to repeal the withholding of tax from interest and dividends and to require statements to be filed by the taxpayer with respect to interest, dividends, and patronage dividends.

S. 242

At the request of Mr. QUAYLE, the name of the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of S. 242, a bill to provide additional authorizations for labor intensive programs, to provide additional provisions for the dislocated workers program under title III of the Jobs Training Partnership Act, to promote employment and training for recipients of federally financed unemployment benefits, to provide procurement targeting in labor surplus areas, and for other purposes.

S. 331

At the request of Mr. BYRD, the name of the Senator from Hawaii (Mr. INOUYE) was added as a cosponsor of S. 331, a bill to create a National Investment Corporation.

S. 401

At the request of Mr. DODD, the name of the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 401, a bill to authorize financial assistance for a continuing education program to secondary school teachers of science and mathematics designed to increase their competency, and for other purposes.

S. 430

At the request of Mr. TSONGAS, the name of the Senator from Hawaii (Mr. INOUYE) was added as a cosponsor of S. 430, a bill to prohibit employment discrimination on the basis of sexual orientation.

S. 443

At the request of Mr. DOLE, the name of the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 443, a bill to reorganize the court system for cases and proceedings under the bankruptcy laws, and for other purposes.

S. 444

At the request of Mr. DURENBERGER, the name of the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. 444, a bill to provide that registration and polling places for Federal elections be accessible to handicapped and elderly individuals, and for other purposes.

S. 445

At the request of Mr. DOLE, the names of the Senator from Mississippi (Mr. COCHRAN), the Senator from Arizona (Mr. DECONCINI), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of S. 445, a bill to amend title 11, United States Code, and for other purposes.

S. 450

At the request of Mr. PRYOR, the name of the Senator from Illinois (Mr. DIXON) was added as a cosponsor of S. 450, a bill to amend title 39, United States Code, to strengthen the investigatory and enforcement powers of the Postal Service by authorizing certain inspection authority and by providing for civil penalties for violations of orders under section 3005 of such title (pertaining to schemes for obtaining money by false representation or lotteries), and for other purposes.

S. 454

At the request of Mr. BYRD, the name of the Senator from Illinois (Mr. PERCY) was added as a cosponsor of S. 454, a bill to provide for an accelerated study of the causes and effects of acidic deposition during a 5-year period, and to provide for grants for mitigation at sites where there are harmful effects on ecosystems resulting from high acidity.

S. 476

At the request of Mr. LEVIN, the name of the Senator from Oklahoma (Mr. BOREN) was added as a cosponsor of S. 476, a bill to amend title II of the Social Security Act to require a finding of medical improvement when disability benefits are terminated, to provide for a review and right to personal appearance prior to termination of disability benefits, to provide for uniform standards in determining disability, to provide continued payment of disability benefits during the appeals process, and for other purposes.

S. 490

At the request of Mr. DIXON, the name of the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of S. 490, a bill to amend the Agricultural Trade Development and Assistance Act of 1954 to improve certain agricultural commodity donation programs, and for other purposes.

S. 501

At the request of Mr. DOLE, the names of the Senator from Mississippi (Mr. COCHRAN), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Alaska (Mr. STEVENS), the Senator from Pennsylvania (Mr. SPECTER), and the Senator from South Dakota (Mr. ABDNOR) were added as cosponsors of S. 501, a bill to amend the laws of the United States to eliminate gender-based distinctions.

S. 527

At the request of Mr. GRASSLEY, the names of the Senator from Texas (Mr. TOWER), and the Senator from Missouri (Mr. DANFORTH) were added as cosponsors of S. 527, a bill to amend the Internal Revenue Code of 1954 with respect to the tax treatment of agricultural commodities received under a payment-in-kind program.

S. 540

At the request of Mr. GOLDWATER, the names of the Senator from West Virginia (Mr. RANDOLPH), the Senator from Ohio (Mr. GLENN), the Senator from Connecticut (Mr. DODD), the Senator from Illinois (Mr. DIXON), the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from Louisiana (Mr. JOHNSTON) were added as cosponsors of S. 540, a bill to amend the Public Health Service Act to establish a National Institute of Arthritis and Musculoskeletal and Skin Diseases, and for other purposes.

SENATE JOINT RESOLUTION 15

At the request of Mr. MOYNIHAN, the names of the Senator from Nebraska (Mr. EXON), and the Senator from Michigan (Mr. LEVIN) were added as cosponsors of Senate Joint Resolution 15, a joint resolution designating the month of March 1983 as National Eye Donor Month.

SENATE JOINT RESOLUTION 20

At the request of Mr. INOUYE, the names of the Senator from North Dakota (Mr. BURDICK), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Georgia (Mr. MATTINGLY), the Senator from New York (Mr. MOYNIHAN), the Senator from Indiana (Mr. QUAYLE), the Senator from

Idaho (Mr. SYMMS), the Senator from Nebraska (Mr. ZORINSKY), the Senator from Kentucky (Mr. FORD), the Senator from Washington (Mr. JACKSON), the Senator from South Dakota (Mr. ABDNOR), the Senator from Arizona (Mr. DECONCINI), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Indiana (Mr. LUGAR), and the Senator from Alaska (Mr. STEVENS) were added as cosponsors of Senate Joint Resolution 20, joint resolution to authorize and request the President to designate March 27, 1983, as "National Recovery Room Nurses Day."

SENATE JOINT RESOLUTION 21

At the request of Mr. DECONCINI, the name of the Senator from Kentucky (Mr. FORD) was added as a cosponsor of Senate Joint Resolution 21, joint resolution to designate April 1983 as "National Child Abuse Prevention Month."

SENATE JOINT RESOLUTION 36

At the request of Mr. PRYOR, the names of the Senator from Ohio (Mr. GLENN) and the Senator from Rhode Island (Mr. PELL) were added as cosponsors of Senate Joint Resolution 36, joint resolution designating April 29, 1983, as "National Nursing Home Residents Day."

SENATE CONCURRENT RESOLUTION 2

At the request of Mr. CRANSTON, the name of the Senator from Alaska (Mr. MURKOWSKI) was added as a cosponsor of Senate Concurrent Resolution 2, concurrent resolution expressing the sense of the Congress with respect to the role of the Administrator of the Veterans' Administration.

SENATE CONCURRENT RESOLUTION 11—RELATING TO SOVIET GOVERNMENT OBLIGATIONS WITH RESPECT TO HUMAN RIGHTS

Mr. MITCHELL (for himself, Mr. PACKWOOD, and Mr. MOYNIHAN) submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 11

Whereas the Government of the Soviet Union is pursuing a policy of virtually closing its borders to Jewish emigration, as evidenced by declining emigration levels which for 1982 were the lowest since 1970, with only 2,688 Soviet Jews allowed to emigrate;

Whereas this policy has left tens of thousands of people seeking to emigrate from the Soviet Union with little hope of being granted permission to emigrate in the foreseeable future;

Whereas there are several hundred long-term "refuseniks", including many children, who applied to emigrate from the Soviet Union between 1970 and 1976 and have been waiting for permission to emigrate since that time;

Whereas those who have been denied emigration rights, especially the long-term "refuseniks", are often subjected to a life as internal refugees in the Soviet Union, resulting in loss of jobs, loss of membership in important social and professional organizations, revocation of academic degrees, surveillance and arbitrary assault, and other forms of harassment of social isolation;

Whereas these individuals also suffer physical, emotional, and psychological problems which result from social isolation;

Whereas these individuals are also denied the right to cultural expression, evidenced by the breaking up of cultural seminars and Hebrew classes and harassment by Soviet officials of those individuals participating in those forms of cultural expression;

Whereas these individuals are subjected to arbitrary arrest, imprisonment, and internal exile, as is the case with the Jewish "Prisoners of Conscience" currently serving sentences in the Soviet Union;

Whereas it is the stated policy of United States law, including section 502B (a)(1) of the Foreign Assistance Act of 1961 and section 402 of the Trade Act of 1974, that human rights considerations are a vital element of United States foreign policy; and

Whereas the Government of the Soviet Union, by arbitrarily denying its citizens the right to emigrate and the right to religious and cultural expression, and by harassing members of a specific ethnic group, is violating the norms of international law as set forth in agreements and declarations such as the Final Act of the Conference on Security and Cooperation in Europe (hereafter in this concurrent resolution referred to as the "Helsinki Final Act"), the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, the International Covenant on Economic, Social and Cultural Rights, the International Labor Organization Convention Concerning Employment Policy, and the UNESCO Convention Against Discrimination in Education: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that—

(1) the Government of the Soviet Union should fulfill obligations undertaken in the Helsinki Final Act, the Universal Declaration of Human Rights, and other international agreements relating to human rights, by pursuing a more humane emigration policy and ceasing harassment of Jews and others seeking to emigrate;

(2) the fulfillment by the Government of the Soviet Union of its obligations with respect to internationally recognized emigration rights would significantly promote improved relations between the United States and the Soviet Union;

(3) the President or his representatives should convey to the Government of the Soviet Union the concerns of the Congress expressed in this concurrent resolution at every appropriate opportunity, including—

(A) at such time as agreements are negotiated between the United States and the Soviet Union in the areas of trade, commerce, including grain sales, and science and technology exchange; and

(B) at such time as the President or his representatives meet with leaders of the Soviet Union concerning other aspects of relations between the two countries; and

(4) the President or his representatives should also convey these concerns of the Congress to the governments of allies of the United States and urge the cooperation of those governments in efforts to promote emigration from the Soviet Union.

SEC. 2. The Secretary of the Senate shall transmit a copy of this concurrent resolution to the President with the request that he transmit such copy to the Chairman of the Presidium of the Supreme Soviet of the Soviet Union.

Mr. MITCHELL. Mr. President, the Senate concurrent resolution I am submitting today expresses the sense of this Congress that our Government do everything in its power to encourage the Soviet Union to observe the international guarantees of human rights which it has signed.

The Soviet Government's perception of human rights is not the same as ours. But if the Soviet Union wants to claim a right to be a respected member of world community of nations, it must recognize that its signature to human rights documents carries with it a commensurate obligation.

This is important, not only for the people directly addressed in this Senate resolution, but for all people, everywhere. If a nation can, with impunity, disregard its solemn international undertakings in this respect, it can do so in any other. And if other governments allow international obligations to be flouted, they undermine the structures of international cooperation on which our hopes for peace rest.

This resolution directly addresses the plight of Soviet Jewry, for the reason that this minority group in the Soviet Union today is the subject of an escalating campaign of harassment and outright anti-Semitism. In a tragically ironic twist of history, the inheritors of the czarist state have reinstituted one of its most notorious features.

The Soviet Constitution officially recognizes over 100 different Soviet nationalities and guarantees to each the right to maintain its own language, culture, and traditions. In many cases, that guarantee is honored more in the breach than in the observance, but in no case more blatantly than as it affects Soviet Jews.

Although Jewish people are the 16th largest of the Soviet nationalities, they alone are denied schools in either Yiddish or Hebrew; they alone are denied links with coreligionists in other countries; and they alone are the subject of an official campaign of anti-Semitism.

Soviet treatment of its Jewish citizens has eerie echoes of the other great totalitarianism of our century: the National Socialist government of Adolf Hitler, whose 50th anniversary falls this year. Hitler, too, relied on the world's not recognizing the implications of his government's actions until it was too late. His reliance was, unfortunately, not misplaced.

For that reason it is imperative for all people, Jewish and Gentile alike, to understand what is meant by the "plight of Soviet Jewry" and to recognize that it is a threat to all human rights.

In 1948, Stalin destroyed the Jewish cultural and educational institutions that then existed in the Soviet Union. Jewish theaters, Jewish schools, Jewish publications and printing presses; the institutions by which Jewish culture and identity were sustained; all were destroyed. Despite changes in Soviet leadership since Stalin's death, that destruction has never been remedied.

Schools for Jewish children are not permitted. Only 57 synagogues exist in the entire country, 20 in Soviet Georgia, which has 28,000 Jews. The remaining 37 synagogues serve a community of 2 million people.

Jewish religious gatherings in private homes are systematically discouraged. Established study groups are broken up by police. There is in the Soviet Union no seminary for the training of rabbinical students. Four individuals were granted the right to enter rabbinical studies in Budapest. A commitment that two would be permitted to do so in the United States has not been honored. Even Jewish cemeteries are being systematically liquidated.

Two press organs serve the 2 million Jewish citizens of the Soviet Union. One is a Yiddish-language newspaper published in the so-called Jewish autonomous region, where only 10,000 Jews live. It is published in editions of 1,000 copies. The other is a monthly literary journal, published in editions of 7,000, of which half are sent abroad.

The teaching of Hebrew is illegal, because it is not considered "socially useful" labor. Hebrew teachers are thus guilty of "parasitism," and liable to arbitrary arrest and detainment.

No Russian-language translations of Jewish or Hebrew works have been published, although over 97 percent of Soviet Jews do not speak Yiddish or Hebrew. Despite Government claims that Jewish religious literature is regularly published, no copies of such publications have been seen by Soviet Jews.

In 1977, the Soviet Union started an indoctrination course for the armed services which continues today. It ascribes to a mythical "Masonic-Zionist" conspiracy the goal of world domination. This course, and the anti-Semitic publications Soviet censors have passed in recent years, is nothing but a thinly disguised reiteration of anti-Semitic propaganda of the most virulent kind. The Soviet state is mimicking the czarist regime, whose secret police originated the notorious "Protocols of the Elders of Zion," a staple of anti-Semites everywhere. Official Soviet art is propagating the monstrous perversion of truth that Jews collaborated with the Nazis in death camps.

In practical terms Soviet Jewish citizens are suffering economic discrimination.

In 1950, 15 percent of scientific workers were Jewish. Today, the proportion is less than 5 percent. Quotas have systematically reduced the number of Jewish students admitted to higher educational institutions. Jews are 3.56 percent of the Moscow population, but only 1.6 percent of Moscow University students. Between 1970 and 1975, the number of Jewish postgraduate students in the Soviet Union fell from 4,945 to 2,841. For a people which was traditionally barred from any but urban professions, the implication is clear: There is a systematic effort underway to deny to young people of Jewish origins the basic right to equal educational opportunity within the Soviet Union.

And today, in an ominous echo of the Hitler years in Germany, the Soviet Government is revoking scientific diplomas earned by Jews. Not since the promulgation of the Nuremburg racial laws has any advanced nation sought to use its institutions to legally strip certain citizens of their rights. Yet that is precisely the case in the Soviet Union today.

Given these realities it is not surprising that some Jewish citizens of the Soviet Union seek to leave their country.

The plight of would-be emigrants is well known. Application to leave entails interminable delays in receiving official papers and clearances, loss of work, dismissal from professional associations, lengthy interviews with security forces, and all the attendant harassment a totalitarian state has within its power.

Jewish applicants for emigration must receive an invitation from an immediate family member in Israel. Invitations are frequently intercepted in the mail. The definition of "family" is further being narrowed by the demand that there be a relationship of economic dependence as well as first-degree consanguinity.

Those who are not discouraged and repeatedly seek the right to leave are subjected to intimidation and harassment, which can range from lengthy interviews with the police to arrest and conviction. The outcome of arrests is predetermined: To be charged is to be convicted. So, all over the Gulag of the Soviet prison system there are Jewish prisoners of conscience, whose only crime is the desire to leave a nation which has done its utmost, both officially and unofficially, to make them unwelcome and unwanted.

The purpose of the resolution we are introducing today is twofold. On the one hand, it is vital that the recent dramatic drop in emigration permits be reversed, so that those Soviet Jews who wish to leave may do so. Over 51,000 people were allowed to depart in 1979. In 1982, only 2,688 people are allowed out. Over 10,000 people who have applied for exit permits exist inside the Soviet Union today.

They include longtime "refuseniks" who have waited for exit permission for a decade. Ida Nudel, for example, applied to leave in 1971. Her sister was permitted to leave with her family, but she was not. Since 1971, this woman has tried to exercise a fundamental right: The right to leave her country for another. She has been harassed, beaten, imprisoned, and exiled. In 1978 she was exiled to Siberia and forced to live with 60 male prisoners. She slept with an axe under her pillow to protect herself. On her return to Moscow she was denied a residence permit. She was forced to sleep at the railway station in Riga, having been refused residence and the right to seek shelter elsewhere. Her whereabouts today are unknown.

Other refuseniks have seen their sons inducted into the military. Soviet law prohibits departure within 3 years' of military service, so such inductions are tantamount to a sentence of living without permanent work, under police surveillance and harassment, with interrupted mail and telephone service and the constant fear of arrest, detainment or prison.

We cannot condemn 10,000 people to such an existence for an indeterminable number of years. The resolution therefore expresses the sense of Congress that this situation be taken into account in the negotiation of trade, technical, and other agreements with the Soviet Union.

The second purpose of our resolution is directed to the vast majority of Soviet Jews, who have not requested permission to leave.

They are the world's third largest Jewish comunity, consituting one-fifth of the world's Jewish population. Discrimination against Jews in the Soviet Union could, over time, so undermine Jewish traditional, religious and cultural life as to virtually extinguish all trace of an identifiable Jewish community.

Deportation of some national groups and forced Russification of others have weakened many national communities within the Soviet Union. Those which most successfully maintain their culture and language have a geographic base.

The same is not true of Soviet Jews. The Jewish autonomous region in the Central Asian desert contains less than 10,000 Jewish inhabitants. Soviet Jews are dispersed in urban areas throughout the Soviet Union. Consequently, Soviet law, which formally bans the teaching of Hebrew, and Soviet practice, which effectively prevents organized religious and cultural observance, is a far more serious threat to Jewish survival than russification of a geographically compact community. And the pervasive, offi-

cially sponsored and sanctioned anti-Semitism in the Soviet Union is clearly designed to send the message that Soviet Jews cannot be good citizens so long as they are Jews.

A generation ago, the Jewish people lost a third of their entire population to the lunatic demand of Adolf Hitler that Europe be made "judenrein." The subtler undermining of Jewish life in the Soviet Union today is a less savage but not less serious threat to survival.

There are ominous signs that repression of all forms of dissent is being stepped up in the Soviet Union today. And because Jewish emigrants constitute the largest remaining discrete group of dissidents, repression falls most heavily on them.

Last April saw the arrests of a number of religious groups. In July and August, there was a dramatic interruption of telephone service. Direct dial service, introduced for the 1980 Olympics, has been terminated. In September, the KGB stepped up efforts to terminate all contracts between refuseniks and overseas supporters. Alexander Lerner, the patriarch of the refusenik movement, has been warned to stop speaking with foreigners.

So the second goal of this resolution is directed to alleviating the conditions of life that most Soviet Jews will be forced to face indefinitely.

This resolution is designed to encourage our Government to do its best in all dealings with the Soviet Union to bring home the fact that relations between our two countries will never see real and permanent improvement so long as the most fundamental rights of human beings are brutally suppressed by Soviet officials.

Relations between ourselves and the Soviet Union are strained today. The invasion of Afghanistan and the Soviet role in the suppression of the Polish people cannot be ignored. But just as the military invasion was a breach of the geographic frontiers of a sovereign state, so is Soviet treatment of Soviet Jewry an invasion of the spirit of all people, everywhere. The Soviets must recognize that violence against humanity is no less intolerable than violation of geographic borders.

The Soviet view of human rights is not identical to ours. It is clear, for instance, that the Soviets regard Jewish emigrants as a bargaining chip in relations with the United States, a repugnant use of human lives and human fears. But if, by taking advantage of that Soviet view, we can shorten the ordeal of any human being, we should do so.

In the long term, the Soviet Union must come to recognize that our concern about human rights springs, not from an anti-Soviet political animus, but from the same foundations that underly all our political and cultural traditions.

We did not fight Hitler's extermination policy only to stand by silently while the Soviet Government launches its own official anti-Semitism 30 years later. We do not condemn repression in authoritarian countries only to condone it in totalitarian states.

We do not believe that the rights of any human being must depend on the accidental geography of his birth. We believe that unless and until nations can reach accommodation on the basic rights of the individual, there can be little or no hope for permanent friendship and peace.

Indirectly, the Soviet Union acknowledges this reality. The Soviet Government gives lip service to the ideals of human rights expressed in countless international documents. In public pronouncements, the Soviets are willing to recognize the fundamental rights that all people share and to which all people, including their own, aspire. What we must do is persuade the Soviet Government that verbal acknowledgment, by itself, is not an adequate way to recognize human rights.

It must be the task of our Government, and of all world governments, to impress upon the Soviet leadership that lip service does not discharge the Soviet responsibility to fulfill the international agreements it has signed. If the Soviet Government wants the respect of other peoples as an international leader to go beyond recognition of Soviet ownership of a nuclear stockpile, then it must begin to extend to its own citizens the respect for human rights that is indivisible from human dignity.

I hope President Reagan's recently announced effort to publicly promote the ideals of democratic nations will focus on the fundamental reality. And I urge all Senators to make the plight of Soviet Jewry a human rights priority in the coming months.

● Mr. PACKWOOD. Mr. President, I am pleased to join today with my colleague from Maine in introducing a resolution which addresses the tragic plight of Soviet Jewry. The purpose of our resolution is to express the sense of the Congress that the Soviet Union should pursue a more humane emigration policy and stop harassing Jews and others seeking to emigrate. The resolution urges the President and other members of the administration to convey the concerns of Congress to Soviet officials.

Mr. President, the climate in the Soviet Union has evolved into one in which anti-Semitism thrives. Progressively greater injustices are permitted and the frequency and severity of discrimination against the Jewish population has grown dramatically. The cruel denial of equal rights continues in employment and education, obstacles to religious and cultural expression proliferate, and anti-Jewish propaganda fills the media.

In 1950, Jews constituted 15 percent of all scientific workers in the Soviet Union; today, the figure is less than 5 percent. A quota system at most universities and in hiring policies has resulted in an increasingly smaller number of Jewish university students and professionals. The anti-Jewish discriminatory pattern in higher education poses a direct challenge to historic job opportunities and traditional lifestyles of Soviet Jews.

The Soviet Government has long pursued a policy aimed at suppressing Jewish culture and at severing Soviet Jewry from its cultural heritage. While it is true that restrictions apply to the observance of all religions in the Soviet Union, those aimed specifically at Judaism are especially severe. Synagogues have been closed, contact with other religious groups are forbidden, no seminary exists to train clergy, Jewish religious texts have been confiscated, and no Jewish literature may be published or distributed. The private teaching of Hebrew—the only language common to all Jews everywhere—has been outlawed. It is virtually impossible for Jews to pass on the rituals and traditions of Judaism to younger generations. As a result, the Jewish religion could face extinction in the Soviet Union.

The worsening situation for Soviet Jews has led hundreds of thousands to apply to emigrate. And yet the number of Jews allowed to leave the Soviet Union has rapidly diminished. Only 2,688 Soviet Jews emigrated last year, the lowest level since 1971 when truly effective emigration began. This represents a decrease of a staggering 95 percent in the past 3 years. In addition, the approximately 300,000 Soviet Jews awaiting exit visas face increasingly severe governmental harassment. Many have been fired from their jobs and some scientists have been advised that their academic degrees have been or will be revoked. Only in Hitler's Germany have the academic degrees of Jews been revoked.

There are a multitude of individual examples—documented cases—of hardship, of separated families, and of persecution. The Helsinki accords, which the Soviet Union signed, requires respect for the rights of religious and ethnic groups. They also forbid Governments from holding people who want to emigrate and rejoin their families. Minority rights are also guaranteed in the Soviet Constitution, the International Covenant on Civil and Political Rights, and the Universal Declaration on Human Rights. The Soviet Union, however, continues to blatantly ignore these agreements.

The persistence of an international voice of outrage against the treatment of Soviet Jews must continue. Our message helps sustain the hope and courage of Jews who face vicious op-

pression day after day. It also reminds the Soviet Union of our concern for the plight of these people.

I ask my colleagues to lend their voices to this cause by cosponsoring and supporting the resolution Senator MITCHELL and I are introducing today—and thereby demonstrate to the Soviets our commitment to do whatever we can to halt their anti-Semitic activities.●

SENATE RESOLUTION 71—HONORING THE TWELFTH ANNUAL MODEL SENATE OF STETSON UNIVERSITY AND THE CENTENNIAL OF STETSON UNIVERSITY

Mr. CHILES (for himself and Mrs. HAWKINS) submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 71

Whereas one hundred years ago, Henry A. DeLand founded DeLand Academy, which later became Stetson University;

Whereas Stetson University has grown from a small academy to a first class university with alumni who have served at all levels of government;

Whereas Stetson University, for the past twelve years, has sponsored a United States Model Senate, allowing students from Florida and the southeastern United States an opportunity to learn about the performance of the United States Senate by portraying Senate Members;

Whereas through the model Senate students learn to draft bills, work on committees, and understand the internal workings of the United States Senate;

Whereas each year the Model Senate has had outstanding support from fine men and women who now serve or have served in the United States Senate;

Whereas opportunities like the Model Senate help to direct the future of aspiring political personalities; and

Whereas the Model Senate is an educational program that promotes better government by encouraging student participation in legislative affairs: now, therefore, be it

Resolved, That the United States Senate recognizes and honors the Twelfth Annual Model Senate of Stetson University and the University in its centennial year marking the founding of Stetson University.

● Mr. CHILES. Mr. President, this week Florida's Stetson University is holding its 12th Annual Model Senate. To mark the 12th Annual Model Senate and the centennial of the founding of Stetson University, I am submitting, along with Senator HAWKINS, this Senate resolution. Speakers for the model senate have included Senators BAKER, BRADLEY, BUMPERS, BYRD, HAWKINS, INOUYE, KASSEBAUM, MATHIAS, and myself. Former Senators Sam Ervin, Richard Stone, and Spessard Holland have also served as speakers. Senator Holland was the first speaker and is credited with helping the program get off the ground. This year's keynote address will be delivered by Senator DAVID PRYOR from Arkansas.

Started in 1971 under the auspices of Dr. Wayne Bailey, chairman of Stetson University's Political Science Department, the model senate has grown to include students from colleges and universities all over the Southeastern United States. The program includes 3 days where conditions of the U.S. Senate are recreated with 75 to 100 students playing the roles of actual Senators. The model senate has been guided in its 12-year history by Dr. Floyd Riddick, former U.S. Senate Parliamentarian. Participants choose key leaders and the approximate Republican-Democratic balance is preserved. The model senate involves over 150 students each year, many of whom go on to become active in government and politics. It is with great pleasure that I offer this resolution to honor such an effective educational tool patterned after the U.S. Senate.

Stetson has more to be proud of than the model senate. This university is celebrating the 100th anniversary of its founding. Started in 1883 by Henry Deland as Deland Academy, it was renamed Stetson University in 1889 in honor of hat manufacturer John B. Stetson. Chartered in the same year as a university by the Florida State Legislature, Stetson has grown into one of the State's foremost schools and has achieved a number of firsts in its 100 years. Stetson had the first music school in Florida and the first business school in the State. The university was one of the first, if not the first, to admit women as students in Florida and had the first forensic and debate program in the State. Added to this list of firsts is Stetson's victories in the State's first baseball championship and first men's and women's basketball championships. One of Stetson University's students, Benjamin Hulley, was awarded the first Rhodes Scholarship given in the State of Florida. Stetson's first 100 years have been filled with many achievements and I extend to the university best wishes for the next 100 years.●

SENATE RESOLUTION 72—RELATING TO ARMS SALES TO JORDAN

Mr. KENNEDY (for himself, Mr. HEINZ, Mr. HART, Mr. BOSCHWITZ, Mr. BYRD, Mr. PACKWOOD, Mr. BAUCUS, Mr. BIDEN, Mr. BINGAMAN, Mr. BOREN, Mr. BRADLEY, Mr. BUMPERS, Mr. BURDICK, Mr. CHILES, Mr. COHEN, Mr. CRANSTON, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DIXON, Mr. EAGLETON, Mr. EXON, Mr. FORD, Mr. GLENN, Mr. GRASSLEY, Mr. HATCH, Mrs. HAWKINS, Mr. HEFLIN, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. INOUYE, Mr. JACKSON, Mr. JOHNSTON, Mrs. KASSEBAUM, Mr. LAUTENBERG, Mr. LEVIN, Mr. MATSUNAGA, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. PELL, Mr. PRESSLER, Mr. PROXMIRE, Mr. PRYOR, Mr. RIEGLE, Mr. SARBANES, Mr. SASSER, Mr. SPECTER, Mr. STAFFORD, Mr. WEICKER, and Mr. ZORINSKY) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 72

Whereas Israel is a stable, democratic and reliable ally of the United States;

Whereas the security of Israel is in the national interest of the United States;

Whereas Jordan continues to oppose the Camp David peace process;

Whereas Jordan has aligned with Iraq, whose government is committed to the destruction of Israel;

Whereas Jordan is purchasing advanced weapons from the Soviet Union;

Whereas the sale of advanced arms to Jordan would jeopardize the security of Israel and increase the overall instability of the region;

Whereas promises to sell advanced U.S. arms to Jordan set the stage for an unnecessary and divisive confrontation with Congress; and

Whereas an escalation of the arms race in the Middle East is contrary to the interests of the United States, Israel and Jordan.

Resolved, it is the sense of the Senate of the United States of America, That—

1. The United States should not sell advanced fighter aircraft, mobile anti-aircraft missiles, or any other advanced arms to Jordan under present conditions, in which Jordan continues to oppose the Camp David peace process and purchases arms from the Soviet Union, and in which such sales jeopardize both the security of Israel and progress toward peace in the Middle East.

2. The United States should ensure that Israel retains its qualitative military edge over any combination of Mideast confrontation states.

3. The United States should focus its efforts on bringing Jordan into direct peace negotiations with Israel.

Mr. KENNEDY. Mr. President, I am pleased to join with Senators HEINZ, HART, BOSCHWITZ and 47 other Senators in introducing a Senate resolution opposing the sale of advanced weapons to Jordan and calling on Jordan to enter direct peace negotiations with Israel. A similar resolution was introduced in the past Congress.

All of us hope that recent public reports will be borne out, and that Jordan is reconsidering its past opposition to the Camp David peace process and direct peace negotiations with Israel. For many years, I have strongly urged King Hussein, both publicly and privately, to engage in such negotiations with Israel. I am confident that all the sponsors of our resolution today will enthusiastically welcome such a development—as will all peoples who support the cause of peace around the world. As our resolution makes clear, our first priority must be peace, not another escalation of the arms race in the Middle East.

Reintroduction of our resolution at this time, supported by a majority of the newly elected Senate, should be clear notice to the administration of our determination to enhance the Middle East peace process and to

oppose destabilizing arms sales in that violatile region of the world.

Over the past year, reports have circulated with disturbing persistence that the Reagan administration is considering the sale of advanced arms to Jordan. These reports include the possible sale of fighter aircraft such as the F-5G or F-16, portable Stinger antiaircraft missiles, Sidewinder air-to-air missiles and laser-guided bombs. The F-5G, which is being redesignated the F-20A, is a highly capable aircraft, built to carry Sidewinder missiles, and also capable of carrying bombs and other ordnance. It could be readily integrated into the AWACS system which, under the administration's misguided policy, is being sold to Saudi Arabia. The shoulder-fired Stinger missiles have never before been transferred outside of NATO; they can be carried and used by individual soldiers—and they can be seized by terrorists.

Sales to Jordan of this sophisticated weaponry would significantly increase the military threat against Israel. With its fast scramble time, short takeoff and landing characteristics, high acceleration and maneuverability and superior ground attack capabilities, the F-5G would greatly enhance Jordan's ability to participate in a surprise Arab air attack on Israel.

The Arab States give high priority to strengthening their air forces, and Jordan is the state with the best geographic position to spearhead a combined Arab attack on Israel; Jordan shares the longest border with Israel and has airfields closest to key targets in Israel. Amman is barely 50 miles from Jerusalem.

Provision of the F-5G or other advanced aircraft will increase the likelihood of escalation of conflict between Israel and Jordan, make it more difficult for Jordan to stay out of any future Middle Eastern conflict, and destabilize the already delicate balance of power in the Middle East.

In addition, Jordan has continued to acquire advanced weapons, including surface-to-air missiles, from the Soviet Union. Its forces have received military training on Soviet territory and from Soviet technicians in Jordan. These Soviet ties raise serious questions about the security of any high technology weapons supplied by the United States to Jordan. Sales such as those proposed by the administration could undermine not only Israeli but also American security.

The Congress has repeatedly expressed concern to the administration on this issue. In February 1982, 33 Senators wrote President Reagan to express concern over disturbing reports that the administration might transfer F-16 and mobile Hawk air-to-ground missiles to Jordan. Subsequently we introduced two Senate resolutions opposing such sales, and the resolution we are introducing today parallels these efforts. In 1982 and again in 1983, a majority of the Senate sponsored our resolution.

Jordan obviously has its own legitimate security needs. But what is needed now from the United States is not more sophisticated arms for Jordan, but more sophisticated diplomacy in bringing Jordan into the Camp David peace process. The administration should be concentrating its resources on a vigorous effort to engage Jordan in direct peace negotiations with Israel. This is a far more promising avenue for lasting peace in the Middle East.

Mr. HEINZ. Mr. President, last May Senator KENNEDY and I, together with a majority of the Senate, submitted a resolution expressing opposition to the sale of advanced weapons to Jordan. Today, we are resubmitting this resolution, again with a majority of the Senate in support.

As March 1 approaches, the date of King Hussein's self-imposed deadline for his decision on whether or not—or on what terms—to participate in the Mideast peace process, we are all anxious to find a way to persuade the King to join the peace negotiations. Our focus on his potential role is appropriate. Without question, the King is not only a valuable addition to advancing the peace process, but also a necessary element. Further progress is unlikely to be made without him. Despite his importance, however, we must be certain that the means we employ to bring the parties to the bargaining table are consistent with our national security interests and those of our long-standing friend and ally, Israel, and with achievement of our ultimate goal: a just and lasting peace.

It is no secret that King Hussein wants American arms. Although no sale has been formally announced, the administration has discussed, without necessarily committing itself, a variety of difficult weapons systems with the Jordanians. The clear signal sent has been that advanced weapons would be more easily obtained were Jordan more cooperative in participating in the construction of peace agreements. My concern is that the administration, in its zealous pursuit of peace, will interpret token conciliatory gestures by Jordan as real movements toward peace, and thereby provide a still uncooperative Jordan with highly sensitive weapons that both endanger Israel's security and do not, in fact, bring us one step closer to peace.

Such a sale would produce multiple ill effects. Clearly, it would threaten Israel whose security is in our national interest. Although it is difficult to discuss specific weapons systems in the absence of a specific sale, persistent rumors have suggested some highly advanced arms, some of which have never been sold outside of NATO, are being considered. The list of weapons discussed has been said to include advanced fighter aircraft, including the F-5G, or F-16, portable Stinger antiaircraft missiles, Sidewinder air-to-air missiles, and laser-guided bombs. The F-5G, built to carry Sidewinders as well as bombs and other ordnance, can also be integrated into the AWACS system being sold to Saudi Arabia. The Stinger missiles, never before sold outside of NATO, can be carried and used by individual soldiers, and therefore could be more readily seized by terrorists.

Second, as I have stated before, I am greatly disturbed by the counterproductive policy trend this sale would reinforce; that is, trying to buy peace with weapons of war. Both logic and experience show this policy to be unsuccessful. From an a priori standpoint, it just does not make sense to add weapons to an already extremely volatile area; we would merely be increasing the chance of violence, as well as escalating its extent when it does occur.

Furthermore, in practice, this policy has been as unfruitful as logic would predict. In 1978, when the Carter administration first proposed a major arms sale to Saudi Arabia, it was hinted that such a sale would make the Saudis more amenable to suggestions for peace talks. Having sold the Saudis both F-15's and then the AWACS in 1981, we still find them unceasingly intransigent. They have not only remained opposed to any negotiations, but have also vented their hostility at the most trivial opportunity. At this year's World's Fair, for example, an event designed to promote world understanding, the Saudis distributed maps that designated the land where Israel now stands as part of Jordan.

King Hussein's lack of cooperation, though less trivial, has been no less injurious to hopes of peace. At the time of the signing of the Camp David accords, on which President Reagan's proposals are based, the King expressed vehement opposition. He strengthened his ties with Iraq and the PLO, both sworn enemies of Israel and promoters of terrorism. In addition, he has, in the past, asked for his friends the Soviets to mediate peace talks rather than the United States.

Most frustrating, though, is the King's habit of appearing to soften his stance only later to resume his intractable position. He has continually aroused our hopes with his apparent willingness to cooperate, then disappointed us with a variety of excuses. Most recently, he has cited doubts about America's ability to obtain Israel's withdrawal from Lebanon as another explanation for his hesitancy.

Of course, we cannot lay all the blame for that problem at the King's

door. We must guard against our tendency to attribute the King with more independence than he actually enjoys. The King wants to act in the interest of the Arab States collectively, and his own political position gives him little choice. Yet the Arab States' inability to reach a consensus has helped to cause the King's apparent unreliability. Moreover, his hesitancy to enter negotiations concerning PLO autonomy without a mandate from that organization is understandable. Unfortunately, recent events have further complicated the King's task; though the PLO's traditional intransigence has softened somewhat, the problem of a mandate has been complicated by factionalism within its ranks. Thus, it is becoming increasingly unclear from whom the King should seek his mandate and for whom such a mandate will hold validity. The PLO executive committee seems to have regrouped in Algiers, only to deny King Hussein a mandate to negotiate on its behalf.

In any case, with the King's past record of noncommitment, an arms sale at this time without any definite assurance would be a gamble with terrible odds.

In the final analysis, though, it is essential to examine why the King, a careful and astute politician, may finally be warming toward President Reagan's peace initiative. Could it be that the King is only interested in obtaining American weapons? Last January 10, an article in the Washington Post suggested to the contrary. It reported that the King's "new thinking is said to reflect growing fears generated by the greatly accelerated pace of Israeli settlements in the occupied territories, the perceived threat of Israeli aggression against Jordan's East Bank and other threats to the Kingdom he has ruled for decades."

Thus it appears the King is searching for ways to insure Jordan's national security. Seeking that through an arms sale would be illusory, at best. But, by providing arms to Jordan we enhance the King's idea of security, thereby providing a disincentive to find real security through lasting peace. Our irony is that we may have finally found the King at a point where he believes peace is his country's most attractive option; an arms sale at this time would only serve to offer him a destructive alternative.

Finally, it is only fair to acknowledge that the King's reluctance to negotiate may stem at least partly from doubts about the outcome of the negotiations. A weapons sale would not bridge major fissures that could prove to be impasses once both sides begin talking. For example, though the King is now discussing President Reagan's suggestion of Palestinian autonomy on the West Bank and Gaza, the King has never retracted his demand for the establishment of a Palestinian homeland, an entity precluded by the Reagan plan, as well as by Israeli Government policy. Jordan must enter negotiations as a state committed to peace, willing to compromise, not as a reluctant participant brought to the table by a weapons sale.

For these reasons, at the present time, I oppose an arms sale to Jordan without an adequate commitment by Jordan to enter the peace process. Such a sale endangers the security of Israel, destabilizes a volatile area, and impedes our most important objective: the creation of a just and lasting peace.

● Mr. LAUTENBERG. Mr. President, I join today in sponsoring this Senate resolution opposing the sale of sophisticated weapons to Jordan. When one examines the situation in the Middle East, one is struck by the role Jordan could play in seeking peace in the region. But Jordan has refused. Instead, Jordan continues to stand by while others actively seek peace. Arms should not be Jordan's reward.

Anwar Sadat sought peace with Israel. Israel welcomed him, and the Camp David process ultimately brought peace between Israel and Egypt. I think we all share the hope that there also can be peace between Israel and Jordan. But it cannot come while King Hussein passively stands by. Hints are not enough. The United States must require of Jordan a real and tangible commitment to peace with Israel.

Until that is forthcoming, the sale of sophisticated arms to Jordan must be seen as a menacing threat to Israel—our stable, reliable, and democratic ally—and a threat to peace.

For these reasons, I believe that the Congress should express its opposition now to any proposal to sell sophisticated weapons to Jordan.●

● Mr. PRYOR. Mr. President, I have joined with other Senators today to express my concern over the prospect of a request for a substantial sale of arms to Jordan in the next few months.

In this matter, we may be putting the cart before the horse since King Hussein requested no arms during his recent visit to the United States and President Reagan has not proposed a sale at this time. But I think a signal from the Congress can be useful at this time as an indication of our concern over the rising level of arms in the Middle East and the death and destruction that will inevitably result from the abundant availability of land and air weapons in that region.

According to Andrew J. Pierre, author of "The Global Politics of Arms Sales," over three-fourths of all purchases of arms by Third World nations were by Middle Eastern countries, and the United States bears the major responsibility for arms buildups around the world since we have supplied 45 percent of all arms aid to the developing nations. That is a heavy moral responsibility that we share along with the Soviet Union, France, and Great Britain.

President Reagan has reversed the Carter administration policy of reducing the level of arms sales and has made such sales a centerpiecee of our foreign policy. I hope that the Congress of the United States will use all the power at its disposal to refute the Reagan policy and restore some sanity and foresight to our military assistance programs.

Thus, while I recognize Jordan's crucial role in establishing peace in the Middle East and the importance of continued good relations with that country, I want to put the President on notice today that any future arms sales proposals will receive a close and critical scrutiny by the Congress.●

● Mr. CHILES. Mr. President, I am pleased to join Senator KENNEDY and others today in sponsoring this resolution opposing the sale of advanced arms to Jordan.

Since we first got wind that President Reagan was considering such a sale, we have been able to discourage him from pursuing the idea. Our efforts last year ranged from letters to the President to the introduction of a resolution of disapproval. This time around, we have over half the Members of the Senate signed on as cosponsors. It is my hope that sustained opposition here in Congress will kill the proposal.

Selling sophisticated weapons to Jordan at this time is ill-advised, to say the least. Not only would it pose a threat to Israel's security, but it would also send a very wrong message to the Arab world.

I am particularly concerned that the administration wants to deal with the Jordanians in this way, when they have not agreed to participate in the peace process. At a time like this, it makes absolutely no sense to sell them advanced weapons. All we accomplish by doing that is to destroy some of their incentive for making peace.

The hopes for a just and lasting peace in the Middle East do depend to a large extent on Jordan. Hopefully, King Hussein can be convinced to step forward. I think he has the capacity to do so, but there is no reason to even consider selling him arms until he does.

The proper pattern was set by the late Anwar Sadat. By going to Israel and offering peace, he set the stage for friendship with the United States. That friendship has brought Egypt many rewards. If King Hussein is looking for similar rewards, let him also come forward—without preconditions—in pursuit of peace.●

● Mr. BINGAMAN. Mr. President, I am pleased to be an original cosponsor

of the resolution introduced today by Senator KENNEDY opposing the sale of advanced weapons to Jordan, supporting Israel's security, and urging efforts to bring Jordan into direct peace negotiations with Israel.

I want to commend the principal cosponsors of this resolution, Senators KENNEDY, HEINZ, HART, and BOSCHWITZ, for taking this initiative both in the last Congress and again here today. I am convinced that the sale of advanced weapons to Jordan will only contribute to further instability in the Middle East. Further, we should not be rewarding Jordan for its failure thus far to engage in the search for peace in the Middle East through direct negotiations with Israel.

The search for peace, for political stability, and economic vitality, must be our first and foremost task in the Middle East, as in other troubled regions like Central America and southern Africa. Our emphasis should be on bringing the rivals in these conflicts together in direct negotiations and on aiding the economic recovery of these countries as peace is restored.

Sophisticated arms transfers of the sort apparently being discussed within the administration in the case of Jordan seldom contribute to political stability and never advance the economic revitalization of these regions. My cosponsorship of this resolution reflects in part this broader concern about our arms transfer policy to the Third World.●

● Mr. SARBANES. Mr. President, I have joined in sponsorship of Senate Resolution 72, to assure the security of Israel, to further peace in the Middle East, and to oppose the sale of advanced arms to Jordan. This resolution carries forward the commitment of Senate Resolution 406, which was introduced nearly 1 year ago in the 97th Congress in response to unwarranted statements by the Secretary of Defense with respect to the sale of sophisticated arms, including the Hawk mobile missile system, to Jordan.

Those statements were made in an airport interview apparently without regard to the delicate balance in the Middle East, despite the continuing refusal of King Hussein to participate in peace negotiations within the framework of Camp David, and in clear contravention of the 1975 agreement carefully worked out between the Congress and the President to preclude the sale of the Hawk anti-missile system. They were made on the Secretary's own initiative, without prior consultation with the Congress and in the absence even of any request from the King of Jordan.

This year's resolution, like last year's, is intended to make plain the strong commitment of the Senate to support a just and lasting peace in the Middle East, a peace that will be accomplished only through direct negotiations among the parties directly concerned, and the equally strong opposition of the Senate to any steps that will make such negotiations more difficult to achieve. The sale of sophisticated military equipment to Jordan at this time will impede, not promote, the peace process. It is no more likely to induce Jordan to participate in good-faith negotiations than the sale of advanced military equipment to Saudi Arabia has caused the Saudis to moderate their intransigent position.

Furthermore, it is important to remember that Middle East States hostile to Israel have a very significant quantitative advantage in the weapons at their disposal. In the face of that threatening arsenal, Israel has had to rely, and has been encouraged to rely, on the qualitative superiority to aggression, and Israel's security depends on it. The sale of technologically advanced weapons system to Saudi Arabia in 1978, and again in 1981, introduced a new and destabilizing factor into the military equation in the Middle East. A sale of comparable importance to Jordan would further erode the qualitative margin which is essential to Israel's survival and would only make more difficult the task of bringing about fruitful negotiations for peace.

Mr. President, as the resolution states, the sale of sophisticated military equipment to Jordan would "jeopardize both the security of Israel and progress toward peace in the Middle East"; it would undermine Israel's "qualitative military edge over any combination of Mideast confrontation states"; and it would divert the energies and attention of our own Nation from the urgent task of "bringing Jordan into direct peace negotiations with Israel." For these reasons, I join in sponsoring Senate Resolution 72.●

SENATE RESOLUTION 73—RELATING TO TARGETING OF JOBS LEGISLATION

Mr. SPECTER (for himself and Mr. DIXON) submitted the following resolution; which was referred to the Committee on Labor and Human Resources:

S. RES. 73

Whereas, our nation's rate of unemployment is over 10 percent, and persists at record levels, leaving over 11.4 million Americans out of work; and,

Whereas, the unemployment level is much greater in some states, even exceeding 50 percent in some localities; and,

Whereas, our economy is undergoing profound structural changes, creating high levels of long-term unemployment and causing many traditional manufacturing and heavy industries to severely curtail production; and,

Whereas, the ongoing recession has produced approximately four million dislocated workers whose skills are no longer appropriate for existing or emerging employment opportunities; and,

Whereas, millions of families have suffered tragically from the burden of unemployment and many individuals, unemployed through no fault of their own, have become so discouraged that they are no longer seeking work; and,

Whereas, traditional anti-recessionary approaches have often compromised their effectiveness in providing jobs in high unemployment areas at the expense of parochial interests: Therefore be it

Resolved, It is the sense of the Senate that, any jobs program or other form of anti-recessionary assistance be targeted to areas of high unemployment, and

Further, that any such program or assistance provide special aid to the long-term unemployed and dislocated workers.

Mr. SPECTER. Mr. President, I rise today to request that the Senate, in legislating a jobs bill, give priority to those areas of the country that have suffered the most.

The President has forwarded a proposal to provide assistance for creating jobs. Congress must now decide what action to take and how this money is to be allocated. The temptation to manufacture pork-barrel measures which serve special interests only must be resisted. If we are to offer effective assistance to meet the critical needs of the many unemployed individuals throughout this country, the Congress must enact legislation that is targeted to reach the economic casualties of this ongoing recession.

In this regard, the Congress should approach this bill with its priorities firmly in place; assistance must be granted to regions that have incurred the most severe stress as a result of the recession. Many people, including the President, have been encouraged by the Department of Labor's most recent release of unemployment statistics. These numbers indicate that the jobless rate declined from 10.8 percent to 10.4 percent in January 1983. While this is positive news, it does not reflect the fundamental structural unemployment problem our economy is experiencing. Although the national unemployment rate declined, the rate for my State—Pennsylvania—increased from 12.9 percent to a staggering 13.6 percent. Other States and areas experienced similar increases. Some counties in Pennsylvania and throughout the rest of the country have more than 20 percent of their work force unemployed; some localities even exceed 50 percent.

Economic indicators suggest this country may be breaking the grips of a harsh recession, but I can offer convincing evidence that hard times persist where structural changes in our economy have left thousands of dedicated workers unemployed.

Certain segments of the economy are undergoing profound transition. Manufacturing industries continue to give way to service-oriented businesses requiring skilled labor. Martin Feldstein, the President's chief economic

adviser, estimates that dislocated workers comprise at least one-third of our unemployed work force. It is likely that these individuals will never regain their jobs, notwithstanding a prosperous recovery. These people were dedicated workers and deserve the opportunity to become contributing and productive members of our work force once again. Today, they are victims of our changing economy, uncertain whether unemployment compensation will be extended long enough for them to find work again. These individuals and their families rest uneasily as they are delinquent in their mortgages and unable to pay their bills.

Mr. President, it is incumbent upon this body to present a rational and thoughtful response to the unemployment dilemma this Nation faces. We must resist any temptation to fill this bill with miscellaneous projects and programs to meet the numerous and diverse needs of the many interests that call upon us to act. Instead, our action here must be intelligent and concentrated.

In the past, legislative efforts to combat the pains of recessionary times have exhibited a propensity to be diluted and short-term in nature. The diagnosis is indisputable; the medicine must be administered promptly and correctly. We are obligated to allocate the modest Federal resources we make available to those areas greatest in need. Only through acknowledging that certain elements of our work force require the focus of our efforts will we achieve the objectives of this proposal.

Mr. President, today I am offering a resolution that expresses the sense of the Senate that any increased assistance to address the critical unemployment problem should be targeted at those States suffering most from our sluggish economy. I am asking the Senate to resolve to channel any jobs program or antirecessionary assistance to areas afflicted with high unemployment. Furthermore, such program or assistance should provide special aid to the long-term unemployed and dislocated workers.

It is essential that we bear in mind those individuals that will be left behind in the wave of economic recovery. I am hopeful that the Senate will act swiftly to meet this critical need for jobs, and that the legislation we construct will assure the most equitable and effective distribution of Federal resources to alleviate the problem of unemployment.

Mr. DIXON. Mr. President, I am pleased to join my distinguished colleagues from Pennsylvania. ARLEN SPECTER, in sponsoring this resolution which will put the Senate on record as being committed to providing meaningful help to the people who need it most and the areas of the country which are hardest hit by this recession.

There are many proposals now pending before this Congress to provide assistance to the unemployed. It is certainly a problem of such critical dimensions, that we can never do enough to alleviate the problem. But we must try.

The administration has projected unemployment levels above 10 percent for the remainder of this year, and near that for the next 2 years. It is not that people are not trying to find work; they are and the media is full of examples—20,000 people in Milwaukee lined up in January for 200 jobs; 2,000 people in Peoria lined up for 100 jobs; 30,000 people in Chicago lined up for 2,000 jobs. The list is endless.

People are doing without the basic necessities, losing everything they have worked their whole lives to obtain; standing in line for hours to get a pound of cheese or a single stick of butter; losing their homes; keeping their heat turned off because they cannot afford the utility bills; neglecting medical care for themselves and their children because they no longer have issurance and do not qualify for medicaid.

The pain is real. The need, dire. Our responsibility is clear, and our agenda, vast.

AMENDMENTS SUBMITTED FOR PRINTING

OCEAN SHIPPING ACT

AMENDMENT NO. 5

(Ordered to be printed.)

Mr. METZENBAUM proposed an amendment to the bill (S. 47) to improve the international ocean commerce transportation system of the United States.

DEPARTMENT OF TRADE

AMENDMENT NO. 6

(Ordered to be printed and referred to the Committee on Governmental Affairs.)

Mr. COHEN submitted an amendment intended to be proposed by him to the bill (S. 121) to establish as an executive department of the Government of the United States a Department of Trade, and for other purposes.

NOTICES OF HEARINGS

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. ROTH. Mr. President, the Senate Committee on Governmental Affairs will not hold the scheduled hearing on proposed legislation to create a Department of Trade on Tuesday, March 1. The hearing will be rescheduled at a later date. For further information, please contact Mike Mitchell at 224-4751.

SUBCOMMITTEE ON LABOR, HEALTH AND HUMAN SERVICES, EDUCATION AND RELATED AGENCIES

Mr. WEICKER. Mr. President, I am pleased to advise the Senate that the Appropriations Subcommittee on Labor, Health and Human Services, Education and Related Agencies will hold its fiscal year 1984 public witness hearings on Thursday, April 28; Friday, April 29; Monday, May 2; and conclude on Tuesday, May 3. These hearings will be preceded by a hearing on Wednesday, April 27 when the subcommittee will take testimony from Members of Congress.

The deadline for interested groups and individuals to submit their requests for an opportunity to testify is Tuesday, March 15. All requests must be in writing and should be addressed to me in care of the Labor, Health and Human Services, Education and Related Agencies Appropriations Subcommittee, SD-186, Washington, D.C. 20510.

Those persons whose requests are received by March 15 will receive a letter providing instructions for their appearance before the subcommittee.

In addition, the deadline for those who only wish to submit statements for the hearing record will be Friday, May 6. Such statements must be no longer than seven double-spaced pages, and 3 copies should be sent to me in care of the subcommittee.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of public hearings before the Committee on Energy and Natural Resources to consider pending natural gas legislation. The hearings will be held on Wednesday, March 9; Thursday, March 10; Friday, March 11 and Saturday, March 12, beginning at 9:30 a.m. in room SD-366 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, room SD-360, Washington, D.C. 20510.

For further information regarding these hearings you may wish to contact Mr. David Doane at 224-7144 or Mr. Howard Useem at 224-5205.

SUBCOMMITTEE ON ENERGY RESEARCH AND DEVELOPMENT

Mr. DOMENICI. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Subcommittee on Energy Research and Development to consider the President's proposed budget for fiscal year 1984 for the Department of Energy's nuclear energy programs—other than the breeder reactor programs. The hearing will be held on Friday, March 4, beginning at 9:30

a.m. in room SD-366 of the Dirksen Senate Office Building. Testimony will be received from administration witnesses.

For further information regarding this hearing you may wish to contact Mr. Paul Gilman of the subcommittee staff at 224-4431.

AUTHORITY FOR COMMITTEES TO MEET

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

Mr. GORTON. Mr. President, I ask unanimous consent that the Subcommittee on Energy and Mineral Resources of the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Thursday, February 24, to hold an oversight hearing on abandoned mine land fund.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

STATE FISCAL CONDITIONS ENTERING 1983

● Mr. DURENBERGER. Mr. President, I would like to call to the attention of my colleagues a recent survey conducted for the National Conference of State Legislatures by Steven Gold and Karen Benker under the auspices of the Ford Foundation. The report on the findings of the survey is entitled "State Fiscal Conditions Entering 1983."

The authors characterize the fiscal conditions of the States as "exceedingly grim" as State legislatures prepare for their 1983 sessions. They found that only six States expect a year-end balance at or above the level traditionally considered the "minimum prudent balance"—5 percent of annual general fund spending—while 19 States are projecting actual deficits at the year's end. Furthermore, this fiscal stress is not specific to any particular region of the country. The survey found that "at least two States in each of the Nation's eight regions anticipate ending fiscal year 1983 with a deficit unless present policies are changed."

To meet the constitutional requirement of a balanced budget or the demands of prudent fiscal management, the survey found that all States intend to adopt "some combination of spending reductions and tax increases" in the coming legislative sessions. Moreover, the authors saw evidence that, based on current service levels, "ballooning revenue shortfalls" are in the offing for fiscal year 1984 as well.

This report is very useful for the comprehensive picture it yields of the States' fiscal condition. It is also of great importance, because it provides an explanation of why the States are presently in such fiscal straits. And it is only by carefully considering the causes, as well as the conditions those causes create, that Congress can determine what, if any, the Federal role should be in alleviating this fiscal pressure.

The report points to four basic explanations for the States' current fiscal dilemma. By far the most important explanation is the recession. In the words of the report, "the recession is the major source of State fiscal problems." This is both good news and bad news. It is bad news in that it means States' fiscal problems will almost certainly persist as long as the economy does not recover. It is good news in that it means most of the stress is not the result of a permanent structural defect in the Federal system.

Recognizing that the recession accounts for most of the fiscal conundrum facing the States also gives clear signals to Congress as to where Federal responsibility lies: To put in place policies that will insure a strong and sustained economic recovery. More than any aid program created in Washington, a vibrant economic recovery is the lasting solution to States' fiscal woes. Happily, we are beginning to see signs that such a recovery has begun. This also implies that Congress has a responsibility to monitor States' fiscal conditions closely during the recovery period for any signs of crisis at which time Federal action would be called for. We are not yet to that point in spite of the bad news in this report.

The second major explanation of fiscal distress cited by the report is the widespread tax cuts adopted by State and local governments in the late 1970's. The authors found that when States raise taxes in 1983, they will often be recouping some of the revenue given away during the recent period of tax relief. Table 9 in the report makes this point dramatically. To the extent that revenue shortfalls result from earlier tax cuts, the dilemma States face is more political than fiscal. The authors observe that "legislators and Governors do not enjoy raising taxes or cutting popular programs, but that course appears inevitable." Indeed, governing in a democracy was never meant to be easy. That is the essence of democracy.

The third explanation for the revenue shortfalls, while less important than the former two, is the most ironic. As the inflation rate has been brought under control, State and local tax collections, like those of the Federal Government, have fallen off. This aspect of the problem may therefore be the dark before the dawn as lower rates of inflation set the stage for true economic recovery and as real economic growth begins to increase tax collections once more.

The final explanation for States' fiscal problems offered by the authors of this report is the one of greatest concern to me in my role as chairman of the Subcommittee on Intergovernmental Relations. At precisely the time economic slump and declining inflation decreased State revenues, Congress has made major cuts in Federal aid to State and local governments. The overall contribution of these cuts to the fiscal stress revealed here should be put in perspective. They contribute little compared to the effects of the recession and lowered inflation. But such cuts have had their effect, and because they have come in programs that tend to deliver human services directly to people, they have worked together with the other forces mentioned here to produce hardship on certain segments of society.

Federal aid, Mr. President, cannot create jobs on any meaningful scale. Federal aid cannot make a significant dent in the infrastructure problem if it is anywhere near the magnitude we are led to believe. Countercyclical Federal aid intended to have macroeconomic effects to help end the recession is destined to be too little, too late and directed to the wrong place. However, Federal aid can, when delivered efficiently, help State and local governments meet emergency needs they otherwise would not be able to meet during fiscal hard times. And when a recession becomes so severe as to inflict unacceptable hardship on a relatively small segment of society, Federal aid, judiciously administered, can help to redistribute some of that hardship broadly across society.

This report is required reading as we begin to consider this year's Federal budget. If ever careful thought were called for, this is the year. Simple solutions seldom solve complex problems, but this year in particular, they are apt to make them worse. I ask that the report entitled "State Fiscal Conditions Entering 1983" be printed in the RECORD.

The report follows:

STATE FISCAL CONDITIONS ENTERING 1983

(By Steven Gold and Karen Benker,* fiscal affairs program, National Conference of State Legislatures)

SUMMARY

Fiscal conditions are exceedingly grim in most states as legislators begin their 1983 sessions. This is the overwhelming message of a survey of legislative fiscal officers conducted in December 1982 and January 1983.

Principal findings of the survey include the following points:

At the end of the current fiscal year, 19 states project deficits in their general funds and another 12 states anticipate having a

* Steven Gold is the Director of the Intergovernmental Finance Project and Karen Benker is a research analyst. This report was prepared with financial support from the Ford Foundation. The views expressed are the authors' and do not reflect the positions of the Ford Foundation or NCSL.

year-end balance of 1 percent or less of their annual general fund spending. At the other extreme, only six states expect a balance of more than 5 percent, which has traditionally been regarded as the minimum prudent balance.

Thirty-five states have reduced their spending for the current fiscal year below the level in their original budgets for fiscal year 1983.

The reason for these cutbacks is a plague of revenue shortfalls that has afflicted nearly every state. As the recession has persisted much longer than expected, all but three states have seen their tax revenue flow in more slowly than anticipated in their budgets.

As a result of amendments to budgets adopted in most states, the median increases of revenues and expenditures are 5.5 percent and 6.4 percent respectively. This is less than the inflation rate for the goods and services which states purchase.

Total state employment has been decreasing since mid-1981. During the past year there has been a decrease in the number of state workers in 28 states.

All regions of the country have been affected by fiscal miseries. At least two states in each of the nation's eight regions anticipate ending fiscal year 1983 with a deficit unless present policies are changed.

While the budget problems of the states are similar in 1983 to those of 1982, the outlook is that the policies adopted in many states will differ. Tax increases are likely to play a much larger role in budget adjustments than they have in many years. Meeting in special sessions during the last few weeks of 1982, five states raised either their personal income or general sales tax or both. This is probably a harbinger of things to come.

If the states do resort to general tax increases in 1983, it will represent a major policy shift for most of them. Between fiscal years 1978 and 1982 state taxes fell as a percentage of personal income in 44 states. The national average of state taxes in relation to personal income decreased from 7 percent to 6.5 percent during those four years.

In addition to the widespread tax cuts adopted in the wake of the Tax Revolt of the late 1970s, the recession is the major source of state fiscal problems. The reduction of federal aid and the drop in the inflation rate (which lowered tax collections) also contributed to budget difficulties.

The results of the survey confirm the gloomy prognosis of a survey by the National Governors' Association and the National Association of State Budget Officers compiled in December. Conditions are considerably worse, however, than the earlier survey reported. For example, the number of states anticipating deficits is more than twice as great.

All states will adopt some combination of spending reductions and tax increases to eliminate or reduce their prospective deficits, so the actual number of states ending the fiscal year with deficits will certainly be less than the survey indicates.

Although it was not the focus of the survey, the outlook for fiscal 1984 budgets is also very bleak. Unless the national economy recovers strongly, balancing state budgets will continue to be difficult.

Any report on state fiscal conditions today will have a familiar ring. One year ago an NCSL report began this way: "With their revenues buffeted by the national recession, the majority of states entered 1982 either in deficit or teetering on the brink of deficit."[1] In July, summarizing state budget actions, another report stated, "State legislatures met this year amidst perhaps the worst fiscal conditions in forty years . . . Fiscal conditions are bleak in most states."[2]

Each of these statements made in 1982 is just as true today but there are two important differences now. First, state fiscal conditions have seriously deteriorated since mid-1982. Second, while most states are still teetering on the brink of deficits, 1983 will not be a re-run of 1982 because the policies adopted are likely to differ. Indications are that in 1983 raising taxes will play a much larger part in solving budget problems than was true in 1982.

Last year most states dealt with their budget problems by holding the line on spending and making minor adjustments in their taxes. During the regular legislative sessions held in the first half of 1982, only nine states raised either their personal income or general sales tax.[3] Budgets were constructed on the assumption that an economic recovery beginning during the late summer would boost revenues and keep budgets in the black. When the recession not only continued but intensified as the year progressed, many state budgets were thrown out of balance.

Virtually every state is required to balance its budget annually. Because of revenue shortfalls two-thirds of the states—an unprecedented number—have already reduced their spending for this fiscal year below the level originally enacted. In many states, however, further spending reductions or tax increases are needed to avoid deficits for the current fiscal year. In addition, legislation will be wrestling with imbalances in their fiscal year 1984 budgets (for the period beginning July 1) because of the continuing weak economy.

WHAT THE SURVEY RESULTS MEAN

This report described the fiscal position of the states as of early January, 1983. It is based on results of a survey of legislative fiscal officers conducted in December 1982 and January 1983. In most states the information reflects projections which have been revised within the past few weeks in preparation for the coming legislative sessions. Many states are understandably unwilling to provide updated estimates to NCSL before they have been released to the public at large.

The survey dealt primarily with general fund spending and revenue, which does not include certain special funds, such as for highways in most states. The general fund accounts for the majority of total spending in nearly all states, and it is the focus of most attention in budget deliberations. In some instances, states earmark a large portion of tax revenues for specific purposes. For example, Alabama and Utah have separate school funds; for purposes of this report, these funds have been added to the general fund. A number of states, particularly those with extensive energy industries, dedicate a portion of their tax revenue collected from those industries to trust funds. Federal aid is generally not included in the general fund, so it is not reflected here.

In recent years 22 states have created contingency funds or "rainy day funds". These funds receive revenue in "good years" which can be used to help finance services in years when revenue collections are less than normal. This year's survey, unlike previous ones, includes revenue in these funds as part of the balances available to states. To omit them would understate the resources available.

A key indicator of fiscal conditions is how large a state's year-end balance is in relation to its total spending during a year. In the past, states generally viewed a 5 percent balance as a prudent level to maintain. One reason to keep such a large balance is to guard against unexpected decreases of revenue or emergencies requiring increased spending. Additionally, states must allow for variations in cash flow during the year. Revenue flows in at a greater pace during the second half of the fiscal year (January to June) than during the first half, but spending occurs relatively evenly throughout the year. Therefore, the balance at the start of the fiscal year (July 1 for 46 states) is considerably higher than the average throughout the year. The need for a 5 percent balance may be less than it was in the past because states have adopted more sophisticated cash management practices, but balances of 1 percent or less definitely cause serious problems.

States with projected deficits or small surpluses will undoubtedly take action during their 1983 legislative sessions to adjust revenues and spending. As a result, the actual balances in these states at the end of fiscal year 1983 may be larger than this survey indicates. For example, last year's NCSL January survey indicated that 30 states faced deficits or anticipated year-end balances of one percent or less of general fund spending, but by the end of the fiscal year only 19 states had deficits or such small balances.[4]

MAJOR RESULTS OF SURVEY

As noted above, the prospective year-end balance is a very important indicator of state fiscal conditions. However, it is susceptible to misinterpretation if viewed in isolation. For example, some states in the last two months of 1982 enacted major increases of sales and income tax rates. The year-end balance in these states is now expected to be positive, although large forecasted deficits had prompted the tax increases. Therefore, this survey considers not only the year-end balance, but four other indicators as well—the actions already taken to deal with budget problems, the growth rates of spending and revenues, the frequency of shortfalls below anticipated revenues, and changes in state employment levels.

Balances: Surplus or deficit

A very significant indicator of budget problems is that 31 states expect to conclude fiscal year 1983 with a balance of one percent or less or their annual spending, including 19 states which at this time anticipate deficits. Eight other states forecast balances between 1 and 3 percent of spending and 5 states anticipate balances of 3 to 5

[1] Steven Gold and Karen Benker, "State Fiscal Conditions as States Entered 1982" (NCSL, Legislative Finance Paper 13, 1982), p.1.

[2] Steven Gold, Karen Benker, and George Peterson, "State Budget Actions in 1983" (NCSL, Legislative Finance Paper 27, 1982).

[3] Florida, Nebraska, Washington, Vermont, and Wisconsin raised their general sales tax; Michigan, Ohio, Minnesota, and Oregon raised their income taxes. Gold et. al. "State Budget Actions," pp. 7-12.

[4] The only states with other dates for the end of their fiscal years are New York (March 31), Texas (August 31), Michigan (September 30), and Alabama (September 30). As originally reported by NCSL, 29 states anticipated surpluses of 1 percent or less or deficits. Shortly after the survey was completed, Wisconsin lowered its revenue estimate, shifting it into the deficit category.

percent, for a total of 44 states with balances below 5 percent.

Tables 1 and 2 report the prospective balances for 1983 in comparison with those for 1982. As Table 1 shows, in all but four cases 1983 surpluses are smaller than those that actually occurred in 1982. Table 2 compares the 1983 projections with similar forecasts reported by NCSL in January 1982. The 19 states projecting a deficit now are a considerably greater number than the 13 making that projection a year ago.

[1] Includes contingency fund.

[2] Figures compare changes in the fiscal year 1979–81 biennium budget period to the fiscal year 1981–83 budget period. Annual figures are not available.

Notes.—

Alabama: Figures shown combine the general fund and the education fund. Then fiscal year 1983 general fund revenue projections indicate a $6 million deficit, while the education fund shows a $25.1 million balance which will be prorated to $0 by the end of the fiscal year.

Alaska: The revenue and expenditures figures do not reflect reversions and changes to other funds that relate to the general fund.

Arkansas: A $50 million working capital fund is included in the balance, but it is used solely for cash flow purposes.

California: The projected deficit estimates range from $1 to $1.8 billion.

Illinois: State officials require that a $200 million balance is necessary for cash flow purposes, so that the real shortfall is $200 million.

Maine: Projecting $1.2 million fiscal year 1982 balance, but actual revenues are down by $4.5 million. Also, in November 1982 the voters passed a personal income tax measure that is retroactive to tax years 1981–82 which will cost the state $32 million in tax rebates. This initiative is likely to be amended by the legislature.

Minnesota: A deficit was allowed in fiscal year 1982 as long as the budget is balanced at the end of the biennium which is June 30, 1983.

Montana: Fiscal year 1982 revenues came in higher than originally anticipated, so fiscal year 1983 revenues were revised upward. In January 1983, fiscal year 1983 revenue estimates were revised downward.

Nebraska: Fiscal year 1982 closing balance and fiscal year 1983 balance forward does not include $18.6 million of outstanding interfund borrowing.

New Jersey: Figures shown combine the general fund and the property tax relief fund.

Ohio: Unofficial revenue estimates show the general fund short $200 to $500 million.

Oklahoma: Due to unique budgeting methods, carryovers and balances may not be comparable to other states.

Oregon: Unofficial revenue estimates show the general fund balance lower than indicated in this table.

Tennessee: Unofficial revenue estimates show the general fund short $130 to $140 million. Monthly allotment holdbacks have already been initiated and savings to date total $42 million.

Texas: Figures shown combine the general fund with other major State funds.

Utah: The uniform school fund is combined with the general fund.

TABLE 2.—PROJECTED YEAREND BALANCES, FISCAL YEAR 1982 AND FISCAL YEAR 1983

Balance as a proportion of annual appropriations	Fiscal year 1982		Fiscal year 1983 as projected in January 1983
	As projected in January 1982	Actual	
Deficit	13	5	19
1 percent or less	17	14	12
1.1 to 3 percent	3	10	8
3.1 to 5 percent	6	4	5
More than 5 percent	11	17	6

Many more states would have been classified as expecting a deficit were it not for the budget cuts and tax increases which have already been implemented (described in Appendices A and B). Likewise, most or all of the states presently projecting a deficit will restore a balanced budget before the end of the fiscal year by raising revenue, reducing spending, or some combination of the two. Only five states finished 1982 with deficits, although 13 had projected one in the January survey by NCSL.

During the past five years, there have always been at least a half dozen states with large balances of 10 percent or more, but that is not true at the present time. Only Wyoming reports a balance of that magnitude. The main reason for the absence of states with large balances is the downturn in the oil industry. Last year in January five of the seven states projecting balances over 10 percent were among the major oil producing states.

Questions sometimes arise as to how it is possible for states to finish their fiscal years with deficits. In some states the balanced budget requirement applies only at the end of a biennial budget period, not at its midpoint. Elsewhere, states must adopt a balanced budget but are not forced to make adjustments if an unexpected deficit arises. In most states, however, the actual budget (not merely the enacted one) must be balanced at the end of each fiscal year.

Actions already taken

Revenue shortfalls have forced most states to amend the budgets they had initially enacted for FY 1983. Table 3 shows the percentages by which spending and revenues have been raised or lowered from the levels incorporated in the initial budgets. The great majority of changes are in a downward direction.

TABLE 3.—PERCENTAGE CHANGE IN REVENUES AND APPROPRIATIONS DURING FISCAL YEAR 1983

[1] Figures compare changes in the fiscal years 1979–81 biennium budget period to the fiscal years 1981–83 budget period. Annual figures are not available.

Spending Reductions: One of the most dramatic signs of state fiscal problems is that 35 states have already reduced spending below the level set when the 1983 budget was adopted. Most of these reductions were considered necessary to avoid deficits although in some instances these actions were taken to prevent balances from falling to an undesirably low level.

A description of these budget cuts is provided in Appendix B. Most reductions were on an across-the-board basis, with exemptions for welfare, Medicaid, aid to local governments including public schools, and certain other programs. In many states, however, aid to local governments has been reduced below the amount budgeted, although aid was often cut by a smaller percentage than funds for states agencies. In a few states, even income maintenance programs have been reduced.

These spending reductions are occurring in budgets which were fairly lean when originally passed. The average increase in appropriations for FY 1983 was less than 8 percent before the cuts.

Tax increases: From July to late November, the only response to disappointing revenue collections was to reduce spending. In the last several weeks of 1982, five states went into special session and increased their sales and/or income taxes.

Minnesota raised its sales tax from 5 percent to 6 percent and added a 3 percent

surtax on an already existing surtax of 3.5 percent. Both actions expire June 30, 1983.

Indiana raised its sales tax from 4 percent to 5 percent and also increased its income tax. Both actions are permanent.

New Jersey raised its sales tax from 5 percent to 6 percent and increased the income tax rate for returns over $50,000. Both actions are permanent.

Mississippi temporarily raised its sales tax from 5 percent to 5.5 percent effective in 1984 and increased its income tax beginning in 1983.

Nebraska increased its income tax from 17 percent to 18 percent of federal income tax liability.

The results of recent special sessions are described further in Appendix A.

Many actions taken by states during 1982 were in the nature of stop-gap measures: they helped to balance the FY 1983 budget but often left unresolved problems for FY 1984. Examples include acceleration of tax payments, postponement of expenditures, interfund transfers, and issuance of short term debt. See Appendix C for details on which states employed each of these devices.

Acceleration of tax payments: Seventeen states speeded up tax collections, providing them with a one-time windfall. For example, Missouri is now collecting income tax withholding from large firms on a weekly basis rather than monthly, netting the state an additional $34 million this year.

Postponement of payments: Eighteen states deferred certain expenditures into the next fiscal year. For example, in a special session Indiana postponed over $250 million in payments to local governments until FY 1984. Michigan recently postponed $500 million of aid payments. Other states that deferred expenditures include California, Illinois, Minnesota, New Jersey, and Wisconsin.

Interfund transfers: In order to cope with cash flow problems, at least 16 states borrowed from pools of money other than the general fund. One state to do this was Wisconsin, which temporarily borrowed $200 million and must repay this loan with interest. Other states include Illinois, Michigan, Nebraska, Oregon, New York, and Utah. States that transferred funds directly into the general fund and are not obligated to repay the funds include California, Kentucky, and New Hampshire.

Short term debt: This past year several states borrowed in the short term credit market in response to cash shortages. In July 1981, Minnesota legislators raised the short term debt limit from $100 million to $360 million, and in January 1982 increased the limit again to $850 million. The full $850 million must be repaid by the end of June 1983. New Hampshire also raised its debt limit from $40 million to $60 million.

Michigan, which has been particularly hard hit as a result of foreign trade competition, obtained a loan guarantee from Japanese bankers so that the $500 million borrowed in October 1982 would carry a lower investment risk and reduce Michigan's interest payments.

California, Idaho, Rhode Island, and Washington were other states that borrowed unusually large amounts in FY83 to help pay bills.

Growth of revenues and expenditures

The median increases for FY 1983 after taking revisions into account are 5.5 percent for revenues and 6.4 percent for expenditures. These increases are lower than the inflation rate for goods and services states purchase (which has been increasing more rapidly than prices of consumer purchases).[5] Table 4 shows the reported increases for each state.

[1] Figures compare changes in the fiscal year 1979–81 biennium budget period to the fiscal year 1981–83 budget period. Annual figures are not available.

Interpretation of increases for many states is difficult because of devices employed to maintain budget solvency. As noted above, eighteen states deferred spending from one year to the next, while 17 states accelerated tax collections into an earlier year. Such actions can seriously distort comparisons between years. For example, suppose that spending is planned to rise from $1.00 billion to $1.05 billion, a 5 percent increase. Then, in order to avoid a deficit in the earlier year, $.05 billion of spending is deferred from the first year to the second. Since the spending levels will now be $.95 billion and $1.1 billion respectively, the percentage increase between the two years is nearly 16 percent rather than 5 percent. California, Colorado, Illinois, and New Jersey are among the states where this occurred.

[5] U.S. Office of Business Economics, Surveys of Current Business.

Rate of revenue inflow

As Table 5 shows, nearly every state reporting indicated that revenue was coming in more slowly than had been anticipated. Only three states responding to this question did not indicate that it faces a shortfall. States with particularly large shortfalls were Colorado, Idaho, and Michigan. As noted above, states with large petroleum industries have not been spared in this recession. Collections have been depressed not only for severance taxes (i.e., those directly on the extraction of oil and gas), but also for personal and corporation income taxes and general sales taxes.

TABLE 5.—FISCAL YEAR 1983 REVENUE SHORTFALLS AS OF JANUARY 1983

[Dollars in millions]

	Amount of projected shortfall	Percent of general fund revenues
Alabama	$130–160	6.7–8.2
Alaska	[1]

Wyoming	16	4.0

[1] Revenue equaled or exceeded projection.

Employment policies

After rising for 35 years, state workforces have been decreasing since mid-1981, according to data collected by the Bureau of Labor Statistics (BLS).[6] NCSL survey data supports the BLS findings. Twenty-eight of the states surveyed have reduced the level of their state workforce from 1981 to 1982. In comparison, the average annual growth of state employment was 3.3 percent between 1969 to 1980. The largest decreases in 1982 occurred in Nevada, New Hampshire, and Michigan, where employment declined 16

[6] According to the U.S. Bureau of Labor Statistics state employment in October 1982 was 1.5 percent below its level a year earlier.

percent, 10 percent, and 7.3 percent respectively.

Appendix D reports changes in employment levels and other policies affecting workers.

In addition to cutting back employment levels, 21 states currently have a hiring freeze in effect. Other states effectively have an "informal" hiring freeze since budget cuts have deterred agencies from filling vacant positions. In January 1983 California became the latest state to initiate a freeze, while other states such as North Carolina, Iowa, and Illinois have had hiring restrictions in effect since at least 1980.

Seventeen states postponed, scaled down, or eliminated scheduled Cost of Living Adjustments (COLA) and/or merit raises for state employees due to budget problems. For example, North Dakota reduced the average COLA from 8 percent to 4 percent, and California eliminated a 5 percent COLA, for savings of 1.4 billion.

Financially hard-pressed states also adopted more drastic measures to cut employee costs such as: reducing the hours worked during the work week; initiating mandatory furloughs or "payless vacation" days; and adopting a lagged payroll which lengthens each pay period until one entire payroll is deferred into the next fiscal period.

More specifically, during a December special session, Minnesota legislators decided to temporarily transfer part of the cost of the state pension program to employees, resulting in a 2 percent wage reduction. This action saved the state $63 million. Several states considered reducing work weeks, although only Oregon came close in adopting this option for FY83 by reducing the 40-hour work week to 36 hours. In negotiations with the unions, this measure was exchanged for elimination of a COLA. Thus far, only Idaho has temporarily reduced the work week for the last 6 weeks of FY82 to balance the budget.

In a similar action, Illinois asked state employees to take 5 day furloughs throughout this fiscal year, while in Alabama negotiations are under way for public safety employees to take 1 day unpaid leave every 2 weeks.

In New York and Washington less drastic action was taken when these states endorsed a plan to defer one pay period into the next fiscal year. Employees in Washington took the state to court over this action, but the court upheld the right of the state to enact this policy.

At NCSL's Annual Meeting in July 1982, George Peterson of the Urban Institute stated that state employees had been hit harder than any other group by state budget ajdustments up to that time.[7] That still appears to be true.

REGIONAL PATTERNS

Table 6 shows how the prospective year-end balances for 1983 vary across the country. Fiscal distress is found in all regions. Each of the eight regions of the country has at least two states with a prospective deficit. In all regions except the Plains, at least half of the states anticipate a balance of 1 percent of less. New England has the most uniformly dismal fiscal conditions, with every state projecting a balance of 1 percent or less.

TABLE 6.—GENERAL FUND BALANCES FOR YEAREND, 1983 BY REGION

Region	Percent				Deficit	Total
	Over 5	3.1 to 5	1.1 to 3	0 to 1.0		
New England	0	0	0	2	4	6
Mideast	1	0	1	1	2	5
Great Lakes	0	0	1	2	2	5
Plains	1	1	3	0	2	7
Southeast	0	1	3	6	2	12
Southwest	1	1	0	0	2	4
Rocky Mountain	1	1	0	0	3	5
Far west	2	1	0	1	2	6
Total	6	5	8	12	19	50

The Sunbelt is no better off than other regions. Deficit states in the South include Louisiana, Virginia, Arizona, and New Mexico. Two of these states—Louisiana and New Mexico—are among those where booming severance taxes during the late 1970s and early 1980s had produced overflowing state treasuries. Due to the "oil glut" severance tax collections in 1982 fall short of 1981 levels.

The figures in Table 6 illustrate why the year-end balance can be a misleading indicator of budget problems. Fiscal conditions in New England are no worse than in the Pacific Northwest or the Great Lake states—the two hardest hit regions of the country—but several states in those regions, such as Indiana, Ohio, Wisconsin, Oregon, and Washington, have already raised taxes and cut expenditures sharply. No New England state other than Vermont raised its sales or income tax in 1982, nor have most New England states made large spending reductions in FY 1983 budgets.

Table 7 examines regional patterns from another perspective—differences in the size of revenue shortfalls. The Great Lakes, Rocky Mountain, and Far West states had the highest proportion of states with shortfalls of 5 percent or more.

TABLE 7.—REVENUE SHORTFALLS BY NUMBER OF STATES, BY REGION

Region	Under 5 percent	Over 5 percent
New England	3	2
Mid-East	6	0
Great Lakes	1	4
Plains	4	3
Southeast	6	6
Southwest	2	2
Rocky Mountain	1	4
Far West	1	5

Note.—In cases where the revenue shortfall was estimated within a range, the high point of the range was used to classify the state.

In general, Great Lake states such as Indiana, Ohio, Wisconsin, Minnesota, and Michigan and states of the Pacific Northwest—Idaho, Oregon, and Washington—have had the most serious fiscal problems during the past year.[8]

Figure 1 shows unemployment rates in each state for November 1982. While there are exceptions, the states with extremely high unemployment rates tended to have more serious state fiscal problems.

CAUSES OF FISCAL PROBLEMS

Several factors have contributed to the serious fiscal problems facing most state governments. The recession is the most important consideration, since people who are unemployed pay little if any income tax and relatively little sales tax, while companies with low profits pay little if any corporate income tax. The decrease of inflation added to states' problems, since it lowered the yields from the sales tax and other taxes while having a much smaller impact on costs. The reduction of federal aid also contributed to state fiscal woes, although it had less effect than the impact of the recession. Finally, the legacy of the state tax cuts enacted in reaction to the Tax Revolt of the late 1970s sharply reduced the revenue which many states had available. As Table 8 shows, in 44 states the tax burden as a proportion of personal income decreased between 1978 and 1982. Nationally, state taxes fell from 6.98 percent to 6.48 percent of personal income during that period.[9]

COMPARISON WITH NATIONAL GOVERNORS' ASSOCIATION SURVEY

In December 1982 the National Governors' Association and the National Association of State Budget Officers published a survey very similar to the present one, "Fiscal Survey of the States: December 1982 Update." In a news release accompanying the report, it was noted that ". . . the fiscal situation in the states is probably worse than portrayed here. Several states have not recently updated their estimates; and since revenues across the country were lower than expected this fall, these early estimates will no doubt prove optimistic."

The current survey confirms the NGA-NASBO prediction. Since the information in this survey is more current than that reported by NGA and NASBO, it is not surprising that the outlook is bleaker than the earlier report described. For the 41 states reporting in the NGA-NASBO survey, this survey has lower fiscal year 1983 year-end balances in 19 states, roughly the same balances in 17 states, and higher balances in only 5 states. In four of the five cases where the NGA-NASBO figure was lower, the discrepancy can be explained by state budget adjustment actions adopted since the earlier survey or by the inclusion in this report of "rainy day funds" which NGA-NASBO did not include. (In this comparison, if the difference in year-end balance was projected to be less than one percent, the two surveys were considered to be in agreement.)

The eight states where the current survey portrays a considerably weaker fiscal situation than NGA-NASBO are:

PROJECTED FISCAL YEAR 1983 BALANCE

	NCSL	NGA-NASBO
Connecticut	−1.9	0.1
Michigan	−13.8	0
Iowa	−4.0	.5
Louisiana	−3.5	.5
Colorado	−6.1	−1.7
Idaho	−16.1	.7
Montana	4.2	10.4
Wyoming	11.0	26.9

Despite these differences, the two surveys are in substantial agreement as to the severity of state fiscal problems. As the NGA-NASBO report states, "The recession and other factors have caused state fiscal conditions to deteriorate badly through 1982." The accompanying news release added, "This is the ninth NGA-NASBO report and is by far the bleakest yet."

CONCLUSION

It appears that legislators and governors will face very tough decisions as they develop budgets for fiscal year 1984. Although this report has concentrated on prospects for the current fiscal year, the magnitude of problems in the year beginning July 1 is even greater. Early revenue projections, based on current service levels, indicate ballooning revenue shortfalls. Some examples:

California is forecasting a shortfall as high as $4.5 billion.

New York's impending deficit may be $1.8 billion.

Wisconsin and Minnesota face biennial budget gaps of $1.3 billion and $1.5 billion respectively. The shortfall in Wisconsin had been estimated at $2.5 billion prior to a recent special session at which some temporary tax increases were made permanent.

Reports from around the country as well as the results of special sessions held in December suggest that 1983 will see more increases of major state taxes than any year in more than a decade. This does not mean that states are increasing the size of government. As John Shannon, Assistant Director of the U.S. Advisory Commission on Intergovernmental Relations, said recently: [10]

"The evidence suggests that a major state tax increase is a signal of fiscal desperation—not the proof that the big spenders are once again in the saddle. Since Proposition 13, a state government only turns to its citizenry for a major tax transfusion when it is clearly apparent that the state is suffering a severe fiscal hemorrhage—a large revenue shortfall due to the economic recession."

Tax increases of 1983 should be viewed in the context of the tax reductions of recent years. When states raise taxes in 1983, they will often be recouping some of the revenue given away during the recent period of tax relief.

A year ago we wrote, "one implication of this survey is that in most states budget deliberations this year will be more excruciating than usual." That is also true this year. Legislators and governors do not enjoy raising taxes or cutting popular programs, but that course appears inevitable.

Budget-making in the states contrasts sharply with budget-making in Washington, D.C. When states confront deficits, they nearly always act to eliminate them. Fiscal discipline is much stronger in the state capitols than in our national capital.

[10] John Shannon, "Fiscal Federalism after Proposition 13: Federal and State-Local Spenders Go Their Separate Ways" (Paper presented at American Economic Association meetings, Dec. 29, 1982).

APPENDIX A.—FISCAL YEAR 1983 SPECIAL SESSIONS

Indiana

A special session was held in December to resolve an estimated $452 million shortfall. Actions include: permanently raising the sales tax from 4 percent to 5 percent beginning January 1983; permanently increasing the flat rate personal income tax from 1.9 percent to 3 percent beginning January 1983; postponing $286 million in payments to fiscal year 1984; and cutting the budget $59 million.

Minnesota

In December with a $312 million deficit projected for the remainder of the fiscal year 1981-83 biennium, the legislature chose to: add a 3-percent personal income tax surcharge on top of the 3.5-percent surcharge enacted for 1983 earlier, with both scheduled to sunset in June 1983; made the temporary sales tax increase from 4 percent to 5 percent permanent; enacted a temporary 1-percent sales tax increase bringing the rate to 6 percent which will expire June 1983; shift $100 million of payments to fiscal year 1984; lower benefits for State employees; and cut the budget $79 million.

Mississippi

The Governor called a special session in December to propose a State public school kindergarten program and raise the appropriate revenue. The legislature voted to: increase the sales tax from 5 percent to 5.5 percent effective January 1984 to December 1986; and created a third top tax bracket of 5 percent for taxpayers with income over $10,000 effective January 1983 to December 1986.

Nebraska

In November, the legislature met and cut the budget by $18.1 million. The Board of Equalization: postponed the scheduled sales tax decrease from 3.5 percent to 3 percent from December 1982 to December 1983, and increased the personal income tax from 17 percent to 18 percent of Federal tax liability retroactive to tax year 1982. This will automatically increase the corporate income tax since this tax rate is tied to a percentage of the personal income tax rate.

New Jersey

During the last week in 1982, the legislature met in a special session and: permanently raised the sales tax rate from 5 percent to 6 percent January 1983; increased the top personal income tax bracket from 2.5 percent to 3.5 percent on income in excess of $50,000 effective January 1983; ordered the Governor to cut the budget by $30 million; and provided for supplemental appropriations of $85 million primarily for aid to education that was cut out earlier.

New York

The legislature resolved the $200 million deficit faced by the Mass Transit Authority in New York City by raising all business taxes for 2 years in areas served by the MTA. The State deficit and New York City deficit remains unresolved.

Wisconsin

In a special session during the first week in January, the legislature made the previously enacted temporary sales tax and cigarette tax increase permanent.

APPENDIX B.—STATE BUDGET CUTS IN FISCAL YEAR 1982 AND FISCAL YEAR 1983

State	Fiscal year 1982 budget cuts	Fiscal year 1983 budget cuts (actual and pending)
Alabama		In October 1982, general fund was over $55 million or 12.4 percent. Education fund cut $96.4 million or 6.7 percent.
Arizona	Cut 5 percent across the board exempting corrections	Agency budgets cut 10 percent in July 1982 to save $65 million. Shortfall of $155 million pending.
Arkansas		Budget reduced by 2 percent or $27.5 million. Second shortfall of $17 million pending.
California	Cut $67 million or 2 percent from State agency budgets	Cut $70 million or 2 percent from state agency budgets. Shortfall of $1.5 billion pending.
Colorado	Cut 1 percent across the board	Cut 2 percent across the board to save $30 million in October 1982. Second shortfall of $102 million currently pending.
Connecticut		Cut 5 percent from agency budgets in January 1983. Will save about $20 million. $60 million shortfall will probably roll over into next fiscal year.
Delaware		Shortfall of $28 million. Options include cutting the budget or spend down rainy day fund.
Florida	Cut $27 million in agency budgets. Remainder of $190 million shortfall was taken from working capital fund.	First across-the-board budget cut in August 1982 totaled $109 million or 2 percent of the budget, with no program exemptions. Second across-the-board in December, cut another 2.5 percent to save $136 million. Remaining shortfall $166 million made up with other budget adjustments.
Georgia		State agency budgets cut by $106 million. Cut represents 2.8 percent of total general fund budget.
Idaho	Cut 4 percent across the board with only 2 months left in fiscal year 1982 to save $17 million. State employees worked 4-day workweeks for 6 weeks.	Cut 10.5 percent across the board, exempting school aid and corrections, to save $19 million. Second shortfall of $70 million pending.
Illinois		Cut $164 million in selective cuts; second shortfall pending.
Indiana		Budget cut 4.5 percent or $117 million for biennium. Second shortfall for fiscal year 1984 totaled $452 million or 19 percent of budget. Primarily raised taxes in special session with some cuts.
Iowa		Voluntary State agency cuts totaling $70 million or 3.4 percent of general fund. Second shortfall of $80 million pending.
Kansas		Agency budgets cut 4 percent or $22.5 million from budgets in July. Second short fall of $60 million partially corrected with 4 percent cuts to school and entitlement budgets saving $22 million.
Kentucky	Cut 6 percent across the board to save $282 million	Revenues are down by $102 million. Cut 3 percent of the budget, but exempted higher education, K–12, and entitlement programs. This cut will also apply to fiscal year 1984.
Louisiana		Cut agency budgets $76 million in October. Represents 1.8 million of general fund. Second shortfall of $149 million pending.
Maine		This past election, an indexing measure was passed by the voters which will cost the State an estimated $32 million. In addition, revenues are down $4.5 million.
Maryland		Cut 1.5 percent or $10 million from agency budgets in November. Exempted Department of Public Safety and Corrections.
Michigan	Total cuts were $778 million or 15 percent of general fund. There were 4 rounds of selective cuts.	No cuts enacted, but current revenue shortfall is $660 to $900 million or 14.4 percent to 19.7 percent of total general fund budget.
Minnesota	Budget cut 5 percent for biennium or $450 million	In December 1982, special session additional cuts were made totaling $145 million.
Mississippi	Cut $59 million or 4.8 percent from general fund. Reduced ½ of the scheduled increase from the prior year.	Projected $85 million shortfall. Cut the budget 1.5 percent to save $20 million.
Missouri	In June 1981, cut $75 million or 3.5 percent of general fund in selective cuts	In October 1982, cut $95.3 million or 4.1 percent; 10 percent in agency budgets and 5 percent higher education and K–12 budgets.
Nebraska	In November 1981, cut $17.1 million or 2.3 percent of the general fund. Exemptions include aid to local governments and schools, welfare, and corrections.	In November 1982, cut $16.3 million or 2.2 percent of the budget with few exemptions.
Nevada		Cut $33.6 million or 7.9 percent of general fund in selective cuts.
New Hampshire	In 1981 session, cut 10 percent in personal services for both fiscal year 1982 and fiscal year 1983 to save $14 million.	In addition to the cut made in the 1981 session, in the 1982 session another cut of 5 percent was enacted. Also in January 1983, a 4 percent across-the-board cut was made to save $15.7 million.
New Jersey		In January 1983, selective cuts of $30 million or ½ of 1 percent of the general fund were made. Aid to local government was not affected.
New Mexico		Revenue estimates down $165 million. $100 million will be made up with contigency funds. Remaining $65 million may be made up with 3.5 percent cuts.
North Carolina	In November 1981, 5 percent of the budget was frozen to save $150 million	In July 1982, a 5 percent across-the-board cut was enacted and in September was increased to 6 percent to save $127 million. Smaller cuts to public school and human service programs were made.
North Dakota	In Noermber 1981, cut $26.7 million from State agency budgets for the biennium. Total equals 3 percent of general fund.	The November 1981 cut was also applied to fiscal year 1983.
Ohio	In February 1982, cut $102.6 million or 1.7 percent of general fund. Selective cuts exempted welfare and medicaid. In March 1982, cut another $56 million in across-the-board cuts (some exemptions) or 0.9 percent of general fund. In April 1982, cut $50.9 million or 0.8 percent of general fund.	In July 1982, cut $321 million or 4.6 percent of general fund. Most State agencies were cut 10 percent. Second short fall of $200–$500 million pending.
Oklahoma		October allotments held back 5.5 percent to save $8 million. November allotment held back 13 percent to save $18 million. Basic school aid, welfare, and medicaid cut only 4 percent.
Oregon	In March 1982, selectively cut $126.5 million. Reduced property tax relief program. basic school support (3.6 percent), and State agencies (up to 6.4 percent).	In June 1982, cut selectively $73.7 million from agency budgets, employee salary adjustment, property tax relief program, and basic school support. In September 1982, cut $14 million in agency budgets and property tax relief program. Total cuts equal 6.9 percent of general fund.
Pennsylvania	Cut general fund 1 percent across the board exempting certain basic educational subsidies to save $44 million.	$164 million shortfall pending.
Rhode Island	Budget cut selectively $10 million or 1.2 percent in December 1981	$35 million shortfall pending million.
South Carolina	Cut 2.2 percent across the board exempting debt service in December 1981 to save $40 million.	Cut the budget 4.6 percent to save $80 million.
Tennessee		Monthly cuts in allotments amount to $42 million or 2.2 percent of the general fund. Cuts were selective exempting public shcool aid, but cutting high education 5 percent. Total projected shortfall is $130–$140 million.
Utah		2 percent voluntary cuts in the general fund and the uniform school fund to save $18 million. Second shortfall was $30 million corrected with a one-time windfall due to a court decision.
Vermont	Selectively cut $2 million or 1 percent of general fund	Selecetively cut $4.3 million or 1.3 percent of general fund. General fund still short $8 million.
Virginia		Cut State agency budgets $55.1 million in October. Cuts total 1.8 percent of general fund. State agency budgets cut $55 million in October. Cuts total 1.8 percent of general fund. Revenues are down another $130 million and a second cut is expected.
Washington	Budget cut 5 percent across the board in April, exempting certain programs to save $180 million for fiscal year 1981–83 budget period.	Special session in June to make up $253 million shortfall with cuts and revenue increases. Recent projections show another $145 million shortfall.
West Virginia	In January 1982, general fund budget cut by 2.4 percent to save $30 million. Most agencies cut 5 percent. Certain programs exempted.	In November 1982, budget reduced by $22 million with most agencies cut 3 percent (K–12 exempted). In January 1983, the budget was cut another $70 million to increase the cut to 10 percent. K–12 budget was cut only 4 percent. These cuts equal 6.8 percent of the general fund.
Wisconsin	State agency budgets cut 8 percent for both years of the biennium	State agency budgets cut another 2 percent for fiscal year 1982 and 4 percent for fiscal year 1983. Total biennium cuts total $91 million. Currently short $315 million. Will probably roll over into next budget period.

ESTONIAN INDEPENDENCE DAY

● Mr. ZORINSKY. Mr. President, today marks the 65th anniversary of Estonian Independence Day. On this day in 1918, Estonia proclaimed its independence from imperialist Russia and opened an era of unprecedented liberty and equality.

Sadly, it was to last only a few short years. In 1939, the Molotov-Ribbentrop Pact was signed dividing Poland between the two military superpowers of Germany and Russia. Estonia, along with Latvia and Lithuania, was bartered away to Russia. The free and independent infancy of a sovereign people was replaced by a cold, hard domination of Russia as she prepared to go to war. In the postwar era, the Soviet Union has maintained its stranglehold over the area and its people.

To their credit, the Estonians have never relinquished their dream of freedom, despite threats to their language, culture, and their very existence. The Soviets have set out to crush their individuality, to Russianize them out of existence.

The practical effects of this are readily apparent in Estonia today. The right of Estonians to use their mother tongue is attacked and hundreds of thousands of non-Estonian immigrants have poured into Estonia's overindustrialized cities.

Yet another cause for concern is the rise of Yuri Andropov to a position of supreme power in the Soviet Union. He is the only Russian leader, to date, who has visited Estonia. He went there after the student demonstrations of 1980 in his role as chief of the KGB to chastise the local KGB for not adequately controlling and suppressing national sentiments.

Considering also the ruthless suppression of the Ukrainian national movement executed by the KGB under Andropov, the Estonian national movement—in fact, all national movements within the Soviet Union—must view the future with apprehension.

But there are bright spots as well on this 65th anniversary of Estonian Independence Day. Last month, the European Parliament passed a resolution reiterating the right of the Baltic States of Estonia, Latvia, and Lithuania to self-determination. And the continuing refusal of the United States to recognize the Soviet seizure of the Baltic States gives strength to those still struggling to free themselves from Soviet oppression.

Today, it is most appropriate that we join with the Estonian people to commemorate their dream of freedom. We honor them for their courage and determination. We express our solidarity with them in the fight to regain their sovereignty. And most important, Mr. President, we reaffirm our commitment to work with them to try to make Estonian Independence Day more than just a memory.●

IN COMMEMORATION OF ESTONIAN INDEPENDENCE DAY

● Mr. DOLE. Mr. President, on February 24, Estonians throughout the world will commemorate the 65th anniversary of Estonian independence. On this day in 1918, out of the havoc of post-World War I Europe, the courageous Estonian people proclaimed their nation an independent republic and asserted their right to self-determination. Although invaded by the armies of Soviet Russia that very same year, the independence of Estonia was not to be denied. In the ensuing year, the Estonians were able to repulse the Soviets and conclude a treaty of peace in February 1920, in which the Soviets officially recognized the new republic and explicitly renounced "voluntarily and forever all rights of sovereignty over the Estonian people and territory." Thus, after centuries of domination by foreign powers, Estonia became a member of the community of free and independent states.

In the two decades that followed, the Estonian people demonstrated their unshakable commitment to the ideals of liberty and justice. They adopted a constitution which embraced democratic principles and protected the rights of all citizens of Estonia, including those of minorities. This democracy fostered the development of a flourishing national culture, the heart of which was, and still is, the Estonian language, the symbol of their country's national identity. The Estonian heritage of a colorful national folklore and specifically a distinctive style of choral singing sprung to life as never before. Estonia may also be proud of the great strides made in both the agricultural and industrial sectors of the economy during this period. Indeed, these 20 years of independence clearly demonstrated what a small nation is able to achieve in all fields of life when its people are permitted to be the masters of their own destiny.

THE SOVIETS ANNEX ESTONIA

The year 1939 saw the end of sovereignty for the Estonian state as Stalin and Hitler carved up the Baltic region and Poland in the notorious secret protocol of the Molotov-Ribbentrop Pact of August 1939. All three Baltic nations fell victim to the vicious impulse toward hegemony by the Soviet empire. Treaties of nonaggression were forced upon these three small states by Stalin in 1939 and, on August 3, 1940, in complete contradiction to the terms of the 1920 peace treaty, Estonia was declared a republic of the Soviet Union. The United States has never recognized the forcible incorporation of the Baltic States into the U.S.S.R. and, to this day, continues to speak out against this illegal Soviet act.

The 43 years of Estonian victimization to Soviet expansionism contrasts strikingly with the period of Estonian independence. A massive effort of Russification has been employed, threatening the future of Estonia. The Estonian people now face the possibility of becoming a minority in their own country. The Estonian language is being replaced with the Russian language in business affairs, official gatherings, in schools and kindergartens. Journals devoted to the Estonian language and culture are becoming harder to find with each passing year as they are displaced by Russian publications. History and other fields of study are presented from a strictly Soviet perspective.

Not only are the Estonian people denied their sovereignty and national identity, they are also denied their basic human rights. Estonians are now subjected to the dictates of a government which routinely denies the rights embodied in the U.N. declaration on human rights and the Helsinki Final Act to its citizens. Those who speak out against Soviet violations of human rights are liable to be sent to prisons, labor camps and psychiatric wards.

COURAGEOUS INDIVIDUALS STILL SUFFER FOR ESTONIA

Yet, despite these risks, in recent years numerous individuals have spoken out in support of Estonian rights and independence. One such courageous individual was Juri Kukk, a chemist, teacher and Estonian nationalist who, in January 1981, was sentenced to hard labor for the peaceful expression of his opinions. He undertook a hunger strike before his trial began, and by the end of March 1981, he was dead.

Another patriot is Mart Niklus, who in November 1981, was sentenced to 10 years of special regimen camp and 5 years of internal exile for sending an appeal to Leonid Brezhnev and a memorandum to the Atlantic charter states calling for the publication in the Soviet Union of the secret protocol of the Molotov-Ribbentrop Pact that doomed his nation to Soviet tyranny.

Tiit Madison, an Estonian human rights activist, was arrested in October 1980 and sentenced to 6 years of imprisonment for his effort. Religious leaders also have been harassed and arrested. Villu Jurgo, an Estonian Lutheran pastor, lost his state license to preach in December 1980 for encouraging national consciousness among Estonian youths. The methodist pastor, Herbert Murd, arrested for the second time in October 1981, spent a year behind bars before he was released in September 1982.

In addition to these individuals who dare to speak out, many groups of people have protested Soviet repression. In September 1980, over 1,000 young people demonstrated in Tallinn, the capital of Estonia, after the performance of a popular musical group was suddenly banned because Soviet authorities detected nationalistic elements in the group's lyrics. Demonstrations followed on October 1 and 3, during which an estimated 5,000 students waved the banned Estonian national flag and shouted slogans calling for the independence of Estonia and the removal of foreign troops. After the demonstrations were suppressed and many students thrown out of school, forty Estonian intellectuals, including Juri Kukk, wrote to the Communist Party paper Pravda, calling for a wider and more candid discussion of the tense situation in Estonia.

OPPRESSION CONTINUES

Tragically, the Soviet Government continues to invoke crude and repressive measures against the people of this small, captive nation. Russification has been stepped up with an expected new influx of Russian workers for a project to deepen the harbor in Tallinn. Those who point out that the Kremlin violates the U.N. declaration on human rights, the Helsinki, Final Act, and even the Soviet constitution, article 72, which states that "each union republic should retain the right to freely secede from the U.S.S.R.," continue to be harassed, confined to psychiatric wards or sentenced to lengthy prison terms.

Despite the horrendous acts inflicted upon them by Soviet authorities, the people of Estonia continue to cherish their own language and culture. They have withstood the attempts to destroy their national identity and yearn for the life of freedom and independence that was theirs 65 years ago. In pursuit of this goal of freedom, it is vital that they be made aware that the free peoples of the world have not forgotten and that they deeply empathize with them. They must be assured that the United States will never recognize as legitimate Soviet control of the Baltic States. Only with the extension of our support can the 65th anniversary of the proclamation of Estonian independence be a day of hope for the future rather than a day of sadness for the past.●

65TH ANNIVERSARY OF ESTONIAN INDEPENDENCE

● Mr. D'AMATO. Mr. President, on February 24, 1983, we commemorate the 65th anniversary of the establishment of the Independent Democratic Republic of Estonia by the Estonian National Council.

The Estonian people have a long history of resistance to foreign oppression. In 1227, the country was divided between the Danes and the German knights. However, the Estonians did not readily submit to their conquerors, and finally there occurred a series of uprisings which forced the Danes to relinquish control. The same flame of resistance refused to be quenched during successive foreign regimes, especially during the brutal establishment of a program of Russification instituted in 1882. On February 23, 1918, German troops entered Estonia, causing the Russian Bolsheviks to flee. At this time, the Estonian leaders took a symbolically momentous step; on February 24, 1918, they proclaimed Estonian independence. Although Germany refused to recognize this patriotic declaration, Estonian leaders, who had fled the country, persuaded France, Britian, and Italy to accord de facto recognition of independence.

After the German withdrawal, the Estonians, with the help of the Finns, successfully drove the invading Red army out of the country. The Soviet Union "voluntarily and forever" renounced its sovereign rights over the "peoples and territory of Estonia" in the Soviet-Estonian Peace Treaty of 1920. The new constitution of Estonia was modeled on the United States, French, and Swiss constitutions, affirming independence, a republican form of government, and emphasizing human rights and dignities of minorities. De jure recognition by almost all sovereign states and admission to the League of Nations in 1921 brought Estonia to the fore in world affairs as the spokesman for the small democratic states.

Immediately following the Nazi-Soviet nonaggression pact in 1939, this new free Estonia was dissolved, by the terror tactics of Josef Stalin's totalitarian regime. During this time, Estonia was illegally incorporated in the Soviet Union. Upon German reconquest in 1941, the Estonian resistance movement flourished despite German atrocities, until the Red army once again overran Estonia in 1944 and purged all enemies of the people.

The people of Estonia have managed to uphold their national character, in spite of the harsh realities of life under their Communist masters. The United States has never accepted the validity of the Soviet annexation of Estonia, and consequently has not invalidated the recognition it accorded to the Estonian Republic in 1922. The stoicism and dignity with which the Estonian people have suffered at the hands of the Communist dictators as well as their fierce resistance to foreign aggression throughout history show that the democratic spirit of the Estonian people cannot be broken.

On February 24, Estonians around the world, including 20,500 Estonian-Americans, will join in solidarity with their countrymen in observance of Estonian independence. In light of our Nation's dedication to the principles of independence and commitment to protection of human rights, it is appropriate that we join with members of the Estonian community in observing the 65th anniversary of Estonian Independence Day. It is imperative that the United States send a clear and strong sign of moral support to the 1.3 million Estonians living under Soviet oppression and that our Government continue to champion the cause of independence for Estonia. I urge my colleagues to join me in voicing support for the struggling people of Estonia and outrage over continued Soviet hegemony in the Baltic region.●

REPEAL WITHHOLDING NOW

● Mr. KASTEN. Mr. President, over the Lincoln Day recess, I had a chance to travel through Wisconsin and visit with my constituents. As many of my colleagues know, the American people are deeply concerned about the law that requires 10 percent withholding of interest and dividend income.

Withholding is a people issue, not just a fight between savings institutions and the Treasury. My office receives an average of 3,000 letters a day against withholding. After reading some of them, I am even more commit-

ted to repealing withholding in the 98th Congress.

Withholding will hurt a number of low-income and elderly Americans—and even though many will be exempt from withholding, they will not be exempt from the problems it will cause.

Mr. President, I have come across two letters in recent weeks that have touched me deeply. These letters were written by people who worked hard all their lives to provide for their families and their retirement. And now, thanks to withholding, their lives will change. Through the letters of Mildred Meyer of Jefferson, Wis., and Mr. and Mrs. Harry Kornburger of Milwaukee, Wis., we see what impact the 10-percent withholding tax will have. I ask that these letters be included in the RECORD.

The letters follow:

MILWAUKEE, WIS., *January 24, 1983.*
Hon. ROBERT W. KASTEN, Jr.,
U.S. Senate,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR: Regarding the 10 percent withholding tax your planning on Savings, Certificates, and dividends; being senior citizens (78 yrs), we are asking that you repeal this law, because it would impose a very unnecessary and unfair penalty on small savers like ourselves.

The most direct effect this will have on us personally is that the compounded interest yields on our savings will be diminished by the 10 percent withheld.

We haven't had to pay an income tax for quite some time because of insufficent income in our retirement years. We have strived so hard to have a modest saving for a rainy day, denying ourselves many things. The exception has been this past year receiving a higher interest on some of our saving certificates, but in 1983 this will not be so, because of interest rates being lowered, and the spending for eye glasses, perhaps dentures, repairs on our home, as well as new linoleum on kitchen floor, which is 43 years old and crumbling, and aluminum siding, because of our heart condition not being able to paint anymore. This will all take quite a bit away from our savings.

Much more would be taken away if the 10 percent withholding tax goes thru, than any tax we would normally have to pay, if any. Also this will entail a lot of extra book work for banks, building and Loans institutions, and U.S. government returning moneys to the poorer or modest class of people.

You all claim there is such a large deficit, but do not hesitate to raise your own salaries, in such bad times as these. Anyone you talk to, say its so unfair to all of us, and then penalizing us with a withholding tax. You would all set a good example to reduce your salaries instead of raising them.

What about people with a lot of money, investing in tax sheltered bonds or stocks? How can they get away with it?

Please, we beg of you, to repeal this unfair 10 percent withholding tax.

Yours very truly,

MR. AND MRS. HARRY KORNBURGER.

JEFFERSON, WIS., *January 9, 1983.*
Hon. ROBERT W. KASTEN,
Senate Office Building,
Washington, D.C.

DEAR SIR: I am a widow, seventy-three years of age. My husband and I were married during the Great Depression. We knew how it felt to do without, to suffer hunger. Yet never once did we ask anyone for help. We reared four children, four wonderful children who had to pitch in and help earn the money towards their educations. Six years ago my husband died. By careful living (and denying ourselves things many might consider essential), we finally had a few dollars in the bank. I had hoped the interest realized on that investment would help ease the financial burden of the few years ahead for me. Now there are those who support legislation to take away a goodly percentage of even that. For shame!

I'll continue teaching my piano class, raising the few vegetables I can in my little garden, mowing my lawn myself, in winter shoveling the snow from my walks myself. After there is no more strength to do these things, then what? Will the same government that taketh away, give? If so, it will be at a terrible expense to its people.

God bless America! May God grant her legislators who are truly mindful of the needs of the peoples of our beloved nation.

Respectfully yours.

MILDRED O. MEYER.●

KENNETH ADELMAN SHOULD BE CONFIRMED

● Mr. EAST. Mr. President, several Senators have recently expressed opposition to the nomination of Kenneth Adelman to be Director of the Arms Control and Disarmament Agency. The leadership of the Soviet Union has also voiced the opinion that Mr. Adelman ought not to be appointed. I disagree with both groups.

In my view, Mr. Adelman has encountered opposition primarily because of his honesty in recognizing the Soviet dictatorship for what it is: A government totally devoid of honor and unworthy of the trust of civilized nations.

Very recently the Soviet Union has again shown its utter contempt for arms control agreements with the United States and with other nations.

On February 8, 1983, the Soviet Union flight tested an apparent second new type of ICBM with total encryption of telemetry. On July 4, 1982, the Soviet Union violated the threshold test-ban treaty by exploding a nuclear weapon with yield in excess of the treaty limits. The Soviet Union has used poison gas against women and children in Laos, Cambodia, and Afghanistan.

How many violations of international obligations are required before the U.S.S.R. will be seen for what it is? Why should honesty in a Presidential nominee be punished while Soviet deceit and duplicity goes unchallenged as if nonexistent?

Mr. President, I ask that three articles from the Washington Times, which I am providing, and a letter I received recently from former Secretary of Defense Donald Rumsfeld be printed in the RECORD at the conclusion of these remarks.

The material follows:

[From the Washington Times, Feb. 23, 1983]

BYRD ANNOUNCES OPPOSITION TO ADELMAN

(By Thomas D. Brandt)

Senate Minority Leader Robert Byrd, D-W. Va., came out yesterday in opposition to Kenneth Adelman, President Reagan's nominee to head U.S. arms control efforts, while Adelman is being called back to Washington for a third hearing on Thursday.

And the Senate Foreign Relations Committee today is polling its members by hand-carried letter to see if a majority of them want to subpoena New York Daily News columnist Ken Auletta who quoted Adelman as saying in 1981 that negotiating arms control was "a sham."

Adelman said he has no recollection of the interview and that those are not his views. Last Friday Auletta released all his notes, some of which further complicate the record of Adelman's views.

In the interview, according to Auletta, Adelman also said, "I'd go into negotiations willing to give up a great deal—a real reduction in nuclear weapons, if the Soviets were willing to."

The thrust of his position in 1981, Auletta said, was that Adelman was emphasizing an arms buildup as part of his view that honest arms reductions were not achievable at that time.

Auletta said that Adelman was also opposed to the SALT II treaty, which was a position that President Reagan used as part of his campaign platform.

Last week the committee appeared to be divided 9-6 against Adelman, but Sen. Charles Percy, R-Ill., committee chairman, said he wants to move to a vote on the nomination immediately after the hearing and get the issue to the Senate floor, whether the committee recommends approval or not.

Byrd said he opposed Adelman's nomination because he questioned his competence and because of his cavalier attitude in his committee testimony. In not answering a number of questions, according to Byrd's discussion of the matter in the Senate Democratic caucus yesterday, Adelman either was not informed about the issues, or did not take the committee seriously enough to answer them.

Auletta, who is being advised by Floyd Abrams, an attorney who is an authority on 1st Amendment constitutional issues, said he was concerned about the precedent of a newsman voluntarily responding to a congressional committee's request for information, so he said he would only appear under subpoena.

On a personal level he said, "I like the guy (Adelman). We swim in the same pool.

"I don't want to appear to be, or am I, an adversary of Ken Adelman. I'm not here to pass judgment on him."

[From the Washington Times, Feb. 23, 1983]

A SHAM IS A SHAM IS A SOVIET SHAM

Did Kenneth Adelman, the president's nominee to head the Arms Control and Disarmament Agency, once tell a columnist that arms control talks with the Russians would be "a sham"? Well, I don't know if he did or didn't. But he certainly should have

said this. And he should have added that any agreements with the Russians are a sham. My dictionary defines "sham" as "an imitation that is meant to deceive; counterfeit; deception; fake."

As a case in point, consider the unratified SALT II treaty which various administration spokesmen have told us—with straight faces—is not being undercut by the Soviets. According to reliable sources, on Feb. 8 of this year, the Soviets tested a new type of ICBM which resulted in a triple violation of SALT II.

This new missile, known as the PL-5 (it is named after the Plesetsk Test Range 5 from which it was fired), has multiple independently targeted re-entry vehicles and it is mobile. It is a new light ICBM. It carries four MIRV warheads. The missile's telemetry signals were 100 percent encoded. Furthermore, its Transportation Erector-Launcher is 1.7 meters longer than the TEL of the mobile SS-16. And this establishes it as a missile derivative of the SS-16. The new missile the Soviets have tested cannot be regarded as a mere follow-on to the SS-13 because it is MIRVed.

What all of this amounts to is at least three violations of SALT II:

(1) As a derivative of the SS-16, the PL-5 violates the prohibitations on SS-16 testing, development, production and deployment contained in SALT II and its protocol.

(2) The PL-5 is a second new type Soviet ICBM, yet Article IV of SALT II allows only one new type ICBM for the Soviets. In mid-December of last year, State Department spokesman Alan Romberg said that if the Soviets tested the kind of missile they have just tested, "this would conflict with the terms of SALT II."

(3) The 100 percent encryption of the PL-5's telemetry signals by the Soviets violates Article XV of Salt II, which prohibits such encryption because this interferes with the capability of the United States to verify this arms control agreement.

The Soviets' illegal testing of its PL-5 missile is but the most recent violation of a series of United States-Soviet agreements. Other violations include the following:
